

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

ANNUAL REPORT  
OF THE  
PHILIPPINE COMMISSION  
TO THE  
SECRETARY OF WAR.

---

MANILA, P. I., *December 23, 1903.*

SIR: The Philippine Commission has the honor to submit to you its fourth annual report, which is accompanied by the reports of the civil governor, the secretary of commerce and police, the secretary of finance and justice, the secretary of the interior, and the secretary of public instruction. The reports were delayed, due to absence and illness of two or three of the Commission, and cover varying periods. The report of the Commission extends over a period from November 1, 1902, to December 22, 1903.

The conditions of the islands as to tranquillity are quite equal, so far as peace and good order are concerned, to what they were at any time during the Spanish régime. There are centers of disturbance in the Moro country, but they do not offer any difficulty in their removal. The conditions in the Jolo group are shown in the special report of Major-General Wood, governor of the Moro Province, and in the report of the civil governor. The Commission concurs in the recommendation of the civil governor and General Wood that the sultan and *datos* signing the so-called Bates treaty be notified that its terms are no longer binding on the United States or the Philippine government, and that the Jolo group and all its inhabitants, including the sultan of Jolo and the signing *datos*, are entirely subject to the Philippine government act and laws passed in accordance therewith.

The condition as to the food supply in the Archipelago has been dealt with at length by the civil governor in his report to the Commission, and it is sufficient to say that the \$3,000,000 voted by Congress were exceedingly useful in aiding the islands to meet emergencies which grew much more serious than they were supposed to be at the time the appropriation was made. The recovery from the disastrous loss of cattle through the rinderpest must of necessity be slow, and it

can not be said as yet that the Commission has reached a satisfactory solution of the difficulty, or that it can be certain that with the remainder of the \$3,000,000 it may greatly alleviate the embarrassment in agriculture due to the absence of draft cattle. Still, experiments will be continued, and it may be that a remedy will be found. The civil governor in his report to the Commission has set forth at length the dispositions which have been made of the money which has been expended or appropriated out of the \$3,000,000 relief fund. The law requires that the civil governor should give an account of this expenditure to the Secretary of War. There is appended to the report of the civil governor to the Commission a detailed statement of expenditures by the auditor so far as it can be made down to the date of his report. In order to prevent a duplication of matter which was properly part of the Commission's report to the Secretary of War, it is hoped that the report of the civil governor with the auditor's statement will be regarded as a sufficient compliance with the law.

The revenues of the islands were maintained for the last fiscal year, and the balance of trade for the year with respect to the islands was much more favorable. The balance of trade against the islands in merchandise was a little over \$8,000,000 for the fiscal year ending June 30, 1902. For the fiscal year ending June 30, 1903, it was about \$150,000 in favor of the islands, and this in spite of the importation of \$10,000,000 gold of rice, an increase of nearly four millions over last year's importation.

The conditions with respect to sugar and tobacco continue to be very unfavorable, and the arguments in favor of a reduction of the Dingley tariff upon these articles, to 25 per cent of the rates of that tariff on sugar and tobacco from the Philippines, grow stronger instead of weaker.

On the 22d of December, 1903, contracts were signed with the owners of the so-called friars' lands and by the civil governor, with the approval and consent of the Commission and the Secretary of War, by which, for a lump sum of \$7,239,000, more or less, all the agricultural holdings of the friars in the Philippines were agreed to be transferred to the Philippine government, except about 10,000 acres, the reason for the exception of which is stated in the report of the civil governor. By these contracts, when consummated, something more than 400,000 acres, three-fifths of which have been highly cultivated land and are thickly inhabited by thousands of tenants, will be transferred to the Government. This step has been recommended by the Commission in its previous reports, by the Paris Peace Commission, and by the Schurman Commission as important in producing permanent tranquillity in the islands. Many of the tenants have urged the purchase upon the Government.

The Commission is in a position to say that the number of Spanish friars in the islands is being gradually reduced, so that out of more than 1,000 that were here in 1898 there were but 370 on December 1, 1902, and now there are but 246; that of these a number are infirm and unable to do parish work, and that 83 Dominicans have renounced parish work altogether with the Holy See, and that the policy of the church, therefore, in not sending back to the parishes Spanish friars where it can be avoided, or where they will not be well received by the people, has been sufficiently shown by the facts. The intention of the Roman Catholic Church to Americanize the church in the Philippines is also shown by the appointment of American Catholic bishops and one Filipino bishop to fill the episcopal see of the islands. Not one Spanish friar bishop remains. It is also understood from the correspondence with Cardinal Rampolla and subsequent information received, that of the money to be paid under the purchase to the religious orders by present owners, a large part will be devoted to church purposes in the islands by the supreme authority of the church. It can be safely stated, therefore, that the most important of the matters which the President and the Secretary of War proposed to adjust by sending the civil governor to Rome to confer concerning matters of difference between the Roman Church and the Philippine government have been adjusted, or are on a fair way to satisfactory settlement.

There still remain the fixing of the amount due for rent of and damages to buildings belonging to the church, occupied by United States troops, from the United States Government, and the adjustment of certain trusts, the character of which, as to being secular or religious, is in dispute.

The disposition of the friars' lands agreed to be purchased will entail a very heavy burden upon the Philippine government, but it is thought that in the course of ten or fifteen years the distribution of the lands can be successfully effected to those now lawfully in possession as tenants. The history of the negotiations for the purchase are fully set forth in the report of the civil governor.

The income from customs and other regular taxes has been falling off for the last six months, and there is some reason to expect that the income for the year ending June 30, 1904, will be considerably less than that for the year ending June 30, 1903. Much of the money which has been expended during the current eighteen months has been applied to permanent improvements or to extraordinary expenditures like the cholera (\$300,000), the census (\$694,000), and the St. Louis Exposition (\$575,000); \$2,500,000 have been expended or are under appropriation for extensive port works. It is quite possible that with the pressure for enlargement in the branches of public education and in other bureaus which call for expansion there will be a deficit dur-

ing a period of reduced income, due to the depressed condition of agriculture. If provision should be made by which the Commission could issue bonds to pay for permanent improvements, like port works or the construction of heavy bridges or other works of great utility usually paid for under other governments by bond issues, the embarrassment of a deficit could certainly be avoided. It is thought that it would not be extending too great power to the Commission, with the consent of the President of the United States and the Secretary of War, from time to time to issue bonds not exceeding in the aggregate \$5,000,000 to pay the cost of permanent improvements like the construction of port works or bridges or of large provincial or city schoolhouses. For the latter purpose, that of schoolhouses, two or three millions of dollars might easily be spent and not one dollar wasted. The crying need throughout the islands is school capacity, and the chief cause for the fact that only about 10 per cent of the children of school age attend the public schools is the limitation upon the schoolroom. The erection of handsome, permanent, airy, and healthy schoolhouses would have an excellent effect both in enlarging the school capacity and in giving ocular demonstration of the importance which the government attaches to the general system of education.

Section 66 of the so-called Philippine act of Congress provides:

That for the purpose of providing funds to construct sewers, to furnish adequate sewer and drainage facilities, to secure a sufficient supply of water, and to provide all kinds of municipal betterments and improvements in municipalities, the government of the Philippine Islands, under such limitations, terms, and conditions as it may prescribe, with the consent and approval of the President and the Congress of the United States, may permit any municipality of said islands to incur indebtedness, borrow money, and to issue and sell (at not less than par value in gold coin of the United States) registered or coupon bonds in such amount and payable at such time as may be determined by the government of said islands, with interest thereon not to exceed five per centum per annum: *Provided*, That the entire indebtedness of any municipality under this section shall not exceed five per centum of the assessed valuation of the property in said municipality, and any obligation in excess of such limit shall be null and void.

It seems to the Commission that section 66 ought to be amended by striking out the words "and the Congress of the United States," contained in the seventh line thereof, and that with the continuance of the limitation that the bond issue shall not exceed 5 per cent of the assessed valuation of the property in the municipality, the requirement that the Commission and the President shall approve the bond issue before it can be made will be a quite sufficient barrier against abuse of the power. The cumbersomeness of the requirement that Congress shall be applied to for the issuing of bonds for any one of the nine hundred different towns of the Archipelago, will, it seems to us, at once strike the impartial observer. The limitation of 5 per cent

upon the assessed valuation is of itself a very great one, and in many instances will prevent the making of useful improvements by means of a bond issue, but such as the authority is, it ought not to be restricted by a further burdensome requirement that we should go to Congress for assistance in the case of each municipality. It is sincerely hoped that there are many municipalities in which, by a bond issue of this sort, a healthful water supply could be obtained either by gravity or sunken wells, and the Commission is earnestly desirous of beginning this work as soon as possible.

Attention was called in the last report of the Commission to the fact that in the case of the bonds to be issued in the payment of the friars' lands, their exemption was made to extend not only to Federal and Philippine taxes, but also to the taxation of States, counties, and municipalities of the United States, and that by this means it was made possible to secure a very much lower rate of interest than without the exemption from State, municipal, and county taxation in the United States. With respect to the bonds to be issued to pay for the sewer and water supply systems in Manila, the exemption did not include that from State, county, and municipal taxation. As the whole effort of the Government of the United States in these islands is a national one, it does not appear to the Commission why a distinction should be made, and it is again urgently recommended that all bonds to be issued by virtue of the Philippine act should be exempt not only from Federal and Philippine taxation, but also from State, and municipal, and county taxation.

The operation of the coastwise trade laws of the United States, in respect to trade between the islands of the Philippine Archipelago and to trade between those islands and the mainland of the United States, have been suspended by act of Congress until July 1, 1904. If Congress were to take no action and to allow the coastwise navigation laws to become applicable to the interisland trade of these islands and to the trade between the islands and the United States as they now are, most disastrous results would follow. It is earnestly recommended that the regulation of the coastwise trade, so far as it relates to the trade between the islands of the Philippine Archipelago, be left wholly to the discretion of the Philippine Commission, subject to the approval of the Secretary of War and the President of the United States, and that the trade between the islands and the mainland of the United States be continued as at present by suspending the application of the trading laws of the United States for five years longer, to wit, until July 1, 1909. The reasons for this recommendation will be found set forth in the report of the civil governor, and still more in detail in the reports of the secretary of finance and justice and the reports of the insular collector of customs, Mr. W. Morgan Shuster.

Since the above was written, it has come to the knowledge of the Commission that a bill has been introduced in Congress applying the coastwise law to trade between the islands and the mainland of the United States. The danger from this of increasing the freight rates and thus imposing an additional burden upon the trade of the islands must be obvious to anyone who has examined the facts with respect to the percentage of the business now done between the islands and the mainland of the United States in American bottoms. The Commission, of course, can not present any objection to legislation which shall unite more closely the Philippine Islands with the United States in bonds of amity and mutually beneficial business relations, but it most urgently and earnestly invites your attention, and that of Congress, to the great injustice which will be done to the islands if the law which limits the means of communication to American bottoms between the United States and the Philippine Islands does not at the same time and as a consideration for this interference with the natural laws of trade and the necessary increase of freight rates, strike down the tariff wall made by the Dingley tariff in the matter of the importation of sugar and tobacco from the islands to the mainland. The people of the islands may well ask, "What advantage are we to get out of association with the United States in a business way, if our trade is to be used only for the purpose of increasing the business of American ships while the limitation of the coastwise laws by increasing the freight rates will reduce the business that we now have with that country?"

Does not every consideration of justice require that if the Philippine Islands are to be treated as a part of the United States and subject to the coastwise laws, they should enjoy the same freedom of trade with the United States which is enjoyed by every other part of the United States to which those coastwise laws are made applicable?

We respectfully urge, therefore, that as a condition and as a consideration for making the trade between the islands and the United States coastwise trade, the duty on sugar and tobacco should be reduced to not more than 25 per cent of the Dingley rates.

Now that conditions of tranquility have been completely restored to the islands, the time has arrived for the material improvements in the islands by great works of construction, and especially the building of railroads. In tropical countries the cost of construction and maintenance of a railroad is much less in comparison with that of the construction and maintenance of a wagon road than in the temperate zone. The effect of the torrential rains on wagon roads is so destructive that their maintenance each year is almost equal to their original cost of construction in many places in the Philippine Islands where good road material is difficult to obtain. It becomes therefore more important in these islands to have railroads than wagon roads, and we believe

sincerely that the stimulation of the construction of railroads by Government guaranty of a certain income is fully warranted.

We are opposed to the granting of lands as a subsidy for the construction of roads, and favor the definite fixing of the Government liability by guaranty of the income on a fixed investment. In this way we feel certain that the construction of a large part of the needed trunk lines in the islands can be brought about. In our view a guaranty of income not exceeding 4 per cent is all that is required, and in many instances a grant of less than that will supply the needed capital. We think that the making of such guaranties might well be left to the Commission, with the approval of the Secretary of War and the President of the United States.

The Commission retains its opinion already expressed that the limitation upon the holding of land in the islands by corporations to 2,500 acres is a needless hindrance to the development of the islands, and that the limitation ought either to be removed entirely or to be increased so as to allow the acquisition of at least 25,000 acres of land. In cases in which, in order to justify the expenditure of the amount of capital required to conduct sugar and other agricultural industries on a paying basis, a very large amount of money is needed, the restriction of corporations to the ownership of 2,500 acres is practically prohibitory upon such enterprises.

Again, the chief of the mining bureau and the secretary of the interior recommend that the provision of the present mining laws which prevents the location of more than one claim by a single individual or association upon a lode or deposit should be stricken out. The Commission entirely concurs in this view. Attention is also called to the fact that that part of the Philippine act which relates to mining needs some amendments of smaller importance, but which are quite necessary. Thus, both standards of measurement are used in the act, whereas the metric system alone ought to be used. Again, the recording of mining claims is forbidden without certain requisites. The chief of the bureau is strongly of opinion that all such claims ought to be recorded, and then their legal effect after recording should be left to the courts. He thinks the present provision intrusts too much power to the recording officer.

The Commission therefore has the honor to recommend that Congress be requested to enact legislation as follows:

First. Legislation which shall reduce the tariff on sugar and tobacco imported from the Philippine Islands to not more than 25 per cent of the present Dingley rates on tobacco and sugar imported from foreign countries.

Second. Legislation authorizing the Philippine Commission, with the approval of the President and the Secretary of War, to issue bonds

from time to time, which shall not in the aggregate sum exceed \$5,000,000, for the making of future permanent improvements.

Third. An amendment to section 66 of an act entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," by which the consent of Congress to issue the bonds therein provided for may not be required.

Fourth. Legislation providing that all bonds authorized to be issued by the Philippine government or any provincial or municipal government thereof by act of Congress shall be made exempt not only from Federal and Philippine taxation, but from State, county, and municipal taxation in the United States.

Fifth. That control over the shipping in the trade between the islands shall be left wholly to the discretion of the Philippine Commission, subject to the approval of the President and the Secretary of War.

Sixth. That the application of the United States coastwise navigation laws to the trade between the Philippine Islands and the mainland of the United States be postponed by Congressional action until July 1, 1909; or, in the alternative, that the coastwise laws of the United States be not made applicable to the trade between the islands and the mainland of the United States, except with a proviso or condition that the rates upon imports from the Philippine Islands into the United States shall not pay duty in excess of 25 per cent of the rates on such merchandise imposed by the Dingley tariff.

Seventh. That authority be given by Congressional act to the Philippine Commission, with the approval of the President and the Secretary of War, to encourage the investment of capital in the construction of railroads for the Philippine Islands by accompanying the grants of franchises to build railroads, in cases where it is deemed necessary, with a guaranty by the Philippine government of income on the amount of the investment to be fixed in advance in the act of guaranty, the amount of income guaranteed not to exceed annually 4 per cent of the fixed principal.

Eighth. That the amount of land which may be acquired, owned, and used for agricultural purposes in the Philippines by any individual or corporation shall be extended to 25,000 acres.

Ninth. That the clause which forbids the filing of more than one mining claim by the same individual or association upon a lode or deposit be repealed.

Tenth. That the provisions of the Philippine act entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," which apply to mining claims, and the procedure in filing them, shall be so amended that only the metric system of distances shall be used, and

shall also be so amended that mining claims shall be filed whether properly executed according to law or not, the effect of their execution and record to be left to future adjudication.

Respectfully submitted.

WM. H. TAFT, *President.*

**LIST OF EXHIBITS TO REPORT OF CIVIL GOVERNOR FOR THE  
YEAR 1903.**

- EXHIBIT A.**—Resolutions re rice. Executive order 64. Acts 495, 517.  
Proclamation re quick-growing crops. Acts 817, 738,  
786, 797, 828.
- B.**—Report insular purchasing agent.
- C.**—Report insular purchasing agent carabao to November  
20, 1903.
- D.**—Expenditures Congressional relief fund.
- E.**—Reconcentration act No. 781.
- F.**—Stenographic report Villegas hearings (Washington).
- G.**—Summarized statement valuations religious estates.
- H.**—Contracts for sale friars' lands.
- I.**—Statement showing executive action religious matters.
- J.**—Report Governor Wright—Hemp.
- K.**—Petition agricultural society Panay and Negros—Sugar.
- L.**—Colton's statement re sugar.
- M.**—Governor Wright's statement re sugar and tobacco.
- N.**—Supervisor fiscal report labor Benguet road.
- O.**—Labor report, Captain Couden, U. S. Navy.
- P.**—Report Norton and Drew.
- Q.**—Report exposition board.
- R.**—Report civil service board.
- S.**—Acts of the Moro Province.
- T.**—Report General Wood, Bates treaty.
- U.**—Report of municipal board.
- V.**—Charter Manila Street Railway.
- W.**—Improvement of port.
- X.**—Report executive secretary.
- Y.**—Executive orders and proclamations.

**REPORT OF THE CIVIL GOVERNOR FOR THE PERIOD ENDING  
DECEMBER 23, 1903.**

MANILA, P. I., *November 15, 1903.*

**GENTLEMEN:** I have the honor to submit a report to you on the general conditions in the islands and on the affairs of the bureaus which by law are under the direct supervision of the civil governor. The report of last year, upon the subjects treated in this report generally, covered a period ending October 1, 1902. I shall attempt to make this report cover the period ending December 23, 1903.

This has been a year of considerable suffering among the people of the Philippine Islands. The depressing causes referred to in my last report united to bring on in July and August last a short food supply. The worst has passed, and while the immediate future is not as bright as it might be, I believe that we are beginning an era in the history of the islands which, with the assistance of proper tariff reduction in the United States and proper navigation laws for the islands, will be one of decided material development.

In November, 1902, the price of rice rose rapidly in Manila and the provinces, and authentic information reached the Commission that a syndicate had been formed by certain merchants of Manila and elsewhere to effect a corner in this food of the people and to control its price. The situation warranted extraordinary action to prevent hardship and suffering. On the 4th of November, 1902, therefore, the Commission passed Act No. 495, a copy of which is appended under Exhibit A, appropriating \$2,000,000 Mexican to defray the expense of buying and distributing rice at a reasonable price to the inhabitants of those provinces in which the market price was too high. By the terms of the law the rice was bought under direction of the civil governor and was distributed under the orders of the same officer for cash and at a price which would cover cost and all expenses. Subsequently the restriction as to price was repealed. In attempting to buy rice in Saigon, the source of rice supply nearest to the Philippines, the Commission was informed that the supply from there was exhausted. Thereupon application was made to the consul at Bangkok for Siam rice and also to the consul at Calcutta for Calcutta rice.

It was found necessary to go into these distant markets because the syndicate evidently controlled the Saigon market.

The purchases of rice, with the cost of storing, distribution, and wastage, did not prove to be profitable as a mere investment. An especially severe loss was suffered in the rice purchased at Calcutta. We bought there what was called "first-class famine rice." On arrival this proved to be an inferior quality of red rice, which soon developed weevils and in its deteriorating condition had to be sold at a considerable loss. It was probably necessary to go as far as Calcutta to break the corner, but it would have been wiser to buy a better quality of rice.

None of the rice in question was given away; it was held in Manila and sent to the various provinces as word was received from the governors that the local dealers were raising the price of rice beyond what was reasonable. Our purchases in Siam and Calcutta broke the corner, and rice fell in price. It then became necessary to dispose of the rice on hand to dealers in Manila and in other parts of the Archipelago at such price as could be obtained. A large part of the Calcutta purchase was sold to a firm having control of certain small coastwise steamers of small draft which plied from port to port and peddled out cargoes of the poor rice through Chinamen. The contract of sale forbade under bond penalty, disposition of the rice at a price greater than \$6.50 Mexican per picul of 137½ pounds, plus actual cost of freight. This was not an unreasonable price for that quality of rice in the provinces.

The purchases of rice under Act No. 495 in Mexican money amounted to .....	\$1, 815, 974. 81
And the sales amounted to .....	1, 567, 642. 00
Loss from wastage and poor Calcutta rice .....	248, 332. 81

The details of these Government transactions can be seen by reference to the report of the insular purchasing agent, made an exhibit hereto, marked Exhibit B. On the purchase under Act 495 the loss to the Government, at the then prevailing rate, was thus about \$100,000 gold. Considering that by this action rice at a reasonable price was secured to six millions of people for one season when they were threatened with starvation prices, the money was not badly spent. The losses sustained by the syndicate who attempted the corner was sufficient to prevent another combination of the kind. It will be noted that the money spent under Act No. 495 was appropriated from the general funds of the insular treasury, and did not come out of the three millions appropriated by act of Congress for relief of the distress in the islands, subsequently passed.

Anticipating that the small rice acreage, due to the absence of cattle and other causes, would not be sufficient to furnish food enough for

the inhabitants during the year 1903, the Commission passed an act to provide against the danger of famine dated November 12, 1902, and numbered 517. By this act it was made the duty of municipal presidents in all the towns of the islands to call meetings of the people of their respective towns, and to urge them at once to take steps to secure the necessary seed and to plant quick-growing crops of corn, camotes (i. e., sweet potatoes), rice, and other food plants. Each president was authorized temporarily to allot public land within his town to citizens of the town for the purpose of planting seed and of reaping the crop. The act further authorized provincial boards to buy seed and sell it where needed to the towns, to be sold again to the inhabitants, with authority to furnish the indigent with seed and to collect the equivalent of the same from the crop. Monthly reports of their proceedings under the act were required from the municipal presidents and provincial governors. The civil governor was required to bring the terms of the act to the attention of the people by proclamation.

The proclamation was issued in accordance with the act, and reports from the various provinces justify the statement that the act stimulated the planting of many different kinds of food-making plants and prevented much of the suffering which would have been caused by the short food supply. In parts of the islands the municipal councils exceeded their authority and made the failure to plant crops criminal offenses, and punished persons by imprisonment in jail for failure to attend to the provisions of this act and to raise the crops as the councils thought they ought. Executive action had to be taken to prevent such abuses. From the 1st of January until late in August there was a drought in the islands of unusual length, which interfered with the successful reaping of many of the crops planted under Act No. 517; and with the drought a pest of locusts came that bade fair to consume every part of the food supply that grew above the ground. Locusts have visited some provinces in the islands for two or three years past, but during this year every province seems to have been afflicted with them. In a normal state of agriculture, with the acreage of planted crops what it was before 1896, every *hacendero* or farmer, the moment that locusts appeared, had the strongest motive for uniting all the people in the suppression of the pest. If locusts are promptly attacked, driven into ditches and burned before their wings are grown, and when they are what are called "loctones" or hoppers, they can be destroyed and the losses which they cause as flying insects may be avoided. The difficulty during the past year has been that comparatively so little of the land has been cultivated that the motive for the influential *hacendero* and landowner to make great efforts to kill the locusts has not existed. The Commission became convinced from official reports received that some radical action must be taken

to rouse the people to suppress the locusts. Accordingly Act No. 817, declaring the presence of locusts to be a public emergency and making provision for their suppression, was enacted on the 3d of August, 1903. By this act a board for the suppression of locusts was provided in each province, to consist of the three members of the provincial board and three agriculturalists. In each province in which locusts appeared, every able-bodied inhabitant, with a few necessary exceptions, was declared liable for service under regulations of the board, which might require the inhabitants to assemble "en masse" to suppress the pest, or might make it the duty of each inhabitant to deliver to an agent of the board a certain number of bushels of locusts a day. The municipal officers were made subject to the orders of the board, and they were required at once to give notice of the presence of locusts in any barrio of a town to the agents of the board. The board was authorized to distribute rice to those engaged in the work of suppressing locusts who were unable to support themselves during their service, and this rice, it was provided, the civil governor should purchase at the expense of the Congressional relief fund and distribute to the various provinces. Any person failing to comply with lawful regulations of the board was made subject to prosecution and a fine of \$10 or ten days imprisonment, or both. The board was also authorized to procure from the civil governor sheets of galvanized iron to be distributed to each town, and to be used as a means of obstructing the escape of locusts and of driving them into prepared ditches. These sheets of iron were also to be paid for from the Congressional relief fund.

Money has been drawn from the Congressional relief fund by virtue of Acts Nos. 738, 786, and 797, and under resolutions of the Commission adopted in accordance with the provisions of the last act. The three acts and the resolutions passed are appended to this report under Exhibit A. It was thought wise to buy rice and distribute it in the provinces to be used not only to pay for the destruction of locusts, but also for the payment of labor on the roads, for the labor in the erection of barrio schoolhouses and other public works, the construction of which in districts where the food supply was short would furnish means of living to the poor and indigent. Rice for this purpose proved generally to be better than money, because money earned and paid was too often lost in gambling, the prevailing vice among the Filipino people, whether rich or poor. Rice generally reached the mouths it was intended for.

We have purchased under Acts 786 and 797 from Congressional relief funds, rice amounting to 16,552,487 pounds, costing \$732,790.13 Mexican currency, and 8,455,524 pounds, costing \$348,931.93 Philippine currency. Of this 19,994,565 pounds have been distributed down to November 30 of this year, and we have on hand 5,013,446 pounds. Probably no more than this will be needed for the present year.

The following table shows the provinces to which the rice has been distributed and the purposes to which it has been devoted:

Province.	Piculs (137½ pounds to picul).	Days wages in driving and destroying locusts.	Repairing and constructing roads.	For sale to prevent exorbitant prices.	Barrio school-houses.	Iron for locusts (sheets).	Netting for catching locusts.

a Provincial buildings.

The only gratuitous distribution of rice permitted was as follows:

	Picula.
Mariquina fire sufferers .....	182
Indigent poor, town of Capiz, Panay .....	25
Relief inhabitants of Canaman, Magarao, Bombon, Quipajo, Ambos Camarines (50 piculs each town) .....	200
<b>Total .....</b>	<b>407</b>

Under date of September 18, 1903, provincial board of Occidental Negros was authorized to furnish 2 cavanese of rice per week to lepers at Macalol, Bacolod. (To be taken from rice shipped under Act 786.)

It was supposed for some time to be possible to destroy the locusts by infecting some of them with a disease from a poisonous fungus and allowing the infected ones to escape to their fellows and thus spread destruction through all of them. In exceptional instances this remedy was effective, but during the dry season it failed utterly, and it is so likely to fail at all times that it has not been deemed wise to devote any further attention to it. The destruction by locusts during the months of April, May, and June and earlier, was very great,

but it is thought that the steps since taken for the protection of the crops which were seeded in July and August have been quite effective to prevent serious loss. The offer of rice for work in suppressing the locusts, with the provisions of the law referred to, summoned the entire population—men, women and children—and the result justifies the plan.

The road work done at the expense of the relief fund has been chiefly that of repairing former roads under the control and direction of the provincial supervisors. The consulting engineer has been busy preparing plans and specifications for the construction of what may well be called “insular” roads, because they will lead from one province to another or from one side of an important island to another, and are too expensive to be built under the auspices of the provincial government.

Rice has also been used in Ilocos Norte, in Tayabas, and in Cavite, and possibly it will be used in other provinces for work done in the erection of barrio schoolhouses. Almost the entire cost of these schoolhouses is in labor, and the use of rice therefore, for the construction of such houses, is very convenient. Under the laws and executive orders safeguarding the expenditure of the rice, set forth in the appendix and already referred to, the objects, places of expenditure, the amount of work done, the price at which it was done, will all be shown by accounts filed by supervisors of the provinces with the auditor, but it is impossible at the present time to submit such accounts, for the reason that sufficient time has not elapsed for their submission and audit.

The stimulus given to the cultivation of the ground this year by legislation and the efforts of the authorities has led to what is probably a greater acreage for the planting of rice and other food supplies than any year since 1889. Of course much difficulty has been found in the absence of draft cattle, but the pinch of hunger and the instruction of municipal authorities has led to the use of the existing carabao by many different farmers and to some plowing by hand. The prospect is that we shall have a better rice crop in nearly all the provinces, except, possibly, Batangas, than we have had for years. It was at first thought that all the crops would be destroyed by the continuance of the drought, but after August rain fell all over the islands, and the rice which has seemed to be in a failing condition developed, and now gives prospect of producing a fair amount of grain.

No cases of actual starvation have been brought to the notice of the Government. In the provinces of Ambos Camarines, Iloilo, and Batangas it has been reported that there was much suffering from lack of food and this was doubtless true, but the people have always found enough camotes or tubers and other food roots to avoid starvation. Such food not properly cooked is indigestible and unhealthy,

and while there were no deaths from starvation there were diseases incident to bad and insufficient food which carried off many. Among people thus badly nourished, cholera, too, found many victims.

The absence of draft cattle is likely to produce a change in the amount of rice production in these islands under normal conditions. In a number of provinces hemp is being planted. The hemp crop does not need, except for purposes of transportation, the carabao. The hemp culture is increasing very rapidly in Laguna, in Batangas, in Cavite, in the Camarines, in Union, and in other provinces where rice was the chief product. The importation of rice for the year ending June 30, 1903, exceeded that of the previous year by about three and one-half millions of dollars gold, and reached as a grand total something over ten millions of dollars gold. It is hoped that no such amount of rice will need to be imported next year, but it should be said that if the culture of hemp, copra, sugar, and tobacco pays better, the importation of some rice as food may not necessarily indicate a lack of prosperity in the country.

One of the chief objects of the Congressional relief fund was the restocking of the islands with draft animals. By Act No. 738 the sum of \$100,000 was appropriated for the preliminary expenses in the purchase of draft cattle. The acting insular purchasing agent and a cattle expert, taken from the agricultural bureau, were sent to every country in the Orient whence exportation to the Philippines was possible. The purchasing agent advertised in Manila for bids at which 5,000 carabao, immunized from rinderpest, would be delivered in Manila, but the uncertainty as to the percentage of cattle that would survive the process of immunization prevented our securing a contract from responsible cattle importers in Manila. The process of temporary immunization consists in injecting into the circulation of the animal a serum which will render the animal immune from rinderpest some four or five months. Permanent immunization is only effected by a simultaneous injection of the serum and virulent rinderpestic blood drawn from a victim of the disease. The inoculators of the board of health of the islands have inoculated many carabao in provinces revisited by rinderpest, to prevent a spread of the disease, and the loss has not averaged three per cent of the animals inoculated. It was hoped that the same result might attend inoculation of animals purchased in China and subjected to inoculation at Shanghai. Accordingly, the acting insular purchasing agent made a contract with the firm of Keylock & Pratt, of that city, for the delivery in Manila of 10,000 immunized carabao at the price of 88 Mexican pesos a head; an agent of the insular government to examine and reject carabao before inoculation at Shanghai and to supervise the process, and the insular government to share the risk of loss by paying 40 pesos for each head dying on account of it. The percentage of loss from the treatment became so

great at Shanghai that both parties to the contract were glad to modify its terms by a new contract under which Keylock & Pratt agreed to deliver 10,000 carabao of certain weight and age in Manila at 79 Mexican pesos a head, temporarily immunized in China and subject to inspection at Manila. Thus far it can not be said that the contract has been successful. The truth is that the imported animals seem to be peculiarly susceptible to many other diseases than rinderpest after they are brought here. We have lost nearly an entire herd of 200 from hemorrhagic septicæmia, quite a number from surra, and others from a union of rinderpest and foot-and-mouth disease. In addition to this, we received word through the State Department at Washington that the Chinese Government would forbid the exportation of more than 1,000 animals. Our latest information, however, is that the Chinese authorities will not interfere with the fulfillment of the present contract. The following table shows the carabao transactions:

*Statement November 20, 1903.*

		Shanghai cur- rency.
Total number purchased under old contract .....	649, at \$75..	\$48,675.00

The Commission passed Act 828 (a copy of which is appended under Exhibit A) for the purpose of prescribing a method of disposing of the carabao purchased in the provinces where they were most needed. The insular purchasing agent is authorized by the act to send carabao purchased to any province the provincial board of which shall request it, upon approval of the Commission. Sales are conducted under the auspices of the provincial board. The minimum price at cash sales is fixed at 70 Philippine pesos. The privilege of choice is to be put up for public bidding. Sales partly on time are allowed, but preference

is given in choice to those buying wholly for cash. The terms of partly credit sales are 93 pesos—31 pesos cash and the balance in one and two years secured by chattel mortgage on the animal. It has also been the custom of the Commission to authorize the purchasing agent to sell in small numbers carabao at 100 Philippine pesos a head for cash, with the privilege of choice to any bona fide *hacendero* or farmer coming to Manila to buy. Of course the prices fixed will not pay the cost of the carabao, but it was not the purpose of the Commission to charge full cost. The Commission understands the intention of Congress to be to relieve the scarcity of cattle by furnishing them to farmers at a low price.

If we assume that the carabao shown to be on hand and sold at the time of the preparation of the statement given above will continue in life, they have cost the insular government 126.65 Philippine pesos a head, without counting forage and other expenses of maintenance, which would perhaps increase the expense to 150 pesos. This is not encouraging, but experience will doubtless enable us to reduce the cost. The attitude of the Chinese Government makes it improbable that we can procure from China more than the 10,000 already contracted for there. It seems likely, though experiment will only make it certain, that it would be wiser for us to import the so-called Indian bulls and cows used now in the Straits Settlements in Java and in India for rice culture, because, though not so strong, they are hardier than the carabao and quite as good workers. I append hereto a statement as to carabao transactions to November 20, 1903, by the insular purchasing agent, as Exhibit C.

I also append a statement from the auditor showing the actual expenditures from the Congressional relief fund as Exhibit D. From this statement it appears that of the total sum of ₱6,000,000, appropriated by Congress, the sum of ₱2,691,000 has been appropriated or allotted by the Philippine Commission for the purposes of the act, and that net withdrawals from such allotments have been made amounting to ₱1,312,162.42, leaving a balance to the credit of the allotments amounting to ₱1,378,837.58. There was in the treasury on December 1 to the credit of the Congressional relief fund a balance unappropriated of ₱3,309,000, and a balance of the original fund in the treasury, allotted and unallotted, amounting to ₱4,687,837.58, or \$2,343,918.79.

#### CONDITIONS AS TO TRANQUILLITY.

The conditions with respect to tranquillity in the islands have greatly improved during the last year, and I think it fair to say that at no time in the history of the islands has there been less ladronism than as when this is written, December 10, 1903. At the time of writing my last report the provinces of Rizal and Bulacan, in the immediate neighborhood of Manila, were disturbed by marauding bands, which

are said to have derived considerable support from persons in Manila. They were under the command of one San Miguel, who professed to be the appointee of a junta representing the Filipino Republic. He drew his forces from the purlieus of Manila and from well-known ladrones, thieves, and other criminals to be found in the towns of the two provinces. So active did the marauders become that the forces of the constabulary of the two provinces were not enough to guard the towns against their attacks and at the same time to chase the robbers to their hiding places. Accordingly, use was made of the scouts under the constabulary act, and this with very good effect. In two engagements, one with the constabulary and the other with a company of scouts, the ladrones suffered most severely, losing in the latter of the two engagements more than 60 men by death, including their leader, San Miguel. Shortly before the death of San Miguel, Apolinario Mabini landed in these islands from Guam, after taking the oath of allegiance. Upon his landing a note from San Miguel was handed him, asking for advice. To this note Mabini responded by writing on his visiting card that he had not been long enough in the islands to answer, but that he would advise him later. The card of Mabini was found on the dead body of San Miguel and was delivered to me by the chief of the constabulary. I sent the card to Mabini by the hand of Pedro A. Paterno, expressing surprise that so soon after taking the oath he should open communication with men in arms against the Government. He replied by sending to me a copy of a letter which he had sent San Miguel, but which did not reach him before his death. The letter was as follows:

MANILA, *March 27, 1903.*

SIR: Since you ask me my opinion concerning your action, I will clearly inform you in accordance with my method of thinking.

I do not consider that the liberty enjoyed to-day in this Archipelago can be followed by independence through means of arms at the present time. The people do not move because they have no arms, and even if they had them they would have nothing to eat. Although you might find another nation that would like to furnish arms and supplies, this nation also would like to annex this territory, and if this should happen our misfortune would be still greater.

If we should proceed gradually, as, in fact, you are doing, the war would continue and possibly our nation never would enjoy prosperity, because the war would finally turn into a poisonous disease which would greatly increase our weakness. Understand well that we are now killing each other.

It seems to me that at the present time we should endeavor to secure independence through the paths of peace. Let us cease that the people may rest, that it may work to recover from its recent proprietary losses. Let us conform to the opinion of the majority, although we may recognize that by this method we do not obtain our desires.

This is, I believe, the surest and most fit method in obtaining the welfare of all.

Let us deliberate and hold an assembly to treat of these matters. In case you are in conformity with this and return to peace, determine upon the necessary conditions that you should ask in order to save yourselves from any whatever vexations,

and if you think that I should transmit your petition to the constituted authorities I am disposed to comply at any time.

There are those who say that your procedure is the cause of many abuses and methods which are unfavorable to the country, but I believe that the remedy for this, if it were true, is not comparable to the great poverty which would be born of a war apparently interminable. I believe that as long as the Filipinos do not endeavor to liberate themselves from their bonds the period of their liberty will not arrive.

Excuse me for telling you this. If, perchance, you are not in accord with my opinion, this will not, as far as I am concerned, be a motive for destroying our former friendship and companionship.

Order your humble servant whenever you see fit.

AP. MABINI.

General LUCIANO SAN MIGUEL.

Subsequently to this, Mabini addressed to me a letter in terms following:

MANILA, P. I., *April 9, 1903.*

HONORABLE SIR: A few days after my arrival at this capital, I received a message from the late San Miguel, sending greetings of welcome, and requesting my opinion in regard to his attitude. In reply I sent him a card, thanking him for his welcome and informing him that I had not as yet formed any opinion, since I had only just arrived and did not know the conditions.

Weeks after, when I had acquired some knowledge of the true state of affairs, I wrote a letter, in which I endeavored to prove that armed contention is ruinous to the country and that the present condition of things permits only of a pacific contention for the political ideals that one might strive after. I prepared this letter against the time when San Miguel should ask me for the second time for my opinion. On the morning of the 27th of March last a messenger came for the said opinion, and I gave him the letter. But on the following day the messenger came back to inform me that the letter had not reached the hands of San Miguel, who had been killed, but had been delivered to an officer of his band for him to deliver to the second in command. Later I turned over the rough copy of the letter to Mr. Pedro A. Paterno, in order that he might inform you in regard to the contents.

I have just been informed that the letter is in the possession of Faustino Guillermo, chief of a band, who, with his people, is disposed, so they say, to follow the counsels given in the said letter. But there exists another and larger band, under the command of Alejandro Santiago and Apolonio Samson; this Alejandro Santiago is, according to reports, the successor of San Miguel. These chieftains have not received the letter yet, for the reason that the frequent expeditions and patrols of the constabulary render communication very difficult; no one dares to search for them, for fear of falling into the hands of the officers of public order. They tell me that it is necessary that the persecution should not be so active, if only for a few days, for them to secure an opportunity to hold intercourse; or that a safe conduct should be furnished them, so that they can send a person to look for them and deliver the letter.

I must confess frankly that the late San Miguel was an old acquaintance and even friend of mine; but the chiefs above mentioned I do not know personally, and I am not acquainted with their antecedents.

With these data, I await your determination, signing myself your humble and obedient servant.

MABINI.

Mr. WILLIAM H. TAFT,  
*Civil Governor of the Philippines.*

To which I made the following reply, which ended the correspondence:

BAGUIO, BENGUET, *April 18, 1903.*

MY DEAR SIR: I have to acknowledge receipt of your letter of April 9, 1903, and to apologize for my delay in answering the same. The letter was delivered to me just before I left Manila for Benguet, and I had to delay answer until reaching here, and until the letter could be translated. I have also read the copy of your letter to San Miguel which you sent me by Señor Paterno. I thank you much for interesting yourself in the maintenance of law and order in the islands and in presenting as cogently as you do the necessity for peace and tranquillity. If I have understood your letter to me and its request, you have in mind a surrender of the persons to whom you have directed your letter, on condition of their receiving immunity from ordinary prosecutions under the law. Could I be assured that this leniency would secure quiet and freedom from robbery and invasion to the good people of Bulacan, Rizal, and Cavite, whose welfare we both have at heart, I should be glad again to offer immunity to those to whom you desire your letter to be conveyed; but the difficulty is, my dear señor, that purely out of consideration for the welfare of the people of the three provinces, I ran the risk of allowing many criminals to go unwhipt of justice and did authorize an offer of immunity to these very persons should they come in and surrender all their arms—an offer which remained open for some six weeks from October 1 to November 15 of last year. Reports came from time to time that the offer was to be accepted, but finally nothing was done. There was for a time suspension of the police expeditions in order to permit a general surrender. The only effect of this was to exaggerate in the eyes of the poor people of the towns of Rizal and Bulacan the prestige of those to whom the offers of immunity were made, enabling them the better to terrorize such people, and to give to the individuals in arms an excessive idea of their own importance. The negotiation fell through chiefly because the men who made up the bands of these various individuals belonged to the criminal classes, were confirmed ladrones and escaped fugitives from justice, whom their leaders, even if they desired to do so, could not control to the extent of compelling them to give up their arms which they needed for their life's profession. They were all bent on a lawless life, were outlaws and bandits, and would continue to be so whatever the government at Manila. True they received reenforcement from time to time from the idle and worthless of the neighboring towns and doubtless had assistance from some of the municipal officials, who, acting from motives of fear or gain, reaped a benefit from their complicity and assistance. After this experience, and after a conference with the members of the Commission, I reached the definite conclusion that patience with them had ceased to be a virtue, and that the worst possible course to pursue with them, having regard to the welfare of the Filipino people of the three provinces, was to temporize, negotiate, or offer immunity to them. Most of them were criminals and had been so since the Spanish times, and it could not reasonably be expected that they would, even if they surrendered, return to paths of peace. San Miguel was selected as nominal leader and figurehead because the real leaders were jealous of each other. Santiago, a very obscure person, with facility only for intrigue, has been selected on the same principle. Apollonio Samson, Faustino Guillermo, Julian Santos (now under sentence of death), Manilang (now dead), Felizardo, Montillon, and Contreras were the real leaders and they always have been robbers, kidnapers, and carabao thieves, and Guillermo, Santos, and Manilang, and possibly some of the others, were fugitives from justice under charge of murder. They are unworthy of either the encouragement or sympathy of any Filipino of honor and integrity, no matter what his views as to the present civil government, or the independence of the islands. It is difficult for those who are sincerely irreconcilable not to sympathize with any disturbance involving attacks upon the peace and order of the community,

because they can hardly repress the hope that such disturbance, whatever the motive, may embarrass the present government and ultimately germinate into a new insurrection. In the blindness of their zeal they are willing to sacrifice their own people—for it is only their own people who suffer by such outlawry—to a vague hope that out of pure ladronism, murder, and robbery may grow a successful revolution based on patriotic sentiment. Those whose duty it is, however, to keep informed as to the character and nature of these persons who keep up such disturbances know that while these persons may receive encouragement and even material assistance from irreconcilable persons of respectability, they are essentially only robber bands, thieves, murderers, and kidnapers for ransom, determined to live on their neighbors and willing to sacrifice any number of Filipinos to the enjoyment of an outlaw life. They masquerade at times as “*revolucionarios*” in order to win the assistance just mentioned, but they are nothing but *ladrones* and should be punished only as violators of the law. Were there established in these islands a self-respecting and responsible independent Filipino government, almost its first duty would be the suppression and punishment of exactly this class of persons, who in their hearts recognize no law and wish no condition of affairs save that of violence and rapine, for in no other can they acquire a livelihood, or attain the position of prominence or influence which their vanity demands.

I have written, my dear Señor, to you with great frankness, not with the idea of publishing our correspondence, but merely to show you my exact attitude and to explain why it is that I can not facilitate communication between you and the persons whom you name, whose past history you say you do not know, because if I were to do so, it would lend support to the view that I am willing to offer immunity in case of their surrender.

I have the honor to be, with sentiments of very great respect,

Very sincerely, yours,

WM. H. TAFT, *Civil Governor.*

Señor DON A. MABINI,  
*Manila, P. I.*

Within a few weeks after this Mabini died of cholera. My letter to Mabini states, with as much care as I can state it, the character of the men who were engaged in disturbing the peace and tranquillity of Bulacan and Rizal provinces last winter. Subsequent to the defeats in the field a secret service was established, in the two provinces and in Manila, which gradually obtained evidence against the persons who had been part of the *ladrone* forces. Alejandro Santiago and Faustino Guillermo have been among those captured. All the persons were brought to trial, and now most of them are in Bilibid, either under sentences for long terms or awaiting execution. The same result is being brought about in Cavite, where conditions have much improved since last year, though the two *ladrone* chiefs, Montillon and Felizardo, have thus far avoided capture. The province has been thoroughly policed, and more than 150 *ladrones* have been arrested and are on their way to the penitentiary. Arms are being brought in every day and the government is receiving aid from the people in its work.

The arrest, trial, and punishment of certain criminals in Surigao led to their being sentenced for long terms. This rendered the prisoners desperate, and in their desire to escape they communicated with

some confederates in the neighborhood of the province, who at a certain time came into town to assist the prisoners. The prisoners awaited a good opportunity while the constabulary were at their meals, seized all their guns, killed the American Captain Clark, and with the only guns in the town of Surigao took the town, except the provincial building. This was occupied by the treasurer, Captain Kelly, and the other American officials, who bravely held out against the lawless band. From the provincial building telegraphic communication was had by the besieged with Iligan, the nearest military station on the north coast of Mindanao, and the dispatch was forwarded to Cebu and Manila. A small force of 15 or 20 men started by a small boat at once from Iligan to Surigao. Colonel Taylor, the assistant chief of constabulary, was reached by telephonic message, and he, with a coast guard boat, took a force of men from Leyte to Surigao, reaching there about twelve hours after the detachment of soldiers. The criminal malcontents had deserted the town before Taylor reached it. In view of the remoteness of the province and the nearness of a military post thereto, I concluded to turn the province over to the military, and the general commanding, General Lee, at once visited Surigao with a sufficient force to restore complete confidence in our power to suppress lawlessness. In a few weeks all the criminals except Concepcion, the leader, were captured, and all the guns with the exception of four or five were recovered. It is possible that had prompt steps not been taken the trouble might have spread, but as it was it was nothing more than a breaking of jail by a lot of desperate prisoners and their escape with the arms of their captors. It never took on the aspect of an uprising of the population or an insurrection.

In Misamis the taking of the census, in which the enumeration of cattle, hogs, chickens, and other animals was required, aroused the suspicions of the people against the census enumerators because they thought that these statistics were being taken as a basis for taxation, and in the island of Camiguin, a part of Misamis, there was a rising among the people, which was quickly suppressed, however, by one of the scout companies. For the same reasons which obtained in the case of Surigao, I requested the aid of the military commander in Misamis. The scouts and the constabulary worked together under the military commander in Misamis as in Surigao, and subsequently all the lawless elements were captured or killed and the living are now in Bilibid. Both the provinces of Misamis and Surigao are entirely quiet, and the people are pursuing their usual vocations without disturbance. At one time during the winter there was a disturbance in the island of Cebu. The pulajanes, who are a band of religious fanatics in the mountains, attacked the civilized towns and succeeded in defeating a small force of constabulary and in killing two of its officers. Colonel Taylor, together with 100 men, inflicted such a severe defeat on them

that their leaders were killed and their power was broken. Many of the most violent were arrested and are now confined in the state's prison. They present a curious combination of religion and robbery and can hardly be regarded as of the civilized tribes. Cebu is entirely quiet now. Occasional reports of ladronism in the provinces of Iloilo and Capiz, on the border between the two provinces, indicate that all the guns have not been captured, but the conditions in the two provinces are on the whole quite satisfactory.

The most serious trouble of this kind has been in the province of Albay, which, due to its hemp production, is the richest province in the entire archipelago. When the insurgents in command of the forces in 1901 surrendered in Albay, two of the subordinates named Toledo and Saria with a very small force remained in the mountains with a few guns, but were unable to create substantial disturbance in the province until a former insurgent named Ola, said to be a Tagalog, left the town of Guinobatan because of a quarrel with a presidente who had threatened to prosecute him for burning his house during the previous insurrection while Ola was an insurgent soldier. Ola surrounded himself with a number of malcontents, whose objection seems to have been not to the insular government or to the American Government, but to the political rule of the wealthy hemp growers in municipal governments in the province of Albay. It was the custom there to elect rich men to the presidencias in the province, and there may have been some abuse of power. At any rate, Ola's career began as a protest against municipal tyranny and awakened the sympathy of the poor masses. After he went into the mountains he was soon joined by Toledo and Saria and there was begun a regular campaign of collecting contributions, which was so profitable in the rich province that the forces of Ola continued to grow. At the town of Ola some of Ola's followers were able to secure assistance from the townspeople and also from the municipal police in surprising the constabulary who were there and taking away about 40 guns. This of course was a great aid to Ola's force, and the disturbance soon spread to the entire province. It is undeniable that there was both sympathy on the part of the poor people with Ola's cause and there was also fear of vengeance at his hands sufficient to induce inaction by the people. In consequence a reign of terror was inaugurated through the province which it was necessary to meet by radical measures. Accordingly, authority was given, by section 6 of the act of the Commission numbered 728, and a resolution of the Commission (copies of which are appended) to the governor and the constabulary authorities to bring the people from the outlying barrios, where they were exposed to the invasion of ladrones, nearer to the populated portions of their respective towns. Under the law it became the duty of the provincial board to see to it that the people thus brought in were properly

fed and not subjected to unnecessary privations. For a time the action did not have any effect. No guns were being obtained, and while the number of attacks by the ladrones was very much reduced substantial progress did not seem to be making. The province was visited by Vice-Governor Wright and Commissioner Tavera, who talked to the people on the subject of their duty to suppress this disorder. The effect of the visit of these gentlemen and the policy adopted of depriving those in the mountains of means of support was finally crowned with success when Ola and his entire body of followers with all their guns came into Guinobatan and surrendered unconditionally. They were in a most ragged and pitiable condition. Later on Toledo with his small body of followers came in, and most of Saria's men having been captured, there is complete peace and quiet in Albay. All the prisoners are being tried. Some have been sentenced to death for particular murders. The remainder will doubtless be sent to state's prison for long terms.

The effect of the disturbance has produced substantial financial loss in the province. The governor estimates that hemp production and sale have been interfered with to the extent of some ten or twelve millions of dollars Mexican. Still the province is rapidly recovering from the effect of the disturbed conditions. By telegram of December 8 Governor Betts advises me that "the clearances of hemp in this province for the month of November exceeded any previous month in the history of the province."

Ola could have been induced to surrender some months earlier had the authorities been willing to grant immunity from prosecution. As it had now become the settled policy of the government to treat persons in arms in their proper light, as ladrones and outlaws, and not to accept them as prisoners of war or to grant them immunity from ordinary or criminal prosecutions, permission was not granted to extend immunity. The reason which actuated the government in insisting upon this course is that surrenders made with promises of immunity do not ordinarily, when the dealings are with the criminal class, result in anything but a temporary cure, for as soon as the hard effects of the campaign have worn off the criminal thus pardoned in advance feels a longing for his old-time business and returns to the woods and mountains, there to begin again the practice of his profession of a ladron. The confinement of the leaders, and all the rank and file, under long sentences of confinement in the penitentiary has a much more permanently tranquilizing effect.

In Nueva Ecija and Tarlac a man named Felipe Salvador, who professes to exercise miraculous and supernatural power, has been attempting to rouse the people of his neighborhood to resistance to lawful authority and association with him in a kind of religious rite. Their religious character, however, does not prevent Salvador and

his friends from constituting a ladrone band preying on the neighboring country. Salvador has made one or two raids on towns, but he has been punished severely in several engagements with the constabulary, and has now withdrawn into an obscure part of Nueva Ecija.

As an instance of the character of people, that in the mountain districts of these islands are reported as insurrectos sometimes, as ladrones at other times, as Pulajanes at other times, and as mere ordinary outlaws at others, I copy a report from Lieutenant Guild in regard to the action of three ladrones in Capiz. The report is as follows:

CALIVO, PANAY, *October 12, 1903.*

SIR: I have the honor to report that on the 29th day of September two ladrones, by name Ompong and Tuest, accompanied by one unknown, entered the barrio of Ilijan, of Navas, and murdered 13 women and children. The constabulary of Ibajay were notified the same afternoon, and at once set out for the scene of the crime. On arriving at the barrio, no trace of the ladrones could be found, nor could any information be gotten from the inhabitants, as they seemed terror stricken. The only information of any value at all was that the leader of the ladrones, Ompong, had a Remington rifle and 20 rounds of ammunition, but that his companions had only spears and bolos. As far as can be learned, the killing was not done for the sake of gain, but for the sake of one of the customs of the mountaineers. The child of Ompong having died of cholera, he, as is their custom, went out and had these others killed so his might have company and servants in the other world. The killing was all done with the bolos and spears, Ompong simply threatening the men of the barrio with his gun while the women and children were being murdered. The killing of the people could never have occurred had the men of the barrio interfered, instead of looking on and doing nothing. The country has been thoroughly searched, but no trace of the ladrones found, and it is generally believed that they returned to Antique Province, where they live.

Very respectfully,

JAMES J. GUILD,  
*Third Lieutenant, Philippine Constabulary,  
Commanding Second Section.*

The SENIOR INSPECTOR, *Capiz, Capiz, P. I.*

#### THE USE OF SCOUTS WITH THE CONSTABULARY.

The act of Congress authorizing the use of the native scout companies under the command of those constabulary officers who were detailed from the Regular Army has worked exceedingly well. General Davis and General Wade have both acted with the utmost dispatch in responding to the call of the civil governor for scout companies, and there have been in use during the last year from three to five thousand native scouts operating with the constabulary. This arrangement presents some anomalies which seem greater to the military commander than to the civil government; but however unsymmetrical the union of the two forces under a constabulary officer may seem to be, it has had the immense advantage of enabling the civil government, with native troops, to suppress disorder. It is of the utmost political importance that the regular soldiery, under a command more or less independent of the civil government, should not be called in to sup-

press disorders and to maintain the authority of the civil government until all the forces of natives, whether constabulary or scouts, should be used for this purpose. Nothing could be further from the truth, nothing could be more unfounded or unfair, than the inference that the use of scouts in association with the constabulary for the suppressing of disorder is a reflection upon the military establishment or upon those who are in command thereof; but we know in our own country how loth governors of States are to call out militia, and how loth the President is to summon the Regular Army in the suppression of domestic disorder. In this country it is politically most important that Filipinos should suppress Filipino disturbances and arrest Filipino outlaws.

#### RECONCENTRATION.

With reference to the act of the Commission which authorized, upon resolution of the Commission, the provincial governors to withdraw the outlying barrios of towns to their respective centers of population and, in a sense, to reconcentrate the residents of the outlying barrios, it may be said that this course is justified by the peculiar character of the country and the wonderful opportunity that it offers a comparatively small body of men to terrorize an entire province and to allow persons to evade the utmost efforts of large bodies of constabulary. The act is appended hereto as Exhibit E. So effective is this system against ladrones, if carried on properly, and so comparatively easy is it for the people in this country, without great suffering or inconvenience, to move from one part of the country to another, erecting temporary houses of light material, that in Tayabas, which at one time was much afflicted with ladrones under a man named Rios, to whom I referred in my last annual report and who has now expiated his crimes on the gallows, the so-called reconcentration was used voluntarily by the towns that were invaded by Rios and carried to a successful conclusion before the central authorities were advised of the methods pursued.

#### BANDOLERISMO STATUTE.

The treatment of ladrones by criminal prosecution has been most effective. A statute known as the "bandolerismo statute" was enacted in November of last year to meet an emergency which then seemed to be great. The statute is as follows:

SECTION 1. Whenever three or more persons, conspiring together, shall form a band of robbers for the purpose of stealing carabao or other personal property by means of force and violence, and shall go out upon the highway or roam over the country armed with deadly weapons for this purpose, they shall be deemed highway robbers or brigands, and every person engaged in the original formation of the band, or joining it thereafter, shall, upon conviction thereof, be punished by death, or imprisonment for not less than twenty years, in the discretion of the court.

SEC. 2. To prove the crime described in the previous section, it shall not be necessary to adduce evidence that any member of the band has in fact committed robbery or theft, but it shall be sufficient to justify conviction thereunder if, from the circumstances, it can be inferred beyond reasonable doubt that the accused was a member of such an armed band as that described in said section.

SEC. 3. Persons guilty of the crime defined in section one may be punished therefor in the court of first instance in any province in which they may be taken or from which they may have fled.

SEC. 4. Every person knowingly aiding or abetting such a band of brigands as that described in section one by giving them information of the movement of the police or constabulary, or by securing stolen property from them, or by procuring supplies of food, clothing, arms, or ammunition, and furnishing the same to them shall, upon conviction, be punished by imprisonment for not less than ten years and not more than twenty years.

The difficulty of proof against persons known to be ladrones in fixing upon them particular acts of violence or robbery and the necessity for severe punishment led to the enactment of this statute. It is frequently very easy of proof to show that the persons captured have been members of an armed band running about the country, committing or attempting to commit robberies and murder, but to prove that individuals were present at particular robberies is entirely impossible. The act was therefore drawn to permit the proof of the existence of the band and the membership in the band, beyond reasonable doubt, as establishing the crime of ladronism. It is not too much to say that the act has been most effective in securing convictions and ridding the various provinces of this pest of centuries. The courts have had an immense amount of labor to perform in hearing the various cases, but they have responded with energy and with justice to the call, and both Filipino and American judges have exercised much firmness in imposing suitable penalties when the proof required conviction.

During the year several members of the Hongkong junta have come to Manila. They have been required to take the oath of allegiance to the government and after that have not been disturbed. I am in receipt of a verbal communication from Señors Apacible and Agoncillo, the two most prominent members of the junta. They have signified their intention of coming to Manila if they are not to be subjected to prosecution.

They distinctly repudiate having had any communication with San Miguel or the recent ladrone leaders, whom they characterize as cattle thieves and not worthy the support of men who have been actuated by other motives. I have assured them that should they return to Manila they would simply be required to take the oath of allegiance, and if they thereafter lead lawful lives and take no part in the insurrection movements they will be wholly undisturbed. (December 18. Since writing the above, Doctor Apacible has presented himself and taken the oath.)

There is one Filipino, named Ricarte, who was at the head of the plot to explode dynamite bombs during the Lawton funeral in Manila,

and also set on foot a number of conspiracies to burn the city. He was subsequently sent to Guam, and then on his return from there declined to take the oath of allegiance and went on to Hongkong. It is reported that he has quarreled with the other members of the junta and that he continues his plotting. There is also said to be a socialistic or anarchistic society which has its headquarters at Paris, directed to the establishment of a universal democratic Filipino republic, on socialistic lines, but, so far as we are advised, they have attempted nothing in the way of actual operations, though they occasionally favor the mails with their publications.

Dominador Gomez y Jesus was born in the Philippines and subsequently went to Spain where he studied medicine and was graduated as a surgeon. He entered the Spanish army as a surgeon and served in Spain during the two revolutions of 1896 and 1898. He appears to have been a member of the junta of Madrid, organized to oppose American sovereignty in the islands after 1898, and to have written articles for a paper published in Madrid, called the "Filipinas ante Europa." After peace had been completely restored in the islands, Doctor Gomez came to Manila. His cooperator, Isabelo de los Reyes, had organized a working man's union, called the "Union Obrera Democrática," but having been arrested and subjected to criminal prosecution for an illegal connection with a strike, he resigned the presidency and Doctor Gomez was elected to take his place at the head of the union. Subsequently Doctor Gomez also became the president of the Nationalist party. By contributions from the members of the Union Obrera, he was able to publish a newspaper called the "Los Obreros." He was a man of considerable power of speech and able to arouse audiences of the lower class of Filipinos by his grandiloquence. It soon became evident that there were members of the Union Obrera and of the Nationalist party who were very strongly in sympathy with the ladrone bands, headed by San Miguel, then operating in Rizal and Bulacan. Doctor Gomez recommended to me in his newspaper that as a solution of the difficulties, we invite all the ladrones to come in and surrender their arms on the agreement that we should guarantee them immunity and insure them food or labor for one year. Subsequently Doctor Gomez applied to me for the pardon in advance of Faustino Guillermo, second in command in Rizal, one of the most noted desperadoes and ladrones in the islands, a man since captured and now under sentence of death for murder. It was reported that Doctor Gomez was using the Union Obrera as a means of collecting money to run his newspaper, and to enrich his own pocket. This led to the passage of a law, denouncing as embezzlement the diversion of funds collected in such societies from the purpose for which the society was organized and for which the funds were contributed. Prosecution of Doctor Gomez was begun under several different

charges. Under the first charge of organizing an illegal association he has been convicted and sentenced for four years to Bilibid. There are other charges against him for which he will be tried, including embezzlement and aiding and abetting ladrones. His prosecution has much assisted in bringing about the present satisfactory condition throughout the Archipelago.

#### DISSOLUTE AMERICANS AND VAGRANCY ACTS.

One of the great obstacles that this government has to contend with is the presence, in a large majority of the towns of the Archipelago, of dissolute, drunken, and lawless Americans who are willing to associate with low Filipino women and live upon the proceeds of their labor. They are truculent and dishonest. They borrow, beg, and steal from the native. Their conduct and mode of life are not calculated to impress the native with the advantage of American civilization. When opportunity offers, however, they are loudest in denunciation of the Filipinos as an inferior, lying race. To rid the country of this class of Americans the Commission passed two acts.

The first of these is No. 519, "An act defining vagrancy and providing for punishment therefor," and reads as follows:

SECTION 1. Every person having no apparent means of subsistence, who has the physical ability to work and who neglects to apply himself or herself to some lawful calling; every person found loitering about saloons or dramshops or gambling houses or tramping or straying through the country without visible means of support; every person known to be a pickpocket, thief, burglar, ladron, either by his own confession or by his having been convicted of either of said offenses, and having no visible or lawful means of support when found loitering about any gambling house, cockpit, or in any outlying barrio of a pueblo; every idle or dissolute person or associate of known thieves or ladrones who wanders about the country at unusual hours of the night; every idle person who lodges in any barn, shed, outhouse, vessel, or place other than such as is kept for lodging purposes, without the permission of the owner or person entitled to the possession thereof; every lewd or dissolute person who lives in and about houses of ill-fame; every common prostitute and common drunkard, is a vagrant, and upon conviction shall be punished by a fine of not exceeding one hundred dollars or by imprisonment not exceeding one year and one day, or both, in the discretion of the court.

The second is as follows:

SECTION 1. Upon the conviction of any citizen of the United States under act numbered five hundred and nineteen, entitled "An act defining vagrancy and providing for punishment therefor," the court may suspend sentence, conditioned upon the convict leaving the Philippine Islands and not returning thereto for a period of not more than ten years; and the fulfillment of this obligation shall be deemed as an extinguishment of the prescribed sentence.

SEC. 2. In such cases the court or judge may order the removal of the convict to Bilibid Prison, in the city of Manila, there to remain in custody until he can be placed upon a steamer returning to the United States. This order shall be executed in the manner prescribed by the civil governor in each case.

SEC. 3. There is hereby appropriated, out of any funds in the insular treasury not otherwise appropriated, an amount sufficient to pay the actual and necessary expenses in carrying out the provisions of this act.

The former of the two acts has also been useful in enabling towns to rid themselves of Filipinos suspected of complicity with ladrones, who have no visible means of support and who are probably spies of the ladrones for the purpose of enabling them to make lucrative raids.

#### FRIARS' LANDS AND RELIGIOUS QUESTIONS.

As early as 1898, the Peace Commission, which negotiated the treaty of Paris, became convinced that one of the most important steps in tranquilizing the islands and in reconciling the Filipinos to the American Government would be the governmental purchase of the so-called friars' agricultural lands in the Philippines, and the sale of these lands to the tenants upon long, easy payments. The same policy was recommended by the first or Schurman Commission after an investigation by it, and in the first report of the present Philippine Commission much time was devoted to the political phases of the relations of the four great religious orders to the people and the wisdom of buying the agricultural lands and selling them to the tenants was much commented on and approved. The Secretary of War and the President concurred in the recommendations of the Commission. Accordingly in May, 1902, the writer, as civil governor of the Philippine Islands, was directed by the Secretary of War to visit Rome and to confer with the Pope or such agents as he might designate in respect to the question of buying the friars' agricultural lands and other questions of a similar character which were pending between the Roman Catholic Church and the Government. The negotiations which were had on this subject in Rome were set forth in the correspondence published by the Secretary of War in his report to Congress for last year. In a word, the Pope approved the purchase of the agricultural lands of the three great religious orders that owned agricultural lands in the islands and appointed an apostolic delegate with as full powers as he could be invested with to bring about this result.

The apostolic delegate, Monsignor Jean Baptiste Guidi, archbishop of Staurpoli, reached the islands in the fall of 1902, and negotiations were at once begun. In one of the letters written by Cardinal Rampolla, contained in the correspondence already referred to, he stated on behalf of the Holy See that the resources of the religious orders would be taken into charge by the supreme authorities for the benefit of the church in the Philippines, and it at first seemed that the religious orders, with little prospect of reaping much pecuniary benefit from the sale of the lands under this arrangement, were not anxious to further the proposed purchase. Probably this inference did an injustice to the religious orders in view of the event. It turned out upon examination that the agricultural lands which had originally belonged to the three religious orders of the Philippines,

to wit, the Dominicans, the Augustinians, and the Recoletos, aggregated 420,000 acres. The Commission in 1901 had directed a survey to be made by a Filipino surveyor or agrimensor, skilled both in surveying agricultural land and in estimating its value, by name Juan Villegas. He surveyed between 1901 and 1903 all the agricultural holdings of the three religious orders, except an estate belonging to the Augustinians in the province of Isabela and an estate belonging to the Recoletos in the province of Mindoro. He classified the lands and placed a value upon the differing classes, giving data from which it was possible to estimate the total value of the lands, except the two estates in Isabela and Mindoro, respectively, already mentioned, the value of which was determined by the agents of the Commission from other sources. The event proved that the Dominicans had conveyed their holdings, amounting to 60,461 hectares, to one Andrews, an Englishman living in Manila, under a promoter's contract; that Andrews organized a company, under the supposed existing laws of the Philippines, known as the "Philippine Sugar Estates Developing Company (Limited)," to which he conveyed all the Dominican lands, with the exception of a small estate known as San Juan Del Monte, containing 156 hectares, which was held under such trust restrictions as to prevent its sale. Investigation showed that the Augustinian order as far back as 1893 or 1894 had conveyed to a Spanish corporation, known as the "Sociedad Agricola de Ultramar," all of its agricultural holdings. It further appeared that the Recoletos had conveyed the estate of Imus, or rather the estates of San Juan and San Nicolas, known as the "Imus estate," containing 18,419 hectares, to a company organized under the laws of Hongkong or Great Britain. The Mindoro estate remained in title and possession with the Recoleta order of the Philippines. It became necessary therefore to deal with the representatives of the title holders to the lands. The Dominican lands, the title to which was in the Philippine Sugar Estates Development Company (Limited), were represented by Señor Don Francisco Gutierrez, a stockholder and managing director of the company. The Augustinian lands owned by the Sociedad Agricola de Ultramar were represented by the attorney in fact of the company, an Augustinian friar, Padre Juan M. Yanez. The Imus estate, conveyed to the British Manila Estates Company (Limited), was represented by a young Englishman named Marcus McGregor. The Mindoro estate of the Recoletos was represented by the procurator of the Recoleta order in the Philippines.

In order to determine the value of the estates, the representatives of the various companies and other interests were invited to attend a hearing, when various witnesses were called to testify. The apostolic delegate was also present. A stenographic report of these hearings is hereto attached and marked "Exhibit F."

In addition to the hearings written statements were made by experts for each interest and were filed with the apostolic delegate and with me. The representatives of the various interests were not disposed at first to welcome the presence in the conference of the apostolic delegate. It was vigorously denied that the friars retained any titular interest in the lands which were the subject of the negotiation, and the right of the apostolic delegate to intervene was therefore questioned. From the best information that I could obtain it was true that the religious orders had parted with their legal title to the shares in the new companies, except the Recoletos in Mindoro, and that it was very difficult to find out just what their interest in the property continued to be. That they had an interest, and a most substantial one, went without saying, but, for reasons it is unnecessary to comment on, these interests had been made as ambiguous and doubtful as possible. In accordance with the agreement reached in Rome, I sent to the apostolic delegate a request for a statement of the exact interests retained by the religious orders in the Philippines in the lands which were the subject of negotiation. No formal answer to this letter was ever received, but informally it was stated to me by the delegate that the authorities in the Philippines had informed him that they had so disposed of their interests that they were unable to make a statement of what their interests were, if any. The value of the lands, as estimated according to the statements of the agents of the companies, aggregated a sum between thirteen and fourteen millions of dollars gold. The estimate of Villegas, the surveyor employed by the Commission, showed the valuation of the lands to be \$6,043,000 gold, if his value in Mexican should be reduced to gold at the rate of two to one, which was the gold rate about the time of his survey and classification, though the Mexican dollar fell considerably after that. Considering the bad conditions which prevailed in agriculture, the loss of cattle, the dispute concerning title, and the agrarian question that must always remain in the management of these estates and embarrass the owner, I considered—and I believe the Commission generally agreed with me—that \$6,043,000 gold was a full price for the lands. The sum, however, was scouted by the persons representing the owners, and there appeared to be very little prospect of reaching an agreement. With the knowledge and approval of the Commission and of the Secretary of War and the President subsequently had, I sent a letter to the apostolic delegate and forwarded a copy to each representative of the respective estates, as follows:

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,

*Manila, P. I., July 5, 1903.*

YOUR EXCELLENCY: After a very full consideration of the subject, and with the concurrence of the Commission, I beg to make an offer on behalf of the Philippine Government for the so-called Friars' lands, which include, first, certain haciendas at one time owned by the Dominican order of these islands and now owned by the

Philippine Sugar Estates Development Company, represented by Mr. Gutierrez; second, certain haciendas at one time owned by the Augustinian order and now owned by the Compania Agricola de Ultramar, represented by the Augustinian friar, Padre Juan; and third, the haciendas of San Juan and San Nicolas, generally known as the Imus estates, at one time owned by the Recoleta order, and now owned by an English corporation, the British Manila Estates Company (Limited), represented by Mr. McGregor, and also an estate in Mindoro of 60,000 acres, still owned, as I am informed, by the Recoleta order. The offer I am about to make is, of course, subject to the approval of the Secretary of War, but if accepted, it will doubtless receive his approval.

The members of the Commission believe that the evidence of Juan Villegas as to the value of these lands at present is just. At the conferences between your excellency, the representatives of the three corporations now holding title, and myself, there was some discussion as to whether the fall in the price of silver and the variation in the silver standard in the gold values ought not to play a large part in weighing Señor Villegas's evidence. My own strong conviction is that Señor Villegas's evidence is not in the slightest degree affected by the variation in the price of silver, for the reason that the persons who own lands and who buy and sell them in the provinces where the lands in question are situated know no other standard for the estimation of the value of lands than that of Mexican silver. It may be that indirectly the fall in the price of silver will ultimately affect the value of these lands in silver, and it is possible that some slight increase has already taken place in the value of the lands estimated in silver. But it seems clear from the evidence that the increase is not at all commensurate with the fall in silver. Nevertheless, for the purpose of reaching an agreement, we are willing to waive any such discussion by treating the value placed by Señor Villegas on the lands in Mexican as a value to be reduced to gold at the ratio of two to one. This ratio in fact did prevail when Señor Villegas began his surveys in November, 1901, but very soon changed. This is a concession which amounts to an increase in the valuation of the land over what it would be at the present rate of Mexican of a little less than 20 per cent.

I inclose herewith as Exhibit G detailed and summarized statements of the various valuations of Señor Villegas, who has examined and placed a value upon all the estates involved in this matter, except an estate of the Augustinians in Isabela of some 60,000 acres, which is almost wholly unimproved, and an estate of the Recoletos in Mindoro of about the same extent. I asked Mr. Webber, the manager of the General Tobacco Company, who knows the Isabela estate well, what value he placed upon it. He said that at one time he had offered one hundred thousand gold for it, but that the offer was declined. I asked him if he would give one hundred and fifty thousand or two hundred thousand for it in gold, and he said that he would give \$200,000 for it in gold if he could obtain free admission of Chinese laborers into the islands. I said to him that that was impossible, and then he said that he would not give \$150,000 for the land. The value of this land is in the statement assessed at \$300,000 Mexican, which is a full price. The Mindoro estate is fixed at \$600,000 Mexican, because of definite information that this estate, together with the cattle on it, was offered as late as last fall to certain gentlemen in the city of Manila for \$700,000 Mexican, and that the offer was declined. At that time the gold Mexican ratio was between two-forty and two-fifty. The other valuations in the inclosed statement are taken from Señor Villegas's evidence. The total valuations in Mexican are as follows:

The Dominican lands.....	\$5, 473, 799. 13
The Augustinian lands.....	4, 407, 335. 65
The Recoleta lands.....	2, 205, 303 33
Making a total in Mexican currency of.....	12, 086, 438. 11

The civil government proposes to pay for a good title to these lands, free and unincumbered, the prices above named reduced to gold at the ratio of two to one, as follows:

For the Dominican lands .....	\$2, 736, 899. 57
For the Augustinian lands .....	2, 203, 667. 83
For the Recoleta lands .....	1, 102, 651. 67
Making a total in gold of.....	6, 043, 219. 07

I have sent a copy of this letter of the representatives who were present at our conferences, Senor Gutierrez for the Dominican lands, Padre Juan for the Augustinian lands, and Mr. McGregor for the Imus estate. I have not seen any representative of the Mindoro estate, and so assume that your excellency either represents the Order of the Recoletos or will forward a copy, if you deem it wise, to the proper person.

I have so often said to your excellency and to the representatives of these estates that the motive of the Government in taking this land is purely political, and not for the purpose of profit, that perhaps it is unnecessary to repeat it. Still, as this is a formal offer, it may not be improper to state again that the civil government in making the purchase at the prices herein named, if they shall be accepted, has not the slightest idea that it will make any profit in disposing of the lands, in accordance with the act of Congress, to the tenants who now occupy it. On the contrary, the members of the Commission are confident that it will result in a pecuniary loss to the civil government. It is hoped that if the Government takes charge of the land, it will be better able to secure peaceable possession of the land and an attornment of the tenants than would private corporations, especially those in which the Spanish friars are supposed to have a large interest. What the Government proposes is to buy a lawsuit, and something more than a lawsuit, an agrarian dispute. If peaceable transfer of the title to these lands from the corporations now claiming ownership in them to the tenants in possession could be accomplished without the intervention of the civil government, the civil government would be most anxious to avoid any intervention in the matter at all. Indeed it would be to its interest to contribute by a substantial sum to this peaceable result. While we hope that ownership by the Government may accomplish good, the hope is largely based on conjecture. Certainly the purchase of these lands will mean the assumption of another very heavy burden by the Government in addition to those which it is now attempting to carry. We are convinced that it would be greatly to the advantage of the present owners of the land to accept the offer. It involves the expenditure of \$6,000,000 gold, a sum which must be secured by issuing bonds to that amount under the act of Congress. The members of the Commission are unanimously of opinion that the disadvantage of any substantial increase of such a financial burden would outweigh any advantage which might accrue from the Government ownership of the lands.

In making this offer I beg to call your excellency's attention to the fact that the Secretary of War, in a telegraphic dispatch, a copy of which I transmitted to his eminence, Cardinal Rampolla, in my letter of July 15, 1902, requested that a detailed statement of the interests retained by the monastic orders in the corporate stock of the companies now claiming to own the lands be furnished to me by the Apostolic Delegate, who was to be sent to the Philippine Islands, in order that the statement might be made the basis for the proposed negotiation. The request of the Secretary was acquiesced in by Cardinal Rampolla. In February, 1903, I invited your excellency's attention to this matter and requested that the details requested be furnished. I have as yet received no formal reply. Without waiting for it, however, I have ventured to make this offer with the hope that if it is accepted further investigation and discussion may be avoided.

With the hope that your excellency will find it consistent with your views of the

situation to advise the representatives of the owners of these lands to accept this offer, I beg to subscribe myself, with great respect,

Your excellency's most obedient servant,

WM. H. TAFT, *Civil Governor.*

Monsignor JEAN BAPTISTE GUIDI,

*Archbishop of Staurpoli and Apostolic Delegate*

*to the Philippine Islands, Manila.*

I received a negative answer from all of the representatives. Not discouraged, however, by circumstances that seemed most discouraging, the apostolic delegate bent his energies to bringing the parties to a settlement. After some negotiation the delegate first stated that he thought he could arrange a sale for \$10,500,000 gold. I told him there was no hope of bringing about a purchase at that figure. Some months later I was advised by Mr. McGregor that if an offer was made for \$8,500,000 he thought he could compass the sale. This was definitely declined. I then advised the apostolic delegate and those interested that I would recommend to the Commission and the Secretary of War an increase in the price offered, for the sake of peace, of \$1,500,000, but no more. Then followed a long and protracted discussion between the parties who were to be the venders as to how this sum should be divided, and there was much difficulty in arriving at a solution—so great a difficulty, indeed, that I was informed that unless \$7,770,000 was paid there was no hope of reaching an agreement. With the approval of the Secretary of War and the Commission, I replied that \$7,543,000 was our ultimatum and that we would not give more than that, and this was ultimately the basis upon which the price was fixed. It turned out, upon further investigation, that the Augustinian Company and the Sociedad Agricola de Ultramar had contracted to sell the Mandaloya estate, which lay in the province of Rizal and extended from the city of Manila to the town of Pasig along the Pasig River, at a certain price, and that a strip 150 meters wide by 6 kilometers running along the river had been contracted to be sold to the railroad company for mercantile purposes. The Mandaloya estate is a poor estate, from an agricultural standpoint, and its use for mercantile purposes we were entirely willing to acquiesce in, because it would not present the difficulties concerning agricultural tenancy as the remainder of the land. The estate contains about 10,000 acres. By omitting this from the land sold and deducting the price fixed by Villegas, with 25 per cent added thereto, and making certain other reductions for parcels sold bona fide by the owners, and leaving to the Sugar Estates Development Company a tract of sugar land of 2,500 acres on the hillside of the Calamba estate, we finally closed the purchase of upward of 410,000 acres, at a price of \$7,239,000 gold. Copies of the contracts of sale are hereby appended and marked Exhibit H.

It is thought that the result of these negotiations and the purchase of the lands form a most important step in the rehabilitation of the

people of the islands and the readjustment of their relations to the Roman Catholic Church, which can not but be of material benefit in a political way to the insular and provincial governments. The disposition of the lands to the tenants on contracts of sale with easy payments for a number of years entails a work of tremendous labor upon the insular government and will necessitate the organization of a separate bureau for that purpose. We can not prophesy that the adjustment will rid us entirely of the agrarian questions. There will be doubtless litigation and local centers of disturbance growing out of government landlordism; but the elimination of the friars from the question can not but tend greatly to facilitate satisfactory adjustments. During the last six months I have been in receipt of petitions from tenants in the provinces of Cavite and Laguna, where the agrarian question has been most bitter, urging the purchase of the lands, with a statement that the tenants fully understood that the lands are to be sold to them and that they are to pay for the same. The visit to Rome was watched with intense interest by the people of the islands, and had it not resulted in a purchase of the lands, my judgment is that great disappointment would have been felt. As will be seen by a statement which follows, the number of friars in the islands is rapidly diminishing from year to year, and with the adjustment of the land question and the division of the proceeds between the orders and the church and the use of the part belonging to the Roman Church for the improvement of the Philippine church, we may reasonably hope that in a decade the agrarian and political question of the friars in the Philippines will have been completely removed from among the obstacles to good government with which the Americans, in coming to the islands and assuming control thereof, were confronted.

Arrangements are being made for the floating of the bonds necessary to raise the money to pay for the lands. It is understood that the bonds may be floated at 4 per cent and that they will take the form of bonds payable after ten and before thirty years at the option of the Government. This will entail an interest charge upon the revenues of the Government of \$290,000 a year in addition to the expense of administration, which will be considerable. It is not thought that the income from the islands for several years will be enough to meet the actual outgo, but with a restoration of normal conditions—speaking for myself alone—I hope that the lands will sell for as much as we have paid for them. Other members of the Commission do not think so. It is to be noted, however, that the insular government has not entered upon the purchase of these lands with a view to a profitable investment, but that it is knowingly paying a considerable sum of money merely for the purpose of ridding the administration of the government in the islands of an issue dangerous to the peace and prosperity of the people of the islands.

Following the policy which it was announced by the Vatican would be pursued, the bishops who were Spanish friars in all the dioceses of the islands have been allowed to resign and their places have been filled by American Catholic bishops. I can not state with too much emphasis the satisfaction I feel in this change. It means, in my judgment, the beginning of a new era in the islands. It is to be expected that a large part of the people of the islands will continue to be communicants of the Roman Catholic Church, and it can not but have a liberalizing effect upon them that their bishops shall be Americans with the American ideas of a separation of church and state, and with the American respect for individual rights and individual liberties. The powerful influence of a Roman Catholic bishop in his diocese, exercised over the priests of his diocese, can not but be productive of good and full of cooperation in our purpose to educate these people. A comparatively small number of Spanish friars remains in the islands, and it is to be expected that the American bishops shall use them for the benefit of the Church, though it is hoped that there will be no departure from the policy of the Church announced by Cardinal Rampolla in his letter to me, in which he said that it was not the intention of the Roman Catholic authorities to send back the Spanish friars to any parishes in which the majority of the people were opposed to their coming.

I am officially informed by the apostolic delegate that in 1898 the number of friars in the islands was as follows:

Dominicans .....	233
Recoletos .....	327
Augustinians .....	346
Franciscans .....	107
Total .....	1,013

That, by December 1, 1902, they had been reduced as follows:

Dominicans .....	127
Recoletos .....	76
Augustinians .....	111
Franciscans .....	66
Total .....	380

And that, by December 1, 1903, they have been still further reduced, so that the number in the islands is as follows:

Dominicans .....	83
Recoletos .....	53
Augustinians .....	67
Franciscans .....	43
Total .....	246

That many of the monks are old and infirm, incapable of doing parish or any other work, and that the Dominicans have renounced before the Holy See all their former parishes and dedicate themselves exclusively to teaching.

Whatever may happen during the first few months of the coming of the American bishops, it is certain that the spirit of the American Catholic Church is so different from that of the Spanish church from a political standpoint, that the influence of the Spanish friars will gradually wane and that of the American bishops become controlling. The purchase of the friars' land, the division of the proceeds, the application of a large part thereof for the benefit of the Philippine church, the establishment of the American hierarchy here, and the gradual withdrawal of the Spanish friars, all will bring about what we so much desire—the Americanizing of the Roman Catholic Church in the Philippines. The attitude of the Government has been very much criticised by some American Catholic priests and bishops, and it has been charged that we have withheld from Spanish friars the protection assured to them by the treaty of Paris, and that we have been neglectful in not protecting the interests of the Roman Catholic Church when they were unjustly or unlawfully attacked by schismatics under Aglipay. These charges are wholly unfounded, as may be seen by an examination of the records taken from the executive files showing the executive decision and action with respect to religious matters, which is hereby appended as a part of this report and marked "Exhibit I." We have known that the great majority of the people of these islands were strongly opposed to the return of the Spanish friars to their parishes, and we have felt certain that if such a policy were adopted and the friars were sent back there would necessarily follow disturbances of the peace and discontent among the people; that the people would not be able to distinguish between a government which protected friars going back of their own volition and a government which sent the friars back and maintained them in their pastorates. Therefore the Government has deprecated and still deprecates the return of the friars to their parishes, and has made representations to the church authorities in these islands and to the Vatican, urging that the Spanish friars be not sent back, but when a friar has been sent back, the Government has never refused to protect him in his rights and to punish those who have violated his rights. There is the utmost religious freedom enjoyed in these islands, and no one, whether Roman Catholic, Filipino Catholic, or Protestant, is disturbed in worshipping God as he chooses. The instances in which one sect has interfered with another are comparatively few, but in every case the Government has sought to punish the offender and to prevent a recurrence of the trouble.

## BUSINESS CONDITIONS.

Business conditions in Manila, if the general report from American merchants can be trusted, have not been good during the year. The change in the currency from a silver to a gold standard has been in progress. The demand for Mexican silver in this business, up to the time of writing this report, in other places has been sufficiently great to drain the islands of Mexican silver, though there are indications, as this is written, that it may become profitable to import Mexican silver again. Of course the great difficulty in getting into circulation the new coinage grows out of the fact that Mexican silver is worth less than the Philippine peso, as established by act of Congress, by about 10 per cent, and everyone, business men or not, in paying his debts and making his purchases, naturally prefers to use the poorer currency when it will go as far as the more valuable, because of the ignorance of the people as to the real difference in value. The steps taken to maintain the parity, the laws passed, and the accumulation of a reserve fund, I shall not dwell upon because they will all be contained in the report of the secretary of finance and justice. It is only necessary to remark here that the advantages of the new coinage will not be apparent until some time in the future; not until January 1, 1904, can the Mexican coin be demonetized and denied a legal-tender value. The policy of the government is to purchase the Spanish-Filipino coins, of which there are some ten or twelve millions of dollars in the islands, and recoin them into Filipino pesos.

Notwithstanding the statement that business conditions in the islands have been exceedingly unfavorable, and in spite of the very depressing agricultural condition, so far as rice, corn, and other food products are concerned, the statistics as to exports and imports into the islands show a considerable improvement for the better over last year and a substantial increase in the production and exportation of hemp and copra. In the fiscal year ending June 30, 1902, the total imports were \$41,072,738, but of this \$8,652,648 was silver coin. The total exports for the fiscal year ending June 30, 1902, were \$27,157,087, of which exports the silver coin amounted to \$2,423,200. Excluding silver coin and gold to the value of \$278,248 the total merchandise imported for the fiscal year ending June 30, 1902, amounted to \$32,141,842, whereas the total merchandise exported, aside from silver coin, already mentioned, and gold valued at \$806,208, amounted to \$23,927,679. In other words, the balance of trade against the islands last year was \$8,214,163. For the year ending June 30, 1903, the total imports were \$35,099,241, the silver coin in which amounted to \$2,077,137, and gold valued at \$50,222. The total imported merchandise, therefore, for the year ending June 30, 1903, was \$32,971,882, or a gain in the entire year of \$830,040. The total exports for the year ending June 30, 1903, amounted to \$39,668,366,

of which \$6,366,106 was silver and \$180,480 gold, leaving a balance of merchandise exported of \$33,121,780, which makes a balance of trade in favor of the islands for the year ending June 30, 1903, of \$149,898. It will be seen that there is an increase in the exports for the year ending June 30, 1903, over those of 1902, of \$9,194,101. The total foreign business of the islands, excluding coin, for the year ending June 30, 1902, was \$56,069,521, while the total foreign trade for the year ending July 30, 1903, was \$66,093,662, or a gain of \$10,024,141.

It should be borne in mind in respect to all these statements that they do not include any importations for the Army of the United States which pay no duty and are not included in the statistics. The comparative amounts of the various commodities exported during the two years are shown by the following table:

Article of export.	1902.	1903.
Hemp.....	\$15,841,316	\$21,701,575
Copra.....	1,001,656	4,473,029
Sugar.....	2,761,432	3,955,568
Tobacco, cigars, and cigarettes.....	2,501,367	1,882,012
Miscellaneous.....	1,821,908	1,109,596
Total.....	23,927,679	33,121,780

The decrease in tobacco was due to increase of duties on tobacco in Australia, Java, and Japan. The business of the United States exports and imports is also shown by the following table, excluding always the United States Government importations:

	1902.	1903.
Imports from United States, excluding United States Government imports.	\$4,035,243	\$3,944,098
Exports to United States.....	7,691,743	13,863,059
Total business, exclusive of United States Government imports.....	11,726,986	17,807,157
Increase total business.....		6,080,171

The imports of rice show the depressed condition of the rice culture in the islands. For the fiscal year ending June 30, 1900, the amount of rice imported was \$3,113,423; for the next fiscal year, 1901, it was \$5,490,958; for the fiscal year of 1902, \$6,578,481, and for the fiscal year of 1903, it was \$10,061,323. It is hoped that this abnormal importation of rice will be unnecessary next year, and that the balance of trade in favor of the islands will increase.

Some reason for the complaints in respect to business conditions in the islands which come from the American merchants, may be found in certain especial circumstances with respect to the American trade in the islands that are not a legitimate cause for complaint. When the Americans first entered the islands, enterprising business men followed the army and established what were called trading companies, which naturally catered to the demand caused by the presence of the

army and the Americans that followed in its wake. The army was rapidly increased, until during the year 1900 there were in the Archipelago upward of 70,000 troops distributed through the islands in 600 posts. This presented an opportunity for the sale of liquors and other goods likely to be purchased by soldiers, which continued for two years or more. The army has now been reduced from 70,000 men to a little more than 15,000 Americans, and the number of posts has been reduced from 600 to a few more than 100. In addition to this the Commission has passed an act forbidding the sale of liquor within 2 miles of an army reservation, which it is said has much interfered with the canteen trade. The enormous profits which were reaped by the American trading companies (of which there are some half a dozen in Manila), growing out of the demand produced by the presence of 70,000 soldiers, fell off rapidly as the changes which I have indicated took place, and to this, more than any other one cause, is due the interference with large returns upon much of the American capital invested in the islands. I venture to say that the opportunities which the American merchants have had for making quick and large profits out of the American soldier has had a bad effect upon American methods of doing business and upon the attitude of most of the American merchants in these islands. It has made them feel independent of the Filipino demand for American commodities. It has lessened the necessity for effort on their part to create a demand among the Filipino people for those articles which the United States can make and ought to sell in these islands. The natural hostility of the American business men growing out of the war was not neutralized by a desire and an effort to win the patronage and good will of the Filipino.

The American business men controlled much of the advertising in the American papers, and the newspapers naturally reflected the opinions of their advertisers and subscribers in the advocacy of most unconciliatory measures to the native Filipinos and in decrying all efforts of the government to teach Filipinos how to govern by associating the more intelligent of them in the government. One of the first principles of good business success is not to antagonize unnecessarily those whose patronage you seek and must depend on for the building up of your business. The number of Americans that the American merchants or any merchants in these islands can count upon for business demands is never likely to exceed 20,000. The number of Filipinos whose trade might make a most lucrative business in these islands is 7,000,000. It would seem to be the wiser policy on the part of the American merchant to cultivate the good will of those potential patrons rather than through the press and in society and in all other ways to antagonize them, to give the impression of bitter hostility and racial prejudice toward them too deep to be overcome. Neither the German nor the English nor even the Spanish merchants have allowed

themselves to be put in this attitude. Indeed, there are a few Americans who have pursued a different policy with respect to the Filipinos, to their profit. I venture to predict that as the American business men of these islands become more conservative, as more capital comes in, the utter fatuousness of the present attitude of a majority of the American business men of to-day of these islands will become apparent. There is an immense field here for the sale of American goods.

The Filipinos are imitative, take quickly to new things, may easily be taught, as their wealth shall grow, to regard American products, which are now luxuries to them, as necessities. The sale of cotton goods is almost wholly with the English houses to-day. The handling of hemp, which is the largest export of these islands, is almost wholly confined to foreign houses. There is not the slightest reason why this business should not be done largely by Americans, especially in view of the fact that the United States is the largest purchaser of hemp in the world. It requires the investment of a very considerable capital, the construction of warehouses in the various hemp provinces, and the establishment of friendly relations with the hemp growers and buyers in each province. The American business man in the islands has really, up to this time, done very little to make or influence trade. He has kept close to the American patronage and has not extended his efforts to an expansion of trade among the Filipinos. Until this is done and more American capital is brought here for the purpose, we can not hope that the imports from the United States to the islands will be increased in very large proportion.

#### PROPOSED OFFICIAL INSPECTION AND CLASSIFICATION OF HEMP.

About the beginning of this year complaints reached the Commission that the hemp being exported from the islands was of very inferior quality and that there was fraud in its packing. The Secretary of Agriculture of the United States recommended investigation and action, suggesting that if the Manila hemp continued to be of such poor quality, purchasers and users of fiber would be driven to other fibers and countries. It was recommended that the hemp exported be officially inspected and classified and carry the mark of the Government upon it to indicate its quality. A bill was drawn providing for official inspection and classification, and it was submitted to discussion in a public session. The public discussion satisfied the Commission that little if any good could be brought about by such legislation. Everyone who came to discuss the bill was opposed to it as it was drawn. It was insisted that the only thing possible was to have an inspection which should prevent false packing, but that governmental classification would be not only impracticable but a serious obstacle to business. It further developed that so far as fraud was concerned the purchasers in America were completely protected by the ordinary

terms of purchase which enabled them to reject the hemp or to recoup at once from the price for any failure in quality. When the amended bill was drawn providing only for the inspection into the packing and for the punishment of false packing and of fraud in baling, a representative of the American hemp purchasers stated that the bill would do them no good because it was not radical enough. So far as we were able to determine, the bill which was desired by the American merchants was a bill which should forbid the exportation of hemp of poor quality, and should impose such restrictions on the method of raising and cleaning hemp as to insure the production of only good fiber at a reasonable price. The discussion showed that much poor hemp was exported for use in making paper and hats in Japan and in other countries. Because of the high prices paid for poor hemp, the faulty cleaning of hemp was much more profitable than the preparation of the finer qualities. Inferior qualities of hemp are produced by using a serrated knife in stripping the fiber. Men, women, and children can use a serrated knife for hemp cleaning, whereas the knife with the even blade requires the strength of an adult man. A law forbidding the use of a serrated knife in cleaning hemp, or preventing the export of hemp thus cleaned, would deprive many people of a means of livelihood in the islands and would savor much of paternalism; nor is a law of this kind necessary if purchasers use proper discretion in buying the quality which they desire. The object of the persons asking legislation, when analyzed, seems to be rather to secure a law which shall hold the price of good hemp down. The bill proposed has, therefore, been allowed to lie on the table, and it is unlikely that any further action will be taken in the matter. The high price of hemp always increases the production of inferior quality. This is a natural economic result; if the dealers do not desire to pay high prices for the inferior quality, their refusing to do so will soon bring up the quality of hemp. The report of the committee on the bill, consisting of General Wright, is hereto appended, and marked Exhibit J.

#### SUGAR.

It will be observed that the value of the sugar exports from the islands for the fiscal year ending June 30, 1903, was \$3,955,568, an increase of \$1,194,136 over the value of the exports of sugar for the fiscal year ending June 30, 1902. This increase was the natural result of a betterment of conditions as to tranquillity. More than that, the planters of Negros, where the increase chiefly was, had used greater efforts than the landowners of the other parts of the islands to import carabao to take the place of the carabao destroyed by the rinderpest. The increase in the exports, however, should not be taken as an evidence of prosperity in sugar production. I append a petition of the Agricultural Society of Panay and Negros, marked "Exhibit K," in

respect to the production of sugar in the Philippines, together with a statement made by the collector of customs at Iloilo, Colonel Colton, who has looked into the matter with great thoroughness, and whose opportunities for exact information are great, because Iloilo is the port through which almost all the sugar in the islands is exported. The statement of Colonel Colton is marked "Exhibit L." I also append a statement made by Governor Wright from data furnished him on the same general subject, marked "Exhibit M."

It may be deduced from these sources of information that the sugar production was first introduced into the Philippine Islands in the year 1856, and that the first official record of exportation is of the year 1859, when 5,427 tons of raw sugar were exported from Iloilo. In 1869, 7,344 tons were exported; in 1879, 47,625 tons; in 1889, 112,007 tons; in 1899, 154,462, and the largest exportation in any one year was in 1892, when 165,897 tons of sugar were exported. In 1901 the exportation fell to 34,500 tons. In the early years the sugar production was carried on by the use of wooden rolling mills worked by cattle, a process resulting in a loss of from 40 to 50 per cent of the sugar. Some of these mills are still in use, but most of them have been supplanted by steam mills which extract from  $3\frac{1}{2}$  to  $7\frac{1}{2}$  tons of juice per day with a loss of from 20 to 40 per cent of sugar. The sugar produced is classified as follows: Class No. 1 contains 88 per cent of saccharine; No. 2 contains  $85\frac{1}{2}$  per cent; No. 3, 81 per cent, and damp 70 per cent. The various qualities of sugar are produced in about the following proportions: No. 1 quality, one-fourth; No. 2, three-sixteenths; No. 3 and damp, nine-sixteenths. Sugar polarizing as high as 92 per cent is produced by the old wooden mills in some localities of Panay. The expense of production was a very large percentage. Under ordinary circumstances Negros should produce 150,000 tons and Panay 50,000 tons of sugar annually on land now under cultivation. Those who have had experience in the business assert that with suitable machinery, transportation facilities and capital, the production could be doubled without extending the area of land under cultivation; that at present there are no means of transportation in Negros except for sugar brought to the market by lighters from the estates of the owners, from 5 to 14 miles, depending solely upon the condition of the roads, which is usually bad. The actual cost of producing sugar which is marketed at Iloilo, per ton, is as follows: Tilling and planting, \$22; cutting and carrying to mill, milling, bagging and shipping, \$18, and delivering, \$6, making a total of \$56 Mexican. These figures exclude material items like interest, investment, taxes, or rents, which are hard to estimate. The present selling price of sugar in the Iloilo market, based on the price in foreign markets, is about \$64 Mexican per ton, which allows little or no profit on the sugar from the most favorably located estates, and is considerably less than the cost of production on the interior estates.

The following table shows the quantity and value of sugar exported through the port of Iloilo, by fiscal years, since American occupation:

Year.	Number of pounds.	Value.
1899 .....	96,831,930	\$1,873,183
1900 .....	116,258,922	2,108,844
1901 .....	77,089,391	1,471,281
1902 .....	135,687,751	2,471,820
1903 .....	226,056,793	3,649,536
Total .....	651,924,787	11,569,164

At first glance it would seem from the returns of 1893 that the sugar planters were subject to congratulations upon the substantial increase both as to price and quantity of their product, and the apparently improved conditions. As a matter of fact, however, owing to the increased cost of labor and the extraordinary expenditure for animals to replace those killed by the rinderpest, the planters are more deeply in debt at the close of the 1903 season than at any previous time in their history, and if it had not been for the low-ruling rate of exchange enabling buyers to pay more in Mexican currency on practically the same gold prices as last year, a large percentage of the planters would have been entirely ruined and compelled to abandon their estates. The planters have been steadily losing ground since 1899, and have only been encouraged to continue the operation of their estates by the hope each year that their products would be admitted to the markets of the United States at a much more favorable rate of duty than is now imposed. The shipments to the United States have been very small; 71,000,000 pounds of sugar were exported last year in vessels which cleared for the Delaware Breakwater "for orders." A very small proportion of this was shipped into the United States, the larger portion being carried into Canada or England, and all the sugar entering the United States, except one cargo which was allowed to enter free during the brief period when there was no import tax on imports from the Philippine Islands, resulted in a heavy loss to the shippers. The islands of Panay and Negros are among the most thickly populated, and the inhabitants and business interests depend directly or indirectly upon the sugar industry, which is at this time in an exceedingly precarious condition, and unless something is done by Congress to relieve the situation there must be a total industrial collapse in those provinces. Were there admitted to the United States three or four hundred thousand tons—and there is no likelihood that in the near future the exports of sugar from the islands to the United States will reach any such sum—it would not have any effect upon the price of sugar in the United States, but it would greatly increase the prosperity of the two important provinces named. Sugar is also raised in Pampanga, Cavite, and Laguna, but not so successfully

as in Negros and Panay. The conditions prevailing in the islands of Negros and Panay are typical of those throughout the islands. The growth of sugar in Formosa is apt to interfere very largely with the sugar trade of Japan, which already is hampered by a heavy duty.

#### TOBACCO.

The falling off in the production of leaf tobacco has already been alluded to, as well as the causes for the same. I can not too strongly urge the necessity for the reduction of the Dingley tariff in its application to goods imported from the Philippine Islands to 25 per cent of the rates therein imposed. I am confident that neither in the sugar market nor in the tobacco market will the effect of the amount to be introduced be materially injurious to any interest in the United States, while at the same time it will be of the greatest importance to the prosperity of the islands, and will be a most convincing argument with the people of the Archipelago to show the real interest that the people of the United States feel in the welfare of the Filipino people.

#### THE LABOR QUESTION.

American and foreign business men continue to complain of the difficulty in securing good labor. This question was discussed in my last annual report, and nothing has occurred since that time to change my views. I think it would be a great political mistake to admit the Chinamen freely into these islands as laborers. I am convinced that the Filipino, as conditions settle, can be made a good laborer; not so good as the American, not so good as the Chinaman, but one with whom it will be entirely possible to carry on great works of construction. We are now employing 2,500 Filipino laborers on the Benguet road, and our engineer reports that, wages considered, they are doing good work. We had an unfortunate experience in obtaining labor for this road, due to a misunderstanding with the proposed laborers, and to the fact that the men were obtained from an undesirable class in Manila and the neighboring provinces. It was fairly inferable from the facts that the persons who agreed to furnish the laborers, either intentionally or unintentionally, misled the laborers as to the terms upon which they should be employed. I append hereto, as Exhibit N, the report of the investigation made by the supervisor of fiscals concerning the failure of the first attempt to employ large numbers of laborers on the Benguet road. Since that time, however, the superintendent has been able to get Filipino laborers from all over Luzon, and, as already stated, the number is 2,500 and it is growing. The Atlantic, Gulf and Pacific Company, which is engaged in building the great Manila port works, needing in its employ from 500 to 1,000 men, has adopted the system of making the laborers comfortable and at home, and now can procure more labor than it needs, and good

labor, too. The following letters from the vice-president of the company seem to leave no doubt upon this point:

MANILA, *July 2, 1903.*

SIR: Answering your esteemed verbal inquiry as to our success with the Filipino labor, we beg leave to state as follows:

First. We believe that Filipino labor can successfully be used. We are employing about 1,000 Filipinos, which is a practical demonstration that this statement is not a theory.

Second. To successfully employ Filipino labor is, to the American employer of labor, a new business, which has to be learned. If he can not learn it he can not do business in the Philippine Islands.

Third. In general, the Filipinos have to be taught how to work. This requires a considerable proportion of intelligent high-grade American foremen and mechanics.

Fourth. The way to keep the Filipino laborer permanently in one's employ is to so arrange his surroundings that he is better off and more contented there than anywhere else. This we have attained by means of providing homes for the Filipinos and their families; also amusements, including Sunday fiestas, and schools where their children may be educated.

Fifth. We are opposed to the introduction of the Chinese. The only argument that we can see in its favor is that it may somewhat expedite the development of the resources of the islands. This temporary advantage is, we believe, overbalanced and overwhelmed by the ultimate injury to both the Americans and natives in the islands.

Sixth. We believe that the greatest need of the islands is the abolition of the Dingley tariff as far as it applies to the Philippines. We want the American market, not the Chinese laborer.

Very respectfully,

ATLANTIC, GULF AND PACIFIC COMPANY,  
By H. KRUSI, *Vice-President.*

Hon. WM. H. TAFT,

*Governor Philippine Archipelago, Manila, P. I.*

MANILA, *November 12, 1903.*

SIR: Referring to your esteemed verbal request to state whether our subsequent experience with the labor situation here is in accord with our letter dated July 2, on this subject, would state that our experience since that time has confirmed us in our opinion therein advanced. We are having no difficulty whatsoever with our Filipino labor, who are doing the bulk of the work under our harbor contract.

The well-known civil engineer, Maj. C. F. Case, was recently at our quarry, and can advise you, if desired, as to the state of affairs there.

I wish to strengthen the statement made in my former letter with reference to the use of American foremen and mechanics. These men are the backbone of our organization, and a certain proportion of them are absolutely essential to the success of any enterprise requiring labor. They are required both to lead and instruct the Filipinos. They must be practical men and not afraid to work with their own hands. Our experience is that about 8 per cent of American foremen and mechanics is advisable.

We are firmly convinced that the best interests of the Philippines demand the use of Filipino and American labor, to the exclusion of the Chinese.

Very respectfully,

ATLANTIC, GULF, AND PACIFIC COMPANY,  
By H. KRUSI, *Vice-President.*

Hon. WM. H. TAFT,

*Civil Governor Philippine Archipelago, Manila, P. I.*

I also append the report of Captain Couden, of the United States Navy, upon the capacity of the Filipino for labor. He has charge of

the large number of laborers employed at the Cavite Navy-Yard. It is marked Exhibit O.

The new electric street railway company of Manila, which is just beginning its work of construction, has had no difficulty in securing all the labor it desires.

The Commission employed Messrs. Norton and Drew as railroad engineers to make a reconnaissance survey for trunk lines through the island of Luzon. This report has been published, but will be hereto appended, for the sake of convenience, as Exhibit P. Mr. Norton is quite discouraging in regard to the possibility of securing native labor for the construction of railroads. I think that the facts do not justify his position in this respect. The Manila and Dagupan Railway was built with native labor, and the extensions which are now being constructed under franchises granted by the Commission are being built by the same labor. It is possible that were a very general system of railroad construction begun all at once in the islands, the supply of laborers here would be found deficient. In such contingency the emergency could be met by special legislation permitting use of coolie labor for a short period; but I anticipate no such necessity.

There is more importation of Japanese labor, but it has not as yet reached any proportion likely to have an effect upon the labor market.

#### THE EFFECT OF LABOR ON THE INVESTMENTS OF CAPITAL.

There is no doubt that the iteration and reiteration of the deficiency in the supply of labor in the Philippine Islands have had the effect of frightening American investors of capital from coming into the islands. The Commission is strongly desirous of encouraging American capital to come here, but it should be noted that if American capital declines to come that English, Belgian, and other foreign capital is merely awaiting the franchises which are requested for railroad and other constructive enterprises, and that it will be the duty of the Commission to grant such franchises for the benefit of the islands. The owners of English capital already invested in the Manila and Dagupan Railway have accepted two franchises granted for the construction and operation of branches for that railway, and are very anxious to secure other franchises extending their railway in other directions. They are sufficiently familiar with the possibility of securing native labor and of making it available for reasonably economical construction of their works not to be frightened away from the accepting of such franchises and making such investments. A reluctance on the part of American investors will certainly lead to the acceptance of their propositions. It seems to me that this much ought to be said by way of warning American investors that when later on they shall come into the islands, and shall find foreign capital strongly intrenched in many profitable

enterprises, they will have only themselves to blame for a failure to seize the opportunity when it was offered them.

The disposition to harken to pessimistic maligners of conditions in the Philippines may prove to be, in this sense, quite costly.

#### RAILROAD AND OTHER CONSTRUCTION.

The political conditions in the islands are now such as to make the time ripe for a period of great construction. For the next decade railroads, canals, and steamship companies should revolutionize the interior trade of the islands, and should have a most marked effect upon the export trade. There are a number of short lines of railroads that could be constructed, and doubtless will be, without governmental aid, but there are other lines of longer and more difficult construction which should at once be begun, but which we can not expect to have begun unless there is actual governmental financial encouragement. For this reason it seems to me wise that the Commission be authorized, with the approval of the Secretary of War and the President of the United States, to enter into contracts of guaranty with railroad companies to whom a franchise for the construction of a road shall be granted by which an income of not exceeding 4 per cent, and probably not exceeding 3 per cent, shall be guaranteed on the investment, the amount of which shall be fixed in the law. This method of financial encouragement is much to be preferred to the granting of lands or other forms of governmental subsidy, and I recommend to the Commission that in its report to the Secretary of War, to be transmitted to Congress, it ask for the granting of such power. It is very possible that under the Philippine act, as now passed such power exists, but it would greatly aid in securing public confidence if this power were expressly granted.

#### HEALTH.

The cholera, which began in March, 1902, has continued in the islands down to the time of writing. The number of cases was something over 150,000 and the number of deaths something over 100,000. The number of deaths and cases has been very much smaller in the city of Manila than in the provinces which the disease has visited. This is due to the fact that Manila has a water supply which has been carefully guarded from pollution. There is a great need of improvement in the water supply of the smaller towns. The Commission has directed the consulting engineer to investigate the cost of a plant for driving deep or artesian wells in each province of the islands.

Few cases of plague have been found or reported this last year in Manila. An outbreak of plague occurred in Cebu, disclosing an unsanitary condition in that city that required some radical measures on the part of the board of health to remedy.

There is no bureau of government more important in the development of these islands than that which is charged with looking after the health of the inhabitants. The islands, though they contain 8,000,000 people, are sparsely settled. The natural increase by births should be far greater. The immense loss of life from infantile diseases, before the age of 6 months is reached, is one reason why the increase of population is slow. It is within the function of the health board to encourage a better hygienic treatment of young children than now prevails. The improvement of the drinking water, too, will much decrease the death rate.

In connection with the subject of health, reference should be made to the province of Benguet and to Baguio, the capital of that province. The secretary of commerce and police will refer to the work now being done in the construction of the Benguet road from Pozorrubio, through Twin Peaks, to Baguio. There have been serious engineering mistakes made in the road, and it is proving to be much more costly than was expected; but when completed its importance in the development of these islands can hardly be overestimated. One of the things essential to progress in the islands is the coming of more Americans and Europeans who shall make this their business home. If there can be brought within twelve hours' travel of Manila a place with a climate not unlike that of the Adirondacks, or of Wyoming in summer, it will add greatly to the possibility of living in Manila for ten months of the year without risk. It will take away the necessity for long vacations spent in America; will reduce the number who go invalided home, and will be a saving to the insular government of many thousands of dollars a year. It will lengthen the period during which the American soldiers who are stationed here may remain without injury to their health and will thus reduce largely the expense of transportation of troops between the islands and the United States. More than this, Filipinos of the wealthier class frequently visit Japan or China for the purpose of recuperating. People of this class are much interested in the establishment of Baguio as a summer capital, and when the road is completed a town will spring up, made up of comfortable residences, of a fine, extensive army post, and sanitariums for the relief of persons suffering from diseases prevalent in the lowlands. It is the hope of the government that the Roman Catholic Church will send American priests as it has sent American bishops to the islands, to assist in the moral elevation of the people. The fear of the effect of the climate has kept many from coming. The Roman Catholic Church authorities have announced their intention of erecting rest houses at Baguio for the purpose of the recuperation of their ministers and agents. The Methodists and Episcopalians have already secured building lots in Baguio for this purpose. It is the settled purpose of the Commission to see this improvement through, no matter

what the cost, because eventually the expenditures must redound to the benefit of the government and people of the islands. We have already stated, in the report on the public-land act, that it is proposed, under that act, which allows the organizing of town sites, to sell the public land in suitable lots at auction so that everyone interested shall have the opportunity to obtain a good lot upon which to build a suitable house.

#### SCHOOLS.

One of the most gratifying things to report this year is the great increase in the school attendance in all the provinces but one. This increase is seen both in the attendance of children at day schools and also in the doubled attendance at night schools by adults. Still, only about 150,000, or 10 per cent of the population of school age, are receiving public instruction. We have neither teachers nor schoolhouses enough to carry out our purpose of giving primary English education to every child of school age in the Archipelago. Our resources are not sufficient to permit the necessary expenditure. Several millions could be well expended in the erection of large, airy, and healthy schoolhouses, and the number of teachers might well be multiplied by seven. There is an intense desire throughout the islands to learn English, and when one is familiar with the number of requests for American teachers and for the establishment of schools in which English can be taught, from Aparri to Mindanao, he is justified in smiling at the utterly unfounded charge made by persons professing to have some knowledge in respect to the islands, that we are forcing the English language upon an unwilling people. Here is possibly not the place to defend the policy of a general system of common school education in the islands. I am aware that our plans for education have been the subject of considerable criticism by men whose experience in eastern countries entitles their views to great weight, on the ground that by giving education to the people we unfit them for agricultural and other manual pursuits and inspire them with a desire to succeed only as clerks and professional men. That the result of higher education upon a people unfitted by training and moral stamina to use it to good purpose may be productive of evil need not here be denied or discussed. That superficial education frequently produces discontent and brings about social disturbances may also be conceded. The condition, however, which is most productive of social disturbances is the existence of a vast mass of ignorant people easily and blindly led by the comparatively few of their superficially educated countrymen into insurrection and lawless violence without any definite knowledge or certainty as to the beneficial results therefrom. The theory upon which we justify, even on political grounds, the spread of education is that the more the mass of ignorant persons is reduced in number by diffusing among them common school education the less likely are

they to be led away by degenerate political fakirs into experiences and projects that can lead to nothing but disaster. The common school education does not unfit either the oriental or the occidental laborer for manual effort, but it does enlighten him as to a more civilized life, and does increase his wants and thus does furnish a motive for more continuous and harder labor.

The Commission has thought it wise to inaugurate the plan of sending to America each year for education an average of 100 boys and girls of high-school age for the purpose of enabling them to become teachers, lawyers, doctors, and engineers, on condition that for five years after their return they shall be subject to call by the Government for public service. One hundred boys were sent in October. Seventy-five of the appointments were allotted to the provinces in proportion to the school population and interest in the schools shown in the provinces. They were selected in each province by the division school superintendent after a conference with the provincial governor, and then 25 were selected at large by the Civil Governor. Seventy-five were required to come from the public schools. They left Manila in charge of Professor and Mrs. Sutherland. They go to southern California, and will, in groups of eight and ten, be sent to the county high schools of that State which bear a high reputation. It is thought that by June of next year Professor Sutherland, who will have general supervision of them, may be able to classify them properly and distribute them among the preparatory schools or colleges of the East. The proficiency of the students in English formed an important element in the grounds for their selection. The plan was very popular and awakened a great interest in every town in the islands. As far as possible the selections made this year were by competitive examination. Next year a more rigid system will be followed. Next year probably one-third or one-half of those selected will be girls, with a view to their education as teachers.

#### THE PHILIPPINE EXHIBIT AT THE LOUISIANA PURCHASE EXPOSITION AT ST. LOUIS.

By Act No. 514, passed on the 11th of November, 1902, for the purpose of securing, organizing, and making an exhibit of Filipino products, manufactures, art, ethnology, education, and habits of the people, it was provided that there should be a board of three members, to be appointed by the civil governor, with the consent of the Philippine Commission. The board was authorized and directed to hold a preliminary exposition of certain of the exhibits at Manila in the autumn of 1903, and to establish a permanent museum in Manila. It was authorized to secure the needed land from the authorities of the St. Louis Exposition, to expend the necessary sums in the drawing of

plans for the necessary buildings and for their construction, and for the laying out of the ground included in the tract assigned to the Philippine exhibit; to incur all necessary expenses in securing the exhibits, including the necessary advertising, in the transportation of exhibits from the point where secured in the Philippine Islands to Manila and thence to St. Louis. The board was authorized to incur in all this work obligations not exceeding in the aggregate the sum of \$250,000. The heads of all the bureaus of the insular government and the governor and members of the provincial boards of provinces and all municipal presidents and other officers were directed to furnish every assistance in their power to the exposition board in obtaining the exhibits. The board was directed to render a monthly report of the work done by it to the civil governor, and a quarterly account of its receipts and expenditures to the civil governor and the auditor of the islands. By another section the civil governor was authorized to appoint five honorary commissioners to visit the exposition and to report upon the same. One hundred and twenty-five thousand dollars gold was appropriated to meet the obligations incurred under the act. Amendments were made to the act subsequently, varying some of the powers of the commission and dispensing with the necessity for a preliminary exposition in Manila, which proved to be impracticable, and appropriating \$325,000, making the total appropriation half a million dollars for the expense of the exhibit. At the same time there was obtained from the authorities of the St. Louis Purchase Exposition the use of 40 acres of land, the promise of a contribution of \$200,000 to the erection of the necessary buildings at the exhibit at St. Louis, and the proceeds of concessions granted in the grounds of the exhibit. Dr. William P. Wilson, director of the Philadelphia Commercial Museum, Dr. Gustavo Niederlein, his assistant, and Señor Pedro A. Paterno, who had had much to do with a Filipino exhibit at Madrid, were named the exposition board, and Señor Leon M. Guerrero, a Filipino of high scientific attainments, was made the secretary of the board. Doctor Niederlein came to the islands immediately upon his appointment, and with extraordinary energy has secured upward of 50,000 exhibits, which will probably be increased to 80,000. The Secretary of War has ordered a battalion of four companies of Philippine Scouts to be sent to the exposition, and the Philippine Commission has ordered two companies of constabulary and one constabulary band of 80 pieces also to visit the exposition and remain there while it is open. Among the exhibits will be several colonies of the various tribes, civilized and uncivilized, for the purpose of giving opportunity for ethnographic study of the people of the Philippines.

The work has not been without its obstacles, but it is hoped that the exhibit will be of interest to the American people and give them a

clearer idea than they now have, not only of the inhabitants of the islands, but also of their extent and the variety of their products, the work which has been done in the matter of education, their artistic tastes, and their capacity in many directions. The section directing the appointment of five honorary commissioners has not yet been amended, but it is the purpose of the Commission to increase the number to a delegation of from 30 to 50 prominent Filipino gentlemen of education and culture, who will visit the exposition and various cities of the United States at the expense of the insular treasury, with a view to bringing the two peoples nearer together and to showing the intelligent Filipinos what our country is and what our institutions mean. At the same time this delegation will be able, in the congresses at St. Louis, to represent with dignity the intellectual development of the islands and to speak with authority upon the needs of their people. It is thought that the large amount of money expended is justified by the commercial advantages to the Philippine Islands which will follow an exhibit of its products and resources, as well as the great benefit to be derived from a closer union and a better mutual understanding between the American and Filipino people. I append hereto as Exhibit Q the report of the exposition board.

#### THE CENSUS.

The details of the taking of the census will doubtless appear in the report of the secretary of public instruction, in whose department the bureau of the census by law is put, and the rough results of the census, so far as population is concerned, will there appear. It is sufficient to say that the census was almost wholly taken by Filipinos under the direction of General Sanger and his skilled assistants, Mr. Gannett and Mr. Olmstead, and that on the whole the machinery proved to be very satisfactory. The returns are now being compiled in Washington, but will probably not be published before October of 1904. At the end of two years from that date, if the President shall find that tranquillity prevails in the Christian Filipino provinces, it will become his duty to direct a holding of an election for selection of members for a general assembly of the Christian Filipino people, which will be a coordinate branch of a legislature to be composed of the Commission and the legislative assembly. This will doubtless prove to be a most important step in the growth and development of the Philippine people, and I have abiding confidence that the conservative elements in the Filipino people will accept this concession on the part of the Congress of the United States as a proffered test of their capacity to avoid foolish and impracticable legislative measures and of demonstrating the existence among them of that self-restraint which is indispensable to the growth of popular and effective self-government.

## OPIUM.

Reports from various provinces and information from other sources have convinced the Commission that the smoking of opium is spreading among the native Filipinos. Under the Spanish régime Filipinos were under penalty of fine or imprisonment if convicted of smoking opium, but opium joints or smoking places were licensed to be used only by Chinamen. Under the tariff act now in force the tariff on opium was somewhat reduced, on the theory that a high tax on the importation of the drug increased the smuggling of it. The result is that except for the tariff there is no restriction at all on the sale of opium at present, except that town councils are required to pass ordinances suppressing opium joints.

Commissioner Moses was appointed to draft an opium bill, and on his resignation the task fell to Commissioner Smith. He drafted a bill which, in short, forbade the use of opium by Filipinos, or the sale of it to Filipinos, but provided for the granting of the monopoly for the sale of opium to Chinamen for one year to the highest bidder. The maintaining of a public place for the smoking of opium was punished by a fine, and every Chinaman was forbidden to smoke opium except on his own premises. This bill called forth considerable opposition, especially from the president of the Evangelical Union, of Manila. Doctor Stuntz, of that association, who had had a large experience in India, was especially emphatic in condemning the sale of the monopoly, which he insisted had a tendency to increase rather than to diminish the use of opium. A very extended discussion before the Commission was carried on, and communications were had with the Secretary of War upon the subject. A stenographic report of the discussion has already been forwarded to Washington.

The result was that the Commission hesitated to take action before a more thorough investigation could be made into the methods of dealing with opium smoking in oriental countries. Accordingly a law was passed, No. 800, under which a committee was to be appointed by the civil governor to visit the various oriental countries and make a report upon the methods of restricting the sale and use of opium which were in force in the East. Major Carter, surgeon, United States Army, and commissioner of health of the Philippine Islands, Dr. José Albert, a prominent Filipino physician of Manila, and the Right Rev. Charles H. Brent, Protestant Episcopal Bishop of the Philippine Islands, were appointed to make up this committee. Their report is expected in February or March, and until that time action by the Commission has been delayed.

## CIVIL SERVICE.

The report of the civil-service board, which is attached hereto and marked "Exhibit R," shows that the principles of the merit system are

being enforced with much rigor, that the examinations for places are increasing, especially among the Filipinos, and that the proportion of the places given to the Filipinos is becoming greater. In the next three or four years the proportion of Filipinos in the government is certain to increase rapidly. There are many places in the executive departments which can only be filled by one who knows English. The rapidity with which the Filipinos are learning English gives assurance that this cause of their exclusion will not much longer continue.

Americans responsible for the government of these islands have suffered a most humiliating experience during the past year in the numerous defalcations of Americans charged with the official duty of collecting and disbursing money. The defalcations in the islands have extended also to the clerical service of the American business firms in the islands. The practice of the government has been to appoint to positions of pecuniary trust, especially to those where the amount of money handled was large, Americans alone. They were all placed under bond in either the Union Surety and Guaranty Company, or, later, in the Fidelity and Deposit Company of Maryland, or the American Surety Company of New York. The insular treasurer and the insular auditor have had great difficulty in securing examiners in sufficient number to make the examinations as frequently as the law requires, and the immunity from frequent examinations, which in future will not continue, may explain some of the defalcations. Everyone connected with the government realized as soon as the defalcations were made public the demoralizing effect that such revelations must have upon the service unless such dishonesty was promptly punished. A still more serious result was the effect upon the Filipinos, who had been advised that Americans would be honest where others had not been so careful in accounting for public money. Prosecutions were vigorously begun against all defaulting officers, and the surety companies have responded when shown their liability.

So far as is known, the only defaulting officer who has escaped trial is a deputy collector named Stewart, at Iloilo, who managed to reach the United States at a time when there was no extradition law. It is hoped that he will be apprehended and brought back. In other cases defaulting officials have reached Hongkong, Shanghai, or even Montreal before their arrest, but the insular government, sparing no effort or expense, has succeeded in bringing them to their well-deserved punishment. Two defaulters, though tried, have escaped conviction of embezzlement on the ground that others had stolen the money. In the case of one of these, three subordinates were convicted.

The question that naturally presents itself after a review of these instances of dishonesty is whether we are to expect a recurrence of them. I am glad to say that I think not. They are the natural result

of the circumstances under which selections for official positions in the beginning of this government had to be made. The mode of selection under the civil-service law could not, of course, be applied at first, because the government had to become at once a going concern. The army officers who had begun the civil government here had to be relieved, the number of officers, as civil government spread through the provinces, had to be largely increased, and the material from which selections had to be made was those men who had resigned from the Army or had been mustered out and proposed to remain in the Philippines. It was impossible in the selection of so many officers to institute a thorough investigation into their lives in the States. There were men among those who have proven since to be defaulters who changed their names with the view of avoiding the investigation which would have disclosed dishonesty in their past lives. Then, too, in the very unsettled conditions which have prevailed here, men who would not have yielded to temptation to dishonesty in the States were unable to resist it here. As was said in the first report of the Commission:

Many leave the United States honest, but with the weakening of the restraints of home associations and with the anxious desire to make so long a trip result successfully in a pecuniary advantage, demoralization and dishonesty are much more likely to follow than at home. To avoid the dangers presented by these conditions it is necessary, first, to banish all favoritism and political considerations from the selection of civil servants and rigidly enforce the requirements of a competitive examination and a satisfactory showing by the applicant of his good moral character; second, to pay adequate salaries and to allow liberal leaves of absence adapted to preservation of health in the Tropics, thus securing that contentment with the service without which good work is not possible, and, third, to awaken an enthusiasm in the service by offering as a reward for faithful and highly efficient work a reasonable prospect of promotion to the highest position in the government.

The lack of ordinary, rational, and healthful amusements for one engaged as a provincial officer in the country itself turns the minds of not overstrong natures toward vicious pursuits and enjoyments like those of gambling and licentious association with native women. There is thus furnished a means of spending money in excess of the legitimate salaries, which soon leads on to an appropriation of the public funds. In the beginning of this government it was impossible to organize a system of inspection which should enable us to follow the private lives of our employees charged with the custody of money, but as the organization becomes better and our system of inspection becomes more thorough we are able to furnish the weaker of our employees the fear of expected inspection as a strong motive for pursuing honest ways. There follows below a short statement of the history of each of the defaulting officials in the Philippine civil service during the period July 1, 1902, to November 9, 1903:

JAMES F. BEAHAN.—Born at Boston, Mass., in 1877. Enlisted in Company A, Ninth Massachusetts Volunteers, May 4, 1898; discharged November 26, 1898.

Enlisted in Company F, Ninth U. S. Infantry, January 14, 1899; discharged January 31, 1900, to accept employment as clerk in the office of the chief surgeon, provost guard, Manila. Continued with the board of health, and promoted to clerk at \$1,600 October 1, 1901; appointed disbursing officer April 1, 1902, at \$1,800 per annum. An examination, made in October, 1902, of his accounts disclosed numerous claims for credit covering duplicated payments, besides evidence of forgery of names to a pay roll for which he had claimed credit. These fraudulent claims for credit amounted to about \$4,300 Mexican currency, but there were besides many irregular vouchers and improper transactions. Mr. Beahan was tried and convicted on two charges, the first of "falsification of public documents," for which he was sentenced to twelve years imprisonment December 16, 1902. On the second charge, "misappropriation of public funds," he was given an additional sentence of twelve years imprisonment March 31, 1903. Between the time of his arrest and final conviction Mr. Beahan fled to Shanghai, China, where he was apprehended and returned. The government secured by attachment the amount of a personal deposit of \$2,000 gold made by him in one of the Manila banks.

**WILLIAM A. WILSON.**—Born at Buffalo, N. Y., in 1871. Enlisted in the Thirty-fifth Infantry, U. S. Volunteers, August 22, 1899; discharged March 13, 1901, as regimental commissary sergeant; temporarily employed in police department, April 1 to August 9, 1901, as clerk at \$1,200 per annum; appointed to the bureau of the insular treasury as clerk at \$1,200 per annum August 12, 1901, as a result of civil-service examination; transferred to office of the captain of the port at \$1,600 September 12, 1901; transferred to the bureau of coast guard and transportation January 1, 1902, at \$1,800; promoted to disbursing officer April 1, 1902, at \$2,000. In December, 1902, he disappeared, and in the examination of his accounts which followed an actual cash shortage of \$19,265.65 Mexican currency was discovered. Wilson was traced by way of Hongkong and Shanghai to Montreal, Canada, where he was arrested by United States secret service agents and returned to Manila for trial. He was charged with "misappropriation of public funds" and "falsification of a public document." In the first case he received a sentence, April 13, 1903, of twelve years imprisonment, and in the second case a sentence of twelve years and one day and a fine of 1,250 pesetas, April 20, 1903. Demand was made for the full amount of the shortage upon the Fidelity and Deposit Company of Maryland and the American Surety Company of New York, joint sureties, and the claim was settled in full October 22, 1903.

**MATTHEW T. E. WARD.**—Appointed subinspector in the Philippines Constabulary May 1, 1902; promoted to fourth-class inspector July 1, 1902. In October, 1902, he was found short in his cash and commissary accounts to the amount of \$1,266.26 Mexican currency, and was tried on the charge of "misappropriation of public funds," and was sentenced to imprisonment for two years, four months, and one day on December 4, 1902. The full amount of his shortage was paid by the Union Surety and Guaranty Company of Philadelphia August 31, 1903. An additional shortage on account of property is still undetermined.

**CHARLES J. DE WITT.**—Born at Brooklyn, N. Y., in 1876. Formerly an enlisted man in the Third U. S. Cavalry; appointed fourth-class inspector, Philippines Constabulary, at \$800 per annum, September 19, 1902. In January, 1903, he was found short \$10,498.83 Mexican currency in his cash, commissary, and property accounts; was tried for "misappropriation of public funds" and sentenced, February 9, 1903, to ten years' imprisonment. The amount of his shortage was paid August 15, 1903, by the Fidelity and Deposit Company and the American Surety Company, joint sureties.

**O. G. MILNE.**—Born in New York in 1881. Appointed postmaster at Tacloban, Leyte, September 1, 1902, at \$1,000 per annum. In November, 1902, he claimed to have been the victim of a robbery of over \$12,000 United States currency in money-

order funds from his office. His statements were not consistent. The matter was investigated by the inspectors of the bureau of posts, and upon the evidence secured Milne was arrested and convicted of "misappropriation of public funds" to the amount of \$12,140.80 United States currency. He was sentenced, May 1, 1903, to imprisonment for eight years and one day. After his conviction he confessed his crime and pointed out where \$9,102.50 United States currency, for which he was accountable, was concealed. This sum was recovered and a further sum of \$3,000 United States currency, the full amount of his bond, was paid July 21, 1903, by the Union Surety and Guaranty Company of Philadelphia.

ALBERT C. ROBERTS.—Born in Kentucky in 1873. Served as sergeant of Company D, Second Kentucky Volunteer Infantry, and as regimental quartermaster-sergeant of the same regiment; enlisted May 3 and discharged August 31, 1898. Served in subsistence and quartermaster's departments of U. S. Army from November 1, 1898, to June 30, 1901; appointed bookkeeper in the Insular Cold Storage and Ice Plant, July 1, 1901, at \$1,500 per annum; compensation increased to \$1,800 January 1, 1902. Upon examination of his accounts in May, 1903, he was found short to the extent of \$1,622.42 United States currency, and \$7,014.65 Mexican currency, and was tried on the charge of "misappropriation of public funds," but was convicted of permitting others to abstract public funds, and sentenced July 10, 1903, to pay a fine equal to the amount of the shortage in addition to the civil liability under his bond. Demand was made upon the Fidelity and Deposit Company and the American Surety Company, joint sureties, and the claim was settled in full October 22, 1903. Case pending on appeal of the government, seeking a sentence of imprisonment for years in the penitentiary.

J. VALENTINE KARELSON.—Born in New York City in 1875. Enlisted in the Twenty-seventh Battery, Indiana Light Artillery, May 10, 1898; discharged July 17, 1898, for disability; appointed to the position of clerk, at \$900 per annum, in the Manila post-office, May 16, 1902, as a result of civil-service examination; transferred to the position of postmaster at Calamba, Laguna, January 15, 1903, at \$1,000 per annum. In April, 1903, he claimed to have lost \$1,000, United States currency, in transit to his depositary at Manila. Investigation showed that his claim was a false one. He was charged with "misappropriation of public funds," convicted, and sentenced July 5, 1903, to imprisonment for ten years and one day, and to pay a fine of \$1,000 United States currency. Demand has been made upon the Union Surety and Guaranty Company, but the matter is unadjusted.

WALTER SHULTZ.—Born at Houstonia, Mo., in 1875. Enlisted in Company H, First Territorial Infantry, July 27, 1898; mustered out February 17, 1899; reenlisted in Company H, Thirty-fourth Infantry, July 25, 1900; discharged as sergeant February 26, 1901; appointed postmaster at Laoag, Ilocos Norte, on a percentage basis, March 1, 1901; salary fixed at \$1,000 per annum April 1, 1901; returned to the percentage basis October 1, 1901; reappointed postmaster at Laoag April 1, 1903, at \$900 per annum; salary increased to \$1,000 July 1, 1903. In July, 1903, he was found short \$2,500 United States currency by Post-Office Inspector Ladd. Shultz confessed and made a full statement of his peculations. He was charged with "misappropriation of public funds," and sentenced to imprisonment for eight years and one day. The final audit of this account showed a net shortage of \$2,511.97 United States currency. It appeared by the confession of the late postmaster that the sum of \$809.52 United States currency was abstracted from the money-order funds prior to October 1, 1902, at which time a bond given by the Union Surety and Guaranty Company was effective. For the remainder of the shortage, \$1,702.45 United States currency, the Fidelity and Deposit Company and the American Surety Company were deemed jointly liable. Demand was made upon the surety companies concerned, and the amount for which each was liable was paid October 22, 1903.

BARTLETT SINCLAIR.—Born at Lancaster, S. C., in 1864. A member of the New York bar and subsequently auditor of the State of Idaho. Most highly recom-

mended. Appointed treasurer province of Rizal September 25, 1901. In January, 1903, he was found short in his accounts in the sum of \$1,410.40 United States currency. He was removed from office and charged under a Spanish statute still in force with "carelessness and negligence in office," as a result of which he permitted others to abstract public funds. The books of the late treasurer, as kept by him, showed a shortage of over \$10,000 Mexican currency, while additional debits not charged, amounting to over \$10,000 Mexican currency, were discovered in the examination of his office. The case against Sinclair resulted in acquittal, on the peculiar ground that he was as attentive to his duties as a man with his lack of money accounting sense could be expected to be, October 20, 1903. The loss has been paid in full by the sureties.

EMORY H. FOGERTY.—Born at Worcester, Mass., in 1874. Cadet United States Revenue-Cutter Service, 1898-1900. Appointed to the Philippine civil service from the United States as a result of civil-service examination April 21, 1902; assigned to the position of deputy treasurer, province of Rizal, under Bartlett Sinclair. Mr. Fogerty made a written confession of having appropriated to his own use a sum equivalent to \$1,276 United States currency, pleaded guilty, and was sentenced April 8, 1903, to three years' imprisonment.

RICARDO GUTIERREZ.—Born in Baliuag, P. I., in 1882. Appointed clerk in the office of the treasurer, province of Rizal at \$180, July 9, 1901; promoted September 15, 1901, to the position of deputy treasurer at \$300 per annum. While deputy of ex-Treasurer Sinclair, was charged with misappropriation of \$244.34 Mexican currency, but reimbursed the government before the date of his sentence, which was imprisonment for four months and one day.

GREGORIO DE SILVA.—Born at Pasig, P. I., in 1875. Appointed clerk in the office of the treasurer, province of Rizal, on July 15, 1901, at \$180 per annum. While deputy of ex-Treasurer Sinclair, he was convicted of having appropriated \$46.28 Mexican currency, but reimbursed the government before a sentence of two months' imprisonment was imposed.

FRANK DEAN TOMPKINS.—Born at Troy, N. Y., in 1870. Appointed first lieutenant, First U. S. Volunteer Infantry, June 21, 1898; honorably mustered out October 28, 1898; appointed first lieutenant, Thirty-third U. S. Volunteer Infantry, April 5, 1899; detailed as treasurer and collector of internal revenue, province of La Union, while in the military service, and appointed treasurer of the province of La Union August 15, 1901, at \$2,000 per annum. An examination of the accounts of Dean Tompkins made in June, 1903, disclosed a shortage of \$221.15 United States currency, and \$22,744.25 Mexican currency. After the seizure of his office, July 5, 1903, by the deputy of the insular treasurer, Mr. Tompkins made cash payments on his shortage amounting to \$1,129.99 United States currency and \$7,061.26 Mexican currency, besides payment by personal notes given by him to various persons for salary vouchers, for which he claimed credit in his accounts, amounting to \$294.50 United States currency and \$1,338.74 Mexican currency. The persons who accepted these notes now state that they did so with the understanding that the province was cramped for funds or that the actual cash was not available, and that the obligation of the government to pay was not discharged by acceptance of the notes. The notes were given to provincial officers and employees after the seizure of the office, however. Nine charges were filed against ex-Treasurer Tompkins—four for "estafa," four for falsification of public documents in forging names of municipal treasurers to receipts for money for which he took credit, and one for misappropriation of public funds amounting to \$221.15 United States currency and \$22,744.25 Mexican currency. One of the cases for "estafa" resulted in acquittal on account of a technicality. In the next case heard, the charge being forgery, the defendant was found guilty and sentenced to imprisonment for seventeen years, four months, and one day. During the hearing of the third case brought to trial, that of misappropriation of public funds, the defendant fell sick, and further hearing of the case was postponed to

October 1, 1903. This case resulted in conviction, and an additional sentence of imprisonment for nine years was imposed October 15. The loss is unadjusted. The remainder of the indictments are in abeyance.

**ALFRED E. WOOD.**—Born at Reigate, England, in 1864. Appointed in the United States to the Philippine civil service as clerk, at \$1,400 per annum, as a result of civil-service examination; assigned to the bureau of the insular purchasing agent upon arrival; resigned and appointed in the Census Bureau October 31, 1902; resigned December 5, 1902; reinstated and appointed chief clerk and deputy treasurer of the province of La Union December 15, 1902, at \$1,200 per annum. As deputy to Dean Tompkins, ex-treasurer of Union province, he made certain illegal collections from municipal treasurers and embezzled the same. The amount involved is a part of the treasurer's shortage. Wood was found guilty September 10, 1903, of "estafa," and sentenced to four months' imprisonment in the provincial jail.

**THOMAS P. COATES.**—Born in Illinois in 1880. Appointed to the position of clerk, bureau of customs, Condon, P. I., at \$600, on February 20, 1900. Promoted to coast district inspector of customs, San Fernando, Union, at \$1,400, on June 24, 1901. In July, 1903, he was found short in his accounts \$1,990.22 Mexican currency, by Supervising Special Agent Edwards, of the customs service. Coates was charged with misappropriation of funds, and also with "estafa," in using a false and fraudulent check of Dean Tompkins to deceive the special agent. He was found guilty of the first charge September 9, 1903, and sentenced to eight years' imprisonment. The defendant paid the amount of his shortage in open court.

**CHARLES H. OSBORN.**—Born in Brooklyn, N. Y., in 1875. Enlisted in Company B, Ninth New York Voluntary Infantry, May 2, 1898. Reenlisted in Company L, Third U. S. Infantry, July 20, 1900; discharged to accept employment as clerk in the office of the adjutant-general, Department of North Philippines, June 23, 1901; transferred to Quartermaster's Department December 21, 1901; appointed fourth-class inspector, Philippine Constabulary, June 20, 1902, at \$800 per annum; assigned as supply officer at San Fernando, Union, September 30, 1902; compensation increased to \$900 per annum June 1, 1903; June, 1903, he was found short \$6,081.55 Mexican currency, in his disbursing and commissary accounts, and was charged with misappropriation of public funds and "estafa" in using a false and fraudulent check of Dean Tompkins for \$3,000, to be used as cash during inspection of his accounts. Osborn was found guilty of misappropriation of funds and sentenced September 9 to ten years' imprisonment. Demand will be made upon his sureties without delay.

**QUINTIN R. GONZALEZ.**—Born at Manila, P. I., in 1870. Appointed fourth-class inspector, Philippine Constabulary, September 20, 1901, at \$800 per annum; promoted to third-class inspector June 17, 1902, at \$950; promoted December 18, 1902, to \$1,000. He was found short in his accounts to the amount of about \$1,600 Mexican currency, and is under arrest pending trial. The shortage has been made good by him.

**WILLIAM G. HOLLIS.**—Born at Chatham, Mass., in 1873. Enlisted in Company L, Fifth Massachusetts Infantry, June 1, 1898; mustered out March 31, 1899; served as property clerk and stenographer in the Quartermaster's Department in Cuba and later in the office of the depot quartermaster, Department of Northern Luzon, from 1899 to June 30, 1901; appointed clerk, office of the insular treasurer, July 1, 1901, as a result of civil-service examination, at \$1,200 per annum; salary increased July 15 to \$1,400; September 1, to \$1,600; October 17, to \$1,800; February 1, 1902, to \$2,000; appointed treasurer of Occidental Negros August 8, 1902. In June, 1903, an examination of his cash accounts showed a shortage, as of June 23, 1903, of \$11,063.11 Mexican currency, with an overage of \$86.71 United States currency. His trial is pending before the court of first instance of Bacolod. Demand will be made upon sureties for the amount misappropriated.

**JAMES W. WALSH, Jr.**—Born in North Dakota in 1876; appointed subinspector, Philippine Constabulary, at \$480 per annum, February 13, 1902; promoted April 1 to

fourth-class inspector at \$800; defaulted in his accounts in October, 1903. From the incomplete records in this office it appears that he is short in his disbursing account in the sum of \$10,557.66 Mexican currency, and in his commissary account in the sum of \$5,603.98 Philippine currency. He was convicted and sentenced to ten years' imprisonment for the shortage of more than \$10,000 in his local currency account, and was given an additional sentence of ten years' imprisonment for the embezzlement of commissary stores.

CHARLES G. JOHNSON.—Appointed subinspector, Philippine Constabulary, April 26, 1902, at \$480 per annum; promoted to fourth-class inspector at \$800 per annum on July 1, 1902. While acting in his capacity of supply officer of constabulary it appears that he turned pirate and was killed in an attempt to escape capture. Incomplete reports at hand indicate a shortage of \$8,625 Philippine currency. The defalcation in his accounts occurred in September, 1903. Demand will be made upon his sureties for the full amount involved.

For the purposes of comparison there follows a letter from the auditor showing the total number of officers in the Philippines handling money, either as receiving or disbursing officers, and the amounts handled:

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
OFFICE OF THE AUDITOR,  
*Manila, November 10, 1903.*

SIR: In compliance with your verbal request, I have the honor to submit herewith lists of the collecting and disbursing officers, insular and provincial (including the city of Manila), who served during the fiscal year 1903.

It should be noted that many persons served as collecting or disbursing officers in more than one capacity, and in such cases the name appears for each capacity, as such accounts, so far as the auditor is concerned, are as separate as if rendered by different individuals.

The lists may be classified as follows:

Number of officers who received or disbursed over \$2,000,000 .....	4
Number of officers who received or disbursed more than \$1,000,000 and less than \$2,000,000 .....	3
Number of officers who received or disbursed more than \$500,000 and less than \$1,000,000 .....	10
Number of officers who received or disbursed more than \$100,000 and less than \$500,000 .....	31
Number of officers who received or disbursed more than \$75,000 and less than \$100,000 .....	22
Number of officers who received or disbursed more than \$50,000 and less than \$75,000 .....	29
Number of officers who received or disbursed more than \$40,000 and less than \$50,000 .....	15
Number of officers who received or disbursed more than \$20,000 and less than \$40,000 .....	80
Number of officers who received or disbursed more than \$10,000 and less than \$20,000 .....	81
Number of officers who received or disbursed more than \$5,000 and less than \$10,000 .....	84
Number of officers who received or disbursed more than \$1,000 and less than \$5,000 .....	185
Number of officers who received or disbursed more than \$500 and less than \$1,000 .....	69
Number of officers who received or disbursed less than \$500 .....	491
Total .....	1,104

The treasurer of the islands, who is not included in the foregoing classification, received during the fiscal year deposits of insular funds amounting, approximately, to \$15,000,000 in United States currency and \$25,000,000 in Mexican currency. As depositary he received additional deposits amounting to \$27,965,608 in United States currency and \$24,612,902 in Mexican currency.

Respectfully,

A. L. LAWSHE, *Auditor.*

The honorable CIVIL GOVERNOR.

The percentage of defaulters thus appears to be less than 2 per cent. This is far too large, but we feel assured that next year will show a notable decrease. "It is an ill wind that blows nobody good," and the punishment of American officials for dishonesty has furnished the Filipinos a spectacle which they never enjoyed during the Spanish régime. It is not a matter of inference, but it is a matter of observation, that the prompt trial and severe punishment of American officials has inspired in the Filipinos confidence in the sense of justice of this government. The severe losses entailed on the surety companies during this year will probably necessitate an increase in the rate at which the bonds will be issued for the next year, and yet at no other time in the history of the islands, probably, is the surety business likely to be more lucrative than during the immediate future.

The revelations of dishonesty in the officials above named have not shaken, but have only strengthened our confidence in the wisdom of the merit system. The means of obtaining information concerning a man's previous character are being much improved, and the certainty of tenure produced by the merit system all tend to inspire the civil servant with an esprit de corps and convince him that the only possible course for him to pursue with a view to success is a devotion to duty and to the interests of the public and the government. The merit system excludes favoritism, and with favoritism excluded and the reasonable hope of promotion for good work present, there is a certainty of securing honest and enthusiastic civil servants.

#### THE COASTWISE LAWS.

Unless Congress takes some action, on July 1, 1904, the coastwise laws of the United States will apply not only to the interisland shipping trade, but also to the trade between the islands and the United States. In the present conditions nothing could be more disastrous to these islands. The effect of the laws would be to exclude from the islands and the American trade all but American bottoms. The interisland trade is as necessary to the life of the islands as the arterial system to the human body. The application of the United States coastwise laws would exclude a great majority of the ships now engaged in the trade and would inflict immense damage to the business of the islands. In 1899, by Executive order, the coastwise trade was limited to vessels bona fide owned either by a citizen of the United States,

resident in the islands, or a native inhabitant, or a resident who had become a citizen of the islands by the treaty of Paris. Even this order, if strictly enforced, would have excluded a large proportion of the available coasting vessels then engaged in the business, and the military authorities, to avoid the disaster of driving them out of the trade of the islands, winked at colorable transfers to Filipino clerks and agents in whose names certificates of protection were taken out. These vessels had been in the trade in Spanish times, and they were still needed. Any change in the existing laws should provide that vessels now having a certificate of protection should be allowed to continue in the trade. Indeed so convinced were the Commission that the interisland shipping was not extensive enough for the good of the islands that we procured an amendment to the Executive order by which, under certain restrictions, vessels under foreign flags may engage in the interisland trade. The occasion for this was a combination among the interisland shippers to keep up unreasonable rates. The amendment has had an excellent effect and rates are more reasonable, although still too high. If the present profits of the interisland trade are not sufficient to attract American capital, then certainly it would be selfish exploitation of these islands of an indefensible character to exclude vessels now in the trade and impose the heavy burden of higher freight rates in order to induce American capital to invest in coastwise vessels, and would furnish just ground for reproach against a government professing good will and doing evil. It seems to me that the best provision of law which could be adopted, so far as the interisland trade is concerned, would be to place the matter wholly in the discretion of the Commission, which, as conditions change and warrant it, could make the restrictions in favor of American and Filipino shipping greater.

With respect to the trade between these islands and the United States, I concur fully in the remarks of Collector Shuster in his annual report in which he says:

At the present time the greater [part of the freight traffic between the Philippines and New York is carried on in foreign bottoms. So far as indications go, any law which prevented the continuance of that trade in foreign bottoms until an equal tonnage of cheaply operated American freighters are actually available to take up that trade and maintain healthy rate competition, would result in a decided increase over the present rates of freight. This additional burden would fall upon the already weakened resources of these islands and such a result would be more than lamentable from every standpoint.

The tonnage plying between these islands and the Pacific coast is about equal to the present freight supply and no change in the present law seems advisable so far as trans-Pacific routes are concerned.

It is, therefore, earnestly recommended that the present laws, so far as they permit foreign bottoms to trade between these islands and the mainland territory of the United States, be not changed for a period of at least five years from July 1, 1904, and that positive legislation to that effect be had by Congress at an early date.

## THE INSULAR REVENUES.

The report of the auditor shows that the revenues of the islands for the year ending June 30, 1903, exceeded those for the year ending June 30, 1902, as follows:

*Comparative statement of revenues of the Philippine Islands, fiscal years 1902 and 1903, exclusive of provincial receipts and refundable collections.*

Items.	Fiscal year 1903.	Fiscal year 1902.
Customs.....	\$9,215,551.88	\$8,398,864.85
Postal.....	145,702.53	137,811.99
Internal.....	7,867.01	94,634.84
Miscellaneous:		
Ordinary.....	595,350.95	508,120.60
Extraordinary.....	567,581.97	42,571.86
City of Manila under provost-marshal (exclusive of internal revenue).....		85,709.51
Total insular revenue.....	10,532,054.34	9,267,718.15
Increase in 1903.....	1,264,841.19	
City of Manila.....	1,542,463.83	1,113,850.07
Increase in 1903.....	428,613.76	
Total, including city of Manila.....	12,074,518.17	10,381,563.22
Increase in 1903.....	1,692,954.95	

In the fiscal year 1902 receipts in the city of Manila from July 1 to August 7, 1901, prior to the incorporation of the city of Manila, amounting to \$82,813.43, are included in the internal revenues; and \$85,709.51 was collected by the provost-marshal-general administering the department of receipts and disbursements, making total collections in the city of Manila, under the charter and otherwise, \$1,282,373.01, as against \$1,542,463.83 for 1903, an increase in 1903 of \$260,090.82.

Forestry taxes collected in each year are excluded, these collections being refundable to the several provinces in which the timber was cut.

The income for the year ending June 30, 1902, exclusive of the city of Manila, was \$9,465,952.44, the income for the city of Manila was \$1,199,559.58, and the total income was \$10,665,512.02. The income for the year ending June 30, 1903, included about \$560,000 of extraordinary items. These were the amount paid by the United States for the gunboats turned over to the Navy, purchased out of insular funds; and the Spanish insurgent seized funds, turned over to the insular treasury. During the year we had the extraordinary expense of taking the census, for which there was appropriated something over \$694,000; and in addition to that we had appropriated \$125,000 for the exposition board for the preliminary expense for the Philippine exhibit at the Louisiana Purchase Exposition. Added to this were the appropriations of \$1,000,000 for the continuance of the harbor works in the port of Manila, \$350,000 for harbor works in the city of Cebu, and \$150,000 for the harbor works in the city of Iloilo. The result is that the surplus, which on June 30, 1902, amounted to \$4,000,000, has been reduced to nearly \$2,200,000 in round numbers. Of course the surplus was accumulated for the purpose of making permanent improvements, and its reduction by the amount required for the port works in the three cities is a reduction in accordance

with the plan of the Commission. The revenues, in spite of the conditions, have kept up, although there has been a slight falling off during the first four months of the new fiscal year, as follows: For the first four months of the fiscal year ending June 30, 1903, the amount collected was \$3,612,510.88; for the first four months of the year ending June 30, 1904, \$3,492,729.88, or a loss of \$119,781. This is exclusive of the income from the city of Manila. The tendency to the expensive conveniences and the pressure for increase in salaries in all departments and bureaus renders it most difficult to prevent expenditures from outrunning our income. We are anxious naturally to put as much money into permanent construction as possible. We have as yet, however, no general authority to borrow money to pay for permanent improvements, and the cost falls on the results of taxation. We find it wiser to pay good salaries—salaries in excess of those paid for the same service in the United States—to all who occupy responsible positions. The cost of living is so high in Manila that a salary of \$7,000 here hardly goes as far as a salary of \$5,000 in any of the smaller cities of the United States. I am convinced that we made a mistake in fixing the salaries for the supreme judges at \$7,000, and for that of the chief justice at \$7,500. The court is of so much dignity and of so much importance that we might very well have fixed the salaries of the judges at \$10,000 a year, and that of the chief justice at \$10,500. We are likely to lose by resignation three of the Americans who have constituted the court of seven at the end of their service of three years, and that largely because the salary offers no inducement to hold the place. This is a deplorable condition, because the value of the supreme court depends largely on the experience of its members, and if we are not to obtain the benefit of the learning and experience acquired on the bench in the Spanish civil law by our American judges we lose much.

An examination of the report of the secretary of finance and justice will show that the extraordinary expenses of the current six months provided for in the appropriations, if continued in the same proportions for the remaining six months of the fiscal year ending June 30, 1904, would absorb the surplus and leave a considerable deficit. Part of this extraordinary expense is made up by the purchase of the Oriente Hotel for an office building, at a cost of \$675,000 Mexican, the appropriation of \$450,000 gold for the St. Louis Exposition purposes, which includes not only the direct appropriation for expenditure by the exposition board of \$375,000, but also that of \$75,000 to pay the expenses of sending fifty Filipinos of education, culture, and prominence to the United States for purposes already stated. The work is proceeding so rapidly on the port works of Manila that it is probable that another heavy appropriation will have to be made to meet that expenditure. It is quite unlikely that any considerable

expenditure for public works and improvements of a permanent character can continue to be made out of the current revenue, and a deficit would be exceedingly embarrassing. Of course, if the Dingley tariff were reduced and an impetus given to business in the islands by the increased production of sugar and tobacco and their sale in the United States, the increase in the revenues would probably keep pace with the increase in the expenditures, but to meet all contingencies it seems to me that a Congressional act authorizing the issuing of bonds for permanent improvements in the islands, not exceeding \$5,000,000, each issue to be approved by the Secretary of War and the President of the United States, would not be conferring upon the Commission or legislature of the islands excessive authority, and that it is really a necessary provision to prevent possible financial embarrassment.

#### OFFICE OF THE INSULAR PURCHASING AGENT.

The report of the purchasing agent, which is attached hereto as an exhibit, shows the very large amount of business done by him for the purpose of supplying the departments with needed permanent equipment and consumable supplies. His total purchases for the year ending September 30, 1903, were \$2,215,275.62, exclusive of rice purchases and carabaos. Of this amount it appears that over 80 per cent has been bought through the merchants of Manila, 14 per cent bought in the United States, and the remainder in other countries. The work needed in taking charge of the shipments when they arrived and in distributing them for shipment to all parts of the Archipelago has been very heavy.

In addition to the supplies thus purchased, under special acts of the Commission, the insular purchasing agent has been charged with the duty of buying and selling rice, of which he purchased to the 1st of October \$2,451,168.04 and sold \$2,310,633.06, Mexican currency, having on hand at the present time rice amounting to \$107,152.84 in value. He was also charged with the business of supervising the completion of the contract with Keylock & Pratt for 10,000 head of carabaos bought in Shanghai, to be delivered at the rate of 500 per month. At this date only 773 have been delivered, and they are being sold as rapidly as they can be permanently immunized against rinderpest by the bureau of government laboratories. The insular purchasing agent is also charged with the duty of maintaining and supervising a transportation department for the city of Manila. New stables are being erected for him on the San Lazaro estate, and when they are completed he will furnish all the transportation for all the insular bureaus, including the bureau of health.

The report shows the handling and shipping of \$3,281,000 worth of property and the accounting for \$5,021,045 of United States currency. There has been taken from the purchasing agent all obligation to pur-

chase food supplies, which are now bought directly by the commissary department of the constabulary and are furnished for sale at cost price, with 10 per cent added, to all civil employees outside the city of Manila.

#### PROVINCIAL AND MUNICIPAL GOVERNMENTS.

##### THE GOVERNMENT OF THE MORO PROVINCE.

Early in the present calendar year the Secretary of War called the attention of the civil governor to the fact that the time seemed now to have arrived when a more definite form of government might be given to the parts of the Archipelago occupied by the Moros. Accordingly, a bill for the government of the Moro Province was drafted. It was submitted to General Davis, then commanding the division, and who was formerly department commander of Mindanao and Jolo, and was thus familiar with Moro conditions. Subsequently the bill as revised by General Davis was presented to the Commission, and in the Commission it received many additions and changes. It became a law on the 1st of June, 1903, but did not take effect until the 15th of July next ensuing.

The act makes the Moro Province to consist of all the islands of Mindanao and its adjacent islands, except the provinces of Misamis and Surigao, which had theretofore been established as Christian Filipino provinces under the general provincial act. The law takes away from the province of Misamis the town and district of Iligan, in which there are a great number of Moros resident, and also somewhat reduces the boundaries of the province of Surigao. The Moro Province also includes the island of Isabela de Basilan and all the islands to the south of Mindanao in the Archipelago. It embraces within the boundaries, therefore, all the Moros in the Archipelago except a small number of them resident in the south half of the island of Paragua or Palawan and possibly a few who live on the west coast of the province of Misamis, near the towns of Misamis and Oroquieta. The province is divided into five districts—the district of Zamboanga, the district of Lanao, the district of Cotabato, the district of Davao, and the district of Jolo. The executive head of the province is the provincial governor, who has as his assistants the provincial secretary, the provincial attorney, the provincial engineer, the provincial superintendent of schools, and the provincial treasurer. The officers named, with the governor, being six in number, constitute the legislative council for the province, and in case of an even division the proposition having the vote of the governor prevails. For the support of the province there are assigned all the customs receipts from the port of Jolo, the port of Zamboanga, and the new port of Bongao, making about \$130,000 gold a year. Internal-revenue taxes are to be collected in towns organized under the municipal code, and such other taxes as the legislative coun-

cil may see fit to impose. The legislative council is authorized to create municipalities under the municipal code or to modify its terms to suit local conditions. It is authorized to organize a public school system and to vary the character of the schools in different districts as the special and local necessities require. It is authorized:

(h) To enact laws for the creation of local governments among the Moros and other non-Christian tribes, conforming as nearly as possible to the lawful customs of such peoples, and vesting in their local or tribe rulers as nearly as possible the same authority over their people as they now exercise, consistent with the act of Congress entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," and following as nearly as possible in the provisions of these laws any agreements heretofore made by the United States authorities with such local or tribe rulers concerning the powers and privileges which under American sovereignty they are by such agreements to enjoy: *Provided*, That they have not by their conduct and the breach of the agreements forfeited such powers and privileges.

(i) To enact laws investing the district governors in their respective districts, or other provincial or district officers with the power of adjusting, under the supervision of the provincial governor, all differences between sultans, dattos, and any independent local authorities, and of enforcing their decisions upon such differences.

(j) To enact laws which shall collect and codify the customary laws of the Moros as they now obtain and are enforced in the various parts of the Moro Province among the Moros, modifying such laws as the legislative council think best and amending them as they may be inconsistent with the provisions of the act of Congress entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," and to provide for the printing of such codification, when completed, in English, Arabic, or the local Moro dialects as may be deemed wise. The Moro customary laws thus amended and codified shall apply in all civil and criminal actions arising between Moros. In all civil and criminal actions arising between members of the same non-Christian tribe other than Moros, unless otherwise provided by the legislative council, the customary laws of such non-Christian tribe, if consistent with the act of Congress above mentioned, and if defined and well understood, shall govern the decision of the cause arising, but if there be no well-defined customary laws, or they are in conflict with such act of Congress, then the cases shall be determined by the criminal or civil code according to the laws of the Philippine Islands until the legislative council shall make other provision. In actions, civil or criminal, arising between a Moro and a member of a non-Christian tribe, or between a Moro and a Christian Filipino, or an American or a subject or citizen of a foreign country, the criminal code and the substantive civil law of the Philippine Islands shall apply and be enforced.

(k) To enact laws for the organization and procedure of district courts to consider and decide civil and criminal actions arising between Moros, between members of non-Christian tribes, and between Moros and members of other non-Christian tribes. The district court shall be presided over by the secretary of the district, and the other members of the court shall be appointed by the district governor and shall vary with the race or tribe of the litigants, so that where the action arises between Moros, there shall be at least two and not more than four Moros upon the court; when it arises between members of other non-Christian tribes there may be, if practicable, upon the court members from such non-Christian tribes, and when the litigation arises between Moros and members of other non-Christian tribes there shall be at least one Moro member of the court and at least one member from the tribe of the pagan litigant: *Provided, however*, That judgments of said

courts shall not be given effect unless approved by the governor of the district in which the court is held: *And provided further*, That in case of sentence of death or imprisonment for a longer period of time than ten years, such sentence shall not be executed unless approved by the provincial governor. But the legislative council may, when it thinks proper, provide by law that civil and criminal actions arising between a Moro and a member of another non-Christian tribe shall be tried in the court of first instance or in the court of a convenient justice of the peace, according to the nature of the action and the proper and usual jurisdiction of the court of first instance or the justice of the peace. The legislative council shall prescribe a simple procedure for the district courts and require a written record of its proceedings.

(l) To enact laws for the abolition of slavery and the suppression of all slave hunting and slave trade.

(m) To regulate by statute the use, registration, and licensing of boats of Moro or pagan construction of less than 10 tons measurement, which shall be followed by collectors of customs in the Moro Province, the provisions of the customs administrative act and regulations of the insular collector of customs to the contrary notwithstanding.

It will be seen that the Commission has granted to the legislative council a very large measure of discretion in dealing with the Moros and in preserving as far as possible, consistent with the fundamental act, the customs of the Moros, the authority of the dattos, and a system of justice in which Moros should take part.

One of the serious causes of friction in the Moro land has been the application of coastwise trade regulations to small Moro craft. This is now sought to be avoided by allowing the legislative council to make proper regulations for all Moro craft under 10 tons.

The law provides for the appointment by the provincial governor, subject to the approval by the legislative council, of governors, treasurers, and other officers of the five different districts of the province. The education of the Moro Province presents such a different problem from that of the Christian Filipinos that it was deemed unwise to provide for any but a formal relation between the school system of the Moro Province and that which prevails in the rest of the archipelago, and the Moro Province is left to pay its own school expenses and to arrange such a system as shall meet and overcome the peculiar obstacles that now have to be met and overcome in the education of Moro children. The constabulary system has been extended into the Moro Province as an immediate branch of the constabulary system of the islands. It is thought that it will be entirely possible to enlist Moros and make successful and efficient military police of them under American officers; and the expense of the constabulary will be met out of the insular treasury.

By section 27 it is provided that—

Courts of first instance and justices of the peace in the Moro Province shall not have jurisdiction to try civil or criminal actions arising between Moros or arising between non-Christians, or, except as otherwise provided by the legislative council, actions arising between Moros and other non-Christians, and the existing laws of the Philippine Islands are hereby amended accordingly: *Provided, however*, That in

accordance with paragraph (k) of section thirteen of this act, the legislative council may by law vest jurisdiction to try cases between Moros and other non-Christians in such courts: *And provided further*, That the court of first instance shall have jurisdiction in all habeas corpus cases, no matter between whom arising, to take cognizance of the petition for the release of any person within its territorial jurisdiction, to issue process, to hear the evidence, and to discharge the prisoner or to remand him to custody in accordance with the provisions of the chapter on habeas corpus in the code of civil procedure.

This second proviso was adopted to enable the court of first instance to render its aid whenever called upon to free persons from slavery and thus to furnish a means of carrying out the inhibition against slavery contained in the so-called Philippine act of Congress, reenacted in paragraph (l) of section 14 above quoted.

All laws passed by the legislative council take effect at the time fixed by the legislative council, subject to amendment or annulment by the Commission. Provision is made in the act for the appointment of military officers to fill the civil positions by the act created and for the payment to them of an amount equal to 20 per cent of their salaries as military officers in lieu of their allowances for quarters, forage, and other things.

The first governor of the province appointed is Major-General Leonard Wood, the military commander of the department of Mindanao and Jolo. This union of the civil and the military power in one head seems to be admirably adapted to successful administration in the Moro Province, although it would be of very doubtful efficacy in the whole of the Philippine Islands. The Moro is himself a soldier and recognizes with reluctance any other authority than that which is clothed with immediate control of military forces. The appointments of the other executive officers of the provinces were made at the same time and the legislative council began its work. I inclose herewith the copies of its acts passed down to the time of rendering this report and submitted to the Commission and approved by it, as Exhibit S.

The present conditions in the Moro Province are not as satisfactory as they might be. The campaigns of General Baldwin and Captain Pershing in and about the Lake Lanao district have resulted in subduing the wild Moros of that district so that there is no organized armed resistance to the sovereignty of the United States. The predatory habits of the Moro remain, however, and from time to time reports come of the robbery or killing of American soldiers by marauding bands of Moros whose identity it is difficult to establish. Still the questions presented are not of real difficulty and involve only patience and firmness in their solution. The Lake Lanao country is a beautiful country, and the Moros who inhabit it seem to be fairly good agriculturists. The Moros of Zamboanga and of the valley of the Rio Grande del Mindanao are pacified and make no trouble in accepting the régime under the new Moro law. In Jolo, however, we have a condition that needs thorough and drastic treatment. The Bates treaty may have been very useful

in staying the hand of the Moros and reducing the necessity for the use of United States troops in the Sulu Archipelago at a time when they were needed badly in other parts of the Philippines, but the power and immunity recognized in that treaty as belonging to the Sultan of Jolo have not resulted in good government for the Moros themselves, but have brought about a condition of chaos and petty wars, of murder and rapine, and intriguing conspiracies of one datto against another and of dattos against the Sultan which the good of everybody requires us to put an end to. It is a condition precedent to the continuance upon the United States of the binding effect of the Bates treaty that the Sultan and the signing dattos should be powers capable of subduing lawlessness within their respective jurisdictions. Either the power or the will has been lacking, and the necessity arises for teaching them severe lessons of obedience to the government and the sense of obligation to maintain law and order between local dattos. The establishment of courts partly native will doubtless assist materially in settling many questions that now have to be settled by the sword. The problem in dealing with the Moros is not very different from that which Sir Stamford Raffles and Sir Frank Swettenham have had to solve in dealing with the Malays in the Malay Peninsula. To-day the Malay in the Straits Settlements is most peaceable and law-abiding. The time was in that peninsula when every Malay went armed. To-day every Moro is armed with his kris, and if he has a gun, with a gun. Ultimately the government must compel the Moros to give up their arms and to trust to the peace authorities to preserve their rights. A judicious preservation of the authority of local dattos, and making them responsible for the preservation of order among their people, will doubtless work well here, but their absolute subordination to the sovereignty of the United States, which was not made as clear by the Bates treaty when translated into their language as it might have been, is a *sine qua non* to the maintenance of good government. The Moro does not understand popular government and does not desire it, and he is not likely to desire it until he is changed by education and the introduction of civilized life in his neighborhood.

The Sultan of Jolo and the dattos under him, with whom General Bates entered into an agreement, have not complied with the terms of that agreement in maintaining order among those who acknowledge in a perfunctory way allegiance to them. They have not punished wrongdoers and their whole system of government seems to be one solely for the exaction of taxes. The Sultan of Jolo is a gambler and an intriguer, with not a spark of courage or patriotic and paternal interest in his people. So far as the Bates agreement could be regarded as a contract of the Executive of the United States Government, it has long ceased to be of binding force, because the Sultan long ago forfeited all his rights under it by his violation of the rights he assumed. When General Wood was appointed governor of the Moro Province, with

the knowledge which both of us had of the necessity for the abrogation of the Bates treaty and the gross violation of his obligations under it by the Sultan, we agreed that it would be well for him to accumulate the data showing in how many instances the Sultan had failed when called upon by the United States authorities to preserve order among his people, with a view to formal action in notifying him of the abrogation of the treaty. I append the report of General Wood as Exhibit T upon this phase of the Moro question, and concur fully in his recommendation that for the causes shown by him in the exhibits which accompany his report that the Sultan and the signing dattos be advised of the abrogation of the Bates treaty and that the same is no longer binding on the United States or the insular government and will not be respected.

Among the laws which the legislative council of the Moro Province has enacted will be found one denouncing kidnapping of persons with a view to making them slaves, and the detention of persons in slavery. General Wood has examined the question, as have other members of the legislative council, and has reached the conclusion that the announcement of the policy of the United States upon this question may as well be radical in the beginning. General Wood advises me orally that the proclamation of the passage of the act in the river valley above Cotabato has been received with acquiescence by the dattos. It will probably give more trouble in Jolo. The fact is, however, that the military question in dealing with the Moros is a simple one, and is not at all as difficult as that which confronted the army in the Christian Filipino provinces. The Moros do not fight a guerilla warfare. They retreat to their forts and bid defiance to the foe, and thus expose themselves to an attack by modern artillery and other modern methods of overcoming insufficient fortifications. They are easily whipped, and though the whipping may have to be repeated once or twice, its effect ultimately is very salutary. Force seems to be the only method of reaching them in the first instance, and is the only preparation for the beginning of civilized restraints among them. It is probable that the government is itself subject to criticism for delay in giving to the Moro region something definite in the form of a government, but the vim and interest with which the government of the Moro Province has been launched give every assurance of a satisfactory result. A continuance of the conditions which the exhibits submitted by General Wood, and hereto appended, show to exist in Jolo, Siassi, and other islands of the Sulu Archipelago would certainly be a disgrace to the United States Government and to the insular government which is made responsible by the Philippine act for the maintenance of law and order among the people. It is thought that another year will bring an improvement in conditions so great that even the Moros themselves will understand the advantage of it.

THE CHRISTIAN FILIPINO PROVINCES.

A severe agricultural depression in the provinces, together with the interference with tax collections by the cholera, has caused a number of the provinces to run behind in the matter of their income, and has required the insular government to lend money to them. The amount of money loaned is shown in the following list:

List of loans to provinces during the period September 1, 1902, to October 31, 1903.

Province.	Philippine currency.	Mexican currency.
Abra .....		₱12,550.00
Albay .....	₱25,000.00	
Antique .....		12,250.00
Batangas .....	2,000.00	62,250.00
Capiz .....	15,000.00	
Cavite .....		50,000.00
Mindoro .....		6,500.00

Pampanga .....	2,500.00	
Sorsogon .....	2,500.00	
Total .....	22,500.00	20,050.00

In a number of the provinces it has been deemed wise to cut down the cost of officers by consolidating the offices of treasurer and supervisor, usually filled by Americans, into the office of treasurer-supervisor. This was possible in provinces where there is very little money for improvements, because in such provinces the supervisors of roads and improvements have few duties to perform. The supervisors who were released from office were provided for in the office of the consulting engineer to the Commission, who was greatly in need of engineers for the purpose of carrying on insular road construction, in which the Commission is now engaged.

## MUNICIPALITIES.

In the spring the Commission passed a resolution adopting the policy of a reduction of the number of municipalities in each province. The municipalities also had run behind in their incomes without reducing their expenditures, and it became perfectly evident that many of them were not able to maintain decent government with the tax-producing capacity which they had shown. The Filipino members of the Commission during the last six months have visited all the Christian provinces, and, after a conference with the provincial boards and with the municipal presidentes called in convention, have made report to the Commission in favor of a union of municipalities and a reduction in number. The Commission adopted their report and enacted the necessary laws. The reduction is shown in the following table:

Province.	Municipalities.		Province.	Municipalities.	
	Former number.	Present number.		Former number.	Present number.
Abra .....	12	12	Leyte.....	51	34
Albay .....	27	27	Masbate .....	17	13
Ambos Camarines.....	43	35	Misamis .....	24	10
Antique .....	21	11	Negros Occidental.....	34	21

Ilocos Norte.....	15	10	Surigao.....	34	29
Ilocos Sur .....	24	14	Tarlac.....	17	9
Iloilo .....	51	17	Tayabas .....	31	27
Isabela .....	15	11	Zambales.....	25	15
La Laguna.....	30	19			
La Union.....	15	12	Total .....	1,035	623

The above list shows a total reduction of 412 municipalities. The provinces of Benguet, Lepanto-Bontoc, Mindoro, Moro, Nueva Vizcaya and Paragua are not included above, as they have special organization, independent and apart from the municipal code.

In doing this work the Commission has had to run counter to local prejudice. It is hard to convince municipal officials enjoying office that the public good requires any measure which will in effect prevent their continuing to hold office, and there is much local pride likely to be hurt. It is confidently expected, however, that the fusion of the municipalities thus effected will very greatly increase the efficiency of the municipal governments by reducing expenses and furnishing a much larger revenue in each town. The work has been very well done by the Filipino members and the Commission is greatly indebted to them for the time and trouble spent in solving a difficult problem. Municipal treasurers now selected by the council have not proven to be efficient officers. By law the council of a municipality is obliged to devote a certain part of the income of the town to schools, but in

too many instances it has developed that, in the anxiety to secure his own salary, the presidente has induced the council and the municipal treasurer to appropriate from what are properly school funds to pay the salaries of municipal officials. The office of municipal treasurer has therefore been classified as part of the classified line service and provision made for appointment to it by the provincial board. The municipal treasurer will also act as deputy provincial treasurer. Thus a large body of persons will be led to prepare themselves for civil service examinations for the office of municipal treasurer. Their experience will fit them for promotion to the office of provincial treasurer, which will hereafter be filled largely from such material. The difficulty about using Filipinos for provincial treasurers heretofore has been that the duties of the office are so difficult that Filipinos, with a knowledge of Spanish only, and without any familiarity with the auditing methods of the auditor's bureau and its requirements, are unable to perform them. This change can not but strengthen municipal governments and at the same time bring into use for higher office trained Filipino material.

The truth is that the municipal governments have not been as satisfactory in their operations as could be wished. By the misuse of the school fund already referred to, the native school-teachers have been compelled to go without their salaries. The municipal police have also gone unpaid and in many instances had not been made efficient because they were used as the personal servants of the municipal presidents. It is hoped that the increase of the resources of the towns by the fusion of municipalities may accomplish some reform in these matters and the coming of better times in agricultural and business way may also assist. In order to make the municipal police a more efficient body, a law was passed by the Commission, No. 781, the first and second sections of which are as follows:

SECTION 1. The civil governor, or the provincial governor with the approval of the civil governor, is hereby authorized, whenever in his judgment the public interest will be subserved thereby, to place the municipal police of the respective municipalities of any province under the control of the senior inspector of constabulary on duty in the province at the time. The senior inspector in such case is hereby authorized and empowered, under the general supervision of the provincial governor, to control and direct the movements of the municipal police, and, with the approval of the provincial governor, to discharge any member of the police force and substitute a fit and suitable resident of the municipality in his place. It shall be the duty of the senior inspector when thus placed in charge of the municipal police of a province to see that they are properly uniformed, drilled and disciplined. When thus vested with authority over the municipal police he shall see that all lawful orders of the provincial governor, municipal president, and others in authority are executed as provided by the municipal code, and amendments thereof, and shall further see that all proper arrests are made for violations of law of municipal ordinances, and in case of emergencies is authorized, under the general supervision of the provincial governor, to unite the forces of the various municipalities of the province in suppressing ladronism or brigandage or other grave violations of the law which threaten the peace of the entire community; and he may also unite the constabulary forces

under his command with the municipal forces in the execution of his authority for this purpose.

SEC. 2. It is hereby made the duty of the provincial board of each and every province to prescribe a suitable uniform for the municipal police of each and every municipality, with a proper insignia to indicate the municipality to which the police belong. Authority is also hereby given the provincial board of each province to fix the number of police which is required to be maintained by each and every municipality of the province. In the event that the provincial board shall find that any municipality is unable properly to uniform and maintain the number of policemen fixed by the provincial board, the latter is authorized to vote necessary aid for the maintenance of such police out of provincial funds. In the event the provincial board should not have provincial funds adequate for this purpose it may apply to the Commission for aid in this behalf.

This system had been adopted in the province of La Union before the passage of the law and had worked well, and it was the success in Union that suggested the passage of a general law on the subject. It has not been adopted in many provinces, but where adopted it has accomplished good results.

Outside of the city of Manila, the two great commercial centers of the islands are Iloilo and Cebu. Under the Spanish régime the town of Iloilo did not have more than 10,000 inhabitants, and the town of Cebu did not exceed in population 15,000. There were, however, in the immediate neighborhood of the towns, which were really part of the commercial centers, three or four towns which ought to have been included for purposes of economy in government. By the acts already referred to, Iloilo has had annexed to it the towns of Molo, Jaro, La Paz, and another, which will now make a city of from forty to fifty thousand. The same thing is true of the town of Cebu, which, being united with San Nicolas, a town separated by a small creek from Cebu, and containing 15,000 inhabitants, and other towns in the neighborhood, will also have a population of about 50,000. It will probably be necessary to provide special charters for these two cities, because the municipal code is adapted rather to country municipalities than to cities of a metropolitan size. The improvements in both cities which are badly needed are a water supply and a sewer system. It is quite probable that the power to issue bonds already given in the Philippine act for municipalities would be sufficient if the restriction contained in the act requiring the consent of Congress were removed. It is not understood why it was thought necessary to insert a provision of law requiring the consent of Congress to the issuing of bonds. Certainly with the consent of Congress, without such a provision, bonds might be issued, and it is thought that the requirement of Congressional consent was an error in the drafting of the Congressional legislation. In any event, it is exceedingly awkward and unduly limiting the power of the Commission, to require that where within the narrow limitations contained in the law, the Commission desires to issue bonds for a small amount to aid municipalities, it should be required to apply to Congress for its consent. It is respectfully recommended to the Commis-

sion that Congress be urged to repeal the particular provision of the Philippine act requiring the specific consent of Congress to the issue of bonds for the benefit of any municipality in the Archipelago, where such issue shall not exceed the percentage of taxable value now imposed as a limit by the law.

#### JUSTICES OF THE PEACE.

The secretary of finance and justice will comment upon the general subject of the administration of justice in these islands. It is enough for me to say, that so far as the courts of first instance and the other superior courts are concerned, it is very satisfactory, and is doing much to tranquilize the islands, and teach the people what real justice is. Indeed, it is not too much to say that crime in the islands is punished with more speed and certainty than in many parts of the United States.

With respect to the justices of the peace, however, this is not true, and some new system must be devised. The justice of the peace and an auxiliary justice are now appointed for every town. They do not receive salaries, and are dependent for compensation upon fees. It is difficult to secure good men. The amount of business of any one town is ordinarily so little that the office is not lucrative at all unless it is made the center of petty litigation by local pettifoggers, or, as the Spanish term is, "picapleitos," and in that case the office is an unmixed evil. For this reason the Commission will doubtless feel called upon to change the system within the coming year. There are several remedies recommended, but in my judgment the best one is that of dividing the province into comparatively large districts, and appointing a justice of the peace for each district with a living salary. This will dignify the office, will secure the best man in the district, and will give a much better character to the administration of justice in what ought to be the people's court.

#### THE CITY OF MANILA.

The report of the city of Manila is a very interesting one, and shows the progress which has been made in the material welfare of the city. The two great improvements which are needed are the addition to the water supply and the construction of sewers. Plans and specifications have been prepared for the water supply, which, if the plans are carried out, will be brought by gravity directly from a dam constructed between two marble cliffs, shutting off and securing enough water to remove all danger of a scarcity of water during the dry season. The plans for a sewerage system are being rapidly prepared, and it is expected that they will be ready for submission by the first of January. The Commission has engaged the services of an expert engineer of high repute, Mr. Desmond Fitzgerald, of Brookline, Mass., who will visit the islands in January and preside over a board of engineers which will consider the feasibility of the plans for the

increase in the water supply and the construction of sewers. The change in the source of the water supply will remove great danger of contagion from cholera and other epidemic diseases. So far as we are able to obtain estimates from the engineers making the plans, it would seem that the cost of construction of the sewers and the new water plant will fall within the four millions allowed by law.

It ought to be urged upon Congress, in my judgment, that the bonds issued for the improvement of Manila should be as exempt from taxation as the bonds to be issued for the purchase of the friars' land. They are only exempt from Federal taxation in the United States and taxation in the Philippine Islands. The friars' lands bonds are made exempt from State, county, and municipal taxation in the United States, which enables us to sell bonds of that sort at a very much lower rate of interest. It is thought that it will injure no one if the city bonds of Manila are given as wide exemption.

Manila has increased in houses during the last year, as will be seen from the following table:

Building operations in the city of Manila, P. I., during the fiscal year ending June 30, 1903.

During the year about 150 buildings were condemned and ordered removed.

Much has been done in the way of repairs to streets, widening streets, and giving the city a modern cleaning every day. Of course the absence of the sewerage system entails very heavy expense in the introduction of the pail system, and there is an immense amount of work to be done before it can be called a really modern city. I venture to say, however, that there is no city better policed than Manila. It is singularly free from crimes of violence, and one feels quite secure at any time of day or night in any part of the city.

The falling off of the population of the city of Manila between 1900 and 1903 from 260,000 to 221,000, as shown by two censuses, is not inexplicable. In 1900 there was much disturbance through the country, and the insurrection had not ceased in many parts. The effect of the insurrection upon those who were wealthy or who had money enough to come into Manila was very marked, and they fled to Manila as a place of refuge. As soon, however, as conditions became more tranquil they went to the country, so that the reduction in the population of Manila is a significant evidence of the tranquillity of the provinces. The introduction and maintenance of a modern fire system and a metropolitan and native police force, and of an effective street-cleaning gang are all shown in the report of the city, hereto appended and marked Exhibit U. There is considerable doubt as to what ought to be done about taking down the walls of the walled city of Manila, and how the open spaces in the city ought to be improved. Major-General Davis, commanding the Division of the Philippines, wrote a long application to the Secretary of War, in which he asked for the reservation by the President for military purposes of a great many pieces of land in the city. This application has been vigorously resisted and attacked by the advisory board of Manila, by the municipal board, and by mass meetings of prominent citizens. The Commission has passed a resolution, inviting the Secretary of War to make a contract with a landscape architect of eminence in the United States, empowering him to visit Manila and make a sketch of the improvements needed with a view to art and utility, and until this report is made it is hoped that the President will make no permanent reservation for military purposes. There are in the city itself and in the environs of the city great opportunities for beautifying the landscape, and it is hoped that we may be able in time to make the city of Manila the handsomest city in the Orient. Improvements are expensive, however, and must be accordingly slow. Manila is interlaced with what are called esteros, small creeks or arms of the sea that are useful for navigation and that are now made the vehicle for much of the deleterious sewage of the town. The rise and fall of the tide assists in carrying off the sewage, but the fall of the tide exposes the mud and filth of the bottom to the

sun in such a way as probably to produce illness. The ultimate hope of the introduction of the sewerage system into the city is that the esteros not useful for navigation may be filled, and that those which are useful for navigation may be, as the term is, canalized—that is, dredged out and have their banks walled so that the coming and going of the tides shall only cleanse the water without exposing the filthy bottom. A comprehensive sewer system would take much away from the esteros and would leave them to discharge only the useful function of cheap interurban transportation.

I am glad to call attention to the fact that since our last report on March 3, the bids for a franchise for an electric street railway were opened; and that Mr. Charles Swift, of Detroit, Mich., and his associates made a bid which the Commission and the municipal board thought it wise to accept, for the construction of a first-class, standard-grade electric street-car line, which will gridiron the city and furnish the much-needed cheap transportation from the absence of which Manila has always suffered. A copy of the charter which was granted under a law of the Commission and by a vote of the municipal board is hereto appended and marked Exhibit V. The term of the charter is fifty years. The restrictions in it are those which usually obtain in charters of modern street railways in the United States. The company has the right to run two classes of cars, first and second class, the terms of the charter covering rate of fares being as follows:

The fare charged by the grantee shall not exceed six cents in money of the United States on a first-class car, or five cents in money of the United States on a second-class car, for one continuous ride from one point to another on the railway system of the grantee within the city limits as now or hereafter established, whether it be necessary to transfer the passenger from one car or line of the grantee to another during said ride or not: *Provided always*, That where a change of cars is necessary there shall be established by the grantee a method of transfers not unreasonably burdensome in its restrictions to the transferred passengers; and in case of a failure to comply with the foregoing requirement as to transfers it may be enforced upon application of the municipal board by mandamus to the proper court of first instance or the supreme court: *And provided further*, That on lines running outside of the city limits an additional fare or fares may be charged at the rate of five cents in money of the United States on first-class cars, or three cents in money of the United States on second-class cars, for each two miles or fraction thereof beyond the then city limits: *And provided further*, That the grantee shall for four years from the date hereof accept local currency in lieu of money of the United States in payment for any ride or fare at the ratio of two cents local currency for one cent in money of the United States, until such time as there shall be established for these islands a gold-standard coinage and money thereunder shall be made legal tender, after which time the fares to be charged shall be the equivalent of those stated above in money of the United States: *And provided further*, That pending the adoption of the gold standard, if the official ratio existing between the money of the United States and local currency shall exceed two dollars and forty cents of local currency for one dollar of money of the United States, then and in that case the grantee may require from the passengers the payment for fares of sufficient local currency to be the equivalent of the fares above fixed in money of the United States at the official ratio: *And provided further*, That at any time after

twenty-five years from the date hereof, upon due notice from the city of Manila to the grantee, the fares charged by the grantee may be readjusted on a reasonable basis by three arbitrators, one to be chosen by the city, one by the grantee, and the third to be selected by the two so chosen if they can agree, but if not, then to be selected by the chief executive of the islands. The award of the majority of such arbitrators shall be final.

There is also a provision for sale of 20 first-class tickets for a dollar and of six second-class tickets for 25 cents.

The contract required that construction should be begun in six months, and a formal breaking of ground was made in September. The material for the construction has been distributed all over the city, and the real work of construction has begun this month, it having been delayed because of the rainy season and a fear that the continued fall of rain would only subject the people of the city to the inconvenience of obstructed streets without real progress. The municipal board assures the Commission that the street cars will be running about Thanksgiving Day of next year. Such good interurban transportation as this will afford will reduce the cost of living in Manila certainly 25 per cent for all persons enjoying salaries of less than \$2,500, for it is almost impossible now to live in Manila without maintaining some sort of a conveyance. It is hoped that the company will deem it wise to reduce below the bid the fare to be charged second class, for it is quite certain that a reduction will vastly increase the patronage. The oriental people are very fond of riding in rapidly moving cars.

#### THE PORT WORKS.

The port works of Manila are progressing with all convenient speed, as shown by the report of the officer in charge, hereto attached and marked Exhibit W. The dredging of the 30-foot harbor by a monster hydraulic dredge and the filling in of 168 acres in front of the city running out into the bay goes on rapidly. The dredge delivers 25,000 cubic yards a day and works with great regularity. The break-water which is to protect the harbor from the southwest monsoon has been filled in to a depth of 30 feet, so that it is visible at high water. There will be no finer harbor in the Orient than Manila will have when this great work is accomplished. Two millions of dollars have already been appropriated and it will probably cost two millions more, perhaps three millions, before everything connected with the port is completed, including wharves and suitable warehouses. However, the government will have 160 acres of most valuable warehouse property which it may sell and which will go far toward recouping itself for the expense. The tonnage of the shipping coming into this harbor has increased so much that the wisdom of the engineers and of the Commission in enlarging the harbor beyond the projected lines of the Spanish engineers and Government has already been vindicated. Little

or no progress has been made with respect to the Cebu and Iloilo harbor improvements, because no one has been willing to contract for the work. The Atlantic, Gulf and Pacific Company, engaged in the Manila improvement, is not yet able to take up another work and there is no one else, apparently, who has plant enough in the vicinity to make the undertaking of such contracts for dredging profitable. It is quite probable that the government will have to undertake the contracts by its own engineers and workmen.

#### EXECUTIVE BUREAU.

The work which has been done by the executive bureau, which has not inaptly been called a clearing house for all the bureaus of the government, fairly gauges the size and importance of the government work which has been done in the Philippines. The report of Mr. Fergusson, the executive secretary, who is the efficient head of the executive bureau, which is annexed hereto and marked Exhibit X, shows clearly the earnest work done by government clerks and completely refutes the suggestion that their places are sinecures. Their fidelity and earnestness are largely due to the consciousness that steady application will bring promotion, and no fear or favor will be shown in giving it. I invite especial attention to the report of the recorder of the Commission, which is appended to the report of the executive secretary, and which probably gives a better idea of the labors of the Commission than any more general statement could. It is not too much to say that the executive bureau is organized with the utmost efficiency and dispatches an immense amount of work. I am glad to say that the number of Filipinos employed during the present year in the bureau has increased 150 per cent over previous years, and that the Filipinos are displaying an adaptability and capacity for work which justifies the prophecy that in ten years the expense of carrying on the government will be largely decreased by the fact that Filipinos can be had to do the work as well as Americans in many positions, and at very considerably less salaries, because the supply of such clerks will be far greater than of American clerks, and because in their own country they are able to live on much less. I append as Exhibit Y the executive orders and proclamations from October 1, 1902, to September 30, 1903.

Respectfully submitted.

WM. H. TAFT, *Civil Governor.*

The PHILIPPINE COMMISSION,  
*Manila, P. I.*

## EXHIBIT A.

---

EXECUTIVE ORDER, } THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
No. 64. } EXECUTIVE BUREAU,  
Manila, July 31, 1903.

The following regulations will govern the sale and distribution of rice furnished under the appropriation by Congress for the relief of the people of the Philippine Islands:

Before rice is furnished to any province its provincial board will submit to the civil governor an estimate of the quantity of rice which can be used to advantage in a given period and a statement of the conditions in the province which make the distribution of rice desirable.

All rice furnished by the civil government will be consigned to the supervisor or the supervisor-treasurer of the province to which it is shipped. At the time of shipment the insular purchasing agent will forward to the insular auditor a copy of the notice of shipment, together with a statement of the price at which the rice is to be sold, which shall include cost of transportation and handling, but shall exclude duty, if any. The expense of storing and subsequent handling of the rice shall be at the expense of the province, except when the civil governor shall order otherwise.

All rice shall be receipted for to the insular purchasing agent by the supervisor or supervisor-treasurer to whom consigned, and shall be taken up by the latter officer who shall be accountable on his official bond for the same and render accounts therefor to the insular auditor as hereinafter provided.

Where the rice is used for public works a full report of its issue and distribution shall be made to the civil governor, in addition to the account which is required by the Auditor, with a definite statement of the public improvement upon which it has been used, the number of days of labor, and the amount of material secured.

No rice shall be distributed gratuitously, except in limited quantities to deserving persons unable to work, and upon the recommendation and order of the provincial board, approved by the civil governor, to whom will be made a statement of the peculiar circumstances calling for such action.

In cases where rice is sold, the proceeds of the sales will be deposited in the provincial treasury. The money so received shall be placed to the credit of a "Congressional relief fund," and thereafter may be disbursed as other funds, on the order of the provincial board, for public works, and accounted for in the usual manner to the auditor, full report thereon being made to the civil governor.

The accounts of the supervisor or supervisor-treasurer to the insular auditor will be rendered on a regular property return, Auditor's Form 700, monthly instead of quarterly, supported as follows:

(a) In the case of direct sales, by proper abstracts, showing date of sale, name of purchaser, quantity sold, with price and total amount received. This abstract should be certified as correct by the person in charge of the sales and by the supervisor, and be accompanied by the receipt of the provincial treasurer for the amount deposited in the provincial treasury.

Sales to commercial firms will not be allowed except upon advance approval of the civil governor.

(b) In the case of the issue of rice in payment of labor performed, the regular labor pay roll, Provincial Form 57, will be used, modified so as to show in the columns marked "Rate of pay" and "Amount paid," certain fixed units of measure in rice instead of money. The certificates at the bottom of the roll should also be modified by substituting the words "issue" and "issued," respectively, for "payment" and "paid." The money value of the rice so issued in payment for labor will be computed and stated on the pay roll, and the amount represented by such money value of such pay rolls will be taken up by the provincial treasurer in his revenue account as receipts from rice sales and placed to the credit of the aforesaid

"Congressional relief fund." Credit will be taken for the same amount as a disbursement for labor on public works, the voucher being the pay rolls received from the supervisor or supervisor-treasurer. The latter officer will drop the rice so disposed of on his returns, supporting the same by the receipt of the provincial treasurer for the amount represented by the pay rolls, and taken up by the latter, as in the case of sales made in the regular way.

(c) In case of gratuitous distribution ordered by the provincial board and approved by the civil governor, the same abstract will be used as in the case of sales, modified to show gratuitous distribution instead of sale, certified as correct by the officer making the distribution, which distribution will be witnessed by two disinterested, reputable citizens, whose certificate that they were present and witnessed the issue must appear on the abstract.

In order to facilitate the operation of this order throughout the province, the provincial supervisor or the supervisor-treasurer shall have power to designate in writing any municipal officer as his deputy for the purpose of this issue, who shall serve without additional compensation.

WM. H. TAFT,  
Civil Governor.

[No. 797.]

AN ACT appropriating the sum of five hundred thousand dollars, in money of the United States, from the fund of three million dollars appropriated by the Congress of the United States for the relief of distress in the Philippine Islands, for expenditure under the direction of the civil governor upon resolutions of the Philippine Commission.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. The sum of five hundred thousand dollars, in money of the United States, is hereby appropriated out of the fund of three million dollars appropriated by the Congress of the United States for the relief of distress in the Philippine Islands, for expenditure under the direction of the civil governor for such purposes and in such manner as may from time to time be authorized by resolutions of the Philippine Commission, and in carrying out the intent of the Congress of the United States in appropriating the fund aforesaid.

SEC. 2. The sum of money by this act appropriated shall be withdrawn from the insular treasury by requisitions in favor of the disbursing officer of the executive bureau or of the insular purchasing agent, as the civil governor may direct, in such allotments as may from time to time be necessary, and shall be accounted for as provided by law.

SEC. 3. The resolutions of the Philippine Commission upon which the funds herein appropriated shall be expended shall be printed and published in quarterly volumes.

SEC. 4. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 5. This act shall take effect on its passage.

Enacted, July 10, 1903.

---

[No. 738.]

AN ACT appropriating the sum of one hundred thousand dollars, in money of the United States, for preliminary expenses in the purchase of draft cattle for the relief of agricultural conditions in the Philippine Islands.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. The sum of one hundred thousand dollars, in money of the United States, is hereby appropriated out of the three million dollars voted by the Congress of the United States for the relief of agricultural depression in the Philippine Islands and now on deposit in the depository of the Philippine government in the city of New York to the credit of the insular treasury, for the preliminary expenses of the insular purchasing agent and other agents of the insular government in visiting the ports and countries where draft cattle may be purchased, in paying agents for the procuring of such cattle, in securing the necessary immunization against rinderpest of the cattle purchased, in paying the purchase price for same, in chartering the

necessary transportation for their importation into the Philippine Islands, and for all other expenses incident to their purchase and delivery in the Philippine Islands.

SEC. 2. The sum of money by this act appropriated shall be expended by the insular purchasing agent, and accounted for by him as provided by law.

SEC. 3. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 4. This act shall take effect on its passage.

Enacted, April 8, 1903.

[No. 817.]

AN ACT declaring that the presence of locusts in various provinces of the islands so threatens the food supply for the coming year as to present a public emergency requiring radical action, and authorizing and providing for the appointment of a board in each province with full powers to call upon all able-bodied inhabitants thereof to take united action to suppress the pest, and for other purposes.

Whereas the presence of locusts in various provinces of the Philippine Archipelago so threatens the entire food supply of the islands for the coming year, and presents such an emergency and danger to the welfare of the whole people as to require prompt and radical action for its suppression: Therefore,

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. Under the presidency of the provincial governor a board is hereby created in each province for the purpose of suppressing the locust pest, such board to be made up of the members of the provincial board and three agriculturalists to be appointed by the civil governor, with the advice and consent of the Commission, and to be known as the locust board. The provincial secretary shall act as secretary of the locust board without additional compensation. It shall be the duty of the locust board to enforce the provisions of this act.

SEC. 2. In every province in which a plague of locusts is threatened or exists every able-bodied inhabitant, subject to such regulations and limitations as the board constituted under this act may adopt, is hereby declared to be liable to service in suppressing the locust pest. The board is hereby empowered to issue regulations directing the conduct of the persons summoned for the purposes of this act and to control their operations, either directly or through the municipal officers of the various municipalities who are hereby, in respect to the scope of this act, made subordinates of the board hereby constituted. The regulations of the board may require that the inhabitants shall work en masse or in such force and in such manner as may be deemed by the board most efficacious to the end in view, or the board may require that each inhabitant subject to this act shall collect a given quantity of locusts, fixing the amount thereof in "gantas" or "cavanes." It is hereby declared to be the intent of this act to give the board hereby constituted full discretion in the manner of suppressing the locust pest.

SEC. 3. It shall be the duty of municipal councilors, and of all other municipal officers, upon the appearance of locusts within their respective barrios to bring the fact at once to the attention of the municipal president, whose duty it shall be to take the necessary steps prescribed by the regulations of the board hereby constituted, and to bring the fact to the notice of the board through the provincial governor.

SEC. 4. Where any persons summoned under this act to the public service herein required shall, by reason of their poverty, be unable to support themselves with food during their service, the board hereby constituted may authorize the municipality to furnish them with sufficient rice from the store of rice sent to the province by the civil governor and paid for from the "congressional relief fund," reporting at once to the civil governor, and by telegram where possible, the amount needed for such purpose.

SEC. 5. Every person liable under this act to the lawful orders of the board hereby constituted who shall fail to comply with the same shall be deemed guilty of a misdemeanor and shall be fined or imprisoned, or both, in the discretion of the municipal president, in accordance with the regulations to be provided by the board: *Provided, however,* That the penalty shall not exceed in any case ten dollars fine or ten days' imprisonment, or both.

SEC. 6. The moneys accruing from fines for violations of this act shall constitute a special fund to be deposited with the municipal treasurer of the municipality in

which such violation occurs for the purpose of being applied by him in payment for the hoppers or "loctones" turned over to him by such persons as have already fulfilled the requirements of the obligation imposed upon them by virtue of the provisions of section two of this act. The price to be paid for this purpose shall also be determined and fixed in the regulations to be adopted by the board constituted under this act.

SEC. 7. The board constituted by this act is hereby authorized to purchase the number of galvanized-iron sheets considered indispensable in the suppression of the locusts by the method of destroying them in trenches, reporting the amount needed at once by telegram to the civil governor, who is hereby authorized to expend such amount as in his discretion is needed for the purchase of such galvanized-iron sheets. The provincial supervisor or supervisor-treasurer of the province is required to take up such galvanized-iron sheets upon his property return and to duly account for the same.

SEC. 8. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 9. This act shall take effect on its passage.

Enacted, August 3, 1903.

BY THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS.

#### A PROCLAMATION.

Whereas the Philippine Commission did, on the twelfth day of November, nineteen hundred and two, pass the following act:

"AN ACT to provide against the danger of famine in the provinces of the Philippine Archipelago.

*"By authority of the United States, be it enacted by the Philippine Commission, that:*

"SECTION 1. To provide against the danger of famine, due to the short crop for the coming year in rice and other food stuffs usually produced in the provinces of the Philippine Archipelago, it shall be the duty of all municipal presidents to call meetings of the people of their respective municipalities, to notify them of the impending danger of famine, and to urge them at once to take steps to secure the necessary seed and to plant quick-growing crops of corn, camotes, rice, or other food plants, whichever may furnish the most abundant crop in the particular locality, sufficient in quantity to produce the requisite food for the people of the municipality for the coming year.

"SEC. 2. Any municipal president is authorized to allot to the citizens of his municipality such public land as there may be within the boundaries of the municipality at present unoccupied, for the planting of the seed and the raising of the crops provided for in this act.

"SEC. 3. The crops planted and gathered under this act shall belong to the persons planting and gathering the same, even though they be planted upon the public land; and no rent for the public land thus used shall be chargeable against the persons so using same.

"SEC. 4. In cases where it is impossible in the municipality or province to secure the proper seed, the municipal council shall call upon the provincial board to procure the needed seed through the insular purchasing agent. The provincial board shall purchase the needed seed from the general funds of the province, and shall sell the same to the presidents of the municipalities whose councils have called for seed. The seed furnished by a provincial board to any municipality shall be receipted for by the municipal president and paid for out of the municipal funds by order of the municipal council. The seed shall then be sold to the residents of the municipality at the cost price thereof. If any person having land of his own, or tilling the public land, shall be known to be unable to pay for the seed, the municipal president may furnish him the seed without receiving the price thereof, in which case he shall collect an amount equal to the value of the seed furnished from the new crop, and shall sell the same and reimburse the municipal treasury with the proceeds.

"SEC. 5. Each municipal president shall keep a record of the amount of seed furnished to the inhabitants of his municipality and the number of hectares planted by each inhabitant in accordance with the requirements of this act, and it shall be his further duty to make monthly reports of his proceedings under this act to the provincial governor.

"SEC. 6. It shall be the duty of the provincial governor to see that the municipal presidents discharge their duties under this act, and if they fail to do so to suspend them and bring them before the provincial board to answer to the charges of non-compliance therewith.

"The provincial governor shall make monthly reports of the proceedings of the municipal presidents and his own proceedings under this act to the civil governor.

"SEC. 7. Any municipal president receiving seed from the provincial board under section four of this act who shall appropriate it to his own use or shall fail to distribute it in accordance with the terms of this act, or who shall knowingly permit or connive at the use of the seed for any other purpose than planting a new crop as in this act provided, shall be held to be guilty of embezzlement, and shall be punished by a fine not exceeding one thousand dollars or by imprisonment not exceeding three years, or both, in the discretion of the court.

"SEC. 8. It shall be the duty of the civil governor to issue a proclamation to the governors of the provinces, reciting the terms of this act and directing them to order the municipal presidents in accordance herewith to call the people of their respective municipalities together and secure the action required by this act.

"SEC. 9. The said proclamation of the civil governor shall be printed in English and Spanish and in the principal dialects of the islands, and shall be forwarded to the various provincial governors to be by them distributed among the municipalities of their respective provinces.

"SEC. 10. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of 'An act prescribing the order of procedure by the Commission in the enactment of laws,' passed September twenty-sixth, nineteen hundred.

"SEC. 11. This act shall take effect on its passage."

Now, therefore, I, William H. Taft, civil governor of the Philippine Islands, do hereby direct all provincial governors to order the municipal presidents to call the people of their respective municipalities together and secure the action required by the provisions of the act just quoted.

In testimony whereof I have hereunto set my hand and caused the seal of the government of the Philippine Islands to be affixed.

Done at the city of Manila this nineteenth day of November, one thousand nine hundred and two.

[SEAL.]

WM. H. TAFT.

By the civil governor:

BEEKMAN WINTHROP,  
Acting Executive Secretary.

[No. 517.]

AN ACT to provide against the danger of famine in the provinces of the Philippine Archipelago.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. To provide against the danger of famine, due to the short crop for the coming year in rice and other food stuffs usually produced in the provinces of the Philippine Archipelago, it shall be the duty of all municipal presidents to call meetings of the people of their respective municipalities, to notify them of the impending danger of famine, and to urge them at once to take steps to secure the necessary seed and to plant quick-growing crops of corn, camotes, rice, or other food plants, whichever may furnish the most abundant crop in the particular locality, sufficient in quantity to produce the requisite food for the people of the municipality for the coming year.

SEC. 2. Any municipal president is authorized to allot to the citizens of his municipality such public land as there may be within the boundaries of the municipality at present unoccupied, for the planting of the seed and the raising of the crops provided for in this act.

SEC. 3. The crops planted and gathered under this act shall belong to the persons planting and gathering the same, even though they be planted upon the public land, and no rent for the public land thus used shall be chargeable against the persons so using same.

SEC. 4. In cases where it is impossible in the municipality or province to secure the proper seed, the municipal council shall call upon the provincial board to procure the needed seed through the insular purchasing agent. The provincial board shall

purchase the needed seed from the general funds of the province, and shall sell the same to the presidents of the municipalities whose councils have called for seed. The seed furnished by a provincial board to any municipality shall be receipted for by the municipal president and paid for out of the municipal funds by order of the municipal council. The seed shall then be sold to the residents of the municipality at the cost price thereof. If any person having land of his own, or tilling the public land, shall be known to be unable to pay for the seed, the municipal president may furnish him the seed without receiving the price thereof, in which case he shall collect an amount equal to the value of the seed furnished from the new crop, and shall sell the same and reimburse the municipal treasury with the proceeds.

SEC. 5. Each municipal president shall keep a record of the amount of seed furnished to the inhabitants of his municipality and the number of hectares planted by each inhabitant in accordance with the requirements of this act, and it shall be his further duty to make monthly reports of his proceedings under this act to the provincial governor.

SEC. 6. It shall be the duty of the provincial governor to see that the municipal presidents discharge their duties under this act, and if they fail to do so to suspend them and bring them before the provincial board to answer to the charges of non-compliance therewith.

The provincial governor shall make monthly reports of the proceedings of the municipal presidents and his own proceedings under this act to the civil governor.

SEC. 7. Any municipal president receiving seed from the provincial board under section four of this act who shall appropriate it to his own use or shall fail to distribute it in accordance with the terms of this act, or who shall knowingly permit or connive at the use of the seed for any other purpose than planting a new crop as in this act provided, shall be held to be guilty of embezzlement, and shall be punished by a fine not exceeding one thousand dollars, or by imprisonment not exceeding three years, or both, in the discretion of the court.

SEC. 8. It shall be the duty of the civil governor to issue a proclamation to the governors of the provinces, reciting the terms of this act and directing them to order the municipal presidents in accordance herewith to call the people of their respective municipalities together and secure the action required by this act.

SEC. 9. The said proclamation of the civil governor shall be printed in English and Spanish and in the principal dialects of the islands, and shall be forwarded to the various provincial governors, to be by them distributed among the municipalities of their respective provinces.

SEC. 10. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 11. This act shall take effect on its passage.

Enacted, November 12, 1902.

---

[No. 495.]

AN ACT appropriating the sum of two million dollars, local currency, for expenses in connection with the purchase and distribution of rice to inhabitants of the Philippine Islands in provinces suffering from scarcity of food, and for other purposes.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. The sum of two million dollars, local currency, is hereby appropriated, from any funds in the insular treasury not otherwise appropriated, for expenses in the purchase and distribution of rice for the inhabitants of the Philippine Islands in provinces suffering from lack of food.

SEC. 2. The purchase of rice shall be made by the insular purchasing agent in such quantities and at such prices and times as the civil governor may direct. The rice so purchased shall be distributed in such manner and sold at such prices and in such localities as the civil governor may direct; but no sale shall be made except for cash nor at a price less than the actual cost thereof, including all expenses in connection with the distribution and sale of the same, such as transportation, shrinkage, storage, and customs duties.

SEC. 3. The amounts received from the sale of such rice shall be deposited in the insular treasury as soon as the same are received.

SEC. 4. The public good requiring the speedy enactment of this bill, the passage of

the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 5. This act shall take effect on its passage.

Enacted, November 4, 1902.

---

[No. 828.]

AN ACT authorizing the insular purchasing agent and provincial boards to sell carabao and other draft animals purchased out of the congressional relief fund by the insular government for the purpose of restocking the islands with draft animals and replacing draft animals destroyed by disease or other causes.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. All carabao and other draft animals purchased by the insular government out of the congressional relief fund shall be branded by the insular purchasing agent with the government brand and a consecutive number, of which proper entry and account shall be kept by said insular purchasing agent, together with the name of the vessel on which the animals were shipped to the islands, the number under which they were shipped, the date of their arrival in the Philippines, and their final disposition under proper regulations to be prescribed in executive orders by the civil governor.

SEC. 2. The insular purchasing agent may consign to provincial boards for sale upon proper requisition such number of said carabao or other draft animals as may be required by the board and authorized by resolution of the Commission.

SEC. 3. The insular purchasing agent and provincial boards to which consignments of carabao and other draft animals may be made in accordance with section two of this act are hereby authorized to sell such animals at public auction or in such other manner as may be authorized by resolution of the Commission to farmers and other persons requiring and needing them to perform work or labor on the property of the buyers or on property leased, hired, or occupied by them, or in or about a business owned, managed, or conducted by them. In case of the sale of cattle under this act a certificate of purchase of the cattle, with the proper descriptions, shall be issued to such purchaser of such cattle by the insular purchasing agent or the provincial treasurer for the provincial board, in the form and containing details to be set forth in regulations of the civil governor to accord, so far as may be, with certificates of purchase required by law for private sales of carabao: *Provided, however,* That no stamp for such sale shall be required.

SEC. 4. Where practicable, reasonable notice of all sales of carabao and other draft animals shall be given by the insular purchasing agent or the provincial board, as the case may be, and if at the time and place of sale more than one purchaser is present the privilege of choice shall be put up at auction and awarded to the person bidding the highest sum therefor, in addition to the minimum price for each carabao purchased, which minimum price is hereby fixed at seventy pesos, Philippines currency, for cash sales, and ninety-three pesos, Philippines currency, for part cash and part credit sales as hereafter defined, or the equivalent of these prices in Mexican or Spanish-Filipino currency at the official rate.

SEC. 5. All animals provided to be sold by this act shall be sold either for cash or one-third cash, one-third in one year from date of sale, and one-third in two years from date of sale, without interest, or upon such other terms as may be fixed by resolution of the Commission: *Provided,* That all deferred payments shall be secured by pledge, mortgage, or personal guaranty satisfactory to the provincial board or the insular purchasing agent, as the case may be: *And provided further,* That any part of the purchase money unpaid shall constitute a preferred lien on the animals sold, in favor of the insular government as against all persons whomsoever: *And provided further,* That where a purchaser on credit shall desire to anticipate the second installment by payment of the entire price in one year he shall be allowed to satisfy the debt by a total payment of eighty-one pesos, Philippines currency, instead of ninety-three pesos, as above provided.

SEC. 6. The insular purchasing agent shall keep a true and correct account of all sales made by him under the terms of this act, together with the consecutive numbers and brands of the animals sold, the name, address, business, or occupation of the purchaser, the full price for which sold, the cash paid, the amount due and security given (in case of credit sales), and make true report thereof to the insular auditor.

SEC. 7. The provincial treasurer shall keep a true account of all sales of animals made by the provincial board under the terms of this act, together with the consecutive numbers and brands of the animals sold, the name, address, business, or occupation of the purchaser, the full price for which sold, the cash paid, the amount due and the security given (in case of credit sales), and make a true report thereof to the insular auditor and to the insular purchasing agent.

SEC. 8. No animal purchased under the terms of this act for which the full price has not been paid and a certificate given therefor shall be sold, transferred, or pledged without the permission of the provincial board making the sale by resolution or of the insular purchasing agent in writing, which resolution or written permission shall contain the name of the first purchaser and of the vendee, transferee, or pledgee and his business and address and a description of the animal with its brands, and shall be recorded in the books of the provincial treasurer and of the insular purchasing agent. In case the permission is given by the insular purchasing agent, he shall forward a copy thereof to the insular auditor and to the provincial treasurer of the province where the animal was originally sold, and when the permission is granted by a provincial board a copy of the resolution shall be forwarded by the provincial treasurer to the insular purchasing agent and the insular auditor. A purchaser or his agent violating the provisions of this section shall be punished by a fine not exceeding five hundred Philippine pesos or by imprisonment not exceeding one year, or by both such fine and imprisonment as to the court may seem just.

SEC. 9. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 10. This act shall take effect on its passage.

Enacted August 7, 1903.

---

[No. 786.]

AN ACT appropriating the sum of two hundred and fifty thousand dollars, in money of the United States, for expenses in connection with the purchase, sale, and distribution of rice to inhabitants of the Philippine Islands in the discretion of the civil governor.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. The sum of two hundred and fifty thousand dollars, in money of the United States, is hereby appropriated out of the fund of three million dollars appropriated by the Congress of the United States for the relief of distress in the Philippine Islands, for expenditure in the purchase of rice for the purpose of securing to the inhabitants of the Philippine Islands opportunity to purchase rice at reasonable prices and for the purpose of distributing rice gratuitously to those people who are suffering from lack of food and unable to pay for the same.

SEC. 2. The purchase of rice, authorized by section one hereof, shall be made by the insular purchasing agent in such manner and quantities and at such prices and times as the civil governor may direct. The rice so purchased shall be distributed by sale at such prices and in such localities as the civil governor may direct, or shall be paid for by work on roads or other public improvements, or shall be distributed in emergencies gratuitously to starving people upon order of the civil governor: *Provided, however,* That it is the declared policy of the Commission to distribute rice gratuitously only in cases of sudden emergencies and in all other cases of destitution to furnish rice in consideration of work done for the public. Where distribution of rice, either by sale or gratuitously, is made under the provisions of this act for the inhabitants of any province, such rice shall be sent to the provincial supervisor of such province, by him to be distributed under the orders of the provincial board and the civil governor.

SEC. 3. When any of the rice purchased under this act shall be sold by a provincial supervisor or supervisor-treasurer, as the case may be, the proceeds of the sale shall be paid into the provincial treasury upon order of the supervisor. The provincial treasurer or provincial supervisor-treasurer shall then account to the insular treasurer for all moneys thus received and remit the same to the insular treasurer upon order of the insular auditor. When the rice shall be sold directly by the insular purchasing agent, the proceeds of the sale shall be deposited in the insular treasury forthwith upon order of the auditor. When the rice is distributed for work done or gratuitously, the supervisor shall keep careful account of the rice thus distributed and make report thereof to the insular auditor, including a statement of the work done for the rice distributed, with copy of the receipts received by him from the beneficiaries or from

the presidents or other municipal officers, through whom such distribution is made. The accounting by the insular purchasing agent and the provincial supervisors and treasurers under this act shall be in accordance with regulations to be prescribed by the insular auditor.

SEC. 4. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 5. This act shall take effect on its passage.

Enacted June 1, 1903.

---

EXCERPTS FROM THE MINUTES OF THE PHILIPPINE COMMISSION CONCERNING RICE.

*Excerpt from minutes of July 23, 1903.*

*Be it resolved*, That under act No. 797 the civil governor is hereby authorized to direct the auditor to draw a warrant on the insular treasury in favor of the provincial treasurer of Albay for the sum of twenty-five thousand dollars, United States currency, the same to be deposited in the provincial treasury of Albay and to be disbursed upon the order of the provincial board of Albay for public improvements in such a manner as to furnish labor to the people of the province who shall be in necessitous circumstances; the disbursement of the funds to be made by the provincial treasurer in accordance with law, subject to the same accounting to the auditor as provided for the disbursement of other provincial funds. The provincial treasurer is also required to make a full report of the expenditure of this fund to the civil governor to enable the civil governor, as required by the act of Congress, to report to Congress the disposition of the money. The provincial board of Albay is authorized to purchase rice with this fund and to use the rice in the payment of labor in so far as it may be wise. The provincial board of Albay may also authorize in limited quantities the use of rice purchased to relieve the wants of the indigent poor unable to earn money by labor, but the amount thus expended can only be expended by approval of the provincial board concurred in by the civil governor.

*Excerpt from minutes of August 5, 1903.*

On motion,

*Resolved*, That the civil governor be, and he is hereby, authorized to pay, from the appropriation of five hundred thousand dollars made by act No. 797 from the Congressional relief fund, a sum equivalent at the authorized rate of exchange to \$130.81, Mexican currency, to pay the expenses of transportation on one hundred and twenty-five sacks of rice furnished to the provincial government of Abra for the relief of the inhabitants of that province.

*Excerpt from minutes of August 29, 1903.*

On motion,

*Resolved*, That the civil governor is hereby authorized to expend from the fund of five hundred thousand dollars appropriated from the three million dollar Congressional relief fund by act No. 797 and made available for expenditure under his direction, upon authorization by the Commission, the sum of two thousand dollars, Philippines currency, to be used for the purpose of paying the charges of transportation on five hundred piculs of rice from San Fernando, in the province of La Unión to Baguio, in the province of Benguet, which rice is to be used for the feeding of laborers engaged on public improvements, and for other purposes, as directed by the civil governor.

*Excerpt from minutes of September 24, 1903.*

On motion,

*Resolved*, That the civil governor is hereby authorized to direct an expenditure from the funds appropriated under act No. 797 of the sum of one hundred thousand dollars, United States currency, in the purchase of rice and the payment of transportation and other charges incident to its distribution among the inhabitants of the Philippine Islands, for the purpose of relieving famine and distress therein, said funds having been withdrawn from the insular treasury by accountable warrant No. 3716, issued from the insular purchasing agent's requisition, dated August 12, 1903.

*Excerpt from minutes of October 1, 1903.*

On motion,

*Resolved*, That the action of the insular purchasing agent in chartering the schooner Kodiak at thirty dollars, United States currency, per day, for a period not to exceed six months, to be used in the transportation of carabao, rice, coal, and other government property between ports of the archipelago, for the purpose of relieving distress among the inhabitants thereof, be, and is hereby, approved by the Commission; and

*Be it further resolved*, That the civil governor be, and is hereby, authorized to expend from the funds appropriated by act No. 797, out of the Congressional relief fund, a sum not exceeding five thousand five hundred dollars, United States currency, for the payment of the charter fee of said schooner during such period as the same may be in use by the insular purchasing agent.

*Excerpt from minutes of October 2, 1903.*

On motion of the president,

*Resolved*, That for the purpose of using the rice in the suppression of the locust pest, in the construction and repair of roads and bridges and other public works, and for the sale of rice in order to prevent the excessive prices in parts of the archipelago where such prices are reported, the civil governor be, and is hereby, authorized to purchase two shiploads of rice; one from Messrs. Castle Brothers, Wolf and Son, Saigon white rice No. 2, at six pesos and two centavos, Philippines currency, per picul, duty paid, said shipload containing between twenty-eight thousand and thirty-two thousand piculs; and the second shipload from Messrs. Holliday, Wise and Company, Rangoon white rice No. 2, at six dollars and nineteen cents, Mexican currency, per picul, duty paid, said shipload containing between twenty-eight thousand and thirty-two thousand piculs; and that the civil governor is further authorized to distribute the rice bought in the various provinces in accordance with the methods now provided by law for the purposes above recited.

*Be it further resolved*, That the civil governor is hereby authorized to expend from the moneys appropriated from the Congressional relief fund by act No. 797 a sufficient sum to meet the expenditures authorized herein; these resolutions being adopted in accordance with section two of said act No. 797.

*Excerpt from minutes of October 22, 1903.*

On motion, it was

*Resolved*, That the civil governor is hereby authorized to direct an expenditure from the funds appropriated under act No. 797 of the sum of \$88,858.75, United States currency, in payment of 29,521.18 piculs of Saigon No. 2 rice purchased from Castle Brothers, Wolf and Sons at 6.02 pesos per picul, such rice being required for the purpose of relieving famine and distress within the Philippine Islands.

*Excerpt from minutes of November 6, 1903.*

On motion,

*Resolved*, That the civil governor is hereby authorized to direct an expenditure from the funds appropriated from the Congressional relief fund by act No. 797 of the sum of one hundred thousand dollars, United States currency, in the purchase of rice and the payment of transportation and other charges incident to its distribution among the inhabitants of the Philippine Islands for the purpose of relieving famine and distress therein.

## EXHIBIT B.

### ANNUAL REPORT OF THE INSULAR PURCHASING AGENT FOR THE PHILIPPINE ISLANDS FOR THE YEAR ENDING SEPTEMBER 30, 1903.

OFFICE OF THE INSULAR PURCHASING AGENT  
FOR THE PHILIPPINE ISLANDS,  
*Manila, P. I., October 15, 1903.*

The EXECUTIVE SECRETARY,  
*Manila, P. I.*

SIR: I have the honor to submit herewith the annual report of the bureau of the insular purchasing agent for the year commencing October 1, 1902, and ending September 30, 1903.

In order to show an aggregate of the business, as shown in the detailed statements attached hereto, I have reduced the amount shown as local currency, under the head of "Purchase of supplies," to United States currency at the present legal rate:

*Purchase of supplies (not including rice or carabao).*

Total purchases, this office .....	\$1, 456, 065. 16
Transferred to United States .....	326, 026. 00
Contracts awarded, not fully completed .....	433, 184. 46

Total purchases .....	2, 215, 275. 62
-----------------------	-----------------

Of this amount purchases have been made as follows:

Manila merchants .....	\$1, 785, 660. 52
United States .....	327, 782. 31
Japan .....	34, 437. 56
China .....	27, 449. 67
Australia .....	12, 474. 31
Germany .....	14, 152. 84
England .....	10, 732. 68
Italy .....	148. 00
France .....	2, 345. 81
British East Indies .....	91. 92

Total .....	2, 215, 275. 62
-------------	-----------------

It will be seen from the above that but about 14 per cent of all the purchases have been made in the United States, and but a little over 4 per cent in all other countries, and that over 80 per cent of the entire purchase of supplies have been made through the merchants of Manila.

The two buyers of this bureau have issued during this period 11,840 orders, making an average of 38 orders placed in the local markets each working day of the year.

Seven thousand and forty-four requisitions were received from the various bureaus and provinces, calling for 48,590 different items—an item consisting of any quantity of articles; thus, 150 tons hay or 2,000,000 slate pencils being considered as one item.

The local receiving and shipping offices received and delivered during the year 50,941,122 articles. The foreign and provincial shipping office received 394,050 packages, weighing 62,446,224 pounds, or 1,244,522 cubic feet, making 31,223 tons, and shipped 271,889 packages, weighing 44,156,465 pounds, or 749,065 cubic feet, weighing 22,403 tons, making a total of 53,626 tons handled.

There were 11,459 letters received and 8,594 written and 621 free entries issued

Under the provisions of Acts Nos. 495, 786, and 797 of the Philippine Commission this bureau, in addition to the regular purchase of supplies, has purchased rice amounting to \$2,451,168.04 local currency, and has sold rice to the amount of \$2,310,633.06; having on hand at the present time rice amounting to \$107,152.84. A full and detailed statement of all rice transactions is attached hereto.

Under an act of the Commission a part of the Congressional relief fund was set aside to be used for the purchase of carabao for the purpose of restocking the Philippine Islands by the sale of carabao to the provinces depleted by rhinderpest. A contract for 10,000 head of these animals has been entered into by this bureau with Messrs. Keylock & Pratt, of Shanghai, in deliveries of 500 per month. Up to the present but 773 have been delivered under the contract, and these are being sold as rapidly as they are permanently immunized against rhinderpest by the bureau of government laboratories.

The demands on the transportation department of this bureau are rapidly increasing, and there is now in use in that department 18 American horses, 18 Australian horses, 34 mules, 158 native horses, 80 carromatas, 13 carratelas, 15 escort wagons, 7 trucks, 3 delivery wagons, 5 quilez, 1 calesa.

Plans have been drawn for new stables, and when completed the work of this department can be carried on in a more satisfactory manner.

The total amount of money received from all sources and accounted for by this bureau, as shown by the attached statements of the disbursing officer, aggregate \$3,221,803.71 United States currency and \$3,988,108.36 local currency, showing a balance on hand of \$65,281.21 United States currency. There is also stock on hand in regular supplies amounting to \$571,319.64 Philippine pesos.

The disbursements and collections of this amount entailed 2,539 separate settlements, carried on 3,948 vouchers, covering approximately 15,000 invoices, as audited and checked against 12,908 purchase orders; the issuing of 11,719 invoices in quadruplicate; 718 settlements with provinces, covering 2,193 vouchers, and the settlement of 2,500 bills of lading.

In rendering this report, showing as it does the purchasing, handling, and shipping of \$3,281,000.85 worth of property and the accounting of \$5,021,045.09 United States currency, I desire to express my appreciation of the able assistance rendered the chief of this bureau by Mr. Gus Johnson, chief clerk; Mr. W. W. Garver, disbursing officer; Mr. F. H. Garrett, chief of property division; Mr. H. J. Black and J. N. Weir, local buyers; Mr. S. J. Epperly, chief record division; Mr. George Raetzell, chief property returns, and their assistants. They have worked many hours overtime in order to help in meeting the demands made on this bureau.

Respectfully submitted.

M. L. STEWART,  
*Assistant and Acting Insular Purchasing Agent.*

a Lost.

The above sales were for cash, the first two at \$100 being selected by the buyer, and the balance being taken as turned out by this bureau. Transfer certificates have been issued in each case, and will be accounted for to the auditor.

In selling the above carabao I find that purchasers prefer a large percentage of females, and would recommend that, if possible, the contractor send at least 50 per cent females.

Very respectfully,

M. L. STEWART,  
*Assistant Insular Purchasing Agent.*

CHAIRMAN OF COMMITTEE ON SALE OF CARABAO,  
*Manila, P. I.*

(Through executive secretary.)

### STATEMENT SHOWING ACTUAL EXPENDITURES UNDER THE CONGRESSIONAL RELIEF FUND.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
OFFICE OF THE AUDITOR,  
*Manila, December 1, 1903.*

SIR: In compliance with your verbal request of recent date, I have the honor to submit herewith a special report covering operations under the Congressional relief fund to this date since the same was made available to the insular government.

The original appropriation by Congress was of the sum of \$3,000,000, United States currency, entered on the books of the auditor as ₱6,000,000.

The first appropriation made from this relief fund was by Act No. 738 of the sum of ₱200,000, or \$100,000 United States currency, "for the preliminary expenses of the insular purchasing agent and other agents of the insular government in visiting the ports and countries where draft cattle may be purchased, in paying the purchase price of same, in chartering the necessary transportation for their importation into the Philippine Islands, and for all other expenses incident to their purchase and delivery in the Philippine Islands." This appropriation was fully withdrawn April 27, 1903, by warrant No. 3060, payable to the insular purchasing agent. The sum of ₱196,239.02 was recently repaid to the insular treasury, leaving the net withdrawals but ₱3,760.98 which substantially represents the expense of the acting insular purchasing agent while in China making the preliminary contracts as contemplated.

By Act 750 of the Commission, an appropriation of an indefinite sum was made to reimburse the insular purchasing agent for food supplies and tents issued under authority of the Commission for the relief of the inhabitants of the town of Mariquina who were rendered homeless by a fire in that town on April 26, 1903. The insular purchasing agent's claim for reimbursement under this act has not been settled.

The next appropriation from the Congressional relief fund was of the equivalent of ₱500,000, by Act No. 786, "for expenditure in the purchase of rice for the purpose of securing to the inhabitants of the Philippine Islands opportunity to purchase rice at reasonable rates and for the purpose of distributing rice gratuitously to those people who are suffering from lack of food and unable to pay for the same." This act provided that the purchase of rice should be made by the insular purchasing agent in such manner and quantities and at such prices and times as the civil governor might direct, and the law further provided that the rice should be distributed in such localities as the civil governor might direct or applied to payment for work on roads or other public improvements, in addition to gratuitous distribution to starving people upon the order of the civil governor. Act No. 786 was amended by Act No. 814, and in order to carry out the provisions of Act No. 786, as amended by Act No. 814, executive order No. 64 was issued, as follows:

EXECUTIVE ORDER, } THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
No. 64. } EXECUTIVE BUREAU,  
Manila, July 31, 1903.

The following regulations will govern the sale and distribution of rice furnished under the appropriation by Congress for the relief of the people of the Philippine Islands:

Before rice is furnished to any province its provincial board will submit to the civil governor an estimate of the quantity of rice which can be used to advantage in a given period and a statement of the conditions in the province which make the distribution of rice desirable.

All rice furnished by the civil government will be consigned to the supervisor or the supervisor-treasurer of the province to which it is shipped. At the time of shipment the insular purchasing agent will forward to the insular auditor a copy of the notice of shipment, together with a statement of the price at which the rice is to be

sold, which shall include cost of transportation and handling, but shall exclude duty, if any. The expense of storing and subsequent handling of the rice shall be at the expense of the province, except when the civil governor shall order otherwise.

All rice shall be receipted for to the insular purchasing agent by the supervisor or supervisor-treasurer to whom consigned, and shall be taken up by the latter officer, who shall be accountable on his official bond for the same, and render accounts therefor to the insular auditor as hereinafter provided.

Where the rice is used for public works a full report of its issue and distribution shall be made to the civil governor, in addition to the account which is required by the auditor, with a definite statement of the public improvement upon which it has been used, the number of days of labor, and the amount of material secured.

No rice shall be distributed gratuitously, except in limited quantities, to deserving persons unable to work, and upon the recommendation and order of the provincial board, approved by the civil governor, to whom will be made a statement of the peculiar circumstances calling for such action.

In cases where rice is sold, the proceeds of the sales will be deposited in the provincial treasury. The money so received shall be placed to the credit of a "Congressional relief fund," and thereafter may be disbursed as other funds on the order of the provincial board, for public works, and accounted for in the usual manner to the auditor, full report thereon being made to the civil governor.

The accounts of the supervisor or supervisor-treasurer to the insular auditor will be rendered on a regular property return, auditor's Form 700, monthly instead of quarterly, supported as follows:

(a) In the case of direct sales, by proper abstracts, showing date of sale, name of purchaser, quantity sold, with price and total amount received. This abstract should be certified as correct by the person in charge of the sales and by the supervisor, and be accompanied by the receipt of the provincial treasurer for the amount deposited in the provincial treasury.

Sales to commercial firms will not be allowed except upon advance approval of the civil governor.

(b) In the case of the issue of rice in payment of labor performed, the regular labor pay roll, provincial Form 57, will be used, modified so as to show in the columns marked "Rate of pay" and "Amount paid," certain fixed units of measure in rice instead of money. The certificates at the bottom of the roll should also be modified by substituting the words "issue" and "issued," respectively, for "payment" and "paid." The money value of the rice so issued in payment for labor will be computed and stated on the pay roll, and the amount represented by such money value of such pay rolls will be taken up by the provincial treasurer in his revenue account as receipts from rice sales and placed to the credit of the aforesaid "Congressional relief fund." Credit will be taken for the same amount as a disbursement for labor on public works, the voucher being the pay rolls received from the supervisor or supervisor-treasurer. The latter officer will drop the rice so disposed of on his returns, supporting the same by the receipt of the provincial treasurer for the amount represented by the pay rolls, and taken up by the latter, as in the case of sales made in the regular way.

(c) In case of gratuitous distribution ordered by the provincial board and approved by the civil governor the same abstract will be used as in the case of sales, modified to show gratuitous distribution instead of sale, certified as correct by the officer making the distribution, which distribution will be witnessed by two disinterested, reputable citizens, whose certificate that they were present and witnessed the issue must appear on the abstract.

In order to facilitate the operation of this order throughout the province, the provincial supervisor or the supervisor-treasurer shall have power to designate in writing any municipal officer as his deputy for the purpose of this issue, who shall serve without additional compensation.

WM. H. TAFT, *Civil Governor.*

Withdrawals have been made to date from the funds appropriated by act No. 786, as follows:

June 10, warrant No. 3344 .....	₱200, 000
July 22, warrant No. 3530 .....	200, 000
Sept. 22, warrant No. 3877 .....	100, 000
Total .....	500, 000

A repayment of ₱6,137.54 was made to this appropriation and again withdrawn, leaving the net withdrawals at the full amount appropriated.

It is not practicable at this time to state the actual expenditures under these various subappropriations, but the same will be submitted at the earliest practicable date.

Act No. 795 appropriated from the Congressional relief fund the sum of ₱3,000 for certain contingent expenses of the Government laboratories for reimbursement to that bureau for expense incurred in immunizing and caring for draft animals, and this appropriation was withdrawn July 11, 1903, by warrant No. 3471, in the sum of ₱3,000. There has been repaid to this appropriation the sum of ₱1,853.87, leaving the net withdrawals for the purpose named ₱1,146.13.

Act No. 797 made an appropriation from the Congressional relief fund of \$500,000, equivalent to ₱1,000,000, "for expenditure, under the direction of the civil governor, for such purposes and in such manner as might from time to time be authorized by resolutions of the Philippine Commission and in carrying out the intent of the Congress of the United States in appropriating the fund aforesaid." The withdrawals under these resolutions are of such recent date that accounts of the expenditures made have not been rendered with sufficient completeness to permit of any statement at this time of the actual disbursements thereunder.

July 22, 1903, by warrant No. 3528, the sum of ₱30,000 was withdrawn pursuant to the following resolution of the Philippine Commission, dated July 10:

"On motion,

"*Resolved*, That the insular purchasing agent be, and he is hereby, authorized and directed to provide transportation for all carabaos to be sold in the provinces and to make requisition for the expenses of such transportation in accordance with act numbered seven hundred and ninety-seven, these expenses of transportation to include also the lighterage of cattle from ships in Manila Bay, or wherever the ships bringing the cattle from foreign countries are anchored, to the shore; and also the expenses of the maintenance of the cattle, including the rent of suitable places for yarding the same pending their transportation to the provinces where they are to be sold; and also the expenses of branding the cattle with the Government brand, the same to bear consecutive numbers and series; and

"*Be it further resolved*, That the insular purchasing agent be, and he is hereby, directed to keep a careful and separate account of the cattle purchased and of the expenses connected with the purchase, distribution, care, and sale of the cattle and of the proceeds received therefrom; and

"*Be it further resolved*, That a copy of these resolutions be forwarded to the insular purchasing agent."

On July 25, by warrant No. 1539, the sum of ₱50,000 was withdrawn pursuant to the following resolution of the Philippine Commission, dated July 23:

"Whereas one hundred thousand dollars in Mexican currency was collected by forced contributions to the insurgents during the insurrection from the inhabitants of the province of Albay at a time prior to American occupation of that province; and

"Whereas there is much evidence to show that this one hundred thousand dollars was embraced in a draft which was subsequently seized by the United States Government, and the proceeds of the draft turned into the insular treasury; and

"Whereas the conditions in the province of Albay are such as to require the institution of public works with a view to furnishing labor to the people thereof; and

"Whereas, although the facts enumerated above do not form the basis of any legal claim for the return of the money referred to from the insular treasury to the people of the province of Albay, the circumstances nevertheless present an equitable basis for action in the discretion of the Commission in this regard in view of the present needs of the province;

"Now, therefore, be it resolved, That under act No. 797 the civil governor is hereby authorized to direct the auditor to draw a warrant on the insular treasury in favor of the provincial treasurer of Albay for the sum of twenty-five thousand dollars United States currency, the same to be deposited in the provincial treasury of Albay and to be disbursed upon the order of the provincial board of Albay for public improvements in such a manner as to furnish labor to the people of the province who shall be in necessitous circumstances; the disbursement of the funds to be made by the provincial treasurer in accordance with law, subject to the same accounting to the auditor as provided for the disbursement of other provincial funds. The provincial treasurer is also required to make a full report of the expenditure of this fund to the civil governor to enable the civil governor, as required by the act of Congress, to report to Congress the disposition of the money. The provincial board of Albay is authorized to purchase rice with this fund and to use the rice in payment of labor in so far as it may be wise. The provincial board of Albay may also authorize in limited quantities the use of the rice purchased to relieve the wants of the indigent poor unable to earn money by labor, but the amount thus expended can

only be expended by approval of the provincial board, concurred in by the civil governor."

Only July 30, by warrant No. 3609, the sum of ₱10,000 was withdrawn pursuant to the following resolution of the Philippine Commission, dated July 27:

"Whereas, the employment of additional veterinarians and inoculators by the board of health for the Philippine Islands for the purpose of combating the spread of disease among draft cattle in the islands is considered by the Commission to be a proper charge against the three million dollar relief fund voted by the Congress of the United States;

"Now, therefore, be it resolved, That the civil governor is hereby authorized to expend from the fund of five hundred thousand dollars, appropriated from the three million dollar relief fund by act No. 797, and made available for expenditure under the direction of the civil governor, upon authorization by the Commission, the sum of twenty-nine thousand one hundred and forty dollars United States currency, for the payment of the following expenses:

"Salaries and wages, board of health for the Philippine Islands, nineteen hundred and four; one supervisor of inoculating veterinarians and of inoculators, at eighteen hundred dollars per annum; nine veterinarians, class seven, twenty inoculators, class A, seventeen thousand one hundred dollars;

"For the payment of services and expenses of interpreters in provinces to aid inoculators etc., one thousand dollars;

"Transportation, board of health for the Philippine Islands, nineteen hundred and four, for the actual and necessary traveling expenses, including subsistence, of the veterinarians and inoculators while on duty in the provinces, eleven thousand and forty dollars."

On August 20, by warrant No. 3716, the sum of ₱200,000 was withdrawn pursuant to the following resolution of the Commission, dated September 24:

"On motion,

"*Resolved*, That the civil governor is hereby authorized to direct an expenditure from the funds appropriated under act No. 797 of the sum of one hundred thousand dollars United States currency, in the purchase of rice and the payment of transportation and other charges incident to its distribution among the inhabitants of the Philippine Islands for the purpose of relieving famine and distress therein, said funds having been withdrawn from the insular treasury by accountable warrant No. 3716, issued upon the insular purchasing agent's requisition, dated August 12, 1903."

On August 27, by warrant No. 3778, the sum of ₱2,000 was withdrawn pursuant to the following resolution of the Commission, dated August 18:

"On motion,

"*Resolved*, That the civil governor is hereby authorized to expend from the fund of five hundred thousand dollars appropriated from the three million dollar Congressional relief fund by act No. 797, and made available for expenditure under his direction, upon authorization by the Commission, the sum of one hundred thousand dollars United States currency, to be used for the following purposes:

"For the payment of an assistant foreman, at \$3.50 United States currency, per day, whose employment by the insular purchasing agent for the purpose of superintending, under his direction, the sale and care of carabaos purchased by the insular government, is hereby authorized;

"For the payment of transportation expenses of employees of the insular purchasing agent, engaged in the sale or care of carabaos in an amount not to exceed twenty-five dollars United States currency, per month; and

"For the purchase of carabao carts and yokes to be used in connection with the care of carabaos in charge of the insular purchasing agent; and

"*Be it further resolved*, That Commissioner Luzuriaga, chairman of the committee on the purchase and sale of carabaos be, and he is hereby, authorized to extend the contract entered into by the insular purchasing agent with the firm of Lack & Davis for the care and feeding of carabaos belonging to the insular government as he may deem wise."

On August 31, by warrant No. 3805, the sum of ₱2,000 was withdrawn pursuant to the following resolution of the Commission, dated August 29:

"On motion,

"*Resolved*, That the civil governor is hereby authorized to expend from the fund of five hundred thousand dollars, appropriated from the three million dollar Congressional relief fund by act No. 797, and made available for expenditure under his direction, upon the authorization of the Commission, the sum of two thousand dollars Philippine currency, to be used for the purpose of paying the charges of transportation on five hundred piculs of rice from San Fernando in the province of La Union, to Baguio in the province of Benguet, which rice is to be used for the feeding

of laborers engaged in public improvements, and for other purposes, as directed by the civil governor."

On September 11, 1903, by warrant No. 3834, the sum of ₱49,033.88 was withdrawn pursuant to the following resolution of the Commission, dated September 7:

"On motion,

"*Resolved*, That the civil governor be, and he is hereby, authorized to expend from the appropriation of five hundred thousand dollars, made by act No. 797 from the Congressional relief fund and made available for expenditure in his discretion, upon authorization by resolution of the Commission, the sum of \$24,516.94 in money of the United States, to be devoted to the payment of drafts against the insular purchasing agent on account of carabaos purchased by the insular government under the contract with Messrs. Keylock & Pratt, of Shanghai, in such amount."

On September 24, by warrant No. 3920, the sum of ₱364.34 was withdrawn, pursuant to the following resolutions of the Commission, dated July 30 and August 5, respectively:

"*Resolved*, That the expenses of the trip of the superintendent of the government laboratories to Shanghai and return should properly be paid out of the fund of five hundred thousand dollars, appropriated from the three million dollars Congressional relief fund by act No. 797, and made available for expenditure under the direction of the civil governor upon authorization of the Commission, and that authorization for this action by the civil governor be hereby conveyed."

On motion,

"*Resolved*, That the civil governor be, and he is hereby, authorized to pay, from the appropriation of five hundred thousand dollars, made by act No. 797, from the Congressional relief fund, a sum equivalent, at the authorized rate of exchange, to \$130.81, Mexican currency, to pay the expenses of transportation on one hundred and twenty-five sacks of rice furnished to the provincial government of Abra for the relief of the inhabitants of that province."

On September 28, by warrant No. 3939, the sum of ₱18,961.90 was withdrawn, pursuant to the following resolution of the Commission, dated September 24, 1903:

"The chairman of the committee on the purchase and sale of carabao presented to the Commission correspondence, under dates of September 23 and September 24, 1903, Executive Bureau File No. 30,275-A11, between the committee and the insular purchasing agent, in regard to payment for carabao purchased by the insular government from Messrs. Keylock & Pratt, of Shanghai, China. It appearing from the communication of the insular purchasing agent that there is now due Messrs. Keylock & Pratt the sum of \$4,200, Shanghai currency, for 56 carabao, under the old contract, at \$75 each; \$13,825 for 175 carabao, delivered under the new contract, at \$79 each; and \$1,360 for 34 carabao, which died under immunization, and for which the government is obliged to pay, under the old contract, the sum of \$40 each, making a total of \$19,385, Shanghai currency; and it appearing that the sum of \$18,461.90 in Philippines currency is the equivalent on this date of \$19,385 in Shanghai currency, the whole amount reported due to Messrs. Keylock & Pratt:

"*Now therefore be it resolved*, That the civil governor is hereby authorized to direct the expenditure of \$18,461.90, Philippines currency, by the insular purchasing agent, from the fund of five hundred thousand dollars appropriated from the three-million-dollar Congressional relief fund by act No. 797, and made available for expenditure under his direction upon authorization of the Commission for the payment of the above account of Messrs. Keylock & Pratt: *Provided*, That this authorization of the insular purchasing agent to pay this amount is with the reservation of the right of the government to exact from Messrs. Keylock & Pratt an adjustment of claims existing in favor of the government against them for prior deliveries, as per their telegrams and letters."

On October 24, by warrant No. 4047, the sum of ₱12,000 was withdrawn, pursuant to the following resolutions of the Commission, dated July 27 and September 9, respectively:

(Resolution of July 27, authorizing employment of additional veterinarians, etc., is quoted above under warrant No. 3609.)

"Whereas the civil governor did, on August 8, 1903, in conformity with an informal agreement with the Commission, advise the provincial governors of all provinces that a daily allowance of five Philippine pesos for traveling expenses would be made to the agricultural members of the locust boards authorized by act No. 817, while said members were engaged in the work of the boards and away from their usual places of residence, such days to be certified by the provincial governors: Therefore,

"*Be it resolved*, That the action of the civil governor, as above set forth, be, and the same is hereby, confirmed by the Commission, and that the civil governor is hereby authorized to pay the traveling expenses above referred to out of the appropriation

of five hundred thousand dollars made by act No. 797 from the Congressional relief fund, which is available for expenditure by him upon authorization of the Commission."

On October 26, by warrant No. 4058, the sum of ₱177,717.50 was withdrawn, pursuant to the following resolution of the Commission, dated October 22:

*"On motion it was resolved, That the civil governor is hereby authorized to direct an expenditure, from the funds appropriated under act 797, of the sum of \$88,858.75, United States currency, in payment of 29,521.18 piculs of Saigon No. 2 rice purchased from Castle Brothers, Wolf & Sons at ₱6.02 per picul, such rice being required for the purpose of relieving famine and distress within the Philippine Islands."*

On October 27, by warrant No. 4059, the sum of ₱19,144.53 was withdrawn, pursuant to the following resolution of the Commission, dated October 23:

On motion,

*"Resolved, That the civil governor is hereby authorized to direct an expenditure from the funds appropriated under act No. 797 of the sum of nine thousand five hundred and seventy-two dollars and twenty-seven cents, United States currency, in payment of two hundred and forty-nine head of carabao, purchased from Messrs. Keylock & Pratt for distribution and sale within the Archipelago, to relieve distress therein."*

The following resolutions of the Commission were passed under the dates indicated, the expenditures thereunder authorized being made proper charges against the Congressional relief fund. The accounts arising under these resolutions have not yet been rendered to the auditor with sufficient completeness to enable definite statement at this time of the actual expenditures made:

The following resolution was passed July 31, 1903:

*"On motion it was resolved, That the civil governor be, and is hereby, authorized to employ Benito Laureano, the person recommended by Commissioner Luzuriaga, at a salary of one hundred dollars, United States currency, per month, who shall visit Shanghai, China, and there, under the supervision of Veterinarian Slee, now on duty at Shanghai, inspect the carabaos presented for fulfillment of the contract of Messrs. Keylock & Pratt, and that Mr. Laureano be allowed his actual passage expenses, first class, from Manila to Shanghai and return, and three dollars, United States currency, per day for his subsistence and all other expenses while in Shanghai; all of the money expended under this resolution to be charged to the fund of five hundred thousand dollars appropriated from the three million dollar Congressional relief fund by act No. 797, and made available for expenditure under the direction of the civil governor, upon authorization by the Commission; and*

*"Be it further resolved, That a copy of this resolution be sent to the auditor and to the disbursing officer of the executive bureau, and that the disbursing officer of the executive bureau be, and is hereby, authorized to advance to Mr. Laureano a sufficient sum with which to purchase his passage and to meet the expenses of his trip, not to exceed one hundred and fifty dollars, United States currency, which sum shall be accounted for as provided by law."*

The following resolution was passed August 3, 1903:

"On motion,

*"Resolved, That the civil governor be, and is hereby, authorized to expend from the sum of five hundred thousand dollars, appropriated by act No. 797 from the Congressional relief fund, to be expended by the civil governor upon authorization of the Commission, the sum of seven hundred and fifty dollars, United States currency, for the purpose of combating the locust pest in the province of Abra."*

The following resolution was passed September 7, 1903:

"On motion,

*"Resolved, That the civil governor be authorized to place at the disposal of the committee on the purchase and sale of carabaos the sum of ten thousand dollars in money of the United States, to be expended out of the appropriation of five hundred thousand dollars made by act No. 797 out of the Congressional relief fund, and made available for expenditure by the civil governor, upon authorization by the Commission, said sum to be expended as may seem wise to the committee, in the construction of shelters, corrals, and other means for the custody, care, and support, pending their sale, of carabaos, owned by the insular government."*

The following resolution was passed September 23, 1903:

*"It appearing to the Commission that a sum of money is required immediately for the construction of a suitable shelter, on the hacienda of Señor Lopez, near Orani, Bataan, for employees engaged in the care of carabaos, purchased by the insular government; for the construction of corrals in which to keep carabao purchased by the government, during the night time and while they are being inoculated; for the*

payment of the necessary labor to be employed for the herding and care of carabaos; for the necessary contingent expenses arising from the care of said carabaos in the province of Bataan, near the municipality of Orani." Now, therefore,

*"Be it resolved,* That the civil governor is hereby authorized to expend from the appropriation made by act No. 797, out of the Congressional relief fund, the sum of five hundred dollars, United States currency, to be expended for the purposes hereinbefore mentioned; and

*"Be it further resolved,* That these funds be withdrawn upon requisition in favor of the disbursing officer of the insular purchasing agent, as provided by section 2 of act No. 797, and transfer of the same directed to the provincial supervisor-treasurer of Bataan, who is authorized to expend such moneys for the purpose above set forth, upon vouchers to be approved by the provincial board of that province."

The following resolution was passed September 25, 1903:

"On motion,

*"Resolved,* That the civil governor be, and is hereby, authorized to direct the insular purchasing agent to purchase five hundred shovels and five hundred crowbars and to forward the same to the supervisor of the province of Rizal for use in the suppression of locusts and in road work; and that the provincial supervisor shall take up such property upon his property accounts as in cases of other property of the province, and be accountable for the same according to law; and

*"Be it further resolved,* That the civil governor be, and is hereby, authorized to pay for such supplies from the funds appropriated by act No. 797 from the Congressional relief fund."

The following resolution was passed October 1, 1903:

"On motion,

*"Resolved,* That the action of the insular purchasing agent in chartering the schooner *Kodiac* at thirty dollars, United States currency, per day, for a period not to exceed six months, to be used in the transportation of carabao, rice, coal, and other government property, between ports of the archipelago, for the purpose of relieving distress among the inhabitants thereof, be, and is hereby, approved by the Commission; and

*"Be it further resolved,* That the civil governor be, and is hereby, authorized to expend from the funds appropriated by act No. 797, out of the Congressional relief fund, a sum not exceeding five thousand five hundred dollars, United States currency, for the payment of the charter fee of the said schooner, during such period as the same may be in use by the insular purchasing agent."

The following resolution was passed October 1, 1903:

"On motion,

*"Resolved,* That the insular purchasing agent be, and is hereby, authorized to make a contract with the agent of the owners of the Santa Mesa estate for the rental of a tract of land for the pasturage of carabao, at the rate of seventy-five centavos, Philippines currency, per month per head; and he is further authorized to incur the necessary expense of employing men to guard the carabao and of erecting the necessary shelter for the men and the necessary corrals for the cattle for use at night; and the civil governor is hereby authorized to direct the payment of a sufficient sum to meet the expenditures authorized by this resolution out of the appropriation of five hundred thousand dollars, made by act No. 797, from the Congressional relief fund."

The following resolution was passed October 26, 1903:

"On motion of Commissioner Smith,

*"Resolved,* That the carabao of the insular government, purchased from the Congressional relief fund, be placed in charge of Mr. A. J. Washburn, manager of the Culion stock farm, whose duty it shall be to make all provision for their pasturage, care, feed, and interisland shipment under the direction of the insular purchasing agent; that Mr. Washburn shall have authority to employ the necessary labor to enable him properly to perform the duties thus imposed, payment for same to be made by the insular purchasing agent on his certificate as to the time labor was employed; that the insular purchasing agent is hereby authorized to assign to Mr. Washburn one saddle horse and equipment therefor, to be used by him in the performance of his duties under this resolution, and if necessary to purchase such horse and equipment for this purpose; and that the salary of Mr. Washburn, now paid out of the appropriation for the bureau of agriculture, as well as the funds necessary to carry out the provisions of this resolution, be paid by the insular purchasing agent, on approval of the committee on purchase and sale of carabao out of the ten thousand dollars set aside by resolution of the Commission, dated September 1, 1903, from the three million dollar Congressional relief fund for the custody, care, and support of government carabao, pending their sale."

The following resolution was passed November 21, 1903:

"On motion,

*"Resolved,* That the civil governor be, and he is hereby, authorized to pay from the appropriation of five hundred thousand dollars, made by act No. 797, from the Congressional relief fund, a sum equivalent, at the authorized rate of exchange, to \$692.41, Mexican currency, for the expenses of transportation from the ship's side into the province of Abra, and storage en route of one thousand sacks of rice furnished to the provincial government of Abra for the subsistence of the inhabitants of that province while engaged in the destruction of locusts."

Under these resolutions a total sum of ₱571,222.15 has been withdrawn from the treasury, and repayment has been made amounting to ₱7,060, leaving net withdrawals amounting to ₱564,162.15, and balance to the credit of the subappropriation on the books of the auditor of ₱435,337.85.

On June 30, 1903, the sum of \$1,000, United States currency, equivalent to ₱2,000, was appropriated by act No. 793 as a loan to the province of Batangas, "to be used by the provincial board as it might deem wise in aid of the municipality of Batangas to meet the emergency presented by a fire destroying its market and rendering homeless a large number of its people." This sum was withdrawn August 8, on settlement warrant No. 1652.

Under date of October 2, 1903, by act No. 918, the Commission appropriated the sum of \$25,000, United States currency, equivalent to ₱50,000, from the Congressional relief fund, for the purpose of constructing a wagon road from Pasacao to Nueva Caceres, in the province of Ambos Camarines, the said appropriation to be expended for labor and material in money or in rice, as the civil governor might direct. The sum of ₱10,000 was withdrawn by warrant No. 4116, November 13.

Under date of October 3, by act No. 920, the sum of \$84,000, United States currency, equivalent to ₱168,000, was appropriated from the Congressional relief fund for the purpose of constructing roads and necessary bridges thereon as follows:

For a road from Vigan to Bangued, in the provinces of Ilocos Sur and Abra, ₱80,000.

For the construction of a road from Bacon to Bulasan, connecting the Pacific Ocean and China Sea, via Sorsogon, Gubat, and Barcelona, in the province of Sorsogon, ₱80,000.

For the Padre Juan Villaverde trail, Bayombong to San Nicolas, provinces of Nueva Vizcaya and Pangasinan, ₱8,000.

From these appropriations the sum of ₱4,000 was withdrawn, under date of October 28, by warrant No. 4072, for one-half of the sum appropriated for the Villaverde trail. The sum of ₱10,000 was withdrawn November 20, by warrant No. 4140, for the Vigan-Bangued road, and ₱15,000 was withdrawn for the Bacon-Bulasan road, by warrant No. 4166, November 24.

On October 8 the following resolution was passed by the Commission for the improvement of the Pancipit River, Batangas Province:

"On motion,

*"Resolved,* That the consulting engineer be directed to prepare, as soon as possible, detailed plans, and to draw up the specifications and contract for the construction of locks, dams, bridges, embankment dredging, and other works involved in the improvement of the Pancipit River, and, upon the completion of this work, to advertise the same in accordance with the provisions of Act No. 584, section 6, for at least thirty days; and, upon opening bids for this work, that the consulting engineer be further directed to draft and submit an act or resolution providing for the necessary appropriation from the Congressional relief fund, for the prosecution of the work, before contracts for the same are entered into."

This resolution contemplates an expenditure of approximately ₱370,000, but, as indicated by the resolution, no appropriation thereunder has as yet been made.

Under date of November 7, by warrant No. 4094, the sum of ₱200,000 was withdrawn pursuant to the following resolution of the Philippine Commission, dated November 6:

"On motion,

*"Resolved,* That the civil governor is hereby authorized to direct an expenditure, from the funds appropriated from the Congressional relief fund by Act No. 797, of the sum of one hundred thousand dollars, United States currency, in the purchase of rice and the payment of transportation and other charges incident to its distribution among the inhabitants of the Philippine Islands for the purpose of relieving famine and distress therein."

On November 27, by warrant No. 4200, the sum of ₱2,093.16 was withdrawn under resolutions of July 30 and September 8, respectively, already quoted.

Under date of November 20, by Act No. 1000, the sum of ₱234,000, equivalent to \$117,000, United States currency, was appropriated from the Congressional relief fund for the purpose of constructing roads and bridges in the province of Cebu, as follows: For the Carcal-Barili road, ₱58,000; for the Sogod-Putad road, ₱178,000.

No withdrawals have as yet been made from this appropriation.

Under date of November 27, the Commission passed the following resolution:

“Upon motion of the president, it was

“*Resolved*, That the sum of two thousand seven hundred dollars, United States currency, should be expended from the appropriation made by Act 797, from the Congressional relief fund, in the purchase of a well-boring machine for use in the province of Ambos Camarines to secure good water for the people of that province.”

No withdrawal has been made as yet under this resolution.

Under date of November 30, by Act No. 1015, the sum of \$87,000, United States currency, equivalent to ₱174,000, was appropriated from the Congressional relief fund, for the purpose of constructing a wagon road from Pagbilao to Atimonan, in the province of Tayabas. No withdrawals have as yet been made under this appropriation.

Under date of November 30, by Act No. 1016, the sum of \$180,000, equivalent to ₱360,000, was appropriated from the Congressional relief fund for the purpose of constructing the Capiz-O'Donnell-Iba wagon road in the province of Tarlac and Zambales. No withdrawals have as yet been made.

It therefore appears that of the total sum of ₱6,000,000 appropriated by Congress, the sum of ₱2,691,000 has been appropriated or allotted by the Philippine Commission for the purposes herein named, and that net withdrawals from such allotments have been made amounting to ₱1,312,162.42, leaving a balance to the credit of the allotments amounting to ₱1,378,837.58. There was in the Treasury on December 1, to the credit of the Congressional relief fund, a balance unappropriated of ₱3,309,000, and a balance of the original fund in the Treasury, allotted and unallotted, amounting to ₱4,687,837.58.

I submit herewith a tabulated statement comprehending the figures above given.

Respectfully,

A. L. LAWSHE, *Auditor*.

The CIVIL GOVERNOR.

[No. 781.]

AN ACT amending act numbered one hundred and seventy-five, entitled "An act providing for the organization of an insular constabulary and for the inspection of the municipal police," and acts numbered six hundred and ten, six hundred and eighteen, and six hundred and nineteen, amendatory thereof.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. The civil governor, or the provincial governor with the approval of the civil governor, is hereby authorized, whenever in his judgment the public interest will be subserved thereby, to place the municipal police of the respective municipalities of any province under the control of the senior inspector of constabulary on duty in the province at the time. The senior inspector in such case is hereby authorized and empowered, under the general supervision of the provincial governor, to control and direct the movements of the municipal police and, with the approval of the provincial governor, to discharge any member of the police force and substitute a fit and suitable resident of the municipality in his place. It shall be the duty of the senior inspector when thus placed in charge of the municipal police of a province to see that they are properly uniformed, drilled, and disciplined. When thus vested with authority over the municipal police he shall see that all lawful orders of the provincial governor, municipal president, and others in authority are executed as provided by the municipal code and amendments thereof, and shall further see that all proper arrests are made for violations of law or municipal ordinances, and in case of emergencies is authorized, under the general supervision of the provincial governor, to unite the forces of the various municipalities of the province in suppressing ladronism or brigandage or other grave violations of the law which threaten the peace of the entire community; and he may also unite the constabulary forces under his command with the municipal forces in the execution of his authority for this purpose.

SEC. 2. It is hereby made the duty of the provincial board of each and every province to prescribe a suitable uniform for the municipal police of each and every municipality, with a proper insignia to indicate the municipality to which the police belong. Authority is also hereby given the provincial board of each province to fix the number of police which is required to be maintained by each and every municipality of the province. In the event that the provincial board shall find that any municipality is unable properly to uniform and maintain the number of policemen fixed by the provincial board, the latter is authorized to vote necessary aid for the maintenance of such police out of provincial funds. In the event the provincial board should not have provincial funds adequate for this purpose it may apply to the Commission for aid in this behalf.

SEC. 3. Whenever the chief of Philippines Constabulary shall report to the civil governor that in any province the efficiency of the constabulary of the province is being interfered with by frivolous arrests and unfounded prosecutions leading to the imprisonment of members of the constabulary and their unnecessary detention from duty, it shall be in the power of the civil governor, if he finds the report to be well founded, by executive order to make the following section numbered four applicable to the method of arrests in such province instead of the ordinary method of arrests now in force. But until the civil governor shall issue such executive order the section following shall have no force and effect, and it shall cease to have effect as may be provided in said order.

SEC. 4. When in respect to any province the civil governor shall issue the executive order described in the next preceding section, and any officer or member of the Philippine Constabulary shall in such province be charged with the violation of any criminal law or ordinance and a warrant is issued for the arrest of the alleged offender, such warrant shall be placed in the hands of a constabulary officer on

duty in the province for execution; and it shall be the duty of said officer to arrest such person and bring him before the justice of the peace or officer issuing such warrant, to be dealt with as the law directs. No officer or member of the police of a municipality in such province shall have authority to arrest an officer or member of the constabulary upon any criminal charge, save for a criminal offense committed in his presence, and when such offense is committed in his presence it shall be the duty of the municipal officer making the arrest to deliver the prisoner to the nearest constabulary officer on duty in the province with a statement of the cause of the arrest of the offender and the names of the witnesses to the offense; and it shall be the duty of the constabulary officer receiving the prisoner, as soon as practicable, to bring him before a justice of the peace, or the court of first instance of the province, to be dealt with as the law directs. In case the justice of the peace shall bind over any officer or member of the constabulary to answer a criminal charge and the defendant fails to give bail, when the offense is bailable, the defendant shall be delivered to the custody of the senior inspector of constabulary on duty in the province for safe-keeping; and it shall be the duty of the inspector to safely guard and keep the prisoner and produce him before the court of first instance, as required by law, to be dealt with as the law directs; and such prisoner shall be committed to the provincial jail by the inspector, if necessary for safe custody.

SEC. 5. It shall be the duty of all municipal officers, as soon as practicable, to give notice to the provincial governor, or inspector of constabulary in the province, of the presence of any bands of ladrones or brigands or other persons threatening the peace of the community within their jurisdiction, or any act of robbery or theft by such bands, when the offenders are at large; and any violation of the provisions of this section shall be punished by a fine not exceeding one thousand dollars and imprisonment not exceeding two years.

SEC. 6. In provinces which are infested to such an extent with ladrones or outlaws that the lives and property of residents in the outlying barrios are rendered wholly insecure by continued predatory raids, and such outlying barrios thus furnish to the ladrones or outlaws their sources of food supply, and it is not possible with the available police forces constantly to provide protection to such barrios, it shall be within the power of the civil governor, upon resolution of the Philippine Commission, to authorize the provincial governor to order that the residents of such outlying barrios be temporarily brought within stated proximity to the población or larger barrios of the municipality, there to remain until the necessity for such order ceases to exist, and during such temporary residence it shall be the duty of the provincial board, out of provincial funds, to furnish such sustenance and shelter as may be needed to prevent suffering among the residents of the barrios thus withdrawn, and in case the provincial funds are not adequate for such purpose application may be made to the Commission for an appropriation to meet the exigency.

SEC. 7. Act Numbered Six hundred and eighteen is hereby amended by inserting immediately after section one the following:

"SEC. 2. The pay of an assistant chief and lieutenant-colonel, not an army officer, shall be not less than two thousand seven hundred and fifty dollars and not exceeding three thousand five hundred dollars per annum, the amount to be fixed, within the limitations above mentioned, by the civil governor. The grade of major and senior inspector is hereby created, at a salary of two thousand dollars per annum. The chief of Philippines Constabulary is hereby authorized and empowered to select from the most meritorious of the captains and senior inspectors of constabulary, not exceeding four in number, officers of this grade. The chief of Philippines Constabulary is further authorized and empowered to increase the pay of ten of the most meritorious and deserving captains and senior inspectors of constabulary from the amount now fixed by law to a sum not exceeding one thousand eight hundred dollars per annum, and he is further authorized to increase the pay of a like number of first lieutenants and inspectors of constabulary to an amount not exceeding one thousand two hundred dollars per annum: *Provided, however,* That the total number of constabulary officers as now provided by law shall not be increased."

Said act is further amended by changing section two to be section three and section three to be section four.

SEC. 8. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 9. This act shall take effect on its passage.

Enacted, June 1, 1903.

## EXHIBIT F.

---

### TESTIMONY TAKEN AT MALACÑAN PALACE FEBRUARY 16, 1903, RELATIVE TO THE VALUE OF LANDS OWNED BY THE RELI- GIOUS ORDERS.

The first witness called was Señor JUAN VILLEGAS, who testified as follows:

Governor TAFT. What is your name and age?

Señor VILLEGAS. My name is Juan Villegas, and I am 47 years old.

Governor TAFT. What is your profession?

Señor VILLEGAS. I was an assistant in the department of public works, both local and general, during the Spanish régime.

Governor TAFT. Did that involve any knowledge of surveying?

Señor VILLEGAS. Yes, sir; I am a graduate in that profession.

Governor TAFT. Have you any local familiarity with any of these estates, especially the Imus estate?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Did you while in the employ of the government as established in the Philippine Islands make a survey of the Imus estate?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Did you make this yourself, personally?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Did you make this map here?

Señor VILLEGAS. Yes, sir.

Governor TAFT. What were you directed to do?

Señor VILLEGAS. My orders were to survey the entire two estates of San Juan and San Nicolas.

Governor TAFT. Had you any duty as to valuation?

Señor VILLEGAS. Yes, sir. During the time of the Spanish Government I had made some valuations and I was also ordered by Mr. Legarda to make the valuation of this estate.

Governor TAFT. Did the making of valuations come within your profession?

Señor VILLEGAS. During the time of the Spanish Government I made some valuations of private properties, but up to the present time I have not made any valuations of haciendas or estates.

Governor TAFT. What do you mean by private properties?

Señor VILLEGAS. I mean the property belonging to private persons and not to corporations.

Governor TAFT. Agricultural or business property?

Señor VILLEGAS. City property.

Governor TAFT. Have you ever made any valuations of agricultural property?

Señor VILLEGAS. Yes, sir.

Governor TAFT. How did you get your valuations if you had never had any experience before?

Señor VILLEGAS. It was because I had studied both agriculture and topography at the University of Santo Tomas. My brother during the time of the Spanish Government gave me a great deal of practical work in the shape of surveying and of judging the value of land.

Governor TAFT. Agricultural land?

Señor VILLEGAS. My experience of agricultural land has been with the estate of San Francisco de Malabon and with the estate of Malita. I have been nearly two years in the former place and also a length of time in the second place, and my work as a surveyor and going over this land has given me a knowledge of its valuation.

Governor TAFT. Did you prepare a valuation of this land?

Señor VILLEGAS. Yes, sir.

Archbishop GUIDI. Did you make this valuation through your own proper knowledge of the facts?

Señor VILLEGAS. Yes, sir; I made conscientiously, and through my love for the government.

Archbishop GUIDI. How is it, if you have testified that you do not know the present value of the lands, that you are able to make, in view of this assertion, a valuation of the land now? You have declared in your testimony that you do not know the present actual value of this land. How is it possible for you to have made out a valuation of this land in view of your assertion?

Señor VILLEGAS. The valuation has been made according to my knowledge of the value of the lands before the land assessment was placed.

Archbishop GUIDI. But the fact remains that you do not know the present actual value of the lands?

Señor VILLEGAS. I do not know the actual present value of the lands because the valuation has been made since the assessment of the land tax.

Governor TAFT. When was that placed?

Señor VILLEGAS. I believe in the month of July or September—somewhere around that neighborhood—of last year.

Archbishop GUIDI. Do you know if, since the imposition of the land tax, the value of the land has increased, or has decreased?

Señor VILLEGAS. In parts of Luzon it has decreased and in parts it has increased. The decrease is owing to the loss of cattle, while other lands have increased because of the fact that they work at them.

Archbishop GUIDI. That, however, is simply incidental. Is it not true that with the return of plenty of draft cattle the value of the lands will go up?

Governor TAFT. I want to ask when he made the valuation of this land?

Señor VILLEGAS. If I remember correctly, it was either during the month of December, 1901, or in the month of January of 1902.

Governor TAFT. When you made that valuation, did you make the valuation as of that time?

Señor VILLEGAS. Yes, sir.

Archbishop GUIDI. I repeat my first question to you, and I ask you what value did you give to the dollar when you placed the value on these lands?

Señor VILLEGAS. I gave it the same value as the current local value of the peso.

Governor TAFT. Two to one?

Señor VILLEGAS. The value is given at its local current value at par with gold.

Governor TAFT. What was the current value at that time?

Señor VILLEGAS. Eight reales silver.

Governor TAFT. Do you mean the current value of the peso in December of 1901, and January, 1902?

Señor VILLEGAS. Yes, sir; that is what I mean.

Governor TAFT. Do you remember what it was, how many pesos were worth a gold dollar?

Señor VILLEGAS. They were at par at that time.

Governor TAFT. What do you mean by par?

Señor VILLEGAS. That they were not subject to an exchange, not as they are now, at 2.66.

Governor TAFT. What was it if it was not 2.66?

Señor VILLEGAS. Equal in value to the Spanish dollar.

Governor TAFT. In January of last year?

Señor VILLEGAS. Either in December of 1901, or January, 1902; yes, sir.

Governor TAFT. Do you mean that you could get a gold dollar for a Mexican peso? Is that what you mean?

Señor VILLEGAS. The peso at that time was not subject to discount as the Mexican peso is to-day. As I understand it, the Mexican peso is worth 64 cents to-day, but at that time it was worth 100 cents.

Governor TAFT. He evidently does not understand us. This was in December of 1901, wasn't it?

Señor VILLEGAS. I started the survey on the 23d of December, 1901, and continued it until it was finished in the month of January, 1902.

Governor TAFT. You have made this assessment in Mexican dollars, haven't you?

Señor VILLEGAS. Yes, sir.

Governor TAFT. If you wished to state that, instead of in Mexican dollars, in American dollars, at the time you made this survey, would you estimate it at the same amount in American dollars that you have in Mexican dollars, or not? At the time that you made this survey how many Mexican dollars could you get for an American dollar, gold?

Señor VILLEGAS. Two dollars American.

Governor TAFT. If you were to estimate this in American dollars—for instance, you have an estimate here of 150 dollars Mexican a hectare of first-class land—how many dollars would that be in American at the time the assessment was made?

Señor VILLEGAS. I would value it in proportion to the difference in value between the silver and the gold.

Governor TAFT. What was the difference between silver and gold?

Señor VILLEGAS. Nothing, only that \$1 gold was worth \$2 Mexican.

Archbishop GUIDI. The witness has contradicted himself repeatedly, for he has repeatedly said from the beginning that his idea of the Mexican dollar as made in this assessment was, that it was equivalent to a Spanish peso or duro of 8 reals, and that the Spanish peso or duro of 8 reals was equivalent to a gold dollar. Afterwards there was a small change of 5 cents or something like that. It is not for us to find out what the actual difference was between the two moneys, but what was the value of it in the mind of the man who made the assessment at that time.

Governor TAFT. It seems to me that the witness and his excellency have misunderstood each other. I have never, that I recollect, had any conversation with this witness on this subject at all. The witness says that he estimated this at the time when Mexican and gold were at par. For as much as two years Mexican and gold were at par in the sense that one was worth twice the other; and as I have understood the witness that is what he meant when he said that they were at par, and that his estimate in Mexican is, as he said, at the current rate of exchange at par, which was par and not one to two or 2.66.

Mr. MCGREGOR. If he had been asked what the value of this land was in 1884 or 1885, would he have put the sum in Mexican dollars as he has to-day?

Señor VILLEGAS. When I made this valuation I took into consideration the actual value of the land at that time.

Mr. MCGREGOR. Then you would not have put the same value on it in 1884 or 1885?

Señor VILLEGAS. No, I would not.

Mr. MCGREGOR. Would you have put it at more or less?

Señor VILLEGAS. Lower. The price of land has lowered in parts of the island of Luzon, through scarcity of carabaos, and it has risen in other parts.

Governor TAFT. What he said was that he thought that the land now was worth less than when he made the estimate, because of the scarcity of carabaos and of laborers.

Mr. MCGREGOR. He said, I believe, that he would have put the value lower in the years I mention. Why would he have put it lower?

Señor VILLEGAS. Because there has been a small percentage of increase in the value of the land since that time up to the present time.

Mr. MCGREGOR. Is that the reason you would have put it different, on account of the increase in the value of the land?

Señor VILLEGAS. Yes, sir.

Mr. MCGREGOR. If the value of the land had remained the same would you have put the same value on it if it had not risen in value?

Señor VILLEGAS. No, sir; I would have put it 10 per cent less.

Mr. MCGREGOR. Why?

Señor VILLEGAS. On account of the lack of labor that there was at that time.

Mr. MCGREGOR. Otherwise you would have given it the same value?

Señor VILLEGAS. I think the value has increased, because there are a greater number of people there, and therefore there would be more call for the products of the land.

Mr. MCGREGOR. My idea was right, that he would have put the same valuation on the land if the circumstances had been the same. At that time a Mexican dollar was equal to a gold dollar.

Governor TAFT. This witness says now that he put an estimate on the land in Mexican dollars and he put it at the current rate of exchange. Was it first-class land?

Señor VILLEGAS. That is governed altogether by certain conditions; for instance, soil and subsoil, and cultivation; the state of cultivation of the land, character of the soil, and other conditions. But I should judge that first-class land is land that will yield from 80 to 100 cavanese.

Governor TAFT. Does that land, in order to yield as much as that, have to be irrigated?

Señor VILLEGAS. Yes, sir.

Governor TAFT. What is second-class land?

Señor VILLEGAS. It is land where the bed rock comes up nearer to the surface, or, in other words, where the soil is not so deep.

Governor TAFT. How many crops do they get from first-class land in a year?

Señor VILLEGAS. Two crops a year.

Governor TAFT. How many crops do they get from second-class land?

Señor VILLEGAS. The same number of crops, but as the composition of the soil is different, being a poorer class of soil, the yield is not so great.

Governor TAFT. What is the yield of second-class land?

Señor VILLEGAS. From 50 to 60 cavanese of palay.

Governor TAFT. Is all this land rice land?

Señor VILLEGAS. No, sir; other crops are grown, such as sugar.

Governor TAFT. How much ought first-class sugar land to produce?

Señor VILLEGAS. From 25 to 30 pilons of sugar to a hectare.

Governor TAFT. How much does second-class sugar land produce?

Señor VILLEGAS. From 16 to 20 pilons.

Governor TAFT. I would like to ask whether through Cavite, through this province, and Bulacan, first-class rice land among farmers, among people that deal in that kind of property, has a fixed value for sale, so that the people understand what the value is?

Señor VILLEGAS. At the time I made this valuation such land was thought to be worth 150 pesos a hectare. If capitalists were ready with money to buy land in large amounts it might possibly be bought for less than that, and in small lots more; but I think haciendas of this size about 150 pesos.

Governor TAFT. The question asked is this—whether through these three provinces, and Lagudra, too, was first-class rice land a well understood kind of land, so that the people knew what was meant when they said first-class rice land?

Señor VILLEGAS. Yes, sir.

Governor TAFT. What I intended to ask was—suppose we take province by province—suppose we take the province of Cavite: Is there a knowledge among men who deal in this thing of a value attached to first-class rice land in the province of Cavite—a generally understood value?

Señor VILLEGAS. No, sir.

Governor TAFT. Does each hacienda vary in its value? I mean the first-class rice land.

Señor VILLEGAS. Yes, sir.

Governor TAFT. What makes it vary?

Señor VILLEGAS. It is because, for example, in the province of Bulacan, what is understood there by first class produces a greater number of cavanese of rice per hectare than in Cavite. In Cavite it is from 80 to 90; in Bulacan the first-class land produces over 100; so that there is no fixed price for all the land.

Governor TAFT. Is there a limit within which it varies?

Señor VILLEGAS. There are limits between which the purchaser and the seller make their agreement.

Governor TAFT. You have said that it is higher in Bulacan than in Cavite. How does that compare with Rizal?

Señor VILLEGAS. What I have said was that the superior or first-class lands of Bulacan were of a higher grade and brought a higher price than in Cavite. I myself have valued first-class land in that province at 200 pesos a hectare.

Governor TAFT. What is it worth in Rizal?

Señor VILLEGAS. On account of its proximity to Manila first-class land may be worth more.

Governor TAFT. Does it produce more cavanese?

Señor VILLEGAS. About the same as any other province. I am talking of irrigated land.

Governor TAFT. Isn't all first-class land irrigated?

Señor VILLEGAS. Yes, sir.

Governor TAFT. It has to be irrigated to produce two crops, does it not?

Señor VILLEGAS. Yes, sir.

Archbishop GUIDI. Is it not true that you have extended the urban zone at Imus, Santa Cruz, Lolomboy, and Orion? You have considered all this land in your estimate as urban land. Why is it that you have not included in the same urban zone the lots belonging to the places at Calamba, Bifian, Santa Rosa, and Pandi?

Señor VILLEGAS. The area of all the town lots has been recorded in my report. I believe that I have put in the town lots in each case. The only one that I have not included within the urban zone is the one of Santa Maria de Pandi, of which part of the land belongs to the municipality.

Archbishop GUIDI. Why is it then, if you consider it as town property or within the urban zone, that you value them by the hectare instead of by the square meter, as if they were agricultural lands?

Señor VILLEGAS. It is because at those points we do not value land by square meters but by hectares.

Archbishop GUIDI. But all lands within the urban zone should be measured by the square meter. Upon what do you base your judgment when you value the town lots in Santa Cruz and Naic at \$200 a hectare and at \$125 at Lolomboy and Orion, when, as a matter of fact, the property at these two latter places, or at least at Lolomboy, on account of its proximity to the railroad, should be worth more?

Señor VILLEGAS. I did not make the valuation of the lots at Lolomboy.

Archbishop GUIDI. Upon what ground did you place your present valuation of the lands, which is the same valuation or less valuation than it was twenty years ago, when that price was paid, not for the ownership of the land, but merely for the use of the land per hectare?

Señor VILLEGAS. I was helped in forming my judgment in this valuation by investigations made by me in the pueblos near the haciendas. I simply used the information that I got from the people of the locality as a help to me in forming my judgment.

Archbishop GUIDI. Explain why you have made the valuation at \$200 a hectare when twenty years ago it was worth \$200 Mexican, at that time worth \$100 gold, that is to say the two metals being at par, and when rice was worth 6 or 7 reals and now it is worth two or three times as much, while the value of the Mexican money has depreciated to less than half that it was at that time. Explain why you have done this. It appears that this is contradictory of what you said before.

Señor VILLEGAS. I have not said that the land was worth \$200 an acre twenty years ago.

Archbishop GUIDI. Even if you did not say so, we can take that fact into consideration that land was worth 200 pesos a hectare, equivalent to \$200.

Governor TAFT. About Lolomboy. This gentleman (Señor Gutierrez) has said something about the value of the land at Lolomboy; that the town lots ought to be worth more because the railroad runs through them. As a matter of fact the railroad does not run except through a corner of Lolomboy, and there is no station that I can find on this map showing that the railroad has a station on the estate of Lolomboy.

Señor GUTIERREZ. There is a station within 500 meters of Lolomboy.

Governor TAFT. The value of a town lot depends upon the prosperity, the size, and the business of the town, and when these solares are situated 2 or 3 miles from the railroad the presence of the railroad does not affect their value as town lots. It may affect the value of the whole hacienda, because it brings the agricultural property within reasonable distance of the city, but it does not affect the value of the town lots unless those town lots are on a railroad or in a large town? The value of a town lot depends upon its use and utility, ordinarily, for a store or something that is used in a town, such as a factory or store. Now, 500 meters away from a station that has no buildings that can be used as a store or factory is likely to make the land much more useful for agricultural purposes than as a town lot. For instance, \$200 a hectare which it may be worth for agricultural purposes may much exceed its value as a town lot.

Señor GUTIERREZ. The reason that there are lots in some pueblos that are used for agricultural purposes is simply because there is not sufficient population in that town to utilize the land as town lots.

Governor TAFT. That's it, exactly; so it is not worth what you wish to impose on town lots. You do not use it for town lots because there is no demand for it as such.

Señor GUTIERREZ. Still, some of the land even at Lolomboy is needed for building purposes, even if only a few hectares; but those hectares are needed for town lots, and must be considered as town lots.

Governor TAFT. That has got 164 hectares of solares in Lolomboy.

Archbishop GUIDI. Explain to me why you have valued rice land above sugar-cane land, when it is known that the latter gives a more valuable product.

Señor VILLEGAS. It is because they are higher lands than those of palay.

Archbishop GUIDI. Is it not true that the sugar-cane land gives a greater profit than rice land?

Señor VILLEGAS. No, sir; rice lands give a more valuable crop than sugar.

Governor TAFT. Are the expenses of cultivating sugar greater than the expenses of cultivating rice?

Señor VILLEGAS. Yes, sir.

Governor TAFT. How do they differ; how much?

Señor VILLEGAS. It is slight, but the difference consists in the using of machinery with sugar cane.

Archbishop GUIDI. Explain what method you have used in making the valuation of uncultivated lands. It appears that you have put a valuation of \$25 Mexican on

the lands of Santa Maria de Pandi. On all other uncultivated lands you have placed a valuation of \$5 Mexican a hectare, notwithstanding the fact that many of these lands have valuable timber on them. Explain why you have done this.

Señor VILLEGAS. It is because the lands on the estate of Santa Maria de Pandi are all level lands which it is not necessary to clear. I have made this valuation of \$5 in consideration of the fact that uncultivated state lands were valued at from one to five dollars a hectare.

Archbishop GUIDI. You should not have done that when considering private lands. These are not state lands. The government lands naturally would be much cheaper than private lands, because the government sells those lands cheaper in order to promote agriculture. I wish to ask if, in making the valuation of these uncultivated lands, you have taken into consideration that many of them contain valuable woods and quarries; and have you taken into consideration the fact that the character of the soil and the subsoil must be considered, as is the custom in Italy and elsewhere? Have you considered that if they have waterfalls they may be considered valuable for manufacturing purposes? Have you, in short, considered the quality of the soil, the quality of the timber, the quarries, waterfalls, and all other sources of natural wealth which they contain?

Señor VILLEGAS. I have taken into consideration the value of these quarries at Mandaluya. I have seen that there is mountainous land near Imus, but I do not see that there are quarries there. The trouble with the quarries at Imus is that they are so far removed that it is easier to get the stone from Manila than to get it out of the quarry.

Governor TAFT. In what condition are the roads?

Señor VILLEGAS. The main road to Binicayan is almost impassable during the rainy season. They are in bad condition.

Governor TAFT. Are these rivers navigable with bancas?

Señor VILLEGAS. They are navigable with small boats up to the bridge of Imus. Beyond that the river has a very stony bottom and is shallow.

Archbishop GUIDI. In your valuation of this property, have you considered the improvements?

Señor VILLEGAS. Yes, sir.

Archbishop GUIDI. Have you considered the value of the dams?

Señor VILLEGAS. I have also considered the value of the dams.

Archbishop GUIDI. You say that they are in a bad state and you have valued them accordingly?

Señor VILLEGAS. Yes, sir.

Archbishop GUIDI. The difference between the actual cost of this dam and the valuation put upon it by the witness is enormous. Irrigation can be done in two ways. One is the old-fashioned way, with a great deal of trouble, and the other is the modern system, and the land that has these modern improvements is worth a great deal more, irrespective of being first-class land.

Governor TAFT. The land is worth what it produces.

Archbishop GUIDI. You must take into consideration the difference that there is in paying 40 men to irrigate a certain piece of first-class land and paying 2 men to open up the doors and letting the water flow in.

Governor TAFT. It does not make any difference whether the irrigation is natural irrigation or whether it requires power to pump the water. If you have the water there and it can be put on the land just as cheap from natural resources as from engine, the engine is not to be valued in the value of the land.

Archbishop GUIDI. I can not agree with you. You must take into consideration the expense that there is of the irrigation afterwards, which is very high.

Governor TAFT. I agree to that. The point I am trying to make is that what we are paying for here is the agricultural land. Now, what I do not want to pay for is the agricultural land and those amounts invested in the land—a million dollars, it may be, gold or silver, I do not care what—which made that land good agricultural land. If I pay for the land, then I get all there is; and to take, first, a valuation of the land and then add what it cost to make that land, is to make me pay double.

Archbishop GUIDI. We do not claim that we wish payment for these lands as first-class lands and payment for the improvements; but what we do claim is that these first-class lands with the improvements on them at present are worth more than if they were without the improvements.

Governor TAFT. I agree to that. You say superior first-class lands; that means land that can be economically irrigated so that it produces two crops a year. I agree that we ought to pay what that land will sell for—what that land is worth in the market. But we pay for the land; we do not pay for the improvements which made it that land.

Archbishop GUIRI. That is true, but you must value these first-class lands with the improvements.

Governor TAFT. The improvements are worth just what they add to the value of the land. Now, what we pay for this land is its value—its market value—what other people who would buy and had an opportunity to buy and who expected to use it for agricultural purposes would pay. In other words, it is what the land buys and sells for in the market. It is the demand for such land and the willingness to sell by those persons who hold. I agree that the number of cavares that is produced a year affects what people will pay for the land; but the ultimate fact is the actual value in the market, controlled by many circumstances in addition to its productivity and the economy of its working, which is controlled by its distance from the market, by the amount of sugar, etc., that is produced, by the difficulties of getting labor, and by the difficulty of getting cattle to work it. All these things control what land sells for in the market. We are trying to get at the fair valuation of this land. What would you estimate the market value of the land to be? The income from the land influences those who wish to buy. I observe in reading over some of the calculations as to the value of the Recoleta, or Augustinian lands, I think, that they calculated that they ought to be capitalized on a net return of 6 per cent. I have asked gentlemen who are familiar with agricultural land what it ought to pay, and they say that it ought to pay 20 per cent in this country, because of the danger from locusts and everything else that you have to take into calculation as you look at it for five or ten years. If there are no sales of lands, you have got to get at the price in some other way; but the best standard of what is the market value of land is what it sells for.

Archbishop GUIRI. I do not consider myself very strong on economic questions, but I have had some experience in Europe in the sale and purchase of lands; and it is generally the custom there, when trying to capitalize a piece of land, to take what it had produced net for twenty-five years and then get the average per year for the period, and work on that basis.

Governor TAFT. In Europe if a man gets 4 per cent on his investment he regards himself as very fortunate. In this country loans on real estate and agricultural property must have from 20 to 25 and 30 per cent interest a year. That illustrates the difference in the calculation of the value of this land from that which is made on European lands. Therefore, when you come to calculate what you ought to make here, you have got to calculate it on a much larger percentage of income than you calculate in England, in Italy, or in the United States. The difference in the conditions must necessarily affect the price to be paid for the land here. There is another consideration. These gentlemen, the friars, have owned this land from fifty to two hundred years, more or less. What did they actually make out of the land? How much a year did they get out of it?

Continued from February 16, 1903.

MALACANAN PALACE, *February 27, 1903.*

Mr. MCGREGOR. With reference to the answers given by Señor Villegas at the last meeting, I have a copy of the proceedings. Señor Villegas first of all says that there are no quarries at Imus, and then says that the trouble at Imus is that the quarries are so far removed that it is easier to get the stone from Manila than to get them out of the quarry. To this I replied that all the buildings there were built with stone from the neighborhood, as well as the dams and aqueducts. Señor Villegas says that the road to Binacayan is almost impassable during the rainy season; to which I replied that Binacayan is a most inconvenient point on the bay, and that the road to Imus is first class. I might add that Binacayan is a place that is not used as a means of getting to Imus. Everybody goes to Bacoor. I have only once been to Binacayan; that is because I could not get to Bacoor. Señor Villegas made a statement that all the roads on the property are in bad condition. I have personally seen most of the roads, and most of the other roads in Cavite Province, and I think that I can honestly say that most of the roads in the Imus hacienda are as good and better. During the dry season they are not at all bad, and during the wet season for about four months in the year many are very bad; but during the time of the year when we want to transport rice, which is the dry season, they are good. The road from Imus to Bacoor is always good, because it is a first-class road. The principal road that runs right from the hacienda up to Silang is in pretty good condition up as far as Perez Dasmariñas, which is about halfway. It is just 500 yards outside. It was the original idea to make the road from Imus to Dasmariñas a first-class road throughout, but I believe people said the money ran short, and it is now not really a bad road. For provinces it is a good road. I might also say that almost every river or stream is bridged by a very substantial stone bridge, that you do not see

outside the friars' haciendas. Some have been broken down, but most of them are still in good order. All the principal ones are in good order. My statement regarding the value of the dams as a source of power for driving machinery was not recorded. I mentioned principally the dam at San Nicolas, called the Place de Molina. I said that it had a head of water of 22 or 23 yards, which would give all the power that you could possibly want for any factory, and above which is a considerable-sized lake, that, unless there was a very prolonged drought, would furnish power for a very long time. Señor Villegas says the Imus River is navigable only by small boats up to the Imus Bridge. My reply, to the effect that large cascoes can go right up to the go-downs, was not recorded. [Shows Governor Taft a photograph in support of his statement.] Señor Villegas says that the dams are in bad condition. My reply to the contrary is not recorded. I would like to add that some of them may have been neglected. Some of the canals have been neglected and allowed to grow over, but I have seen most of the waterworks, and I have not seen any signs of willful destruction. It has been through want of care if anything is not as it ought to be.

Ask Señor Villegas on what grounds he bases the value that he has put on the whole of the waterworks on the Imus property. I think it is \$84,000 Mexican he puts it at.

Señor VILLEGAS. I have placed that valuation in accordance with the actual condition of those works.

Mr. MCGREGOR. I would like to say in regard to the dam at Place de Molina—and there are other dams on the property—that it could not be built for that amount. I had an engineer up with me, Mr. Dock, an Englishman, who died a short time ago—last year. He valued the hacienda part of the place that has been occupied by troops; and I also had him up to see this dam, and I asked him what it could be built for, and he said that it could not be built for \$160,000. He is a man that does that sort of work.

Governor TAFT. So that it is worth now \$160,000 if you measure it by what it would cost to reproduce it. He added \$84,000 to the valuation of the land. You paid—or your predecessors paid—for the property about \$75,000 gold, and you say you have added \$1,000,000 in improvements. Are you going to estimate the value by what it cost you to buy that land and then what it cost you to put the improvements on? If you add the value of the improvements, and you take what the value of the land is as made by those improvements, you just double the price for the purchaser.

Mr. MCGREGOR. I was getting at this statement of Señor Villegas, that the waterworks now are worth \$84,000. It is put at a very absurdly low price.

Governor TAFT. It is put in there as the basis for use in furnishing electric power for sawmills or something of that sort. If you put a sawmill on the land that adds to the value of the land, and its addition may be fairly estimated by what it costs to put up a sawmill.

Mr. MCGREGOR. I have seen Señor Villegas's valuation once—Señor Legarda showed it to me—and it looked to me as if his valuation of the land was quite separate and apart from any improvement on it, because he has valued the improvements separately.

Governor TAFT. It is fair to add to the value of the whole estate the dams, if they can be used for the purpose of creating water power.

Archbishop GUIDI. In principle I quite agree with Governor Taft as to the manner of placing a valuation on this land and improvements, but it appears to me that there is a mistake somewhere. Señor Villegas, in making the comparative study of the valuation which he has made of different estates, has not considered the added value of the lands by virtue of these improvements, and has assessed the land with improvements at very much the same ratio as he has the land without improvements.

Governor TAFT. That will appear as we go over the different estates.

Archbishop GUIDI. It appears to me that Señor Villegas, while he may be a capable man in his profession as agricultural engineer, does not seem to me to be a man who is competent to know everything, and not a man competent to place a value upon engineering or hydraulic works. I think that there is a limit beyond which he must not go in the assessment of these estates. He has evidently had limits in his mind between which he fixed all these assessments. He has not taken into consideration, in the valuation of these lands, their proximity to Manila or their remoteness from Manila, and other conditions that would bear upon their value. He has not taken into account at all those conditions which ought to be taken into consideration; that is to say, the quality of the land, its nearness to a market, and other conditions which bear upon value. It is impossible to fix a ratio or standard for all of these estates, because the conditions which prevail in regard to the quality of the soil, etc., are so very different.

Governor TAFT. The delegate has stated some of his inferences from the examination of the assessments as to what Señor Villegas has done. I would like to ask a few questions of Señor Villegas as to what instructions he had with reference to the examination of these estates.

Archbishop GUIDI. I have not made inferences with regard to Señor Villegas's instructions, but my reply was simply in answer to your remark that the value of the land ought also to include the value of the improvements, and I have doubted whether Señor Villegas has taken into account the value of the improvements in the valuation that he has placed on the land. It appears that in his assessment he has not taken into consideration the improvements.

Governor TAFT. Let me ask Señor Villegas whether before he made the survey anybody suggested to him the limits of the valuation within which he was required to make this assessment.

Señor VILLEGAS. No, sir.

Governor TAFT. How did you reach your valuation of each estate?

Señor VILLEGAS. I have placed the value after an investigation of the value of land in the vicinity of the hacienda.

Governor TAFT. Did you go over the land yourself?

Señor VILLEGAS. Yes, sir; I have been over all of the estates.

Governor TAFT. Did you take into consideration, in your estimation of the value of the lands, the ease or otherwise with which it could be irrigated?

Señor VILLEGAS. Yes, sir.

Archbishop GUIDI. Have you also borne in mind the proximity or the remoteness of the hacienda from Manila and the ease with which the products could be marketed?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Let us take the two estates of San Francisco de Malabon and that of San Juan and San Nicolas, or what is usually called the hacienda of Imus. You have put \$150 a hectare as the value of the first-class superior land, and there it is the same. Do these estates lie together?

Señor VILLEGAS. Yes, sir; they are adjacent.

Governor TAFT. Are they similarly situated, speaking generally of the whole estate, with reference to the ease with which their products can be carried to Manila or elsewhere?

Señor VILLEGAS. Yes, sir.

Mr. MCGREGOR. I do not wish to detract in any way from the value of the other estates, but I simply want to speak for Imus. I notice that the valuations, at least I am told, are the same for first-class land. If you take into consideration the facility with which the products can be brought to the market, there ought to be a very considerable difference. Imus is situated by road about 14 or 15 miles from here, and with the exception of about four months in the year that road is a good road, and you can go in any way you like to it and it takes but a short time. It also is the cheaper way to put the goods into a casco and punt it along the shore. You can pull it right into the middle of Manila.

Governor TAFT. Can not you do that on the hacienda of San Francisco de Malabon?

Mr. MCGREGOR. You have got to go around the Cavite point.

AUGUSTINIAN FRIAR. The two estates are adjacent, and with regard to those conditions they apply to one and the other equally well, because he also can take his produce from the hacienda of San Francisco de Malabon by casco to Manila.

Mr. MCGREGOR. He has to take it around the peninsula of Cavite, which takes it around the middle of the bay.

AUGUSTINIAN FRIAR. Our estate has a seashore, which the Imus estate has not, and if you take that into consideration the advantages are about equal. The distance by water is a little farther, but with regard to reaching the water front we have the advantage over Imus.

Mr. MCGREGOR. We have got the river and do not need shore frontage.

AUGUSTINIAN FRIAR. The estate of San Francisco de Malabon also has a river, and we have communication with the shore by river. They have a large number of dams and they also have a tunnel or canal there.

Governor TAFT. Are there not extensive improvements on the hacienda of San Francisco de Malabon? Have they dams there?

Señor VILLEGAS. They have dams there.

Governor TAFT. Is the irrigation system on the estate of San Francisco de Malabon in about as good a condition as on the estate of Imus?

Señor VILLEGAS. Yes, sir; it is equally as efficient. The water for both irrigation systems is taken from one source, one river.

Governor TAFT. Is it not fair, therefore, looking at both haciendas, to place the same price on the different classes of land—on the one as on the other?

Señor VILLEGAS. In view of the fact that the soil is thinner in the San Nicolas estate, the Imus estate has a richer and deeper soil.

Mr. MCGREGOR. He is saying that Imus is better than San Nicolas. That is so.

Governor TAFT. Is the soil in Imus about the same as the soil of San Francisco de Malabon?

Señor VILLEGAS. No, sir.

Governor TAFT. Which has the greater advantage?

Señor VILLEGAS. San Francisco de Malabon is better. There is a difference in my valuation of the two haciendas with regard to the second and third class lands. With regard to the first-class land they are both equally good. I have placed an equal valuation on first-class land of the two estates for the reason that I think that they are both equally good.

Governor TAFT. There is a great deal more first-class land in the San Francisco than in Imus, which shows that the land is better in the San Francisco than in Imus on the average. I want to ask as to the estate of Naic; that is a Dominican estate. Are there improvements on the estate of Naic?

Señor VILLEGAS. Yes, sir.

Governor TAFT. What are they?

Señor VILLEGAS. They have large dams, small dams, and some tunnels or canals.

Governor TAFT. How does the soil of the estate of Naic compare with that of the estate of Imus and San Francisco?

Señor VILLEGAS. The soil of Naic is richer than the soil of either San Francisco de Malabon or the estate of Imus.

Governor TAFT. Is the soil of the estate of Naic the richest in the province of Cavite?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Hasn't it always had the reputation of being the best hacienda in Cavite?

Señor VILLEGAS. Yes, sir.

Governor TAFT. The estate of Naic is a considerable distance from Manila, isn't it?

Señor VILLEGAS. It is a little far.

Governor TAFT. Hasn't the estate of Naic a sea frontage?

Señor VILLEGAS. Yes, sir.

Governor TAFT. I want to ask if it is not a fact, with reference to agricultural property that is not likely to become city property at all, but always likely to remain agricultural property, that it makes very little difference, provided there is access to the water and easy navigation to Manila, whether it be 10 miles or 15 miles or 20 miles from the city, in the valuation of land?

Señor VILLEGAS. Yes, sir; that is true. Aside from this advantage which the Naic estate has from being on the water front, the pueblos of Silang and Indang, because they have sterile land around them, have to purchase the products which they need at this hacienda, so that it finds a market in the pueblos of Indang and Silang.

Governor TAFT. I observe that you have valued the first-class land of Naic at 25 per cent more than you value the first-class land of Imus and San Francisco. Do you base that on the character of the soil?

Señor VILLEGAS. Yes, sir; I have done so because I consider them superior, first-class lands.

Governor TAFT. I observe that you make all the land which is cultivated in the hacienda of Naic first-class land.

Señor VILLEGAS. No, sir; there is also third-class land there.

Governor TAFT. I think not; there is no third-class land here. There is only first-class and uncultivated land.

Señor VILLEGAS. Yes; I have some uncultivated lands there at \$5 a hectare.

Governor TAFT. Look at that map and see if you find any third-class land there.

Señor VILLEGAS. I have considered all of this land as first-class land on account of its proximity to the town.

Governor TAFT. Is it claimed by Señor Gutierrez that there is any more first-class land than appears on this map?

Señor GUTIERREZ. I would like to state in connection with this matter that it has not been possible for me to go all over these estates, and therefore I can not say whether these figures given in this estimate are correct or not.

Governor TAFT. As I calculate it, roughly, he has estimated that of the 7,000 hectares in the hacienda of Naic, a little less than half are cultivated or first-class land.

Señor GUTIERREZ. Yes, sir; so I see by his estimate.

Governor TAFT. I am trying to get at the classification of the land, of the cultivated and uncultivated, whether his estimate differs in that respect from yours.

Señor GUTIERREZ. It is impossible for me to say, or to estimate even whether the data given by Señor Villegas are correct or not, because I have not any data at hand to show. I would have to go to my office to examine the data and find out how much of the land is cultivated or not.

Governor TAFT. In estimating the value of an estate the question as to how much land is cultivated and uncultivated is the first and most important matter to be determined, and I would be glad, in order that we may not disagree, if Señor Gutierrez will examine his books and determine in round figures how much of the estate of Naic is cultivated, because Señor Gutierrez will understand that we are much more likely to reach an agreement if we can first find out those things upon which we agree.

Señor GUTIERREZ. My objection was simply now to be confined to the assessment of the valuation which has been placed by Señor Villegas upon eight of our estates.

Governor TAFT. Where does the estate of Santa Cruz de Malabon lie with reference to San Francisco de Malabon and the hacienda of Imus?

Señor VILLEGAS. To the west of San Francisco de Malabon.

Governor TAFT. That is farther from Manila?

Señor VILLEGAS. About the same distance from Manila.

Governor TAFT. Are there improvements on the estate of Santa Cruz de Malabon, and what do they consist of?

Señor VILLEGAS. It has improvements. It has the dam of the Tres Cruces and other dams as well.

Governor TAFT. The dam of the Tres Cruces is a dam across the mouth of the lake, isn't it? Or it makes a lake?

Señor VILLEGAS. No, sir; it is in the bed of a stream.

Governor TAFT. What is the condition with reference to improvements, with reference to roads, with reference to the irrigation of land, of the four estates of San Francisco, Santa Cruz, Naic, and Imus, respectively, and comparatively?

Señor VILLEGAS. Those conditions are almost similar in the four estates.

Governor TAFT. With reference to reaching Manila by the Bay of Cavite, are their conditions practically the same?

Señor VILLEGAS. No, sir; by water the communication is almost similar, but by land the conditions favor Imus first, then San Francisco de Malabon, then Naic, and then Santa Cruz.

Governor TAFT. Is water navigation to be preferred to land navigation now?

Señor VILLEGAS. It is less costly and easier by water.

Governor TAFT. How does the soil of the hacienda of Santa Cruz compare with that of San Francisco and that of Imus?

Señor VILLEGAS. With regard to the comparison between Santa Cruz de Malabon and San Francisco de Malabon, the soil is very similar, but not so in comparison with that of Imus, because I do not think that the subsoil in the estate of Imus contains as many advantageous elements for cultivation as the subsoil of the other estates.

Governor TAFT. I observe that nearly one-half, or a little more than four-ninths, of all the estate of Santa Cruz you have made first-class superior land, but that you have no second and third class there.

Señor VILLEGAS. I have not included any second or third class land in here, because the amount of second and third class land in this estate is very insignificant.

Governor TAFT. As I understand your assessment, then, you have put the value of the Naic first-class land at 25 per cent more than the value of first-class land in the other three haciendas because it is richer?

Señor VILLEGAS. Yes, sir.

Governor TAFT. And you have really made the average value per acre of San Francisco and Santa Cruz higher than that of Imus, not by valuing the first-class land as any higher, but by classifying some of the cultivated land in Imus as second and third class and making all the cultivated land in San Francisco and Santa Cruz as first class.

Señor VILLEGAS. I have done that because of the difference in the soil.

Governor TAFT. This covers all the estates in Cavite.

Archbishop GUIDI. It appears to me that the estates in the province of Bulacan have been assessed at about the same price.

Governor TAFT. I would be glad to call his excellency's attention to the fact that there are different ways of estimating the value of an hacienda, or rather that the value of an hacienda is affected not only by the price put upon first-class land, but by the classification of haciendas in the first-class, second-class, and third-class land, and that our friend McGregor, whose estate is at Imus, suffers in this assessment by the fact that a good deal of his cultivated land is classified as second and third class land.

Archbishop GUIDI. But who makes these assessments?

Governor TAFT. We are discussing Señor Villegas's evidence. His excellency criticises his estimate by saying that there is no variation between the estates, and I am showing by my examination that there is a difference; and I also want to show the purpose of this examination. His excellency has criticised very severely the estimate of Señor Villegas, on the ground that he makes no difference with reference to the proximity to Manila. We have four estates in Cavite and we have shown—and I do not think my friends on the other side of the table differ, except Brother McGregor—that practically the distances of the four estates in Cavite are the same.

Mr. MCGREGOR. I do not agree with that.

Governor TAFT. We have got through Cavite then, so far as that criticism is concerned.

Archbishop GUIDI. My remark was a general remark, applying to all of the estates; but with respect to these four estates I quite agree with you; but I wish it understood that I do not accept the classification that Señor Villegas has made, because I have no confidence in his judgment.

Governor TAFT. I am not speaking of his judgment now, either as to classification or as to values. What I am trying to meet is specifically the criticisms of his excellency on Señor Villegas's report, as he has examined it. What I am trying to show now by the examination of Señor Villegas is, that his classifications are consistent with themselves intrinsically. I understood his excellency to attack them as not consistent with themselves; that is what I am trying now to examine. I understood his excellency to begin with the statement that on the face of them they were wrong because they were not consistent with themselves. With reference to these four in Cavite this inconsistency does not appear. We are now considering his judgment of these lands. The question as to classification, as to whether it is first, second, or third class land, or whether it is uncultivated. I have not heard any dispute—it may be that there is a dispute, but I have not heard of it—of the correctness of Señor Villegas's measurement as to cultivated and uncultivated land. I have seen a calculation made, I think by the representatives of the Augustinian friars, furnished me by his excellency, and possibly also by the Dominicans, whom Señor Gutierrez represents, in which, if I understood the calculations, the figures of the survey of Señor Villegas were accepted as the proper ones. If I am mistaken I would like to be corrected.

Archbishop GUIDI. In his measurement of the land there is practically no difference at all, but it is simply in the valuation that has been placed upon it.

Governor TAFT. The question of cultivated and uncultivated land is a matter of measurement, because there can be no dispute as to whether the land is cultivated.

Archbishop GUIDI. I understand that the matter of cultivated and uncultivated land is a very easy one, because it is a matter of measuring; but the question lies in Señor Villegas's classification of land as first and second class. If it has appeared from my silence that I have accepted any of the classifications made by Señor Villegas, I wish to correct that error and to reserve my criticisms until later.

Governor TAFT. I want to reach out and find how far we agree, and when we have found how far we agree, then we can discuss those things we disagree about. Let us see about Cavite. In Cavite, except in the haciendas of San Juan and San Nicolas, of our friend McGregor, there isn't any land classified as second and third class land. All the land in Santa Cruz, in San Francisco, and in Naic is either uncultivated land or is first-class land as classified by him. Therefore our dispute with the Señor Padre and Señor Gutierrez is reduced solely, if I understand it, to a dispute over what is the real valuation of first-class land and of uncultivated land in those three estates, and therefore, that our only dispute as to classification of land is with Mr. McGregor as to what is second and third class land and what valuation ought to be put on first-class land in the haciendas of San Juan and San Nicolas.

Mr. MCGREGOR. Might I ask if there is no cultivated land in the province of Cavite except on the Imus estate—that is, cultivated land, simply relying on the rain and not on any artificial water—no land cultivated that is not irrigated?

Señor VILLEGAS. Yes, sir; there is other land in the province of Cavite that is cultivated without irrigation—what is called here *aventureres*.

Mr. MCGREGOR. On these estates that have been mentioned, with the exception of Imus estates?

Señor VILLEGAS. No, sir.

Governor TAFT. Is there any such land on Imus?

Mr. MCGREGOR. Yes.

Señor VILLEGAS. Owing to the damages which have been caused to several of the dams there, the water did not reach some parts of the land on the Imus estate. These lands in spite of their not being irrigated were cultivated, and they have depended on rainfall for cultivation.

Mr. MCGREGOR. I simply asked if there was any land cultivated that was not irrigated and he said no.

Señor VILLEGAS. I said that there was, and that these lands that were cultivated without irrigation were called *aventureres*. They cultivate these lands on private property, but not on the haciendas. However, they could be on the haciendas.

Mr. MCGREGOR. Do you mean to say that the Imus hacienda is the only hacienda where the dams are damaged?

Señor VILLEGAS. No, I do not mean to say that. On the hacienda San Francisco de Malabon, Santa Cruz, and others, some of these dams have been damaged, and I have not included the land which is not irrigated owing to the damages to the dams as cultivated land.

Mr. MCGREGOR. But are they cultivating that land?

Señor VILLEGAS. No, sir.

Mr. MCGREGOR. Are they cultivating that land on the Imus?

Señor VILLEGAS. No, sir; that land is not cultivated at the present time; and I think another reason why it is not cultivated, aside from the fact that it is not irrigated, is on account of the lack of labor.

Governor TAFT. I think you said that at Imus they still cultivate with the rains.

Señor VILLEGAS. I meant to say that such land was susceptible of cultivation by rain, but I did not mean to say that they were doing so at the present time.

Mr. MCGREGOR. Why have you made that difference in classification of the Imus and called it second and third class lands, and on the other estates uncultivated lands?

Señor VILLEGAS. On the other estates I have not classified land in the same condition as first-class land.

Mr. MCGREGOR. I asked why you have classified the same land on the other estates as uncultivated lands and on the Imus estate as third-class land.

Señor VILLEGAS. I classified it as third-class land because it is third-class land; but at the present time it is being cultivated.

Mr. MCGREGOR. But you said it was not.

Governor TAFT. His evidence is certainly very inconsistent.

Mr. MCGREGOR. First of all, he said that they cultivated that land on Imus, then he said they did not, then he said that similar land on the other estates was not cultivated, and then he contradicted himself. There is one question regarding Cavite Province that has not been brought up, and that is that Imus is celebrated for its mangoes. That has not been taken into consideration at all.

Governor TAFT. What will a mango tree produce annually?

Señor VILLEGAS. One mango tree produces as high as \$20 to \$25, and sometimes as high as \$50 and \$100. I have taken it into account in making the assessment of the lots or solares.

Mr. MCGREGOR. But solares are building lots.

Señor VILLEGAS. The word solares is used in this country with reference to ground that is used for horticultural purposes.

Mr. MCGREGOR. We estimate that there are 8,000 mango trees in full bearing on the Imus property, and the Imus mangoes are the most expensive in the Manila market.

Señor VILLEGAS. Your remark with regard to the fame of the Imus mangoes applies to the whole province of Cavite as well. I have fixed the valuation on the ground itself and then taken into consideration the mango trees that were on it. I have not fixed it on the products also; that is to say, I have not valued the products also.

Mr. MCGREGOR. That does not appear to me as being the correct way of doing it. I think mango trees should certainly be valued. Being a special crop, it is a very valuable crop.

Governor TAFT. I am told by Señor Luzuriaga that the mango crop is a very uncertain crop. I met Mr. Jones, of Smith, Bell & Co., the other day, and said to him: "I see you have built a steamer for the Rio Grande de la Pampanga." "Yes," he said, "I have, but I built it with a view of going up and down that river to Cabanatuan and San Isidro; but right in the wet season it got so dry that it could not go to San Isidro." "That shows," said Mr. Jones, "what happens in this country." So, in estimating your mango trees, you have got to estimate the fact that the crop is uncertain and requires a good deal of labor to keep off the insects.

Mr. MCGREGOR. Still, don't you think mango trees ought to be taken into consideration?

Governor TAFT. I have no doubt it is. I think it is an element that ought to be considered in judging the correctness of his valuation.

Señor VILLEGAS. Land which is cultivated to mangoes is not susceptible to cultivation of any other thing, because once it is cultivated to mangoes it is not fit to be cultivated to anything else.

Mr. MCGREGOR. Naturally; mango trees grow to an enormous age, and you do not want to cultivate anything else.

Governor TAFT. How are mangoes cultivated?

Señor VILLEGAS. They are cultivated in orchards, generally; also on the banks of rivers.

Governor TAFT. I thought they grew where they did not interfere with the general crops.

Señor VILLEGAS. That is why I say that land which is devoted to the cultivation of the mango tree can not be used to the cultivation of any other crops.

Señor GUTIERREZ. I wish to state that the assertion that land which is devoted to the cultivation of the mango tree is useless for the cultivation of anything else is not true, because I have an hacienda where I cultivate mango trees in the sugar-cane fields. I wish to ask Señor Villegas on what grounds he has fixed the valuation of \$200 for each hectare of first-class land of the Naic estate, when he admits that land of the Naic estate is the best in Cavite Province.

Señor VILLEGAS. Because that is the price which rules around the neighboring pueblos to that estate. I have investigated the matter and have asked several people there, who have told me that first-class land is worth 200 pesos a hectare.

Archbishop GUIDI. Did you ask these questions at Naic itself?

Señor VILLEGAS. I asked these questions as to the value of the land of people in the adjacent pueblos of Ternate and Maragondon. I refrained from asking the people of Naic because I was afraid that I could not get a just valuation there; so that the valuation which I have placed on the Naic estate has been based upon my investigations of the value of land on testimony of people living in Maragondon and Ternate, and the capitalists living there told me that first-class land was worth 200 pesos a hectare.

Archbishop GUIDI. You should have made inquiries at Naic itself. Are you sure that those capitalists at Ternate and Maragondon have given you a just valuation of the land at Naic?

Señor VILLEGAS. Yes, sir.

Archbishop GUIDI. Why are you sure?

Señor VILLEGAS. Because I have absolute confidence in the people of whom I asked this question, and, furthermore, my conscience tells me that this price is fair and just.

Archbishop GUIDI. That is not a matter of conscience, but of science.

Governor TAFT. Ought these not to be united?

Archbishop GUIDI. That can not always be, because an ignorant man may have a conscience. Conscience and science ought to be united, but in the majority of men it is not so.

Señor GUTIERREZ. Señor Villegas, therefore, has really not valued the lands at Naic, but at Ternate and Maragondon.

Señor VILLEGAS. I based my judgment after investigations and upon the evidence given to me by people living at Ternate and Maragondon. I did not ask the opinions of people living at Naic, because the people living at Naic were hostile to the corporations which owned the land, and they would probably put it at a lower price than its true value.

Archbishop GUIDI. Are not the people of Ternate and Maragondon also hostile to the corporations?

Señor VILLEGAS. I asked only those people in whom I had confidence and upon whose word I could rely.

Governor TAFT. Did you ask those people what the value of the land in the hacienda of Naic was, or did you ask what the value of the land which they owned in Maragondon and Ternate was?

Señor VILLEGAS. I asked for the value of the land at the hacienda at Naic.

Governor TAFT. How near to the hacienda of Naic did they live?

Señor VILLEGAS. A very short distance; Naic and Ternate are adjacent. Maragondon is also very near.

Señor GUTIERREZ. I first understood Señor Villegas to say that he had asked the capitalists living at Ternate and Maragondon the price of the land which they owned, but now he states that he had asked them the value of the land at Naic. How is it possible for them to know the value of those lands if there have been no sales of those lands at Naic?

Señor VILLEGAS. The reason I did not take the judgment of the people at Naic in regard to the value of those lands was because, after having asked them the value of the land, they had placed a value of \$100 upon first-class land per hectare, owing to their hostility toward the owners of the estate. Therefore, knowing in my conscience that the price was too low, I consulted the capitalists of Ternate and Maragondon with respect to the value of those lands, and they fixed the value at 200 pesos.

Archbishop GUIDI. What is the value of a peso now?

Señor VILLEGAS. The value of the peso to-day is the same as the peso that has been known from time immemorial.

Archbishop GUIDI. What was the value of the peso in time immemorial?

Señor VILLEGAS. The same as the Spanish duro in the time of the Spanish government, and that is the value of the peso in which I estimated the value of the land.

Archbishop GUIDI. Is it not a fact that when people in that part of the country speak of the peso it is the same peso they have known from time immemorial?

Señor VILLEGAS. Yes, sir; that is the peso they mean.

Governor TAFT. And they do not know anything about any other peso down there?

Señor VILLEGAS. No, sir.

Governor TAFT. And they have always measured the land in pesos, haven't they?

Señor VILLEGAS. Yes, sir.

Governor TAFT. When they sell land down there they sell it by the Mexican peso, do they not?

Señor VILLEGAS. Yes, sir.

Governor TAFT. When they sell it now they sell it by Mexican peso, don't they?

Señor VILLEGAS. I can not say as to just now.

Governor TAFT. What I mean is, since the Americans came here. Whenever land has been sold down there it has been sold by the Mexican peso, hasn't it?

Señor VILLEGAS. Yes, sir; I also have just sold a lot for Mexican in Tondo.

Archbishop GUIDI. The question from which I can not get beyond is, what does the witness understand by a peso? What does he mean by a peso? What value does he place upon it when he values the land in pesos? I have understood that he regarded the peso as of the same value as of time immemorial, or the time during the Spanish government.

Governor TAFT. Let me make an explanation which seems to me entirely clear. These people, in selling land or in doing anything else, in the province of Cavite, deal with one standard of value, and that is the Mexican peso.

Archbishop GUIDI. Yes, sir.

Governor TAFT. Now, when they say it is worth Mexican pesos, they mean Mexican pesos—those dollars that are stamped by the Mexican Government. If we are dealing with values and a standard of value, we have got to take the Mexican standard of value, because that is the only standard of value they know. Now, if it is said that in the Spanish times the Mexican dollar was worth an American dollar, it is not true unless you go back a long distance—say twenty years—and it is a little difficult to estimate values by referring to twenty years back. If it be true that the Mexican dollar has always been the standard, and we are to learn what the value of that land is, we must consult those who live in its neighborhood. Then we take the Mexican dollar as our basis of valuation, and when I come to pay you I will pay you in gold what the Mexican dollar is then worth. That is the logical method of reasoning. But the witness does not know anything about American dollars.

Archbishop GUIDI. I agree with you, but the difference lies in this assessment in exactly the same ratio as there is a difference in the value of the Mexican dollar to-day and twenty years ago.

Governor TAFT. That means that the land since 1896, if it is worth the same in Mexican, has simply in gold decreased in value. It is not reasonable to suppose that, in view of the six years of war that we have had, and the conditions of the country, with the carabaos gone and the scarcity of labor, that agricultural lands should be worth one-half in gold—estimated by commercial men—as much as it was when the conditions were favorable to the sale of land and to its cultivation. Therefore you do not prove anything when you say that people down there estimated the value in Mexican twenty years ago, and that they now estimate it in the same Mexican. In gold it means that the land has decreased in value.

Mr. MCGREGOR. Supposing the value has decreased one-half; the value of the products has increased three or four times.

Governor TAFT. The cost of transportation, of labor, etc., has increased four times, so that the question of profit from the land, which makes the value of land, if you do not estimate it by its selling value, is the same.

Mr. MCGREGOR. These people have all the labor they want to cultivate their own fields. It is very difficult for an outsider, but these people can work their own lands all right.

Archbishop GUIDI. Your assertion, Governor, that the land, with regard to its gold value, has depreciated, is in contradiction of Señor Villegas's statement that the land was worth more.

Governor TAFT. He estimates it in Mexican. But in real value, if you take the gold standard, it is reduced in value.

Archbishop GUIDI. We must take what he says—that he has estimated the value of the land in the Spanish dollar.

Governor TAFT. No; he has estimated it in the Mexican peso that was here at the time, and what they have in their pockets to-day; and when a man down there says a hectare is worth 200 pesos he has in his mind 200 large coins stamped with the Mexican stamp.

(Adjourned until March 2, 1903.)

Continued from February 27, 1903.

MALACAÑAN PALACE, *Manila, March 2, 1903.*

Señor GUTIERREZ. I would like to know whether Señor Villegas considers the lands of Maragondon and Ternate in equal conditions with those of Naic.

Señor VILLEGAS. Yes, sir; those that are contiguous to Naic.

Señor GUTIERREZ. I object to this answer because of the fact that the lands of Naic are irrigated and are perfectly well cultivated, whereas those of Maragondon are not irrigated.

Señor VILLEGAS. The lands are in equal conditions, because those that are contiguous have irrigation.

Señor GUTIERREZ. The lands have not any irrigation from the pueblo itself, but only from the friars' lands; that is, from the hydraulic works which the friars have built, and when they steal the water from them, then they may be irrigated, but not from their own enterprises.

Señor VILLEGAS. I did not value the lands of Maragondon or Ternate, but I appraised those of Naic.

Señor GUTIERREZ. I am not in accord with this valuation of the lands of Naic, because they have never been sold; they have been owned by one party alone and have never been sold.

Señor VILLEGAS. I made the valuation of this land according to my best knowledge and belief.

Señor GUTIERREZ. The witness claims that a great part of the land of Naic is uncultivated; that is not true of the present time, and has not been so since the war. The whole land itself has been under cultivation at one time or another.

Señor VILLEGAS. The statement which I make is exactly correct according to the plans and maps. What I put down as uncultivated is in an actual uncultivated state and has never been cultivated.

Governor TAFT. Where did you get the plans?

Señor VILLEGAS. I measured it myself.

Señor GUTIERREZ. So far as the present condition of the land is concerned, I can state that it has all been under cultivation. As is known in the Philippines, within six months cultivated land, if it is not cultivated, becomes wild again on account of the exuberance of the vegetation; but this land has been at one time cultivated and that cultivation was suspended on account of the war. The witness makes no mention of 111 kilometers of canals which are used for the distribution of water, whereas those canals exist on the property.

Señor VILLEGAS. Their present condition is given in my report.

Governor TAFT. Did you actually measure the canals?

Señor VILLEGAS. They are little narrow ditches and earthworks; those that exist at the present time do not amount to anything.

Señor GUTIERREZ. Since they are the means of carrying water to the people they should not in reality be considered so insignificant, because they have been built by the owners of the estate and furnish water to the people at the present time. He also omits, in the hacienda of San Francisco de Santa Cruz, to mention 15 kilometers and 10 bridges which are used for the distribution of water, and a large dam which cost over \$100,000 gold; he makes no mention of this.

Señor VILLEGAS. I have it set forth in the valuation.

Señor GUTIERREZ. He does mention it, but includes in all these waterworks a price of \$50,000, whereas the dam itself, which is called the Three Crosses dam, cost \$100,000 gold, and could not be replaced at the present time for \$300,000.

Señor VILLEGAS. While the dam may have originally cost what it is claimed that it cost, in its present condition it could not be valued at more than the price which I have placed on it. It is quite old; in fact, older than I am.

Señor GUTIERREZ. After these earthworks have settled they are much more solid and massive and durable than they are when they are first built. The danger is when they are first built; afterwards they become solidified.

Governor TAFT. I would like to ask Señor Gutierrez whether he claims that we ought to pay him for the dam at its cost or what it would cost now to build it, and also pay him the value of the land as increased by the irrigation that the dam furnishes?

Señor GUTIERREZ. No, sir; we desire to be paid for the land merely what it is worth now at its present value; that whether it has increased threefold, twofold, or onefold from the irrigation which it has undergone, I do not desire to consider. I simply desired to state that this dam cost some three or four times as much as Señor Villegas said it is worth.

Governor TAFT. Is the dam high enough, Señor Gutierrez, to furnish power for electrical works or things of that sort.

Señor GUTIERREZ. I have not measured it and can not state at this time.

Señor VILLEGAS. I do not think it is over 25 meters from the bottom to the top. The waterfall is from 15 to 16 meters.

Señor GUTIERREZ. I can not contradict that statement, because I have not the figures, but I really believe it is more.

Archbishop GUIDI. I believe that those lands which have improvements thereon are worth more; those that have not these improvements are consequently worth less. First-class lands of those estates whereon these improvements exist are certainly worth more than first-class lands of those estates whereon there are no improvements. The witness does not seem to have made any distinction in his valuation; he seems to have set a standard of price and does not desire to go above it.

Governor TAFT. How much improvements may add to the value of land depends upon what they do for land.

Archbishop GUIDI. The production of the land is what determines it, and if the improvements are the cause of larger production, of course then the land is improved by it.

Governor TAFT. I would like to ask his excellency a question to test our differences, if there are any. Suppose you take a hacienda in which there is a large stream from which by a dam and by easy methods of irrigation land can be irrigated. We will say that the cost of irrigation is the erection of a dam which may cost \$20,000. Now, suppose you take another hacienda with the same kind of soil but with no stream on it at all, and suppose that in order to make that land good they sink an artesian well and put in expensive pumps and then irrigate the lands, so that the pumping plant, the well, and the irrigation cost \$150,000, so that by the water which is pumped just as good crops are obtained from the second hacienda as from the first. Would you give any more for the second hacienda than you would for the first?

Archbishop GUIDI. I would, because the cost of the labor was more.

Governor TAFT. But you do not get any more returns from it.

Friar MARTIN. In my opinion the two haciendas would be of equal value. I found my valuation of these lands upon the production.

Governor TAFT. My hypothesis is that here I have one hacienda, and here another. There would be this difficulty, that probably on the pumping hacienda it would cost more to irrigate than it does where you only use a dam; but I was assuming that the cost was the same. I mean the cost of operation.

Archbishop GUIDI. If the product is the same their value is the same.

Governor TAFT. I quite agree, and I do not want to be understood to differ from the proposition that works that make land more economically irrigated and make them very frequently irrigated improve the value of the lands. It must be so where it increases the amount of irrigation or reduces its cost. But what I wish to eliminate, if I can, is the importance which Brother McGregor and Señor Gutierrez seem to place on the original cost or the present cost of reproducing dams and other things.

Friar MARTIN. I agree with you in that case.

Governor TAFT. The present condition of these works is important only as it points to whether, in order to make the works workable, it is necessary to spend something to put them in repair.

Archbishop GUIDI. That is quite clear. I do not attach as great importance as you seem to think I do to the original cost of these works, but I desire to impress upon you the fact that these improvements do increase greatly the value of the land, because they increase the productiveness of the land. My great objection to Señor Villegas's testimony throughout is that he does not attach sufficient importance to the fact that these lands have these improvements existing upon them, but he sets an equal standard for all of them and says that first-class land in this hacienda is the same as first-class land in that hacienda, irrespective of whether the improvements on the one are great or those on the other are less.

Governor TAFT. We have been through Cavite and there all the land is irrigated by practically the same system for practically the same cost.

Friar MARTIN. As far as the dams are concerned, the price which they cost in the first place or what they would cost now is the price we should obtain, because they never lose their value and as time passes they become stronger; but of course that does not apply to canals and those things which wear out.

Archbishop GUIDI. What I want to set forth is that the price is the same all the way through.

Governor TAFT. It is fair to give the witness an opportunity to explain the reason of his assessments.

Mr. MCGREGOR. I would like to ask in what pueblo he ascertained the value of the lands around Imus.

Señor VILLEGAS. The first-class in San Francisco de Malabon; only the first-class.

Mr. MCGREGOR. Why did you not ascertain the value of that in the town of Imus?

Señor VILLEGAS. The presidente and the officials and leading men whom I asked there gave me a very low price, which I did not believe was the just one.

Governor TAFT. Herewith we have the hacienda of Malinta, Tala, and Piedra in the province of Bulacan in the pueblo of Polo. Did you survey this hacienda?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Is it irrigated?

Señor VILLEGAS. Only that part that is first-class.

Governor TAFT. How is it irrigated?

Señor VILLEGAS. It is irrigated very little by dams or dikes.

Governor TAFT. Can they raise two crops on the first-class land?

Señor VILLEGAS. They do not; but it produces more than 100 cavanos.

Governor TAFT. How does that compare with the production in Cavite?

Señor VILLEGAS. The first-class is almost equal to that of Cavite. With one crop a year they raise as much as with two crops in Cavite in Malinta on the first-class land.

Governor TAFT. The hacienda of Malinta is given here as about 3,500 hectares and of this 3,500 hectares you place 650 hectares as first-class superior.

Señor VILLEGAS. First-class only.

Governor TAFT. At 200 pesos a hectare.

Señor VILLEGAS. Whatever it is stated there.

Governor TAFT. The second-class you state at 1,620 hectares, which you place at 150 pesos. How does the second-class differ from the first-class?

Señor VILLEGAS. It raises from 60 to 80 cavanos.

Governor TAFT. The third class you estimate at 180 hectares, at 100 pesos a hectare, and the remainder of 980 hectares you treat as uncultivated mountain land at \$5 a hectare.

Señor VILLEGAS. Yes, sir.

Governor TAFT. What are the improvements on the Malinta estate?

Señor VILLEGAS. Little dikes.

Governor TAFT. Here is the hacienda of Santa Maria del Pandi. Did you survey the plans?

Señor VILLEGAS. I had it surveyed by my assistant; I was there investigating.

Governor TAFT. Did you supervise the inspection?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Is that an improved estate?

Señor VILLEGAS. It has small parts there that can be considered first class.

Governor TAFT. Is it well irrigated?

Señor VILLEGAS. It has some irrigation of very little importance.

Governor TAFT. That contains, according to your measurement, 12,069 hectares. Of that you place about 1,000 hectares as first class, at 200 pesos a hectare, and 1,500 second class. What will the first class produce?

Señor VILLEGAS. More than 100 cavanos.

Governor TAFT. Does it produce more than one crop?

Señor VILLEGAS. The land that is subject to irrigation there can raise two crops.

Governor TAFT. How much will, on the average, the first-class land produce? Do you mean by first-class superior the class upon which two crops can be produced?

Señor VILLEGAS. Yes, sir; about 100 cavanos.

Governor TAFT. As I understand the classification (I may be mistaken in this), you call first-class land that which produces above 80 cavanos, but if it produces two crops a year you call it first-class superior?

Señor VILLEGAS. I do not make any difference whether it produces more than one crop or not, but it is the annual production.

Governor TAFT. What is superior first class?

Señor VILLEGAS. Land of 100 cavanos, more or less.

Governor TAFT. What is that which you call first-class land?

Señor VILLEGAS. From 75 to 80 cavanos.

Governor TAFT. What is second class and third class?

Señor VILLEGAS. Second class produces 50 to 60 cavanos, and third class 30 to 50.

Governor TAFT. What is fourth and fifth class land?

Señor VILLEGAS. Fourth class is 20 to 25 cavanos, and fifth class less than 20 cavanos.

Governor TAFT. You make about half of this estate, about 2,025 hectares, worth

\$25 a hectare. Why do you put it at \$25 a hectare when you put uncultivated land in the mountains in other haciendas at only \$5 a hectare?

Señor VILLEGAS. Because they are very clean and they could be easily cultivated.

Archbishop GUIDI. I desire to call attention to the fact that in this estate, where there are very few improvements, the witness has put the first-class land at even more than he has in the other estates.

Governor TAFT. I would like to suggest an answer to it. I did not understand at first, and it shows the advantage of a constant discussion. I did not understand the theory on which Señor Villegas had gone in his estimate. But I think in answer to the suggestion now, I can offer an explanation which I derive from his statements. The theory of the witness, as I understand it, is that superior land—that is, that which produces 100 cavanos to the hectare, within reasonable reach of the market—is worth about 200 pesos a hectare. Now, it is said that because he estimates superior land on one estate at 200 pesos which is not improved, and superior land on another estate at 200 pesos which is improved, that thereby he shows that he gives no weight to improvements. The explanation is this, as I understand it, justifying the action of the witness: The Cavite estates, it is true, are all improved; the estate of Pandi has very little improvement. Now, he does not apply the same standard to the estates as estates. He varies the standard, not by varying the price of the superior land, but he varies it by making a very small classification in the Pandi estate of superior land. The advantage to the Cavite estates by reason of their improvements is in the very large amount; in Naic all that is improved at all is classified as superior first-class land. Therefore the variation in his estimates is shown in the total price of the hacienda divided by the number of hectares. In other words, he makes his variation by the classification to allow for the improvements, and not by changing the price of the superior land, the production of which is the same, whether it be by reason of improvements or by its fortunate location by natural waters. For instance, in this hacienda of Pandi, which consists of 12,000 hectares, only one-twelfth is superior land; in Naic three-sevenths. The entire cultivated land by reason of those improvements is classified as superior first-class lands. He has followed Señor Padre's view, that the product of the land determines its price and the product is increased by the improvements. The more improvements you have the greater proportion of your hacienda is made first-class land; and that is the way he allows, if I have understood his evidence, for the effect of the improvements.

Archbishop GUIDI. From all this we deduce the fact that the value of the land should be calculated upon the production as the basis of the valuation of it.

Governor TAFT. I have been explaining what I understand to be the theory of the witness in allowing for improvements. When it comes to stating the principle, it seems to me, with deference to his excellency, the principle should be stated this way: That land is worth, just as anything is worth, what it will bring, and that is the rule of law, the rule of evidence. But suppose you do not have a market, suppose land is not being sold, then you have got to take other means of finding what the value is. Land is planted and used agriculturally for the profit that is made out of it. Therefore when you go into the question of products you are furnishing a reason why a man ought to be willing to pay for that land in order that he may make the profit that the natural product will give him.

Archbishop GUIDI. It is the seller that makes the opportunity for selling and that makes rules whereby the sales should be made, and not the buyer.

Governor TAFT. It is both the buyer and the seller.

Archbishop GUIDI. But the seller might say, "I will not sell."

Governor TAFT. If you depend on the wish of the seller alone you would never get any market reports at all. It is what the vendor and the buyer agree on. Both the seller and the buyer are affected by the profit to be gathered from the land. Actual sales are the best evidence because they evidence an agreement between the vendor and the buyer as to what the land is worth. If you get two opposite interests agreeing, then you have got the best standard.

Archbishop GUIDI. Certainly.

Governor TAFT. But in the absence of those agreements we have got to do the best we can.

Mr. MCGREGOR. We have records of sales.

Governor TAFT. Then bring them out. Here is the Toro estate of 58 hectares, estimated at 150 pesos a hectare. Is that an improved estate?

Señor VILLEGAS. No, sir; but it is good land.

Governor TAFT. Is it in rice?

Señor VILLEGAS. Yes; in a very good condition. I make it first-class land because it is very low and convenient and easily cultivated.

Governor TAFT. Here is Anget hacienda, 294 hectares, 260 hectares, at 125 pesos. Do you make any difference in the value between rice and sugar?

Señor VILLEGAS. No, sir.

Governor TAFT. Is this improved?

Señor VILLEGAS. It has no improvements, but it is land which produces a great deal by being low.

Archbishop GUIDI. How much does it produce?

Señor VILLEGAS. From 50 to 70 cavanos.

Señor GUTIERREZ. In one year, then, the produce will be more than the value of the land.

Governor TAFT. Does it produce more than one crop?

Señor VILLEGAS. One crop only.

Governor TAFT. There is no facility for irrigating so as to make it?

Señor VILLEGAS. No, sir.

Governor TAFT. How is it situated with reference to the market—to getting into Manila, for instance?

Señor VILLEGAS. You can go by the river San Rafael, but it is a long way.

Governor TAFT. How far is it from Manila?

Señor VILLEGAS. Leaving there in a loaded boat, it would take at least two days to get to Manila.

Governor TAFT. It is passable, however, all the year around, isn't it?

Señor VILLEGAS. In the dry season you can not pass through.

Governor TAFT. Here is Dampol and Quingua, 962 hectares, one hacienda. What kind of a hacienda is that?

Señor VILLEGAS. It has rice and sugar; mostly sugar and very little rice.

Governor TAFT. Is that improved?

Señor VILLEGAS. No, sir.

Governor TAFT. What kind of land is it? How many cavanos does it produce?

Señor VILLEGAS. Seventy to 80 cavanos; it is very low and flat.

Governor TAFT. Is that an advantage?

Señor VILLEGAS. They are conditions which cause land to be richer.

Governor TAFT. You estimate it at 150 pesos a hectare, and solares 60 hectares. What are solares?

Señor VILLEGAS. Building grounds.

Governor TAFT. You estimate them at 125 pesos a hectare. Is not that pretty small?

Señor VILLEGAS. No, sir.

Governor TAFT. Is that near the town of Quingua?

Señor VILLEGAS. It is the pueblo of Quingua?

Governor TAFT. Here are eight parcels of land situated in the towns of Quingua, Calumpit, Barasuain, Santa Ysabel, and Guiguinto, province of Bulacan. This is rice and sugar land, 10 hectares, at \$150 a hectare. At Calumpit, 74 hectares, at \$150 a hectare. At Barasuain, 54 hectares, at \$154. Why did you make that \$154 instead of \$150.

Señor VILLEGAS. It is probably a mistake; it should be \$150.

Governor TAFT. If you do not object, gentlemen, we will change it to \$150. [Makes the correction on the map accordingly.] Now, Dakela and Santa Ysabel, are they the same kind of land?

Señor VILLEGAS. Yes, sir.

Governor TAFT. And Alangelang? That you estimate is superior. Why?

Señor VILLEGAS. Because it raises 100 cavanos, more or less.

Archbishop GUIDI. How much is a cavan worth on the market to-day?

Señor VILLEGAS. I did not calculate on to-day's prices, but when I made the valuation.

Governor TAFT. What was it worth when you made the valuation?

Señor VILLEGAS. One and one-half pesos; that was the price on the ground. I do not know what it was when brought to Manila. If a man needed money he would even take 50 cents.

Governor TAFT. Let us pass to Malapat, at 150 pesos a hectare. Is that the same kind of land?

Señor VILLEGAS. The same as the others.

Governor TAFT. Here is the Recoleta hacienda, 456 hectares. What kind of land is that?

Señor VILLEGAS. The class that is mentioned there; 150 pesos.

Governor TAFT. Did you survey the Lolomboy hacienda?

Señor VILLEGAS. I measured the part which is in the pueblo of Polo—two parcels.

Governor TAFT. What is it, rich land?

Señor VILLEGAS. Yes, sir; that in Polo is.

Governor TAFT. Take this part that is in Malanday. You have marked it all rice land. What kind of rice land is it?

Señor VILLEGAS. It produces 75 to 80 cavanos.

Governor TAFT. These 65 hectares in Pasolo, within the town of Polo. What kind of rice land is that?

Señor VILLEGAS. The same as the other.

Governor TAFT. What does it produce?

Señor VILLEGAS. Palay; 70 to 80 cavanos.

Governor TAFT. And you put the price at \$150. Is there any other land in Bulacan than that which we have gone over which produces 100 cavanos a year, not church property?

Señor VILLEGAS. Yes, sir; there are other lands.

Governor TAFT. Do you know whether there are any sales of that land?

Señor VILLEGAS. I can not state.

Friar MARTIN. I would like to know if the Governor is in accord with the testimony of Señor Villegas, and wherein you agree with his testimony.

Governor TAFT. I do not know; I have no means, except through Señor Villegas and other witnesses whom I call, of knowing what the value of the land is. I would like to say, generally, this: That land like this, much of which has lain fallow for four or five years during the disturbed condition of the country, land that can not now be worked to advantage because of the absence of draft animals, land that lies in a country where agriculture is so depressed, it seems to must necessarily be lower in value than it was in 1896, or before that time. Another thing, were this land offered to the public, to capitalists, I venture to say that there are few capitalists that would go into it. On the other hand, I do not consider that it is the duty of myself, representing the Government, or of the Commission, representing the Government, to squeeze down the price on the theory that the land can not be used by you at all, practically. What we desire to do is to get a just price. We think if we give you a reasonable price—reasonable not in the sense of what, if you were obliged to sell, you could get from capitalists in the market, but a reasonable price, excluding certain considerations that we are willing to exclude—that we are buying ourselves a lawsuit that will occupy us for a good many years, and that we are relieving you from a great number of lawsuits that would occupy you for a great many years, it is as much as you can expect of us. We know we are going to have a great deal of trouble after we get the land, and yet we think that the trouble will be less if we buy it from you, and we are entirely willing to pay what is a fair price. But, on the other hand, I beg of you to consider that my constituents are not the people of the United States, they are the people of the Philippine Islands, and in doing justice to them I must avoid loading them with a burden, so far as I can, which would be too heavy for them to bear; and if we can not agree on a price that seems to me reasonable, my hands are tied, I must then let the thing work itself out the best way it can. But I think if we both yield some we can come to an agreement. When we make the agreement, if we reach it, it may take two or three months to get the money, but we will pay in gold. What I would like to propose, unless I am told that it will do no good, after we get all through the evidence that there is here and after I have added up to see what it all comes to, is to make a lump proposition in gold and then let you gentlemen, if you can, arrange the divisions among yourselves.

Friar MARTIN. That is impossible.

Señor GUTIERREZ. It is impossible because they are opposing interests.

Archbishop GUIDI. You can set a price for each corporation.

Governor TAFT. It would be easier to make it a lump sum, but I can possibly arrange it in some other way. I do not know whether the Señor Padre wished to invite that statement, but that is what I thought he wished me to discuss.

Friar MARTIN. Those observations were probably well taken, but I have some objection to make to those statements of yours.

Governor TAFT. With reference to the estimates of Señor Villegas, I do not care to be bound by them. What I mean is, I might differ from Señor Villegas. For instance, I might think that his estimate on certain land is too low. I might think, again, that the including in the estimate at all of the value of dams and that kind of thing was an error; but what I am groping for—and I think it is the case with his excellency, too—is light. I simply employed Señor Villegas because I understood that he had experience. I did not tell him anything to do except to go and make a survey and make an estimate on the land, and these are the results.

Friar MARTIN. In the first place, without considering the price, I desire to know if you are satisfied with the measurement and the classification of Señor Villegas.

Governor TAFT. I have no other information on the subject.

Friar MARTIN. If you are not in accord with this, then it will be necessary to measure them over again.

Governor TAFT. I do not intend to bring any other evidence here at all on that subject, and if you agree with this measurement then I agree.

Friar MARTIN. I agree.

Señor GUTIERREZ. I desire to remark that from the hacienda of Lolomboy they have taken away a thousand and some odd hectares. Surely it must be an error.

Governor TAFT. Isn't it in this way: Isn't it the fact that the hacienda of Lolomboy is surveyed in two different books?

Mr. MCGREGOR. Yes; in the total, but not in the division of the land. He has given us third-class land and no one else third-class land, and it strikes me that there is third-class land on the other haciendas, I have no doubt.

Governor TAFT. Señor Gutierrez, here is a parcel of Lolomboy, 106 hectares and 65 hectares; that is 171 hectares. Then there is 4,158 hectares.

Señor GUTIERREZ. I have 5,444, and according to this there is 4,329.

Governor TAFT. All I can say about that is that the surveyor is not here, but I will have him here.

Señor GUTIERREZ. I wished simply to call attention to the fact that there is a difference, and that difference can be settled, the land being all there.

Friar MARTIN. When you examined the lands belonging to the corporation which I represent, the lands which you have put as cultivated, did you see yourself that they were?

Señor VILLEGAS. All that I have put as to the classification and the surface area is just as I have found it.

Governor TAFT. Do I understand the Señor Padre to agree to his survey and classification?

Friar MARTIN. It is a very small difference, more or less. I desire to state that all the lands that are called cultivated—I know they were cultivated last year when I examined them.

Governor TAFT. That is what I understand to be the fact.

Friar MARTIN. So that the production is calculated on the part that is cultivated. Do you accept the production which Señor Villegas gives as that of these lands?

Governor TAFT. I do. I have no other data.

Mr. MCGREGOR. I would like to ask Señor Villegas why he has omitted, in valuing the Imus property, to mention anything about the coffee lands.

Señor VILLEGAS. I have seen no coffee growing there.

Mr. MCGREGOR. There is a considerable area of coffee in sight of the hills, where I have not been able to get to.

Señor VILLEGAS. Perhaps the coffee trees have died.

Mr. MCGREGOR. I have not seen them myself, but I know they are there.

Señor VILLEGAS. I have considered all that part that I could not see cultivated as uncultivated, and so classified it.

Mr. MCGREGOR. You can hardly take coffee land as uncultivated land, although it may have been allowed to grow to jungle.

Adjourned until March 6, 1903.

Continued from March 2, 1903.

MALACAÑAN PALACE, Manila, March 9, 1903.

Friar MARTIN. By the reading of the copies of the three conferences I received last week, I have seen that the object of these conferences is the valuation of the friars' lands. If that be true, I can not intervene in such a business, because I have not a power of attorney from any of the religious orders to represent them here.

Governor TAFT. You do not bind anybody by being here.

Friar MARTIN. On the other hand, I must say that from what I know and from what I have heard from my friends, Mr. McGregor and Señor Gutierrez, all the estates, object of the past conferences, do not belong to the friars. It is true that they possessed them formerly, but it is also true that at present these estates belong to one of these three companies: Philippine Sugar, British Manila, and Compañía Agrícola de Ultramar. This last I represent, and I am the chief agent of it in these islands. My representation in these conferences is the representation of the Compañía Agrícola de Ultramar, from which I have received a power of attorney in order to administer or sell lands belonging to it. I have no other representation here. I would like to call the attention of the governor to some other points, but I prefer leaving it for the time when we have discussed everything relating to the haciendas, in order to get more exact information of what was expressed in the three conferences referred to.

Governor TAFT. It makes no difference in what capacity you come, I am delighted to see you here, and your knowledge of the conditions will doubtless assist us in getting to some basis with reference to the valuation of lands; but whatever you say or do in this matter won't bind anybody, whomever you represent or do not represent. The same is true of Señor Gutierrez, who represents the Philippine Sugar, and Mr. McGregor, who represents the British Manila estates. When we closed

we were on the Bulacan haciendas. Had you completed your questions about those, Señor Gutierrez?

Señor GUTIERREZ. No, sir. At that time I had expressed my desire to continue questioning and also making some remarks with respect to the eight haciendas in which I am interested, but if the Governor desires it I can delay the matter until some other time and then take up the matter of the eight haciendas.

Governor TAFT. I have been going over by provinces because I thought that more convenient, but Señor Gutierrez can take any course that he prefers.

Señor GUTIERREZ. I believe it would be more advisable for me to take up the eight haciendas.

Archbishop GUIDI. It is better to take up the estates by orders, the Augustinians first, then the Dominicans and Recoletos.

Governor TAFT. I think it was quite useful to take up the Cavite estates together; it is easier to note their variation when we have them together than when we take them up separately. Here are the Calamba estates of the Dominicans. What is the name of it?

Señor GUTIERREZ. San Juan Bautista, generally known as the Calamba. We will begin with Santa Rosa. Ask Señor Villegas if he surveyed and examined the hacienda of Santa Rosa.

Señor VILLEGAS. It was surveyed by an assistant of mine, but under my supervision.

Governor TAFT. What is the character of the estate? Is it improved or otherwise?

Señor VILLEGAS. There are a few small dams.

Governor TAFT. What is the character of the land?

Señor VILLEGAS. It is broken ground.

Governor TAFT. There is some sugar land and also some rice land on the property. Is there any first-class superior land?

Señor VILLEGAS. There are some superior lands and some first-class lands, as shown in the statement here. The character of the lands I would place a little above the first-class lands and a little below the superior lands.

Governor TAFT. What do they produce?

Señor VILLEGAS. The first-class land produces from 80 to 90 cavanese per hectare.

Governor TAFT. Does it lie right on the lake shore?

Señor VILLEGAS. It is situated right on the Laguna de Bay.

Governor TAFT. So that gives them transportation to Manila, does it?

Señor VILLEGAS. By casco or banca navigation; yes, sir.

Governor TAFT. How many miles is it?

Señor VILLEGAS. A little over three hours by steamer.

Governor TAFT. Is there any method over the estate itself? Can bancas go in the streams on the estate?

Señor VILLEGAS. No, sir. It has to be hauled.

Governor TAFT. How are the roads?

Señor VILLEGAS. The roads are only in a fair state.

Governor TAFT. You place 1,000 hectares as worth 175 pesos a hectare, 1,300 hectares at 150 pesos, and 130 hectares at 100 pesos. Is that all rice land?

Señor VILLEGAS. Yes sir.

Governor TAFT. Then you give 1,010 hectares of sugar land at \$150 and 1,300 hectares of second-class land at 100; also sugar land. And you value the casa of the hacienda at \$25,000. Is it a good house?

Señor VILLEGAS. The house is a pretty good house, but it suffered somewhat during the war between Spain and the Philippines, so that it is not in a very good state of repair. However, on the whole, it might be said to be in a fairly good condition.

Governor TAFT. You estimate the total value of the hacienda at \$700,000 Mexican?

Señor VILLEGAS. Yes, sir.

Señor GUTIERREZ, I would like to ask Señor Villegas what basis he used for his judgment in the valuation of these lands? Have you valued them in accordance with sales of land of similar character made in the neighborhood of Santa Rosa?

Señor VILLEGAS. I have valued them according to the nature and the value of the crop which they produce, and, furthermore, in accordance with the sales of lands which have been made in the pueblos of the province of La Laguna.

Señor GUTIERREZ. From what you state it appears that you have made these valuations in accordance with the sales of lands that have taken place in the neighborhood of other pueblos in La Laguna, and further, that the first-class lands yield from 80 to 90 cavanese per hectare. From this it appears that the value of the crop of the lands is greater than the value placed on the lands themselves, and I consider this preposterous.

Señor VILLEGAS. In stating the profit to be from 80 to 90 cavanese I did not mean

as a regular annual yield. That is what the lands are capable of producing under the most favorable circumstances, but this can not be taken as a basis by itself for the valuation of the land, because it is not the basis for a steady income. It is more or less subject to conditions and circumstances and it is only lately that the price of palay has risen. It is subject to fluctuations, and, indeed, the price will be lower in the future.

Governor TAFT. Are there any lands rented in that neighborhood from others than these companies?

Señor VILLEGAS. The people of Santa Rosa have told me that those lands belong to the pueblo.

Governor TAFT. What I want to ask is, what is the ordinary division of crops between the landlord and the tenant in Laguna, for rental?

Señor VILLEGAS. One-half.

Governor TAFT. Does that include lending or furnishing of carabaos by the landlord?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Suppose they do not furnish any carabaos and do not furnish any seed, what is the division then?

Señor VILLEGAS. It is according to agreement in that case, but it sometimes happens that capitalists will furnish only carabaos while the tenant is obliged to furnish the seed.

Señor GUTIERREZ. I wish to state that the witness is in error with regard to this matter. I myself have been an agriculturist and know what I am talking about. The custom in the Visayan Islands is to split the crop in halves, one half going to the landlord and the other half to the tenant, the landlord furnishing nothing but the land. But in the case of sugar the landlord further takes the tenant's cane and grinds it for him and then they divide the sugar between them. In Luzon it was the custom to give two-thirds to the landlord and one-third to the tenant.

Governor TAFT. That is not my information.

Señor GUTIERREZ. I have been thirty-six years in the Philippines and a great portion of that time a farmer, and I can show examples.

Governor TAFT. I will call a witness on that subject who, long as the experience of Señor Gutierrez is, has had more experience, in that he has owned a larger estate. My impression is (of course I have no knowledge except what I gain) that in certain parts of Luzon (of course they may vary in other parts) the division is just half, whether carabaos are furnished or not. Señor Gonzales owns as large an estate as any of these, and he charged 10 per cent of the crop.

Señor GUTIERREZ. But that is an isolated case. I can cite a case of the Frailes where they only charged 5 per cent.

Archbishop GUIDI. That simply goes to demonstrate that there is no fixed rule. It simply depends on the agreement between the land owner and tenant.

Governor TAFT. But if you get all the agreements together then you are able to determine something of what ought to be the rent. The friars were the largest landlords in the islands and they only charged 10 per cent, and sometimes, as they say, 5; and then you get Gonzales, who is I suppose the next largest proprietor in the islands, or one of the largest, and he only charges 5 per cent.

Señor GUTIERREZ. That is true, but the case of Señor Gonzales is easily accounted for when you know that his lands are uncultivated lands and his lands only date from about the year 1860. He is a man, you might say, of yesterday only, and he would naturally wish to have his land cleared and put into a state so that it could be cultivated. Tuason charges here at Santa Mesa a tax of 6 cents, Mexican, for each square meter a year.

Governor TAFT. I will call Tuason and see what he charges. Santa Mesa is in the city, isn't it?

Señor GUTIERREZ. Yes, sir.

Governor TAFT. What does he charge in the Mariquina Valley?

Señor GUTIERREZ. I have not investigated; I can not say.

Governor TAFT. Mariquina would be a much fairer standard to judge by than Santa Mesa, which is right here within the street-railway limits. For instance, they want \$400,000 gold for this land of Warner-Barnes & Co., but that gets its value not because of the rice it raises (if, indeed, it raises any rice), but it gets its value because just as soon as there is an electric street railway it is bound to be the best land in Manila for suburban residences; and so it is with Santa Mesa.

Archbishop GUIDI. I would ask, then, that the same judgment be taken into account with regard to the lands which we are dealing with that are within a municipality.

Governor TAFT. Certainly. Let me state the proposition, to see whether his excellency agrees with me. Any land that is useful for the construction of urban or sub-

urban residences within a reasonable time has necessarily a value for that purpose as distinguished from the value that it ought to have for the raising of crops; but when you get land out here in Santa Rosa, there is no probability that Manila is ever going to reach out to Santa Rosa, or that anyone is going to build suburban residences there, and that has to be valued according to its agricultural character. The same applies to the Cavite estates.

Archbishop GUIDI. Certainly. It was simply a general observation which I made, and which I wanted to make for the consideration of Señor Villegas; for, if you will remember, I asked the question at the beginning whether he had taken it into due consideration in his valuation of these lands—those lands which were within the urban zone, or which were suitable to go within an urban zone, and those lands which were purely agricultural.

Governor TAFT. As yet we have not considered any lands that were within an urban zone; at least, I do not remember.

Archbishop GUIDI. It is true I have not asked him particularly that question, but simply in a general way, and a question (which, by the way, Señor Villegas did not answer) whether he had taken into consideration in making this assessment those lands which were within an urban zone and those which were purely agricultural lands. I simply wished to make this general question in order afterwards to make the more particular questions. I will now ask Señor Villegas again if he has taken into consideration lands within an urban zone and lands outside the urban zone.

Señor VILLEGAS. Yes, sir; I have.

Archbishop GUIDI. Further on I will discuss which were urban lands and which were not urban lands.

Señor VILLEGAS. With regard to the question of the obligations of the tenant toward the landlord in the case of one of these haciendas, it was the general rule for the tenant to give for each cavan of seed that had been furnished to him 5 or 6 cavan of palay and from 6 to 8 pesos in money.

Señor GUTIERREZ. With regard to Señor Villegas's statement of the improvements on this hacienda, I should like to say that there is on this hacienda a ditch a kilometer and a half in length, besides smaller ditches of 13,000 meters in length. With regard to the valuation of the house, if it was offered to me for \$30,000 I would take it immediately. There is also a warehouse that is situated in the neighborhood of the house that is worth \$10,000, which Señor Villegas has not taken into account at all. There is also another fine house on the estate, a magnificent house, which is outside of the town itself, of which no mention is made by Señor Villegas. He has also valued the sugar land at much less than the palay land, and yet we all know that the sugar land is worth a great deal more than palay land.

Señor VILLEGAS. I do not agree with Señor Gutierrez, because the rice lands are situated almost on the lake shore, while the sugar lands are situated away up in the uplands.

Señor GUTIERREZ. You can say what you like about the matter, but everybody knows that the sugar land is worth a great deal more than the rice land. The fact of sugar land being on the uplands is in accordance with the nature of sugar land. Sugar land needs these conditions to be sugar land—it must be on high ground.

Señor VILLEGAS. I have taken into consideration the difficulty of transporting the sugar cane from these high lands to the pueblo, which is very costly; and, furthermore, these lands are not very good lands for the cultivation of sugar.

Señor GUTIERREZ. Señor Villegas's classification of the land demonstrates, to my mind, that the land must be very valuable for the cultivation of sugar. However, the land has been classified by Señor Villegas as sugar land, and it is in sugar, and it would be certainly very foolish to plant sugar on half of the land of this estate, taking into consideration the cost of planting sugar cane, if it were not suitable for sugar and suitable only for palay.

Señor VILLEGAS. With regard to the valuation that I have made of those lands, it is in accordance with the actual product of the land.

Señor GUTIERREZ. How many pilons of sugar a hectare does the land produce?

Señor VILLEGAS. From 25 to 30 pilons a hectare.

Señor GUTIERREZ. How much is each pilon worth?

Señor VILLEGAS. The price varies.

Señor GUTIERREZ. Furthermore, Señor Villegas has not taken into consideration the urban zone of Santa Rosa in this estate, and I know that the town of Santa Rosa is quite a good town.

Señor VILLEGAS. I have taken it into account in the classification of first-class lands, for the superior class lands, and the town lots are about equal in value.

Señor GUTIERREZ. I can not agree with you that town lots are of the same value as first-class or superior lands.

Señor VILLEGAS. Town lots in provincial towns are not worth as much as in Manila.

Señor GUTIERREZ. That is true. Señor Villegas also states that the communication between the hacienda and the outside is not good, but I can state that the entire hacienda fronts upon the lake shore and has easy communication.

Señor VILLEGAS. I have recognized the fact that some of the land lies on the lake shore, and for that reason I have valued it as first-class, superior land.

Archbishop GUIDI. In order to demonstrate the difference of opinion there is with regard to the value of land, the agent of the Augustinian nuns has been offered a peso and a half a square meter for their lands, and they have refused it.

Governor TAFT. But that is suburban property; the electric street railway is bound to go right there.

Archbishop GUIDI. The Santa Clara nuns have also been offered a very high price for their estate.

Governor TAFT. Now, about Calamba. Is that sugar or rice land?

Señor VILLEGAS. Both sugar and rice.

Governor TAFT. There are 16,424 hectares in the estate.

Señor GUTIERREZ. Yes, more or less; that is about right.

Governor TAFT. You have estimated that of first-class land there are 3,991 hectares; 883 hectares of second-class, and 883 of third-class lands. Also 4,626 hectares of sugar land which you estimate at 60 pesos a hectare, and 6,036 hectares of uncultivated lands. The hacienda house you place at 15,000 pesos, making the total value of the estate \$1,102,000.

Señor VILLEGAS. Yes, sir.

Governor TAFT. Is this on the lake?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Is the soil good?

Señor VILLEGAS. Yes, sir.

Governor TAFT. How many hours is it from Manila?

Señor VILLEGAS. The steamer leaving here at 7 o'clock in the morning will reach there about 1 o'clock the same afternoon; that is, after making all stops.

Governor TAFT. Is it improved?

Señor VILLEGAS. There are a few improvements.

Governor TAFT. It has the main road to Batangas and Lipa running through it, hasn't it?

Señor VILLEGAS. Yes, sir.

Governor TAFT. There seem to be a good many rivers and streams running through the estate.

Señor VILLEGAS. Yes, sir; but they are not navigable streams. The San Juan River is navigable, however, up to the pueblo of Calamba.

Governor TAFT. Are there any dams in the streams?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Are they used in irrigating the land?

Señor VILLEGAS. Those rivers which have dams are used for the irrigation of land.

Governor TAFT. How much do the first-class lands produce here of rice?

Señor VILLEGAS. In good seasons, first-class rice lands produce from 70 to 80 cavanese in this hacienda; the lands lying along the shore of the bay.

Governor TAFT. Where is the sugar land?

Señor VILLEGAS. Through the wooded uplands.

Governor TAFT. I see you have estimated this sugar land as considerably less in value than in Santa Rosa. Why have you made that distinction?

Señor VILLEGAS. Because the sugar land in this estate is away back in the woods, almost up in the foothills of the mountains.

Governor TAFT. Does that produce as much sugar cane as the land in Santa Rosa per hectare?

Señor VILLEGAS. No, sir; these sugar lands produce comparatively little.

Governor TAFT. About this house, is it in good condition?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Is it a large house?

Señor VILLEGAS. No, sir; it is a medium-sized house.

Governor TAFT. You have estimated its value as \$15,000?

Señor VILLEGAS. Yes, sir.

Governor TAFT. You put the valuation of 5 pesos a hectare on uncultivated lands for the same reason, I presume, that you did in other cases?

Señor VILLEGAS. Yes, sir.

Señor GUTIERREZ. You have stated that the first-class rice lands produce from 70 to 80 cavanese a year. What do the second-class rice lands produce?

Señor VILLEGAS. From 65 to 75 cavanese only.

Señor GUTIERREZ. How much do the third-class lands produce?

Señor VILLEGAS. From 45 to 55 cavares a year.

Señor GUTIERREZ. How many piculs of sugar will one hectare of sugar land produce?

Señor VILLEGAS. From 15 to 20.

Señor GUTIERREZ. It produces over 100.

Señor VILLEGAS. But you must take into consideration that in planting sugar land one-half of the hectare is always left idle—that is, one-half cultivated in one year and one-half left fallow until the next year.

Señor GUTIERREZ. So that you have given me the production of one-half of a hectare instead of one hectare?

Señor VILLEGAS. No; I have given the production of one hectare because I have taken into consideration that a hectare that is put to seed this year, next year lies idle; so that I take the average per year.

Archbishop GUIDI. You must not take it as a fact that the land would be allowed to lie idle, because if it was planted to sugar cane one year, the next year instead of being allowed to lie idle it would be planted to corn or any other crop, which would be worth something.

Señor VILLEGAS. I simply took into consideration the value of the land with relation to its productivity in sugar.

Archbishop GUIDI. You should not do so; you should also take into consideration its productivity in other crops.

Señor VILLEGAS. That would be a small affair.

Señor GUTIERREZ. With regard to the sugar lands in the estate of Calamba—they are of such strong soil that it is necessary that they be cultivated for a long succession of years before they can give a good quality of sugar. At the present time they do not give a good quality of sugar, but it is not necessary to let them lie idle at the present time. They ought to be cultivated every year for a succession of years.

Señor VILLEGAS. But it is the general custom in this country where the palay is sown to the land one year and then the straw is burned off, that year they are allowed to lie idle for another year before they are seeded again.

Señor GUTIERREZ. But that is not the normal condition of these islands. What you refer to is simply those lands which have been recently cleared and which are cultivated by the people in the mountains. It may be that they will cultivate them one year and allow them to lie idle, but lands that are under constant cultivation are cultivated one crop one year and cultivated to another the next year. It is the same way here as in Porto Rico, Cuba, or anywhere else.

Governor TAFT. I thought they planted sugar lands and went right on growing sugar for four or five years before they had to renew the cane.

Señor GUTIERREZ. That is in some points true, but in other points it is not.

Governor TAFT. How about the island of Negros?

Señor GUTIERREZ. At Ilog, in Negros—a place which I know very well—they cultivated cane for a period of seven years without making new plantings.

Governor TAFT. What is sugar land in Negros worth?

Señor GUTIERREZ. I do not know, but it is worth a good deal of money.

Governor TAFT. Is it worth 200 pesos a hectare?

Señor GUTIERREZ. Yes, sir; I should think so.

Governor TAFT. It is not worth from 100 to 150. How much is that of Lacson worth? That is as good as there is.

Señor GUTIERREZ. I do not know what Lacson's hacienda is worth. I did know what he paid for it but I have forgotten.

Governor TAFT. The sugar land in Negros, along on the coast there, has very easy communication with Iloilo, hasn't it?

Señor GUTIERREZ. But our communication is ever so much easier.

Governor TAFT. Yes; but they have small vessels that run all the time there, haven't they, right across to Iloilo?

Señor GUTIERREZ. Yes, sir. Lacson's hacienda runs right down to the shore, and his lorchas run right up and take the sugar from the little railroad that he has on the shore.

Governor TAFT. Sugar land there produces a good deal more than sugar land here, does it not?

Señor GUTIERREZ. No, sir; it is better sugar, but much less. It is possible that the land is very much easier cultivated in occidental Negros. I know that it gives a better quality of sugar, but it gives a very much smaller crop—that is, land that is worn-out down there.

Governor TAFT. Some of it is, but I mean good land in Negros situated conveniently toward Iloilo. Is there any of it that is worth more than 200 pesos a hectare, by estates?

Señor GUTIERREZ. I do not know because I do not own any of the land; but I think

it is possible that you could find sugar lands worth that much in Negros, because Negros is a very large island and very thinly populated.

Governor TAFT. What I want to know is, why, if first-class sugar land in Negros is worth generally not 200 pesos but 150, this should be worth five and six and seven hundred pesos?

Señor GUTIERREZ. For the same reason that in Pampanga land is worth from 600 to 800 pesos a hectare where the same lands in Tarlac are worth 30 to 40 pesos a hectare. In Pampanga, there is a very thick population. Tarlac is very thinly inhabited and what they desire there is that new colonists come and cultivate the land.

Governor TAFT. Then you do not judge wholly by the product in ascertaining the value of the land?

Señor GUTIERREZ. In Pampanga and other places the value of the land depends upon the demand for it. In our haciendas which have been long opened up and which are surrounded by a thick population, the people there have to buy the products of the land; consequently it is worth more.

Governor TAFT. In Negros the gross product in many years is worth as much as the land is worth, so that it does not show that an estimate is necessarily absurd of the value of the land because it may not exceed the gross product of the land.

Señor GUTIERREZ. When you deal with a hacienda that is cultivated, an old, established hacienda like this, then it is absurd.

Governor TAFT. These lands in Negros have been cultivated for a long time. You stated that some of the land was cultivated so long that it was thinned.

Archbishop GUIDI. They are lands that have been cultivated for a number of years and that have been abandoned.

Governor TAFT. In Negros?

Archbishop GUIDI. In some parts of Negros.

Governor TAFT. But these lands, some of them—in Santa Rosa, for instance—have been cultivated for hundreds of years, according to Señor Gutierrez. Have they ever been manured?

Señor GUTIERREZ. I do not know.

Governor TAFT. The fact is that none of this land has ever received additions to its strength by artificial means?

Señor GUTIERREZ. I believe not.

Governor TAFT. Does the land become exhausted gradually from cultivation of sugar?

Señor GUTIERREZ. Yes, sir; with the cultivation of everything.

Governor TAFT. Then these lands, which are so old, have been cultivated a long time, haven't they; so that they do not produce as much as if they were fresh lands?

Señor GUTIERREZ. That is true.

Governor TAFT. Then why should they be more valuable from the point of production than the manured land of Negros, for instance?

Señor GUTIERREZ. It is not precisely from their productivity that their values are increased, but from their proximity to a central market, from the ease with which they are worked, from the large supply of workingmen which they can draw upon to cultivate, and from the fact that they are all actually under cultivation.

Governor TAFT. Now, we have got back to what I wished to show, and that was that the value of your land depends on what it will bring in the market, what people will pay for it; that the productivity of the land is only one circumstance, and the fact that it produces \$150 in a year, gross, is only one circumstance to show what its value may be, and that it may be worth no more than the gross production of one year.

Señor GUTIERREZ. I can never admit that latter statement.

Governor TAFT. You just admitted to me that there was land in Negros that produced \$150 a year and was not worth more than \$150.

Señor GUTIERREZ. Yes; but the trouble is that there is no demand for those lands in Negros. In Paragua there are similar lands.

Governor TAFT. That is just what I say; it depends on the lands.

Señor GUTIERREZ. Yes; but the uncultivated land is more subject to fluctuations than cultivated land.

Governor TAFT. I am speaking about cultivated land in Negros. That is what I understood you to refer to—cultivated sugar land that will produce \$150 a year and yet is not worth more than \$150.

Señor GUTIERREZ. With respect to cultivated lands in Negros, such as you refer to, if they do produce 150 pesos a hectare, I can not conceive of anybody wanting to sell them for that sum. It is impossible that anybody should wish to sell for that sum or less than that sum.

Governor TAFT. I understood you to admit a while ago (possibly I am wrong

about it) that the gross production of land frequently is equal for one year, or even greater, than the land itself sold in the market.

Señor GUTIERREZ. No, sir.

Archbishop GUIDI. Friar Martin is probably correct in this matter that Señor Gutierrez speaks about, of lands that are capable of producing 150 pesos a year; that there is a possibility that they have all the elements necessary to produce, if properly cultivated, 150 pesos a year, but that owing to certain conditions and circumstances, like lack of labor or isolated position, long way from a market, etc., they are unable to bring out their entire productivity, that is, to be cultivated to their fullest extent; and in that case such lands may be sold at less than what they are capable of producing in one year. But I do not believe that lands that actually do produce 150 pesos a year could be sold for anything less than that sum. To give a concrete example: There are certain lands around Rome that are capable of great productivity, but they have gone begging in the market; nobody would buy that land on account of malarial fevers around there. Lately they have found a method of combating these fevers and the price of these lands has gone up wonderfully. Formerly, of course, nobody would risk his life to go out and cultivate those lands, although it was known that the lands were capable of great production. Since they have discovered a way of defending themselves against the attacks of the mosquitos by living in mosquito-proof houses, the value of those lands around the Campana of Rome has gone up from 20 cents a square meter to 200 and 300 francs a hectare. That is simply owing to the different conditions surrounding them.

Governor TAFT. I agree to what his excellency says, but I still wish to stick to the point that I am trying to make, and that is, that if you tell me that land is cultivated and produces \$150 gross receipts a year, you only give me one circumstance in determining what the value of that land is, and that that may be so affected by other circumstances as to make the value of the land no more than the gross product in one year. Those are, first, the expenses—the cost of labor, the question of getting labor at all, the danger from locusts, the difficulty of getting carabaos, and a thousand and one circumstances, especially in the Tropics, that affect the net product from that gross product; and then, you add to that what is usually required as in the Tropics or in the community as a fair dividend or a fair percentage of income on your capital, which, I understand, in this community is from 20 to 30 per cent of the capital; so that it would be very easy to produce 150 pesos gross and then cut down the expenses and show that the net product was no more than would be the reasonable income on that land.

Mr. MCGREGOR. That is a tremendous interest, governor.

Governor TAFT. I can call every business man in Manila and show that he would not go into agriculture if he could not get at least 20 per cent. I mean invest capital and buy land.

Mr. MCGREGOR. Because they are not people who care to do it.

Archbishop GUIDI. But relatively the production of the land has also increased, that is, relatively with the expenses. As the circumstances have become more risky and as capital has become dearer, so the production of the land has increased in proportion, so that to-day the production of the land, we will say, that used to yield \$150 is now very much greater. Relatively in proportion to the expenses it is just as great. For instance, palay is worth a great deal more now than it was before. The cultivator never loses; it is the consumer who pays for all that. The people who are obliged to go to market to buy rice for food have to pay for the losses of the landowner, but the landowner will always get his interest on his money.

Governor TAFT. That is not my understanding, and I venture to say that if you go through the landowners of these islands you will find that none of them have made fortunes.

Archbishop GUIDI. The only way you can gauge the value of the land is by the products.

Governor TAFT. That is only one circumstance.

Archbishop GUIDI. I think that is the principal circumstance.

Governor TAFT. Let us see how much palay has come up in price. Ask Señor Villegas what the old price of palay was on the hacienda.

Señor VILLEGAS. I have known, when I was a young man, rice to sell from 3 to 4 reales a cavan. It went to a dollar, from that it went to \$2.20, from that it has gone up until it is now \$3.50.

Governor TAFT. When did it go to \$2.20?

Señor VILLEGAS. In 1901 and 1902.

Archbishop GUIDI. Now I will ask, why has rice gone up? I will answer the question myself. It is because the landowner, the farmer, calculates what it has cost him to raise the rice. He calculates every penny that he has invested in the cultivation of this rice until he gets it into the warehouse and the market, and then

on top of that he adds what he thinks a just interest on his capital, and he sells it at that price on the market, so that he loses nothing.

Governor TAFT. I venture to differ totally from his excellency. He sells his rice for what he can get for it in the market, and that market is determined by what they can import rice for from Saigon and Bangkok and from other ports. It is determined by the demand and the supply. He does not make the calculation and it does not do any good to make the calculation, because he has got to sell the rice for what he can get for it.

Archbishop GUIDI. We were speaking, however, of the price upon the land itself, for local consumption.

Señor VILLEGAS. I was speaking of the market here in Manila.

Governor TAFT. What is it on the hacienda?

Señor VILLEGAS. In Paluan in 1901 I was able to purchase it a \$1 a cavan.

Governor TAFT. Is the carabao necessary for the cultivation of rice.

Señor VILLEGAS. Yes, sir; it can not be cultivated without the carabao.

Governor TAFT. What is the value of the carabao to-day in the market, anywhere, as compared with what it was three or four years ago?

Señor VILLEGAS. Formerly you could get a carabao for from 30, 40, or 50, sometimes at the very dearest at 60, pesos a head, but to-day you can not buy a carabao in the market anywhere for less than 150.

Governor TAFT. In other words, the price of carabaos has trebled?

Señor VILLEGAS. Yes, sir, and even more.

Governor TAFT. What is the "jornal" or daily wages in these provinces about Manila for farm laborers?

Señor VILLEGAS. Fifty cents Mexican a day in the provinces. Formerly it was 25 cents.

Governor TAFT. In some of the provinces has it not increased to 60 and 70 cents Mexican?

Archbishop GUIDI. Perhaps 25 cents formerly was of greater value than 60 cents to-day.

Governor TAFT. I am speaking only of Mexican, and that is the standard here.

Archbishop GUIDI. But it is a great mistake that we have not yet gotten out of, in regard to the value of the Mexican money to-day and the Mexican money of former years.

Governor TAFT. But we are dealing altogether with Mexican money to-day. The price of carabaos, the price of rice, and the price of the "jornal" is Mexican.

Archbishop GUIDI. I agree with you. I know that in your mind you have the Mexican money, but Señor Villegas does not understand you, but he understands that the peso is the peso of Spain.

Governor TAFT. They never had any money here but the Mexican peso. It was a dollar in silver with the Mexican stamp on it, and that may have varied in value and may have been worth in gold 100 cents at one time and 75 cents at another, and 50 cents at another, and 40 cents as it is to-day; but what I am speaking of is the value in Mexican, whatever that was worth in gold. That standard may have varied, but these people only knew the Mexican dollar; that is all they knew. That may have varied in gold, and the fact that it varied in gold may have increased the price in gold, but I am speaking of that standard, however varied that standard was.

Archbishop GUIDI. The standard as applied in actual practice during this length of time works out in this way, that the article which was worth one Mexican dollar at that time is now worth two or three at the present time.

Governor TAFT. As I conceive, what we have got to do in reaching the value of this property is to determine what that property is estimated to be worth by the people who are in a position to buy and in a position to work that land. It is by the demand, and the demand, as Señor Gutierrez says, is determined by the tenants who are around and who want the land. Now they who form the value and the demand have no other standard, whether it varies or not; they had no other standard except the silver Mexican dollar in the last twenty-five years. It is true, I have no doubt, that the fact that this Mexican dollar has gone down in gold has so affected values, unconsciously to these people, that the value of the land and the value of other things has increased in Mexican. The only way we can reach the value of these lands in gold is to determine their value in Mexican in the demand of those people who pay in Mexican and estimate in Mexican and then ourselves, because we go according to value in gold, reduce the Mexican value to a gold value according to the variation between gold and silver at the time that we make the purchase.

Archbishop GUIDI. That means that the purchaser determines the price of the land.

Governor TAFT. No; the seller also.

Archbishop GUIDI. The great thing for us to find out is, if these people value \$200

to-day in Mexican as its actual value to-day, or the \$200 they have known it in times past, that is the difficulty.

Governor TAFT. What we are discussing now, first, is the demand, and then the effect that the production in Mexican ought to have on the value and in demonstrating what that demand is. We have here the gross production in Mexican; we have the expenses in Mexican, to wit, we have the cost of the carabao, the cost of the seed, the cost of the labor, and the production, in Mexican, and we have also what is the understood income or per cent of income that is required by capitalists in the islands. That does not necessitate our going into gold at all, because we have every element in silver—silver as it is estimated by the people to-day.

Archbishop GUIDI. My mind refuses to believe that a carabao can be worth as much to-day as a hectare of ground.

Governor TAFT. But it is. I can get hectares of ground that are worth just a third of what the carabaos are worth.

Señor GUTIERREZ. The price that Señor Villegas has placed on the carabao is about correct—150 to 200 pesos even; but this does not show that the land ought to be worth that. If the carabao is worth that much the land ought to be worth a good deal more.

Governor TAFT. No; it is because the carabaos have disappeared; the land is still here.

Señor GUTIERREZ. That is an accident.

Governor TAFT. It is an accident that is bound to last for a number of years. Then you have surra that has already destroyed 50 per cent of the horses.

(Adjourned until March 11, 1903.)

Continued from March 9, 1903, fifth session.

MALACAÑAN PALACE, *Manila, March 11, 1903.*

Señor GUTIERREZ. I should like to know if Señor Villegas, upon making the survey of the Calamba estate and placing the value thereon, took into consideration the fact that there are coffee lands and hemp lands on the property?

Señor VILLEGAS. I have seen no coffee lands on the property nor have I seen any abaca lands. There is a very small amount of hemp land.

Señor GUTIERREZ. Señor Villegas also omits to take into account such important improvements in the hacienda of Calamba as the large dam and the smaller dams, 22 kilometers of ditching with new bridges, 2 kilometers of ditching of masonry, and a tubular siphon of iron, 24 meters long by 1 meter in diameter, which is placed at the bottom of the river and which is a very costly work of masonry. Neither has he taken into account three warehouses of masonry for the purification of the water, of 512 cubic meters capacity each, all of which is for irrigating the zone of cultivable land of said hacienda. Nor has he taken into account six machines with all their accessories, as well as other warehouses and sugar mills. All these improvements have cost over \$400,000 gold.

Señor VILLEGAS. I have taken into account, as will be shown in my estimate of the value of the property, all the small dams that there are on the property at the present time and have valued them in accordance with their present state of repair.

Señor GUTIERREZ. So, as I understand you, you simply valued the smaller dams, but all the other irrigation improvements you have not taken into consideration, nor have you taken into consideration the warehouses and the mill on the property.

Señor VILLEGAS. I did not take into consideration all of the other improvements in connection with the dams and ditching because I thought that they were merely accessories to the general irrigation works on the property, and as far as machinery is concerned I did not know but that it was private property, as the property is rented out to private tenants; and it must also be taken into account what kind of machinery you refer to. If it is milling machinery, then it does not belong to the hacienda and is not a part of the hacienda.

Señor GUTIERREZ. In the valuation which I have the small dams do not appear, nor do the large dams, and as far as the machinery is concerned, that belongs to the property. There are seven machines on the property, all of them in warehouses.

Señor VILLEGAS. According to the information I got from the presidente and the leading men of Calamba, I understood that all of that machinery and improvements were constructed by and were the property of the tenants.

Señor GUTIERREZ. That is not true. All of the improvements on the hacienda belong to the hacienda and were made by the owners of the hacienda.

Señor VILLEGAS. In the plan itself I have shown the portion which is legally acknowledged to be the property of the friars and shown the other which is not recognized as the property of the friars.

Señor GUTIERREZ. Who has told you which was the part that belonged to the friars legally and which did not belong to the friars?

Señor VILLEGAS. In making the survey of this land I have shown on the map that part which is legally recognized by the principales of Calamba as the legal property of the friars, and I have also designated that part of the land which the principales of Calamba say has been usurped by the friars. I have gone over and measured from monument to monument, taking in all of the monuments in that land; that is to say, the land which is legally recognized as belonging to the friars and that land which is said to have been usurped.

Archbishop GUIDI. Have you seen the title deeds, or how did you determine which part of the land had been usurped and which part was that of the friars legally acknowledged?

Señor VILLEGAS. I have not seen the title deeds to the lands, but I have simply, at the request of the principales and the presidente of Calamba, drawn this line out on the plan in order to show which land was legally recognized as the property of the friars.

Governor TAFT. What do the monuments consist of?

Señor VILLEGAS. They are pillars of stone and masonry.

Archbishop GUIDI. The only way to draw these boundaries is with the title deeds in your hands and then run the lines between the monuments.

Governor TAFT. Were there any marks on this space that the presidente and councilors said was admitted to belong to the friars?

Señor VILLEGAS. No, sir.

Governor TAFT. Then you just made that from their statement, did you?

Señor VILLEGAS. Yes, sir.

Governor TAFT. Didn't they admit that the friars had been in possession of all this property?

Señor VILLEGAS. Yes, sir; they acknowledged they have had and still have possession, but they say it was usurped by them.

Governor TAFT. How long have they had possession, did they admit?

Señor VILLEGAS. I believe that I myself was the bearer of a communication from the principales of Calamba to Señor Legarda with regard to this matter.

Governor TAFT. What did that communication say?

Señor VILLEGAS. The communication stated that from time to time these boundary monuments had been moved.

Governor TAFT. Did it not appear by their admission that the friars had been in possession of this property from fifty to one hundred years?

Señor VILLEGAS. I believe it is a long time. The communication states the time upon which the boundary monuments were moved.

Archbishop GUIDI. It is a useless question.

Governor TAFT. I want to get at actual possession, because actual possession in certain respects is better than the deed.

Señor GUTIERREZ. Possession has been effective from 1830 to 1898.

Governor TAFT. That was my understanding when I examined the heads of the religious orders. Perhaps I saw Andrews's Chain of Title, in which it appeared that this had been in possession of the friars for some eighty or one hundred years.

Señor GUTIERREZ. Furthermore, Señor Villegas has given all that land over, in his estimates, to the friars. It is only now that he makes that remark with regard to the land being usurped.

Governor TAFT. In justice to him, he has put in here this legend, this memorandum, as to the amount admitted legally to belong to the friars.

Señor GUTIERREZ. I see that he has put down as our property 16,419 hectares. I do not know what the plan says.

Governor TAFT. The truth is that he was not employed to look into the title at all. He was asked to go and survey and report on the classes of land and their values. He was asked to go to the haciendas, to whoever they belonged, it made no difference.

Señor VILLEGAS. I have simply shown in the plan that part of the land which is acknowledged to be the legal property of the friars.

Señor GUTIERREZ. Señor Villegas has valued the uncultivated lands of the hacienda at Calamba at 5 pesos a hectare. These lands contain very fine timber, both for building and for firewood; clay mines and chalk mines, of which a very fine quality of crockery has been made. Whereas in the hacienda of Pandi he has valued the uncultivated lands at \$25 a hectare, and there is absolutely no comparison between the values of the two lands. In the first place, Calamba is nearer to the market and it is better situated in every way than Pandi. Therefore it is an absurd valuation that he has placed on the two lands.

Señor VILLEGAS. There is no comparison between the soil of the uncultivated lands at Pandi and the uncultivated lands of the estate of Calamba. The former are gently sloping and have but a small growth of timber on them, which can be easily burned off, so that they are, at a very small expense, susceptible of cultivation; but

the lands of the estate of Calamba are covered with a thick growth of timber and are very mountainous and broken, and it would be extremely expensive to cultivate them.

Señor GUTIERREZ. The uncultivated lands at the Calamba estate not only have very valuable timber upon them, but also have an almost inexhaustible supply of firewood, which can be very easily gotten out. Its soil is a vegetable soil and it is very rich in comparison with that of Pandi. Pandi has a stony soil and is not rich at all. A portion of the uncultivated land at the Calamba estate is suitable for sugar culture; it is gently sloping, and very well suited for the cultivation of sugar.

Señor VILLEGAS. In my opinion the soil at Pandi is very good for any sort of agriculture, but the soil at Calamba—that part of it which I have valued as uncultivated land—is very broken and it is only forest land.

#### TESTIMONY OF GREGORIO CORCUERA.

Governor TAFT. I would like to ask, in order to get through with this witness, which estates he surveyed?

GREGORIO CORCUERA. Lolomboy and Santa Clara.

Governor TAFT. I believe there is some difference between us as to the number of hectares in Lolomboy?

Señor GUTIERREZ. There is a difference of 1,056 hectares.

Governor TAFT. How did you reach the area of this hacienda?

Señor CORCUERA. I used the system of making a complete survey around the hacienda, availing myself of the services of different guides. If I had had one efficient guide, perhaps I might have gotten closer to the actual area of the hacienda, but I was obliged to avail myself of the services of several guides.

Governor TAFT. Did you find stones marking the hacienda, and did you run your lines by those marks?

Señor CORCUERA. Yes, sir. If there is any difference, it is the fault of the guide, because I did not have an official guide from the hacienda, but had to avail myself of other guides. These boundaries are very clear.

Governor TAFT. Most of the boundaries here [pointing to place on map] are natural boundaries, are they not?

Señor CORCUERA. Yes, sir.

Governor TAFT. Are all these boundaries here marked?

Señor CORCUERA. Yes, sir; they are very well marked.

Governor TAFT. Are not those old surveys, many of them, quite defective in the matter of area?

Señor GUTIERREZ. Yes, sir; but all of our surveys have been made by engineers.

Governor TAFT. Has Señor Gutierrez a map?

Señor GUTIERREZ. Yes, sir; it is an old map. I have some maps in the office, but do not remember what the date of the survey is.

Governor TAFT. I should think you might compare the maps.

Señor CORCUERA. I have found a map in a house on the estate which was made, not by an engineer, but by a surveyor. I can not say whether it was like this one or not.

Governor TAFT. I think we have agreed pretty well except with respect to Lolomboy, where there is a difference of 1,056 hectares.

Archbishop GUIDI. This difficulty can be easily gotten over by a study between this map and the old maps.

Señor CORCUERA. This estate adjoins the Santa Clara estate. Perhaps I have included in the Santa Clara estate the land which is lacking in this. I was told by the people on the hacienda there that they owned some other land in the pueblo of Polo belonging to this hacienda, and perhaps that is where the land lies.

Governor TAFT. Did you go over this estate to examine the character of the land?

Señor CORCUERA. Yes, sir; I have personally been over the estate.

Governor TAFT. What is the character of the land on that estate?

Señor CORCUERA. It is all rice land.

Governor TAFT. How much a hectare will the best land produce in a year?

Señor CORCUERA. In good seasons when there is plenty of water it will produce as high as 100 cavanese a hectare.

Governor TAFT. What do they call land of that character?

Señor CORCUERA. Superior quality.

Governor TAFT. What is that worth in the province of Bulacan?

Señor CORCUERA. Two hundred pesos a hectare.

Governor TAFT. How do you fix that value?

Señor CORCUERA. In making the valuation I went around to the neighboring towns to find out what property which had been sold at this time was worth, and taking

that into consideration and taking my own judgment into consideration I arrived at the price which I fixed on the land.

Governor TAFT. Had land of this kind been sold up there?

Señor CORCUERA. Yes, sir.

Governor TAFT. Did those sales average 200 pesos a hectare?

Señor CORCUERA. Yes, sir.

Governor TAFT. How much of the superior land is found in that estate?

Señor CORCUERA. Nearly all the land of the estate, by reason of the easy communication which it has, may be considered as superior.

Governor TAFT. How many hectares are there in that estate?

Señor CORCUERA. Four thousand five hundred and eighty-eight hectares.

Governor TAFT. How many hectares of that are superior land?

Señor CORCUERA. Three thousand three hundred and twenty-six hectares are superior lands.

Governor TAFT. What is the remainder?

Señor CORCUERA. The balance is uncultivated town lots and fishing grounds.

Governor TAFT. What do you estimate the uncultivated lands at?

Señor CORCUERA. Five pesos a hectare.

Governor TAFT. Why did you make that estimate?

Señor CORCUERA. During the former government when I held the position of assistant forester they used to assess uncultivated lands at from \$1, \$2, \$4, and \$5 a hectare, according to the quality of the land, and taking into consideration the quality of this land I have assessed it at 5 pesos a hectare.

Governor TAFT. How many hectares of uncultivated land are there?

Señor CORCUERA. Five hundred and forty-three hectares.

Governor TAFT. How much did you put down as town lots or solares, and what price did you give them?

Señor CORCUERA. One hundred and sixty-four hectares in solares, at 125 pesos a hectare.

Governor TAFT. How did you come to fix the price at \$125?

Señor CORCUERA. When I made the survey I generally inquired of the residents around there what the value of the land was, and I took that into consideration, and then, taking my own judgment into consideration, I fixed this price on them.

Governor TAFT. Are the hacienda of Santa Clara and the hacienda of Lolomboy the only two that you surveyed?

Señor CORCUERA. Yes, sir.

Señor GUTIERREZ. What value have you placed upon the Mexican dollar in your assessment?

Señor CORCUERA. It is the Mexican dollar to which we have always been accustomed here, and especially in such places as this, in which all sales and transactions are made in Mexican dollars.

Señor GUTIERREZ. Señor Corcuera has said that there are 647 hectares of uncultivated land, and I will state in regard to that if there is any land that is not under cultivation it is because of the lack of cattle; that there is not a single square meter of land that is not cultivated land. It has always been under cultivation. It may be, through some accidental cause, through some temporary reason, that it is not now under cultivation; but it has always been cultivated.

Señor CORCUERA. As I saw those uncultivated lands, it was impossible for a carabao to get through; and even further than that, to make the surveys it was necessary to use eight or ten men to get through the brush in order to make the measurements.

Señor GUTIERREZ. That is simply for the reason I stated the other day, and that is that when the land is left without cultivation for a single year the vegetation grows up so quickly that it appears to be in a wild state; but this land has always been cultivated.

Señor CORCUERA. I do not know anything about that; I simply set things down in my estimate as I found them.

Señor GUTIERREZ. Señor Corcuera has not taken into consideration the value of the improvements on the Lolomboy estate or on the Pandi estate. On the Lolomboy estate the improvements for irrigation are very valuable.

Señor CORCUERA. I have taken the improvements into consideration, and have valued them at 40,000 pesos. This includes the house on the estate and warehouses as well as the warehouse for the rice.

Señor GUTIERREZ. But the house on the estate alone is worth more than \$60,000; it is all built of stone and the walls are over a half a meter in thickness.

Señor CORCUERA. In making the assessment of the improvements I have searched out the oldest inhabitants there, and I was finally directed to the son of the man who was in charge of the work when the work was constructed for all the improve-

ments there, and he told me that, more or less, that was the value of the improvements on the land. This was also my own judgment.

Señor GUTIERREZ. So that Señor Corcuera has simply placed his valuation upon the testimony of the son of the alleged superintendent of the construction of the house.

Señor CORCUERA. I made this estimate in accordance with my best knowledge and understanding. If I were making the estimate over again I would put it at less than I did put it, because naturally as time goes on the house and the dams and all the other improvements deteriorate.

Archbishop GUIDI. Are you competent to appraise the value of a building?

Señor CORCUERA. No, sir.

Archbishop GUIDI. You may be quite competent to value and appraise land, but according to your own statement you have not the necessary knowledge to appraise a building.

Señor CORCUERA. I am not competent to do that, but placed an estimate on it to the best of my knowledge and understanding.

Governor TAFT. In what condition was the house?

Señor CORCUERA. The house is in a poor state and needs repairs.

Governor TAFT. What impression did you get from looking at the house as to its age?

Señor CORCUERA. It is a very old house.

Governor TAFT. Is there evidence of another house having been there next to it which was destroyed? I mean, is there evidence of its being smaller than it was?

Señor CORCUERA. No, sir; there are no traces there.

Governor TAFT. Do you include in this \$40,000 the value of the dams?

Señor CORCUERA. Yes, sir.

Governor TAFT. How do you estimate the value of those dams?

Señor CORCUERA. As I have said, in accordance with the statement of the son of the superintendent of construction on those improvements as to what they cost.

Archbishop GUIDI. Are you sure that that individual spoke the truth?

Señor CORCUERA. I thought so.

Governor TAFT. What was the comparative cost of the dams and the house?

Señor CORCUERA. About \$25,000 for the dam and \$15,000 for the house.

Governor TAFT. Are the dams in good condition, or otherwise?

Señor CORCUERA. Part of them are in good condition, and part of them are not.

Señor GUTIERREZ. I would like to state that the dam alone cost \$40,000 gold. It is 25 meters long, 3 meters high, and 2 wide. Besides there are a lot of other dams, and according to the information that I have from my administrator I think they are all in very good condition. There was one which was in a bad state of repair, but that has been repaired now and they are doing the work which they have always done. In what month did you make the estimate?

Señor CORCUERA. In November and December, 1901. They were not then all of them in good condition.

Señor GUTIERREZ. Perhaps Señor Corcuera has simply limited his work to making a survey of the boundaries of the estate and has not gone into the interior of the estate.

Señor CORCUERA. I was in the interior of the estate, have examined the land, and furthermore, I told the administrator down there that his dams were in bad condition. I followed up the ditches and could see that they were not irrigating the land.

Señor GUTIERREZ. It may be that some of the ditches were not in good condition, but the dams were all in good condition.

Señor CORCUERA. Perhaps that was it.

Señor GUTIERREZ. Señor Corcuera has stated that he has reached this valuation after having made investigation of sales around the neighboring pueblos and in the immediate vicinity of the hacienda. I want to ask him if he knows if those sales actually took place, and when.

Señor CORCUERA. They took place at the time I made the survey, or about that time.

Señor GUTIERREZ. Did you know there were any title deeds of evidence?

Señor CORCUERA. Undoubtedly there must have been some.

Señor GUTIERREZ. On the other hand, I would like to present some title deeds here showing sales of land made in that vicinity at a very much higher price.

Governor TAFT. Were these sales made later than the survey or before the survey?

Señor GUTIERREZ. Much before the survey. I can present a great many more. Here is one for 5 hectares, at \$1,500 gold.

Governor TAFT. Will you let me keep these, so that I can get a memorandum of them?

Señor GUTIERREZ. Yes, sir. I have a great many more if you wish.

Governor TAFT. I want all I can get.

Señor GUTIERREZ. I could get you some, though I fear I can not get as many as I would wish, because the owners of the deeds might be afraid of their being lost. Here are some other documents which I have, which show that the tenants used to convey their rights to cultivate the land for \$200 a hectare—and I can show a great many more—and that is gold.

Governor TAFT. I would like to know what you mean by gold. I can bring you a bank bill to-day that agrees to pay you, by a legitimate and responsible bank here, "pesos fuertes;" that means Mexican. You call it "pesos fuertes," but it does not mean anything more than Mexican.

Señor GUTIERREZ. I do not discuss the value of the Mexican dollar or the value of the peso, but simply what was paid at that time for that privilege of cultivating the land, which at that time was gold, because the gold money circulated at that time here. I think it is indisputable that if \$200 was paid simply for the privilege of being one of the tenants of the estate, the value of the land now is over \$200.

Governor TAFT. I do not agree with that; but I want to look at all that evidence. Is there any other document of sale but this one?

Señor GUTIERREZ. I would have to get them from the landowners or the tenants. The copies in the registrar's office have been destroyed. They are all public documents, however.

Governor TAFT. Here is a list of land sales and tax declarations in Bulacan Province, prepared by Señor Villegas.

Señor GUTIERREZ. You must take into consideration that those sales have been sales of poor men to rich men; that is to say, from poor men indebted to rich men and who had a mortgage over that property and took the property for the debt. It is just the same difference as buying a jewel from a jewelry shop and from a pawn shop.

Governor TAFT. These I understand to be actual sales in Bulacan in 1901 and 1902. The first sale is at Obando—rice land at 143 pesos a hectare. In Bulacan, 16 hectares, at 237 pesos a hectare. In Bocaue, 6½ hectares, at 156 pesos a hectare.

Señor VILLEGAS. The hacienda of Lolomboy is at Bocaue.

Governor TAFT. In Baliuag, 12 hectares, at 150 pesos a hectare. At Meycauayan, is it, 160 pesos a hectare.

Señor VILLEGAS. That is near the hacienda of Polo.

Governor TAFT. One hundred and thirty hectares in San Miguel, at 61 pesos a hectare. In Guiguinto, 2 hectares, at 100 pesos a hectare. In Hagonoy, 11 hectares of rice land at 400 pesos. In Barascain, 33 hectares, at 382 pesos a hectare; adjacent to Malolos, right near the railway line. The next one, at 92.70 a hectare, in Quingua. Does Señor Villegas know anything about these sales?

Señor VILLEGAS. I have official letters all prepared with respect to these sales, from information which I have received from the presidentes of the towns where the sales have been made. I have all that data on hand, and am working on it now. These are all on the official register of sales. I can get more data from the official registers. I can also go to the pueblos and see the deeds.

Governor TAFT. We want the circumstances of these different sales. For instance, this varies from 400 pesos a hectare to 61 pesos.

Señor VILLEGAS. With regard to the land at Hagonoy, at 400 pesos a hectare, you can get three crops a year from it. It is above superior land.

Governor TAFT. We want information about all of this land.

Señor GUTIERREZ. I have here a record of the sale of 1 hectare at 200 pesos, made twenty years ago, with the privilege of buying back.

Governor TAFT. We are not estimating twenty years ago.

Señor GUTIERREZ. Now everything has gone up; it must be worth a great deal more now than it was before.

Governor TAFT. He was not buying a lawsuit, as we are.

Señor GUTIERREZ. There will not be any lawsuit.

Friar MARTIN. I have perfect confidence in the government and the people at the head of the government.

Governor TAFT. I have perfect confidence in my friend McGregor's Government in England, but the Irish estates are not worth very much to-day, with all the power of England next door. If you have the people against you with reference to the title and ownership, then you have got a fact that you have to take into consideration.

Friar MARTIN. Notwithstanding this statement, I will challenge, with all due deference to you, anyone to produce titles that are more legally perfect than our titles. They have been passed upon by the Supreme Court of the United States.

Governor TAFT. Where property has been held for fifty or one hundred years, that is enough for me.

Friar MARTIN. I have a perfect chain of titles; not only of titles duly registered under the Spanish Government in compliance with the laws on registration, but also all the original titles, as the land was acquired by us by piece. All the litigation and every paper bearing on the title is complete.

Governor TAFT. I am entirely willing to concede that, and I am entirely willing also, should this thing fall through, to let them go into the courts and get their decrees, and enforce them with all the force I have whenever they have a legal decree of the court; but we are now discussing a commercial transaction. I want to get these lands, and I want to pay for them what is the fair price in view of all the circumstances. If you keep the lands, you have before you a constant turmoil. We can not help it—it exists, and it does not do to say that a government must be strong enough to put down all lawlessness. I cite the instance of Ireland. It is not possible to make the property of Ireland valuable in view of the opinion that the inhabitants have as to those titles, good as they are. If you keep the property, you will have on your hands constant trouble and turmoil; if we get it we will have, I hope, less, but nevertheless it will be great trouble for us. I do not see how we can ignore that fact in reaching what we can afford to pay and what you can afford to take.

Señor GUTIERREZ. I thank you very much for what you have stated with regard to your disposition to enforce any judicial decree of the courts in case that these negotiations should fail; but I do not think that there is any comparison between the Irish question and the question in the Philippines, because the Irish question is purely an agrarian question, which it is not in the Philippines. In the Philippines we have too much land; right in the neighborhood of these estates that are in question there are thousands of acres of land. There is plenty of land for everybody here. Therefore it is not an agrarian question.

Governor TAFT. The word agrarian, I think, means a field, and it is certainly a question arising with reference to the cultivation of the fields. It is the question of moving certain people off who won't pay their rents. It is the question of eviction. We have heard of evictions for twenty years—thirty years—in Ireland, since Gladstone passed his first landed estates act with respect to Ireland, and England, which has prided herself on the sacredness of private property, was obliged, in view of the conditions in Ireland, to take away from the owners of those landed estates that which up to that time had always been considered the first rule of the English constitution. We could not have done it under the American Constitution, because it is a written constitution. I am only citing that to show the difficulties that there are in it that are not disposed of by reasoning with reference to private property and the assertion of rights in the courts. The only reason why we are trying to get these lands is because we think that if we get control of them it may be easier for us to dispose of them than for those gentlemen who now hold them. On the one side is the advantage which we think will be gained by getting these lands into the hands of the government and the possibly greater power which the government will have in dealing with these tenants and adjusting a compromise with them. That is one advantage. On the other hand, there is the great load of debt that will be put on the entire Archipelago; and the question which we have to decide for the government is, when the size of that debt would be so great as to outweigh the advantage. We have the whole people of the islands as our constituents with reference to that debt. Now, Señor Gutierrez is sure that we are going to make a profitable transaction out of it. I wish I could think so.

Señor GUTIERREZ. You have with a great deal of talent and very ingeniously taken up the cause of the tenants and defended that cause as a very brilliant and able lawyer, but, notwithstanding this, I recognize the fact that in your inner conscience you know you are going to make a good thing out of those lands. As far as I am personally concerned, I know I could sell my lands to the tenants to-day at a greater profit than to you.

Governor TAFT. I would vote, as a member of the Commission, to take out a million dollars gold from the treasury to have those lands transferred from their present owners to the tenants. In other words, I would be willing to lose that amount, and think that our transaction was a very profitable one so far as the politics and safety of this country is concerned.

Señor GUTIERREZ. Speaking for my own haciendas, I know that I can more profitably dispose of all the land to the tenants than to the government. I have disposed of some of it to the tenants.

Governor TAFT. I wish you could dispose of all of it. I do not want the land if you can get it into the hands of the tenants.

Señor GUTIERREZ. I have already effected sales at a larger price than I have asked the government, and the very minute that the tenants knew that the government was out of the business altogether they would be sure to buy from me and give me a better price than I ask from the government.

Governor TAFT. If the government can not buy at a reasonable price, then we will see which is the more profitable. My impression is that if we were to break it off now and let it run for two years you gentlemen would be in begging us to take it.

Señor GUTIERREZ. The purpose of my company always was to exploit the property, not to sell. We did not buy for the purpose of selling, but for the purpose of making money out of it, and working the property at the same time.

Governor TAFT. I do not think that if we let this thing go for two years and you make your efforts the government would be very anxious to buy when you come again, for the result of your two years' labor is going to be a great deal of trouble for the government. I know that.

Mr. MCGREGOR. I do not think the difficulty will be so great as you estimate for the companies to manage the property when the people once know that the government recognizes our rights. The people of Imus have told me all along for the last two years that as soon as I gave them some assurance that the government recognized us as the proper people they would pay their rents. I asked General Wright for a letter telling these people that our title was good, but he said he could not do so.

Governor TAFT. It is no part of the executive department in the government to show to whom land belongs. I have expressed publicly, and I have not hesitated to say both before the Congressional committee and in a report that I made to the Secretary of War, that your titles were probably the best in the islands. That is a matter of opinion on my part. But I can not give effect to that by telling the people what they must do, for the reason that the question of title has to be settled in the courts if it is disputed.

Mr. MCGREGOR. My own judgment is that the judges of the courts will uphold those titles.

Governor TAFT. I am not disputing the title in this transaction at all, and do not intend to; but it is not for the executive part of the government to say that this title is good and that is bad, because it is not a court. It is only the executive, and it enforces the decrees of the courts. If you bring a decree of the court that you are entitled to possession, I will put you in possession. It is my duty to do that; I am the executive officer, charged with the duty of enforcing that decree. That is the difficulty of the division between the executive and the judicial powers of the government, but it exists.

Mr. MCGREGOR. Now that the judges will know your own opinion and the opinion of the Commission, I have not the slightest doubt that they will give a decree in our favor.

Governor TAFT. They ought not to be governed by my opinion. I am not a judge; I am only the executive officer, and my opinion is no better than that of any other lawyer. Of course I have not investigated the question of the validity of the titles. I am not sufficiently versed in the civil law to justify my passing on the question, but when I am called upon as an executive officer to report to my superior, then I have the right to express an opinion.

Mr. MCGREGOR. The people of Imus have always said as soon as they saw that we were the right people they would pay their rent. I do not think there will be any difficulty when the people thoroughly understand that they have no legal right.

Governor TAFT. I can not conscientiously load the government of the Philippines with a very heavy debt when I do not think the land, as it stands to-day, under the circumstances, is worth the amount. It is a question of balancing advantages to the government of the Philippines—that is all. The ownership of the land, the price, is only incidentally important in determining what I would be justified in paying.

Adjourned until March 18, 1903.

Continued from March 11, 1903, sixth session.

MALACANAN PALACE, Manila, March 18, 1903.

#### TESTIMONY OF MATHIAS GONZALES.

Governor TAFT. Where do you live?

Señor GONZALES. In Bautista, in Pangasinan.

Governor TAFT. What is your father's name?

Señor GONZALES. Francisco Gonzales.

Governor TAFT. Is it he who owns a large estate in Pangasinan and Nueva Ecija?

Señor GONZALES. Yes, sir; and partly in Tarlac also.

Governor TAFT. How large an estate is that?

Señor GONZALES. Thirty-two thousand hectares.

Governor TAFT. Have you attended at all to your father's affairs?

Señor GONZALES. I am at present the manager of the estate.

Governor TAFT. How long have you been engaged in that work?

Señor GONZALES. Before the revolution I took full charge of the management of the estate, but before that time I had a great deal of knowledge concerning it, owing to my associations with it.

Governor TAFT. What is raised on the estate?

Señor GONZALES. Rice or palay.

Governor TAFT. Is the land irrigated?

Señor GONZALES. The majority of the land is irrigated.

Archbishop GUIDI. Is it natural or artificial?

Señor GONZALES. Natural.

Governor TAFT. Do you use dams?

Señor GONZALES. In parts of the estate we do.

Governor TAFT. Is there first-class superior land in this 32,000 hectares?

Señor GONZALES. We have a great deal of first-class land.

Governor TAFT. What does the land produce per year per hectare?

Señor GONZALES. From 90 to 100 cavanese per hectare.

Governor TAFT. Do you know, generally, the value of rice land of the first class, as described by you, in the provinces of Pangasinan, Tarlac, Pampanga, and Bulacan?

Señor GONZALES. Yes, sir; the maximum price in Pangasinan and Tarlac per hectare for first class superior lands is 200 pesos a hectare.

Archbishop GUIDI. Do you mean to say that 100 cavanese per hectare is the maximum?

Señor GONZALES. Some of the lands might produce as much as 20 cavanese more per hectare.

Archbishop GUIDI. You should have mentioned the fact that you did not refer to those lands that were exceptionally productive.

Governor TAFT. When you mention from 90 to 100 cavanese, is that the method of classifying superior first-class lands?

Señor GONZALES. Yes, sir.

Governor TAFT. You have doubtless hectares that will produce more than 100 cavanese, but I am speaking now of an average which permits a classification.

Señor GONZALES. I so understood you when I answered.

Governor TAFT. What is the price of the same kind of land in Pampanga and Bulacan?

Señor GONZALES. In Bulacan the price of such lands is higher than in the other provinces. When close to a market and having an abundance of water for irrigation purposes the price may go as high as 300 pesos per hectare.

Archbishop GUIDI. Do you refer to the Mexican peso at its actual present market value?

Señor GONZALES. Yes, sir.

Archbishop GUIDI. Would the price of the lands have been the same several years ago when the value of the Mexican peso was different?

Señor GONZALES. The price of the land several years ago was less than it is to-day; that is, about 250 pesos where it is to-day 300 pesos. The exchange value between silver and gold does not influence the price of land very much in the provinces, nor does the loss of cattle, even, affect the price of the land very much. What most affects its price is the demand for it and the lack of capital.

Governor TAFT. How much do you or your father get of the gross products of the land as rental?

Señor GONZALES. On first-class land, 10 per cent of the gross product; on second-class land, 8 per cent, and third-class land, 5 per cent.

Governor TAFT. Is that a fair statement of what smaller landowners would get from their tenants?

Señor GONZALES. No, sir; the net profit which they get is from 12 to 14 per cent of the products.

Governor TAFT. Is it a custom to make contracts for a percentage of the gross product?

Señor GONZALES. Yes, sir; also. In such cases the landlord gets 10 per cent.

Governor TAFT. But I am speaking now of the smaller landowners.

Señor GONZALES. In such cases about 18 per cent of the gross product.

Governor TAFT. The reason why you and your father are content with 10 per cent is, if I understood you the other day, that your tenants have some peculiar ideas.

Señor GONZALES. Yes, sir; and in order to avoid difficulty with our tenants we have lowered the price that is due to us as rent.

Governor TAFT. Do you know anything about the price of land in Cavite?

Señor GONZALES. No, sir.

Señor GUTIERREZ. Señor Gonzales has simply testified what he believes to be the truth with regard to his own personal experience, and he has simply given his opin-

ions which have been based on his own personal experience. For my part I have already given my ideas on this subject and have shown that for the mere usufruct of the land as much as 200 pesos was paid per hectare.

Governor TAFT. In 1882?

Señor GUTIERREZ. Not only in 1882, but in 1892, 1896, and 1897—at any year when it was profitable to work the lands.

Governor TAFT. My judgment is that Señor Gonzales, since you are expressing your opinion about his evidence, is probably the best qualified witness to speak, because he covers four of five provinces. He is a large landowner himself, and he is familiar with the prices that prevail in those four provinces. I would like to ask Señor Gonzales if his property in Pangasinan is convenient to the market.

Señor GONZALES. Yes, sir.

Governor TAFT. In what way does it reach the market?

Señor GONZALES. We have at Bautista, which is a railway station, a large market, and we also have another market at Dagupan.

Governor TAFT. Does the growing of rice on land exhaust the land?

Señor GONZALES. Yes, sir.

Governor TAFT. Is the land in Pangasinan and Tarlac less worn by the cultivation of the rice which grows there than the land in Bulacan?

Señor GONZALES. Yes, sir; much less worn.

Governor TAFT. It is fresher land, is it?

Señor GONZALES. Yes, sir; it is more fertile.

Archbishop GUIDI. Do not these lands produce other crops, like sugar cane, aside from rice?

Señor GONZALES. They could produce it, but I have never engaged in the cultivation of sugar and therefore do not know whether it would be more profitable than rice culture.

Governor TAFT. Do you know whether it has been the custom in the Philippine Islands on any large estates to use fertilizer or manure to make up for the loss in the fertility of the soil by reason of many years of crops?

Señor GONZALES. I have no knowledge of any fertilizer being used in any province.

Governor TAFT. Therefore if land has been used for one hundred or two hundred years for rice lands, it is not so good as land which has been used for only twenty or thirty years, is it?

Señor GONZALES. There is a great difference in the production of such lands and the production of new lands.

Governor TAFT. Is there danger that it may change its classification as time goes on and become second-class land instead of first-class land?

Señor GONZALES. Yes, sir.

Archbishop GUIDI. I infer from what you have said that land which has been cultivated for a long time is not as good as land which has not been cultivated, if all other conditions are equal.

Señor GONZALES. That is undoubtedly so.

Archbishop GUIDI. In an hacienda which had lands that had been cultivated for a long time, and which yielded the same production as lands which had not been cultivated before which were capable of yielding an equal production, the latter should be preferred to the former?

Señor GONZALES. Undoubtedly the latter would have the preference over the former.

Friar MARTIN. How many hectares have you under cultivation in that estate of 32,000 hectares?

Señor GONZALES. About 11,000.

Friar MARTIN. Have they been cultivated for a long time—that is, those that are at present under cultivation?

Señor GONZALES. We have had more under cultivation formerly.

Friar MARTIN. I think Señor Gonzales must know that in the provinces of Pangasinan, Tarlac, and Nueva Ecija the population is very thin, and that in his haciendas there must be some difficulty in securing the requisite number of laborers or tenants to work the lands.

Señor GONZALES. Yes; that is true.

Friar MARTIN. You must also be aware of the fact that in Bulacan the conditions are exactly the opposite; there the population is very dense, and the very minute that one tenant leaves his piece of land there are four or five applicants for it. This does not happen in any of the other provinces mentioned, and therefore the land is in much greater demand in Bulacan than in the others.

Señor GONZALES. It is true that the population is denser and that those conditions prevail in Bulacan, but at the present time the demand for lands is very meager, owing to the lack of money among the people.

Friar MARTIN. I did not refer to purchases of land, but to the fact that there were plenty of people there able to work the land.

Governor TAFT. Does the difference that you make between the price of land in Pangasinan and that in Bulacan arise from that cause? Have you not made allowance for that, and is not that the reason for the difference in price?

Señor GONZALES. Yes, sir.

Governor TAFT. Have you any interest, one way or the other, in the price of the land which we are considering the purchase of?

Señor GONZALES. The only interest that I take in this sale which is going on between the religious orders and the Government is simply the interest that the owner of an estate takes who wishes to also sell his estate in any transaction of this nature.

Governor TAFT. You would be willing to sell your estate, would you?

Señor GONZALES. Yes, sir; at the price which I have indicated.

TESTIMONY OF SEÑOR JOSÉ LUZURIAGA, MEMBER OF PHILIPPINE COMMISSION.

Governor TAFT. Señor Luzuriaga, you are a member of the Philippine Commission?

Señor LUZURIAGA. Yes, sir.

Governor TAFT. You are a citizen of the province of Occidental Negros?

Señor LUZURIAGA. Yes, sir; of Bacolod, the capital.

Governor TAFT. You have lived in Occidental Negros, as I understand it, all your life?

Señor LUZURIAGA. Yes, sir.

Governor TAFT. Do you own land in Negros?

Señor LUZURIAGA. Yes, sir; I am the owner of three estates which are devoted principally to the cultivation of sugar cane and also rice.

Governor TAFT. Are you familiar with the prices of sugar land per hectare in Occidental Negros?

Señor LUZURIAGA. Yes, sir; I can testify on that matter.

Governor TAFT. How far from the sugar market is land in Negros?

Señor LUZURIAGA. The local markets for the sugar grown on the estates in Occidental Negros are situated on the coast of that province. They are Silay, Saravia, Bacolod, Talisay, San Enrique, Bago, and Pontevedra, and on the southern coast Ilog, all of which are maritime ports; but from these local markets the sugar is shipped to the central market, which is situated in the town of Iloilo.

Governor TAFT. Is it the habit of the vessels which carry the sugar to beach—come right up on the shore—and take the sugar from the estate directly to Iloilo?

Señor LUZURIAGA. In some cases the lorchas are able to come right up to the estate, but as a general rule the sugar is shipped from the coast itself, where the boats come right up to the coast and are loaded there and take the sugar to Iloilo.

Governor TAFT. How much is the ordinary gross product from a hectare of first-class sugar land?

Señor LUZURIAGA. That depends upon the class of lands. Sugar lands are classified into first, second, and third class lands. The product of first-class lands—that is, of the superior lands—is 80 piculs per hectare. But it must be borne in mind that that is the product of a good year. It will not produce that in ordinary years.

Governor TAFT. I would like to ask you generally as to the classification of land. Do they classify land according to the production in the good years, when the conditions are all favorable, or according to the average through favorable and unfavorable years?

Señor LUZURIAGA. As a general rule the classification is made on the basis of five years. It is calculated that in those five years one crop will be an extraordinarily good crop, two years will be ordinary crops, and two years bad crops.

Governor TAFT. When you say first-class land will produce 80 piculs a year, do you mean in a good year?

Señor LUZURIAGA. Yes; I mean in a good year. The two years of average crops would produce about 60 piculs of sugar, and the two bad years I calculate would produce about 25 piculs; that is, on an average.

Archbishop GUIDI. Is it the custom to renew the seeding of the sugar cane every year?

Señor LUZURIAGA. In my estates I have always been accustomed to do so, but in certain parts of Negros, around Isabela for instance, they do not renew the stalks for three years.

Archbishop GUIDI. Is this land not worth a great deal more?

Señor LUZURIAGA. It was owing to the fact that it was not so expensive to cultivate.

Governor TAFT. How much is sugar land worth to-day that produces 80 piculs in a good year?

Señor LUZURIAGA. That also depends on the quality of the sugar. There are four classes of sugar raised in the island of Negros—first, second, and third class and the common or ordinary. At the present time they are getting an extraordinarily good price for the sugar. Number 1 sugar is worth in Iloilo as much as \$6 a picul. There is a difference of 3 reals between No. 1 and No. 2 sugar, and from No. 2 to No. 3 of 2 reals.

Archbishop GUIDI. I understood you to say that this was an abnormal price paid this year, but from my understanding of the matter, which I have based upon a reading of the newspapers, the reduction of the Dingley tariff will have such an effect on the Philippines with regard to sugar culture that the price of sugar will go still higher.

Señor LUZURIAGA. The opening of the United States market is only one factor in the situation. The price is governed more by supply and demand; it depends altogether on the production of beet sugar in the United States and other places, and the production of cane sugar in Java, Cuba, and other countries.

Archbishop GUIDI. The sugar planters of the Philippines would have this advantage, that they could export their sugar to the United States market without paying any duties, and it would undoubtedly have the effect of raising the value of sugar land in the Philippines.

Governor TAFT. I want to speed the day when sugar can go from these islands into the United States, but the difficulty is that Congress has adjourned without passing such a law, and the reduction of 25 per cent on the Dingley law has made no appreciable difference. The prospect of further reducing the Dingley tariff 50 per cent, so the merchants informed me the other day, had the effect of increasing the price of sugar, but with the failure to reduce the tariff the price of sugar, I presume, has fallen.

Archbishop GUIDI. But the fact that Congress has not denied that reduction in the tariff, but simply postponed action upon it, gives me to understand that there is a probability that Congress will in the future grant this reduction. At any rate, it is more reasonable to believe that the reduction will be granted than that it will not be granted.

Governor TAFT. I sincerely concur in that. I believe that Congress will do it at the next session. I shall be very much disappointed if it does not reduce the duties on sugar and tobacco from the Philippines. But this is a little aside from the discussion. I wanted to get at the price of land in the Philippines at the present high price of sugar.

Archbishop GUIDI. The point I wish to make is this: Señor Luzuriaga has said that this was an abnormal and extraordinary price for sugar this year. This extraordinary and abnormal price will in the future be an ordinary price.

Governor TAFT. What is the difference between the price of sugar in Negros and the price in Iloilo?

Señor LUZURIAGA. Fifty cents.

Governor TAFT. So that the price is \$5.50 a picul on the land where it is produced?

Señor LUZURIAGA. That was the price in the months of January and February, but now it has lowered a little. At present we can get only \$4.60 for No. 1 sugar on the hacienda.

Governor TAFT. Let us take it in round figures, \$5 a picul in Negros. Would that mean that a hectare would produce 400 pesos a hectare value of the gross product?

Señor LUZURIAGA. Yes, sir.

Governor TAFT. What is that land which makes a gross product of 400 pesos a year in good years worth, as land is sold in Negros, per hectare?

Señor LUZURIAGA. Owing to a very special condition of things down there, that land which produces 400 pesos a year per hectare is to-day worth not one-half of that sum. That is due to the special circumstances down there and the lack of money. It simply involves the principle of supply and demand.

Governor TAFT. Do you know whether there is any greater lack of money in Cavite than in Negros?

Señor LUZURIAGA. I understand there is a great scarcity of money in Cavite province, so much so that I have been given to understand that one-half of the inhabitants there are engaged in robbing the other half. The lack of money is very much felt in Occidental Negros, and it has had this effect on sugar cultivation, that one-fifth of the land is now devoted to sugar culture that has been devoted two years before.

Archbishop GUIDI. I take it that the present conditions that prevail in the islands are altogether abnormal, and I do not think we can base any argument on these abnormal conditions, because there may be a change any day. Perhaps to-morrow

things may regulate themselves, and it is impossible to make any calculations on such an abnormal situation.

Señor LUZURIAGA. The trouble is that we have been living under these abnormal conditions four or five years and we are within them yet.

Governor TAFT. What, as a rule, is the price of first-class land in Negros to-day, per hectare?

Señor LUZURIAGA. As a rule, from 100 to 150 Mexican pesos per hectare for first-class land.

Archbishop GUIDI. If these are the prices paid in these abnormal times, what was the land worth during normal times?

Señor LUZURIAGA. About 100 pesos.

Archbishop GUIDI. Do you refer to the land here? Several witnesses have testified that the land was worth 200 pesos.

Señor LUZURIAGA. My remarks applied to the island of Negros. I know a great many estates that are now advertised for sale in Negros. They are simply given away almost.

Governor TAFT. Are there some sold there? Do you judge from the prices actually brought?

Señor LUZURIAGA. Yes, sir.

Governor TAFT. Is your estimate based on that?

Señor LUZURIAGA. Yes, sir; you can search the records down there and find my statements to be based on sales actually made.

Governor TAFT. And I understand that for the purposes of growing sugar Negros is just as convenient to the sugar market as Cavite—or is that so?

Señor LUZURIAGA. Yes, sir; that is true with regard to the markets, and I doubt whether there are any lands in Cavite that are as fertile and as good for sugar cultivation as in Negros.

Governor TAFT. How is it with reference to Pampanga?

Señor LUZURIAGA. In Pampanga there are no lands that are equal in fertility or in productivity to those in Negros. I have seen some of the land in Pampanga.

Governor TAFT. Is Iloilo as convenient to Negros as Manila to Pampanga?

Señor LUZURIAGA. Yes, sir; the market of Iloilo is only about three hours away.

Governor TAFT. Is the expense of raising sugar, in proportion to the value of the product, greater or less than that of raising rice?

Señor LUZURIAGA. Proportionately, the expense of cultivating sugar cane is much greater than cultivating palay.

Governor TAFT. What is the comparative expense of the two?

Señor LUZURIAGA. In good times in Negros we could produce 1 picul of sugar at an expense of 3 pesos, Mexican. Now the expenses are very much greater, owing to the fact that the locusts have appeared down there, the cattle have all died, and the cultivation has to be done entirely by hand. The price of labor has also risen.

Governor TAFT. What do you calculate it is now?

Señor LUZURIAGA. All expenses could be covered I think, approximately, by 4 pesos; that is, including all expense of placing it in the market.

Señor GUTIERREZ. I can not agree with Señor Luzuriaga with regard to his statement that formerly the cost of raising sugar was 3 pesos per picul.

Señor LUZURIAGA. I refer to the time immediately before the outbreak of the revolution, not to twenty or thirty years back, when the price of labor was so very much cheaper than it is now.

Señor GUTIERREZ. I do not think that the expense of raising 1 picul of sugar could ever have exceeded from \$2 to \$2.25, Mexican, and I, myself, who have had experience as a sugar planter, have never exceeded this sum. Furthermore, there was a great difference between the cost of raising sugar between a native and a foreign planter. The native planter was able to either hire his labor at a much cheaper price than the foreign planter or else he worked his land on shares, and working on shares is a very much cheaper method than working it by day labor.

#### TESTIMONY OF MARIANO BUNZALAN.

Governor TAFT. What is your name and where do you live.

Señor MARIANO BUNZALAN. My name is Mariano Bunzalan. I live at Rosario, Cavite.

Governor TAFT. Have you lived at Rosario most of your life?

Señor BUNZALAN. Yes, sir.

Governor TAFT. Are you a farmer?

Señor BUNZALAN. Yes, sir; I am an owner of agricultural lands.

Governor TAFT. Is Rosario on the hacienda of San Francisco de Malabon?

Señor BUNZALAN. Yes, sir.

Governor TAFT. Are you familiar with the estate of San Francisco de Malabon?

Señor BUNZALAN. Yes, sir; I have more or less intimate knowledge of the land.

Governor TAFT. Do you know of first-class, superior land in that hacienda?

Señor BUNZALAN. I have a more or less intimate knowledge of the first-class lands on that estate. I am a landowner on that estate.

Governor TAFT. How many cavanese a year will first-class land on the estate of San Francisco de Malabon produce?

Señor BUNZALAN. The lands belonging to the pueblo of Rosario produce per hectare of first-class land about 50 cavanese.

Governor TAFT. But in good years what do they produce?

Señor BUNZALAN. That is what they produce in good years. It is because the land on that estate is pretty well worn-out.

Governor TAFT. What is that land worth which you describe as first-class land?

Señor BUNZALAN. If we take into consideration the present conditions, I would calculate that the lands were worth at present about 100 pesos a hectare.

Governor TAFT. Is there land which produces in Cavite from 90 to 100 cavanese a hectare in good times?

Señor BUNZALAN. I do not know of any.

Governor TAFT. What is the most that you know of land producing in good times? I do not mean when land is not planted at all, but I mean in good times.

Señor BUNZALAN. A long time ago, when I was 29 or 30 years old (I am now 65 years old), I have known of lands to produce 60 or 70 cavanese of palay, but I can bet anybody that those same lands will not produce to-day over 50 cavanese a year.

Governor TAFT. Does the land you speak of produce two crops a year?

Señor BUNZALAN. When I say that lands have produced 50 cavanese, I refer to lands which produce one crop a year.

Governor TAFT. But is there land there that is so irrigated that it can produce two crops a year?

Señor BUNZALAN. Yes, sir. There are lands that can be cultivated so as to produce two crops a year, but they do not cultivate them in that manner. By cultivating two crops they do not gain anything in production; it is more expensive to them.

Governor TAFT. If they cultivate two crops they get more gross crops than when they produce one, do they not?

Señor BUNZALAN. It was formerly so, but not now. At present farmers prefer to cultivate only one crop a year.

Governor TAFT. That is because he doubles his expenses, isn't it?

Señor BUNZALAN. Yes, sir.

Governor TAFT. Suppose he did raise from that land two crops a year, what would be the gross number of cavanese?

Señor BUNZALAN. The production would be about the same, and perhaps less. For instance, if they cultivate lands so as to get two crops a year, the first crop will probably yield 30 cavanese and the second crop would yield them enough perhaps to make up as much as they would get from one crop alone; and the farmers knowing this, and knowing how much more expensive it is, only plant one crop a year.

Governor TAFT. Do they plant it any differently when they plant for two crops than for only one?

Señor BUNZALAN. The first is a transplantation of the plants, and the second crop is simply the sowing of the seed.

Archbishop GUIDI. You have testified that these lands produce 50 cavanese a hectare in one crop a year. Do you mean that they produce that at the present time?

Señor BUNZALAN. No; in good years; that is the maximum in good years.

Archbishop GUIDI. What does it produce at the present time?

Señor BUNZALAN. This year it produced practically nothing, because we have had the locusts down there and there has been a lack of water.

Archbishop GUIDI. It is useless to examine this witness further.

Governor TAFT. The first crop, whether it be the only crop or the crop of two crops in a year, is always planted, is it not?

Señor BUNZALAN. For one cultivation only the plants are transplanted, and for two cultivations for the first lot the plants are transplanted, but for the second crop the seed is simply sown on the ground.

Governor TAFT. I do not understand why the first crop, which is planted by transplanted plants, produces any less whether you add the second crop or not.

Señor BUNZALAN. We will suppose that I gathered two crops last year. If this year I attempt to do the same thing the production will be very much less than if I had only gathered one crop the year before, because the land loses some of its fertility in being forced to grow two crops in one year, so this year my production would be less from the plants which I transplanted for the first crop.

Governor TAFT. Do you mean, then, that you do not plant two crops in one year because two crops exhaust the soil too much?

Señor BUNZALAN. Yes, sir.

Governor TAFT. I understood you to say that in the town of Rosario, in that part of the hacienda of San Francisco de Malabon which is included in Rosario, you know of no land that produces to-day or will produce in good years to-day to exceed 50 cavares a year?

Señor BUNZALAN. Yes, sir; that is what I stated.

Governor TAFT. How much do you cultivate yourself?

Señor BUNZALAN. I have a piece of ground there which, according to the measurement of the administrator of the estate, amounts to 3 cavares and 20 gantas of land, and from this land I have gathered 120 cavares and at the very most 130. Very rarely have I gathered more than 130 from this land.

Governor TAFT. How is your land classified; is it first, second, or third class land?

Señor BUNZALAN. The administrator classifies it as first-class land.

Governor TAFT. What is the custom in Cavite as to what the owner of the land gets, what the lessee of the land gets, and what the workman who works on shares gets out of the gross product; what is the annual rental?

Señor BUNZALAN. For the 3 cavares and 20 gantas in my possession I paid 37 cavares of rice.

Governor TAFT. That is about 10 per cent.

Señor BUNZALAN. Out of the gross product from the land of 120 or 125 cavares or rice I paid to the administrator of the estate 37 cavares as rental.

Archbishop GUIDI. What were the expenses that were deducted after that?

Señor BUNZALAN. All expenses, including the seeding and gathering of the crop, amounted to from 36 to 38 pesos.

Archbishop GUIDI. There we have 37 cavares that you have given for rental, 36 pesos that have been deducted for expenses, and then what was left was to be divided between you and the worker of the land; so that what was left to you must have been very insignificant. How much was left to you?

Señor BUNZALAN. It was sometimes less than what I had paid for rental.

Governor TAFT. The rental of the owner was determined in this manner, wasn't it—that he paid 10 cavares for every 1 cavan used for seed?

Señor BUNZALAN. As a general rule it is about 10 cavares, though I have seen contracts made for 11 cavares; that is, first-class land. For second-class land less, sometimes 8 cavares. For my land I paid for 3 cavares and 18 gantas 37 cavares of palay.

Governor TAFT. But the rental was determined by the cavares used for seed, was it?

Señor BUNZALAN. The amount of seed that was given to the tenant had reference not only to the seed itself but to the amount of ground which the seed would plant.

Governor TAFT. A cavan of seed would ordinarily plant 1 hectare of land, so that they have come to use cavan as equivalent to a hectare. In other words, cavan means to them an area of land.

Friar MARTIN. How many hectares of land do you own there?

Señor BUNZALAN. None.

Archbishop GUIDI. How is it that you claim possession over this land?

Señor BUNZALAN. I had possession as lessee of the land, and because I paid my annual stipend.

Señor GUTIERREZ. I would like to call attention to the great contradiction that there is between the testimony of this witness and the testimony of the expert of the Government who has testified here regarding the value of the lands.

#### TESTIMONY OF DOMINGO COLMENER.

Governor TAFT. What is your name and where do live?

Señor COLMENER. Domingo Colmener. I live at San Francisco de Malabon, which is within the hacienda of San Francisco de Malabon.

Governor TAFT. Are you one of the tenants of the estate?

Señor COLMENER. Yes, sir.

Governor TAFT. How much land did you have?

Señor COLMENER. About 23 cavares, more or less. We measure land down there by cavares, not by hectare.

Governor TAFT. Is that first or second class land?

Señor COLMENER. Of the land which I own there is some which is irrigated and some which is not irrigated.

Governor TAFT. Do they not divide it into first, second, and third class land?

Señor COLMENER. I do not know whether the hacienda itself has classified the land or not, but I am quite sure that I paid a bulk annual rental of 300 cavanos in rice. Besides this I also paid in money about 70 pesos Mexican.

Governor TAFT. How much per hectare did your best land produce per cavan in a good year?

Señor COLMENER. Fifty cavanos.

Governor TAFT. Did you have two crops or one?

Señor COLMENER. My land would only produce one crop a year, but there was land on the estate that would produce two crops.

Governor TAFT. How much would two crops produce a year?

Señor COLMENER. When land yielded two crops a year the gross product was 80 cavanos a year for first-class land. I believe that is the maximum.

Governor TAFT. Had you any of that in your estate?

Señor COLMENER. I can not recollect that I ever gathered two crops from any of my land. The reason why many of the tenants were unable to gather two crops from their land was owing to the fact that a certain municipal official, who at that time was called a justicio, would allot certain pieces of ground which were to be cultivated twice. This was done in order not to create a scarcity of water, because during the dry season, they had to be very careful with their water so as not to create a scarcity.

Governor TAFT. What is the price of land in Cavite that would produce 80 cavanos per hectare in two crops?

Señor COLMENER. I believe as high as 100 pesos Mexican.

#### TESTIMONY OF JOSÉ DEL ROSARIO.

Governor TAFT. What is your name?

Señor ROSARIO. José del Rosario.

Governor TAFT. Where do you live?

Señor ROSARIO. At Santa Cruz de Malabon.

Governor TAFT. Were you a tenant of the estate of Santa Cruz de Malabon?

Señor ROSARIO. No, sir.

Governor TAFT. Did you pay rent to the administrator of the estate of Santa Cruz de Malabon?

Señor ROSARIO. I do not know that I paid any rent for that land, but I do know that a certain sum was exacted of me by the administrator.

Governor TAFT. What sum was exacted from you? We are not here to examine titles.

Señor ROSARIO. There is some land for which 8 cavanos was paid for each cavan of land, some for which only 4 cavanos was paid for each cavan of land.

Governor TAFT. How much of that did you cultivate?

Señor ROSARIO. Eight and one-half cavanos.

Governor TAFT. What did you pay to the administrator for those 8 cavanos?

Señor ROSARIO. Sixty-six cavanos.

Governor TAFT. Did you have first and second class land?

Señor ROSARIO. Yes, sir.

Governor TAFT. How much was produced on the first-class land?

Señor ROSARIO. In the very best of times and the very best of crops, 50 cavanos.

Governor TAFT. How was that divided?

Señor ROSARIO. After deducting the expenses of the cultivation of land and paying the part which was paid to the administrator of the estate the balance was divided between the lessee of the ground and the workmen.

Governor TAFT. How much out of 50 cavanos did that bring to you?

Señor ROSARIO. From 17 to 18 cavanos per cavan.

Archbishop GUIDI. How many crops a year?

Señor ROSARIO. One a year.

Archbishop GUIDI. Have you never had two crops a year?

Señor ROSARIO. Not on my land.

Governor TAFT. Was your land irrigated?

Señor ROSARIO. Yes, sir.

Governor TAFT. How was the question whether they had two crops regulated?

Señor ROSARIO. I do not know whether there was any regulation as to raising two crops a year, as I myself have never raised two crops.

Governor TAFT. Why?

Señor ROSARIO. Because I did not wish to tire my stock too much.

Governor TAFT. Was there a justicio on the estate?

Señor ROSARIO. Yes, sir.

Governor TAFT. Did he determine whether lands should have two crops or one?  
 Señor ROSARIO. Yes, sir.

Archbishop GUIDI. Do you know whether this official called justicio or overseer had the power to prevent any of the tenants from cultivating their grounds twice if they desired to do so and if they had the requisite conditions to cultivate it twice, or whether it was not the fact that the only attribute of this official was the withholding or granting of water.

Señor ROSARIO. I do not know.

Señor LUZURIAGA. What powers did this official exercise?

Señor ROSARIO. The only powers he exercised were those connected with the distribution of water for irrigation purposes.

Governor TAFT. A second crop, I suppose, would be impossible if he withheld the water, would it not?

Archbishop GUIDI. This official, who was an overseer on the plantation, had simply the duty of looking after the distribution of water on the estate for irrigation purposes, and it is not to be supposed that this official would withhold water from one tenant in order to favor another, because that would neither be in accordance with equity nor justice. This was a custom that was followed not only in the Philippines but also in Italy. Wherever they have irrigation they have an official appointed whose duty it is to see that the water is equitably distributed among the agriculturists.

Governor TAFT. But his decision as to the amount of water that each shall have out of the total amount necessarily controls whether they shall have a second crop or not. The judge of the water decides how the water is to be distributed fairly.

Señor GUTIERREZ. That is where we are in error.

Governor TAFT. What does he do, then?

Señor GUTIERREZ. It is unnecessary for me to state particularly what the attributes or powers of this overseer might have been during that time. He was simply one of a great many municipal officials that existed at that time. This man was a municipal official and not an official of the estate, and his duties were simply to settle disputes between tenants with regard to the cultivation of land. But the distribution of water for irrigation purposes was altogether in the hands of the administrator of the estate. It was he who fixed the amount which could be irrigated, and it was generally done in turns, one tenant having a turn this year and another tenant next year, and so on.

Governor TAFT. Whether it was the overseer or not the man who distributed the water—and there must have been such a man in times when water was scarce—necessarily regulated whether the crop was to be doubled for one and not for another tenant. You say a man has the right to raise two crops, but he can not raise two crops unless he gets the water for a second crop. If there is not enough water somebody has got to lose.

Archbishop GUIDI. That question was settled in an equitable manner by the administrator.

Governor TAFT. What, in your opinion, is the value of first-class land in that part of the estate in which you live?

Señor ROSARIO. One hundred dollars Mexican per hectare.

Governor TAFT. Is that land that produces 50 cavanese a year?

Señor ROSARIO. Yes, sir.

Governor TAFT. Do you know of any land in Cavite that will produce more than 50 cavanese a year?

Señor ROSARIO. No, sir.

Señor GUTIERREZ. Are you the owner of any lands?

Señor ROSARIO. Yes, sir; I have land in Pampanga, in Cavite Viejo, and in my town.

Señor GUTIERREZ. Are you willing to sell your first-class land at 100 pesos?

Señor ROSARIO. Yes, sir.

Señor GUTIERREZ. How much did you pay for that land?

Señor ROSARIO. In Cavite I have some land for which I paid 25 pesos a hectare.

Señor GUTIERREZ. Is that land irrigated land?

Señor ROSARIO. No, sir.

Governor TAFT. Do you raise one crop a year from it?

Señor ROSARIO. Yes, sir.

Governor TAFT. How many cavanese do you get from that land in Cavite Viejo?

Señor ROSARIO. From 30 to 34 cavanese for each cavan of seed.

#### TESTIMONY OF SEÑOR SIRIAZO NAZARINO.

Governor TAFT. What is your name?

Señor NAZARINO. Siriazio Nazarino.

Governor TAFT. Where do you live?

Señor NAZARINO. In the pueblo of Naic, province of Cavite.

Governor TAFT. Are you presidente of Naic?

Señor NAZARINO. At present I am not.

Governor TAFT. Do you cultivate land in Naic?

Señor NAZARINO. I own a certain piece of property in Naic.

Governor TAFT. How much?

Señor NAZARINO. About 19 hectares.

Governor TAFT. Is that a part of the hacienda of Naic?

Señor NAZARINO. Formerly it was called the hacienda of Naic.

Governor TAFT. Did you cultivate it at that time?

Señor NAZARINO. Yes, sir.

Governor TAFT. How much did you pay to the administrator of the estate in former times?

Señor NAZARINO. I paid 10½ cavanese for each cavan of seed to the administrator. I paid 1 cavan extra for the church, and I paid half of a cavan for rats.

Governor TAFT. Did they collect half a cavan to pay for the loss by rats?

Señor NAZARINO. They told me it was for the rats; possibly it was to cover that loss. That was the general custom.

Governor TAFT. Was your land first or second class land?

Señor NAZARINO. First-class land.

Governor TAFT. How much per cavan was the gross product.

Señor NAZARINO. Generally when we had what we consider a good crop it would amount to 40 to 50 cavanese per cavan.

Governor TAFT. How many crops a year did you produce?

Señor NAZARINO. Every two years we would get three crops.

Governor TAFT. How many cavanese would be produced in each crop of those three crops?

Señor NAZARINO. The crop to which I first referred of 50 cavanese was what we termed a principal or a fine crop. What we termed an extra crop was one of about 30 cavanese.

Governor TAFT. That would make 130 cavanese in two years from one hectare, or 65 cavanese a year?

Señor NAZARINO. In two years it would be over 100 cavanese of seed. Half of the land was left uncultivated for half of the time, because land which was cultivated two or three successive crops did not yield as much as if it had been allowed to be cultivated for a certain time.

Governor TAFT. What was land worth on which could be raised three crops in two years of over 100 cavanese?

Señor NAZARINO. \$100 to \$125 Mexican per hectare. I forgot to state that aside from the payments which we had to make on the gross product of the first crop we were obliged to make another payment on the second crop, one-half of the value of the first payment. When we raised two crops, on the first crop we paid about 11 cavanese for each cavan; on the second crop we would have to pay one-half of that.

Señor GUTIERREZ. I would like to ask the witness if it is true that he paid for each cavan of seed 11½ cavanese of palay, besides the money payment that he made.

Señor NAZARINO. Yes, sir.

Señor GUTIERREZ. You have valued these lands at \$100 to \$125 Mexican a hectare; on what grounds have you placed this valuation? Is it upon sales which have actually taken place at Naic?

Señor NAZARINO. Yes; upon sales that have taken place in the past.

Señor GUTIERREZ. I would like to state that since the eighteenth, or at the most the beginning of the nineteenth century, no sales of land were made in that estate of Naic until the year when the entire estate was sold to the present company that now owns it. For that reason the testimony of the witness is not correct. He has stated that he was a tenant of the estate up to a certain year, but now, that he is the owner of the lands, I would like to ask him of whom he bought those lands.

Señor NAZARINO. I have not said that I was ever a tenant; what I did say was that they exacted from us a certain rental at that time.

Señor GUTIERREZ. What were you then if you were not a tenant.

Señor NAZARINO. The friars used to call us tenants at that time but I know that those lands were bought by my forefathers.

Señor GUTIERREZ. I infer from your answer that you consider yourself the owner of those lands because you say your forefathers were owners of the land, and if they did not sell the land, you, as their heir, would be the present owner of the land.

Señor NAZARINO. Yes; I have inherited that from my forefathers.

Governor TAFT. They have been on the land for how long?

Señor NAZARINO. My father has told me that he and my grandfather were the first to cultivate that land,

Governor TAFT. Was it the habit in times past of tenants to sell to other tenants their right to occupy land?

Señor NAZARINO. I remember that there have been cases where tenants have sold their rights of tenantry to others.

Governor TAFT. Do you know what prices were paid in those times for those tenants' rights?

Señor NAZARINO. In cases of good land in such conveyances the price paid was 100 pesos; in some instances it was less.

Archbishop GUIDI. Was not that simply a conveyance of the usufruct of the land?

Señor NAZARINO. It was a conveyance rather of the possession of the land of whatever right the man selling the property had in that property.

Governor TAFT. And what he got was the right to enjoy the gross product of the land, less 11 cavanés which he had to pay for each cavan to the administrator?

Señor NAZARINO. Yes, sir; the purchaser of whatever right was transferred had to continue making the payment of 11 cavanés.

Señor GUTIERREZ. I have not yet been able to get the witness to answer my question whether he is the owner of that land or not.

Governor TAFT. Do you think it necessary for him to answer that?

Señor GUTIERREZ. Yes, sir.

Señor NAZARINO. I consider myself the owner of that property, being my father's heir. At the same time I do not attempt to deny the fact that during my father's time and my own time I paid that rental to which I referred, to the administrator of the estate.

Archbishop GUIDI. Have you a title deed?

Señor NAZARINO. No, sir.

Archbishop GUIDI. Had your father a title deed?

Señor NAZARINO. No; not that I know of.

Archbishop GUIDI. How, then, can you consider yourself the owner of that property if you have not title deeds or have not inherited title deeds? What your father has handed down to you is the usufruct of the land and not the ownership of the land.

Señor NAZARINO. In my father's time I might make so bold as to say that there were great obstacles in the way of a Filipino acquiring a title deed to land, and for that reason I have no title deed to the land. I would also like to say that there was also an assessment made on the lessees of the ground for the improvements on the estate, construction of roads and dams, etc.

Governor TAFT. How much was that assessment?

Señor NAZARINO. During my time—since the time that I arrived at the age of reason—I remember in the construction of one bridge on that estate they exacted from 6 gantas for each cavan of seed sown.

Señor GUTIERREZ. Where is that bridge and for what purpose was it constructed?

Señor NAZARINO. It is the bridge on the road from Naic to Santa Cruz.

Señor GUTIERREZ. Is it not used for the purpose of giving an outlet for their crops on the estate?

Señor NAZARINO. Yes, sir.

Adjourned until March 20.

Continued from March 18, 1903, seventh session.

MALACAÑAN PALACE, *Manila, March 20, 1903.*

#### TESTIMONY OF CAYETANO TOPACIO.

Governor TAFT. What is your name?

Señor TOPACIO. Cayetano Topacio.

Governor TAFT. Where do you live?

Señor TOPACIO. In the pueblo of Imus.

Governor TAFT. Do you cultivate land there?

Señor TOPACIO. Yes, sir.

Governor TAFT. How much?

Señor TOPACIO. About 8 hectares.

Governor TAFT. How long have you cultivated it?

Señor TOPACIO. I inherited it from my father. Since his death I have cultivated it. I do not remember the date.

Governor TAFT. Is it irrigated rice land?

Señor TOPACIO. Yes, sir.

Governor TAFT. Is it first, second, or third class land?

Señor TOPACIO. The greater part of these 8 hectares is considered as second-class land.

Governor TAFT. Is there any first-class land?

Señor TOPACIO. No, sir.

Governor TAFT. What is the canon of the land?

Señor TOPACIO. Do you mean lately? Because in former years at the beginning the canon was called a contribution for the support of the worship of Our Lady of El Pilar, who was the patron saint of the estate.

Governor TAFT. Who collected that?

Señor TOPACIO. The curate or parish priest.

Governor TAFT. Wasn't there an administrator of the hacienda?

Señor TOPACIO. Lately, since there was an administrator of the estate, the name of which was changed from the Del Pilar to the estate of San Juan there was an administrator.

Governor TAFT. How much did he collect?

Señor TOPACIO. There was a variation in what he collected. In the beginning it was simply a contribution which we made for the maintenance of the parish priest and for the worship of Our Lady of Pilar. This I got from hearsay only. After that the tribute was in palay, being 2 cavanés of palay, which was equivalent to \$1 Mexican, per cavan of land, which I understand is nearly a hectare of land.

Archbishop GUIDI. Who imposed this contribution?

Señor TOPACIO. According to my idea, I think that it was simply an agreement between the people and the parish priest.

Governor TAFT. Do you recollect whether there had been anybody there but an administrator to collect from the people who occupied land?

Señor TOPACIO. It was either the administrator or the parish priest.

Governor TAFT. What did you pay the administrator, whether he was a priest or a layman?

Señor TOPACIO. I paid 8 cavanés for each cavan of seed. Every three or four years the contracts or leases would be renewed, and upon such renewals the amount of canon was changed.

Governor TAFT. Did you, in addition to the canon, pay something to the curate?

Señor TOPACIO. No, sir.

Governor TAFT. Did you pay anything for rats?

Señor TOPACIO. No, sir.

Governor TAFT. How much will that second-class land that you are now cultivating produce in a year?

Señor TOPACIO. I have not yet explained what I paid for a canon lately. It went up as high as 15 and 20 cavanés for each cavan of seed.

Friar MARTIN. Can you show a receipt showing that you paid that amount of canon, or can you show a contract which will testify that that amount of canon was exacted from you?

Señor TOPACIO. I could not because I lost all my papers during the insurrection.

Governor TAFT. How much per hectare or cavan do you produce on those 8 hectares?

Señor TOPACIO. From 50 to 60 cavanés.

Governor TAFT. On second-class land?

Señor TOPACIO. Yes, sir; that is during normal times.

Governor TAFT. Do you plant two crops or one, or three crops in two years?

Señor TOPACIO. One crop a year.

Governor TAFT. Do you never plant two crops?

Señor TOPACIO. No; I have never planted two crops, because experience has demonstrated to us that if we plant two crops there is not only an additional expense, but the first crop will be a short crop.

Governor TAFT. So that you found it better to plant only one crop. What is that land worth?

Señor TOPACIO. As this is poor land, containing a good deal of lime, it is not worth more than 75 to 80 pesos a cavan or hectare.

Mr. MCGREGOR. In declaring your land for taxation purposes, at how much per hectare did you value it?

Señor TOPACIO. I have declared the land at an excessive price, with the object of covering all the needs of our municipal government.

Mr. MCGREGOR. How much did you put it at?

Señor TOPACIO. For the entire 8 cavanés of land it is between two and three thousand pesos; that is, all the improvements—house and everything. The house alone is worth 1,500 to 2,000 pesos.

Archbishop GUIDI. Why did you declare it at an excessive price?

Señor TOPACIO. It was in order that there might be enough taxes collected to maintain the municipality.

Governor TAFT. What kind of a house is on the land?

Señor TOPACIO. It is a house the foundations of which are of masonry and the main body of the house of lumber. It has a nipa roof.

Mr. MCGREGOR. At what do you value the land without the house?

Señor TOPACIO. I have declared it as uncultivated lands at 10 pesos a kinon, which is a little over 2 hectares.

Mr. MCGREGOR. Why?

Señor TOPACIO. Because all of the improvements that are on the ground I consider my own property.

Mr. MCGREGOR. I do not think he is right in valuing that as uncultivated land. Have you put any improvements besides your house on that land?

Señor TOPACIO. What I call improvements is the work that I have done in leveling off the land and marking it off in squares for rice culture—diking it.

Mr. MCGREGOR. Is your land artificially irrigated from water system?

Señor TOPACIO. It is irrigated by the water taken from the dams and canals.

Mr. MCGREGOR. Were you on the municipal board of assessors?

Señor TOPACIO. No, sir.

Governor TAFT. As I understand it, you make a report of a house worth 1,500 pesos. You have not declared it separately.

Señor TOPACIO. I made my declaration in this manner. I declared the land separately from the improvements, the land at so much and the improvements at so much.

Mr. MCGREGOR. Do you know the value of first-class irrigated land of the town of Imus?

Señor TOPACIO. First-class land, I should say, might be worth about 100 pesos a hectare. That is because even the most superior land in that neighborhood is not of as good quality, on account of being hard, as the land around the other pueblos of the province; but still I think that perhaps the price which I first put on it, from 75 to 80 pesos a hectare for first-class land, would be a better price for it per hectare on account of its inferiority to similar land around other pueblos.

Governor TAFT. But you said that this land of yours was worth from 60 to 75 pesos, didn't you?

Señor TOPACIO. From 50 to 60.

Governor TAFT. How much will that first-class land produce per hectare?

Señor TOPACIO. From 55 up to as high as 60 and 75 cavanos.

Governor TAFT. I do not see much difference between the product of your first-class and your second-class land.

Señor TOPACIO. That is because in that neighborhood the first-class land is really not first-class land; it is a very inferior first-class land.

Archbishop GUIDI. In speaking of first-class land, were you speaking of land of your own that you cultivated?

Señor TOPACIO. No; I was speaking of other people's land there.

Archbishop GUIDI. Is there much difference in the productivity of the first and second class land?

Señor TOPACIO. No; the difference is small.

Mr. MCGREGOR. How is it, if you put the value of first-class land at such a low price, that some of the people of Imus, in giving in their declarations to the provincial treasurer, have valued their land at \$150 gold a hectare?

Señor TOPACIO. This is explained by the reason that the residents of the town of Imus have agreed to put an exorbitant valuation on their lands for assessment purposes in order to raise enough money to run the municipality properly.

Mr. MCGREGOR. Some have put it even higher than \$150 gold.

Señor TOPACIO. I do not know that any residents have declared their lands at \$150 gold.

Mr. MCGREGOR. You probably know E. Bautista. He has 2,157 meters of first-class palay land which he has valued at \$150 gold.

Señor TOPACIO. No; I do not recollect him.

Mr. MCGREGOR. Do you know Mr. P. Cordona?

Señor TOPACIO. Yes, sir.

Mr. MCGREGOR. He has 20,905 meters of land valued at \$300 gold.

Señor TOPACIO. I do not understand this exorbitant declaration. I can understand that a man's patriotism may go up to a certain extent, but I can not imagine it going up that far.

Mr. MCGREGOR. I find some valuations here that I do not understand at all. There is one man has 3,340 meters of land and he values it at \$200 gold. The people in the office could not give me an explanation of it, but I think he has a dam on the

property and controls the water on it. Mr. Tjig has 3,340 meters at \$200 gold. Another man 960 meters at \$150 gold.

Governor TAFT. Did not the people of Imus seize the opportunity to make returns as to valuation of the land for the purpose of establishing title?

Señor TOPACIO. Perhaps that has been the consideration—that is, that they would be considered as owners of the land; but what the landowners of Imus did do was to get together and agree to put a high valuation on their lands in order that there might be enough taxes raised to run the municipality.

Mr. MCGREGOR. Is it a fact that you, Cayetano Topacio, were the administrator of the water works in the old days of the hacienda?

Señor TOPACIO. No, sir.

Mr. MCGREGOR. I was always told that he was.

Governor TAFT. You are now justice of the peace?

Señor TOPACIO. No, sir; I had charges preferred against me, but I was acquitted of the charges.

#### TESTIMONY OF GUILLERMO TIRONA.

Governor TAFT. What is your name?

Señor TIRONA. Guillermo Tirona.

Governor TAFT. Are you related to the secretary of the province?

Señor TIRONA. Yes, sir; his nephew.

Governor TAFT. Do you live in Imus?

Señor TIRONA. Yes, sir.

Governor TAFT. Do you occupy any land there, and cultivate it?

Señor TIRONA. Yes, sir.

Governor TAFT. How much?

Señor TIRONA. About 23 hectares in Imus, besides some lands at Desmarines.

Governor TAFT. How much at Desmarines?

Señor TIRONA. About 7 or 8 hectares.

Governor TAFT. When you were paying canon to the administrator, how much was it per hectare for the land that you own in Imus?

Señor TIRONA. I will begin by saying that the canon has changed a great deal. At first it was a very moderate one which I paid, but in recent years I paid a very excessive canon amounting to 22 cavanese per hectare. Aside from this I had to pay for the mango trees and the sugar cane.

Governor TAFT. How much did you pay for the mango trees?

Señor TIRONA. Twenty-five cents Mexican for each tree.

Governor TAFT. How much did you pay for the sugar cane?

Señor TIRONA. There was also a great variation in the amount that they charged upon sugar cane, but on sugar cane which would occupy an extent of territory equal to about 300 acres they charged 5 pesos. Still, in the year 1880 it was very much less.

Governor TAFT. How much of the land that you own and cultivate is rice land?

Señor TIRONA. Nearly all of the land is rice land; but along the edges of the land are planted mango trees and bamboos.

Archbishop GUIDI. Have you any receipts showing that you paid 22 cavanese for a hectare of land as canon, or can you show any document stating that that would be the amount of canon exacted from you?

Señor TIRONA. No, sir; I have no receipt. During the insurrection all those documents were lost.

Governor TAFT. How many cavanese of rice per hectare will the land that you own in Imus produce a year?

Señor TIRONA. In recent years, without taking into consideration the years when the crop was a total failure, the land would produce on an average about 40 cavanese per hectare, but formerly it used to produce a great deal more, as the land was more fertile.

Archbishop GUIDI. Explain why it is that this land has lost its fertility in a space of five years, when it had been cultivated for over two centuries and had produced good crops.

Señor TIRONA. Perhaps it was on account of the age of the land that it had lost its fertility.

Archbishop GUIDI. How can that be, if for two centuries it produced good crops and now it has lost its fertility in five years? At that rate, in ten years it will lose it altogether.

Señor TIRONA. Perhaps it was owing to other circumstances of the times.

Archbishop GUIDI. Perhaps you do not work it properly.

Governor TAFT. You say that in later times you paid 22 cavanese a hectare. What was the normal amount that you paid as a canon?

Señor TIRONA. About thirty-five years ago my fathers paid from 8 to 12 or 15 cavanés.

Archbishop GUIDI. Explain why it was that they paid such a very small canon in former years when the land, according to your own statement, produced a great deal more than at the present time, and why it was that they paid such a much larger canon at this time, when the land, according to your own statement, produced a great deal less.

Señor TIRONA. It was because they simply had to submit to orders. The man who had the authority simply ordered them to do something and they had to comply with those orders.

Archbishop GUIDI. Have you a receipt or any sort of a document showing that you either had paid that money or that canon was exacted from you?

Señor TIRONA. No. During the insurrection I lost all my papers and documents.

Archbishop GUIDI. Were all the houses burned during the insurrection?

Señor TIRONA. We were glad to get away with our own lives.

Friar MARTIN. Would you agree that the lists or the books of the company were correct with regard to the amount of canon that was paid? Would you take that as proof?

Señor TIRONA. I would, but these books or lists would contain the canon by kinons and balatas.

Friar MARTIN. In that case, if you agree that the books and the lists kept by the company were correct, then you would also have to agree that you have not told the truth here with regard to the amount of canon that was paid, and the governor would be satisfied that he had not told the truth. With regard to this, I myself am not a Recoleta nor am I interested in the order, but I know that I can produce those books of the company and show them.

Governor TAFT. How did they keep the books?

Mr. MCGREGOR. They had a duplicate receipt book; one was kept and the other was given to the man who paid.

Governor TAFT. What amount of money did it cost you to plant the seed in the ground, to gather the crop and garner it—the total expenses, including everything?

Señor TIRONA. I do not know. Most of the expenses were paid by the lessee of the ground, and I only had some of those expenses to pay myself, so I could not calculate what the entire expense would be from the time the seed was planted until the time the crop was garnered.

Friar MARTIN. Can you not recollect the amount of expenses that it cost you for cultivating the ground and gathering the crop?

Señor TIRONA. I spent 4 pesos a hectare for the seeding of the ground and from 75 cents to a peso for the harrowing of the ground. That would make on an average, perhaps, my share of the expenses as 5 pesos a hectare; but I do not count in this the cartage to the storehouse in the pueblo, and I have not been able to say yet what that will cost me. These expenses were divided between me and another man who was my partner and shared the profits, who worked the land. I am the lessee.

Friar MARTIN. What would be your share of the net profits when you had a crop of 40 cavanés per hectare?

Señor TIRONA. About 5 cavanés. I am unable to fix the exact value of the profits that would accrue to me, because that varied with the variation of the price of rice.

Friar MARTIN. I did not ask about the money that you got, but the amount of cavanés that you got when the crop was 40 cavanés. Is it not true that you had the option of paying your canon either in palay or in money, and if so, how much did you pay or how much were you expected to pay in money during the last year of the administration?

Señor TIRONA. That varied. The amount of money we had to pay was according to the price of rice.

Friar MARTIN. Could you not remember in any year what the amount of money was that you had to pay if you should prefer to pay in money instead of rice?

Señor TIRONA. No; I do not remember.

Friar MARTIN. It never went beyond 9 reals a cavan of rice. I can show that by the books of the company.

Señor TIRONA. I remember that during the time of Balatino Balanes they put a very excessive price on the canon that we were obliged to pay, that is to say, a money price on the cavanés.

Friar MARTIN. How long ago was that?

Señor TIRONA. A little over twenty years ago.

Archbishop GUIDI. You have a very remarkable memory, in that you remember an incident of twenty years ago and are unable to remember what happened two or three years ago.

Señor TIRONA. I remember it because it was a very memorable occasion.

Friar MARTIN. The witness has stated that he paid as a canon 22 cavanos of rice. Now, if we take the gross product of a cavan of ground as 40 cavanos of rice we will have left 18 cavanos. The witness has been unable to state the cost of planting and gathering and garnering the crop of palay; but in Cavite Province, according to the facts in my possession, they amount to the equivalent of 16 to 17 cavanos of rice with rice at 10 reals a cavan. As they paid in rice it is a sign that the rice was not worth over 10 reals. If it had been worth more than 10 reals they would have paid in money. If we make a calculation, they would have netted, at the most, between him and his profit sharer working the land, 3 cavanos to divide, supposing that he has told the truth. But he has stated that his share of the profits was 5 cavanos; that is, his own share, which was half of the net profits for both of them.

Governor TAFT. But he said that the expenses were about 5 pesos, didn't he?

Señor TIRONA. The subtenant had a great many more expenses, because he had to provide the plows and carabaos.

Governor TAFT. The custom, as testified here, is that they divided the expenses and then divided the crop.

Friar MARTIN. The general custom is that they used to subtract the expenses from the gross product, first paying the canon, then subtracting the expenses, and then dividing the net profits.

Governor TAFT. So that if his expenses were \$5 that would make \$10 for both of them?

Friar MARTIN. No, sir.

Governor TAFT. And that would leave 8 pesos to divide, according to the witness.

Friar MARTIN. Then you state that you can cultivate a hectare of ground at an expense of 10 pesos, gathering the crop and all expenses.

Señor TIRONA. The custom was a little bit different in my town. The tenant there, not the subtenant, paid the expense of seeding, \$4, and 75 cents to a peso for the working of the ground after the seed was in, which would make, say, an average of 5 pesos; but besides that he had to pay the cartage. The cartage is hard to calculate; it depends on the distance between the warehouse and the place where the rice is grown.

Archbishop GUIDI. I would like to know the exact cost of cultivating 1 hectare.

Señor TIRONA. I am unable to state, because it varies a great deal, but I have tried to explain the expenses that I had to pay and the expenses that my partner had to pay. He had to pay the expense of putting in the seed, then the expense of harrowing, and also the expense of hauling the grain from the land to the granary. This partner was obliged to pay all other incidental expenses, also the expense of reaping the crop and gathering it; but I am unable to state what those expenses of my partner amounted to in money.

Governor TAFT. Did you hear what Friar Martin said with reference to the time that he paid 22 cavanos as the canon? He said this: The total product was 40 cavanos; you paid 22 as the canon, and the total expenses would be 16. That left only 2 cavanos to be divided between you and your partner. Is that correct?

Señor TIRONA. My expenses amounted to about 5 pesos on an average, and the other expenses which were borne by my partner, the subtenant, were those of reaping and other incidental expenses which he bore.

Governor TAFT. What is your land in Imus worth a hectare?

Señor TIRONA. Part of the lands I inherited from my father and part of the lands, about 15 hectares, I bought about fifteen years ago for 80 pesos a hectare.

Governor TAFT. From whom did you buy it?

Señor TIRONA. A man named Blas Heda, now dead.

Governor TAFT. Was he paying a canon to the Recoletos?

Señor TIRONA. I believe so.

Governor TAFT. What you paid, therefore, was 80 pesos for the right to occupy the land?

Señor TIRONA. In the deed of conveyance for which I paid the possession of the land was also given to me.

Governor TAFT. And that at the rate of 80 pesos a hectare?

Señor TIRONA. Yes, sir; more or less.

Archbishop GUIDI. Upon the payment of your 80 pesos per hectare for that piece of property which was conveyed to you, did you get the ownership of the property, or did you simply get possession of the property?

Señor TIRONA. The deed of conveyance that was issued to me states, according to my idea—I am not a lawyer nor do I understand anything about legal terms—that it gives me possession of the land.

Archbishop GUIDI. Can you dispose of this land? Can you sell it or do as you please with it?

Señor TIRONA. It has been the custom among the residents of that town having property to convey possession of it by deeds.

Archbishop GUIDI. It is a loss of time to examine this witness. I do not wish to question him any more.

Governor TAFT. We understand what he means and what he does not want to say, but that is a question we are not trying here. The question is one of value. I want to ask him what that land is worth now.

Señor TIRONA. I have not tried to sell.

Governor TAFT. Suppose you were to buy that land free from the necessity of paying any canon?

Señor TIRONA. It would be worth somewhat more on that account.

Governor TAFT. How much?

Señor TIRONA. I can not calculate; I do not know.

Governor TAFT. Have you first or second class land?

Señor TIRONA. I have both first and second class land.

Governor TAFT. What is the first-class land worth?

Señor TIRONA. It depends upon circumstances what the land is worth. Seven years ago it was worth about 80 pesos a hectare, but lately there have been no sales of land. Still, I would think it might be worth about 90 pesos. It depends altogether on the necessity of the seller for disposing of his property. Possibly it might be worth 100 pesos a hectare.

Governor TAFT. Have you made a tax return on that land?

Señor TIRONA. Yes, sir.

Governor TAFT. How much did you return the land as worth?

Señor TIRONA. A little over 100 pesos a hectare.

Governor TAFT. That was your declaration as proprietor, was it?

Señor TIRONA. Yes, sir. The board of municipal assessors afterwards changed it and converted my valuation into gold.

Governor TAFT. Did they make it \$100 gold?

Señor TIRONA. They converted my declaration into gold because the board saw that the valuation which I had placed upon it would not enable the municipality to collect enough taxes to keep up expenses.

#### TESTIMONY OF FELIZ CUENTA.

Governor TAFT. What is your name?

Señor CUENTA. Feliz Cuenta.

Governor TAFT. Where do you live?

Señor CUENTA. In Bacoor.

Governor TAFT. Bacoor is in the hacienda of San Juan?

Señor CUENTA. Yes, sir; but the pueblo itself is in the San Nicolas estate.

Governor TAFT. Have you any land there?

Señor CUENTA. I am the presidente of the town and I am not a tenant of the town now, but I have some land of my own.

Governor TAFT. How much?

Señor CUENTA. About 30 cavanos of land.

Governor TAFT. Is it rice land?

Señor CUENTA. Yes, sir.

Governor TAFT. How long have you held it?

Señor CUENTA. Some of the land I inherited from my father and some I have bought.

Governor TAFT. Did your father pay a canon on the land?

Señor CUENTA. No, sir; the land to which I refer is land which belongs to the municipality.

Governor TAFT. Is it first-class or second-class rice land?

Señor CUENTA. They are not first-class lands because they are subject to rainfall, and when the rain does not fall there is no crop.

Governor TAFT. How much do they produce in a good year?

Señor CUENTA. From 25 to 30 cavanos. They are not first-class lands; they are lands that are near the center of the town; they are not irrigated lands.

Governor TAFT. And you raise from them in normal years from 25 to 30 cavanos?

Señor CUENTA. Yes, sir.

Governor TAFT. Are you familiar with first-class lands in that part? Do you know first-class lands?

Señor CUENTA. Yes, sir; more or less.

Governor TAFT. What do you consider your land worth?

Señor CUENTA. As these lands of mine have no burden on them whatever except the land tax, I consider them to be worth about 100 pesos Mexican a hectare, and I place this valuation upon them because they are near town.

Governor TAFT. How does that compare in value with the first-class lands on the estates, assuming that there is no canon to pay and no burden of any sort except the land tax?

Señor CUENTA. It would be about the same.

Governor TAFT. But is not first-class land on the estate worth more than your land that is not irrigated?

Señor CUENTA. They are worth 100 pesos a hectare for the reason that the lands in the estate are farther away from the town. You have to take that fact into consideration. You must also remember that those classifications of first class, second class, and third class were made by the administrators of the estates themselves.

Governor TAFT. Isn't there first-class land in the estate just as near the town as your land?

Señor CUENTA. No, sir; as all my lands are within the populated limits of the town.

Governor TAFT. Isn't there first-class land up near Imus?

Señor CUENTA. At the barrio of Mambo, where there is plenty of water, there are good first-class lands.

Governor TAFT. Isn't that near Imus?

Señor CUENTA. Right adjacent to Imus.

Governor TAFT. What is that land worth?

Señor CUENTA. About 150 pesos; I do not know for certain.

Governor TAFT. How much will first-class land produce?

Señor CUENTA. From 40 to 50 cavares.

Archbishop GUIDI. How much do yours produce?

Señor CUENTA. Twenty-five to thirty.

Mr. MCGREGOR. Without irrigation?

Señor CUENTA. Yes, sir.

Governor TAFT. How many crops, on that first-class land, do they produce in two years?

Señor CUENTA. Each year, one.

Archbishop GUIDI. Have they never gathered two crops in one year?

Señor CUENTA. In my town, so far as I know, I have never seen two crops. I have never heard of two crops in Imus.

Mr. MCGREGOR. Your pariente, Juan Cuenta, who used to be the presidente, has land that is irrigated from this large dam called the Place de Malina. Does that only produce 40 to 50 cavares? They have as much water as they require, of course.

Señor CUENTA. Perhaps they produce about that much. There are some years when they might have produced more and some less.

Governor TAFT. How much more?

Señor CUENTA. I suppose that that is about as high as they reach. I do not know. I have heard from others who possessed land around there that they would produce from 40 to 50.

Governor TAFT. Has not your cousin produced three crops in two years?

Señor CUENTA. No, sir.

Governor TAFT. Do you own first-class land?

Señor CUENTA. I do not know whether they are first-class lands or not; they are at the barrio of Ligas and the water from the dam reaches the land.

Mr. MCGREGOR. Then you put a value of about \$100 Mexican on the first-class land there?

Señor CUENTA. I have not said so.

Archbishop GUIDI. What is the value of first-class land?

Señor CUENTA. Perhaps it may be worth over 100 pesos.

Governor TAFT. Did you not say it was worth 150 pesos?

Señor CUENTA. Yes; if they are well irrigated.

Mr. MCGREGOR. Do you consider your land, under the usual way of classifying land, third-class land?

Señor CUENTA. You can not classify these lands, as they are not irrigated lands, and when it does not rain they have very little value.

Mr. MCGREGOR. We look upon that as third class. Do you know a man named A. Tolentino? He has lands in the district of San Nicolas. The reason I ask this question is that there is a man named Tolentino who has 14,707 meters of land and he values it at \$325 gold.

Señor CUENTA. I do not know him; there are a great many Tolentinos.

Mr. MCGREGOR. That is a price that I got from the book in Cavite; I do not quite understand it. They call it improved palay land. Perhaps the man has got a dam on it or something of that sort.

Governor TAFT. What did you return your land at?

Señor CUENTA. I, together with several other prominent citizens of the town of Bacoor, had agreed to fix a high valuation upon our real estate there in order to help

out the municipality in its running expenses for schools, general improvements, etc., and for that reason I put a value of 200 pesos a hectare on my land. It was, however, with the understanding that this high valuation would be reduced when the necessities of the municipality would not be as great as they are at present.

Governor TAFT. Was it \$100 gold that you put on it?

Señor CUENTA. Two hundred dollars Mexican.

Governor TAFT. And they reduced it to gold?

Señor CUENTA. No, sir; they have not reduced it to gold.

Governor TAFT. Haven't they been ordered to reduce everything to gold?

Señor CUENTA. The tax board has not changed the valuation put upon the land by the property owners in their declarations, though it has converted them to gold at the rate of exchange. We increased it, in other words.

Governor TAFT. Did they not transfer it to gold at the rate of two to one?

Señor CUENTA. This conversion was made by the treasurer; the boards did not do it at all. It is done in Cavite itself.

Mr. MCGREGOR. Have you any salt lands?

Señor CUENTA. Yes, sir.

Mr. MCGREGOR. How much?

Señor CUENTA. Perhaps each salt pit may be less than a hectare. I have 12 of these salt pits, about 12 hectares.

Mr. MCGREGOR. What do you value your salt lands per hectare at?

Señor CUENTA. That is according to the condition of the salt pit. Some land is better than other.

Mr. MCGREGOR. But taking average land?

Señor CUENTA. From 250 to 300 pesos for each salt pit, more or less.

Mr. MCGREGOR. I wanted to get at his price, because we have some salt lands.

#### TESTIMONY OF GREGORIO BAUTISTA.

Governor TAFT. What is your name?

Señor BAUTISTA. Gregorio Bautista.

Governor TAFT. Where do you live?

Señor BAUTISTA. Dasmariñas.

Governor TAFT. Do you hold any lands in Dasmariñas?

Señor BAUTISTA. Yes; I am in possession of lands at Dasmariñas.

Governor TAFT. How much?

Señor BAUTISTA. I have two classes of land—one irrigated and the other not irrigated.

Governor TAFT. How much irrigated?

Señor BAUTISTA. Two cavanés.

Governor TAFT. How much unirrigated?

Señor BAUTISTA. About 3 cavanés, I should calculate.

Governor TAFT. Is that irrigated land first-class land?

Señor BAUTISTA. I can not state with regard to the classification of the land.

Governor TAFT. How much will it produce?

Señor BAUTISTA. In the good times, 50 cavanés.

Governor TAFT. How much does the unirrigated land produce?

Señor BAUTISTA. I have not cultivated it to palay at all. I cultivate it to corn. Before the revolution I also planted some sugar cane, but not since then.

Archbishop GUIDI. Did you in the best of times, or at any time, get more than 50 cavanés per hectare from your land?

Señor BAUTISTA. Never.

Archbishop GUIDI. Did you ever get two crops from that land?

Señor BAUTISTA. No; never.

Governor TAFT. Have you returned your land for taxation?

Señor BAUTISTA. Yes, sir.

Governor TAFT. At what price did you return it?

Señor BAUTISTA. Some at 75 and some 80 pesos Mexican a cavan.

Governor TAFT. Do you think that is about the right value?

Señor BAUTISTA. To the best of my knowledge and understanding that is the right price.

Governor TAFT. How much did you declare the unirrigated land at?

Señor BAUTISTA. I returned it at 5 pesos, because the land has not been cultivated for a number of years and it is now overgrown with vegetation.

Mr. MCGREGOR. Is there much sugar land in the vicinity of Dasmariñas?

Señor BAUTISTA. There are two or three landowners at the present time who are cultivating sugar cane.

Mr. MCGREGOR. I think that Señor Villegas said that there was none.

Adjourned.

## EXHIBIT G.

### DETAILED AND SUMMARIZED STATEMENTS OF THE VALUATIONS OF THE FRIARS' ESTATES BY SEÑOR VILLEGAS.

*The friar lands as surveyed by the expert appointed by the Philippine Commission.*

#### ESTATES OF THE DOMINICANS.

<b>Binan (3,739 hectares 10 ares 15 centares):</b>		
Rice lands of the first class, 2,039 hectares 10 ares 15 centares, at \$150 a hectare .....	Mexican currency. \$305,865.22	
Sugar lands of the first class, 1,700 hectares, at \$100 a hectare.....	170,000.00	
Dams and dikes, according to present condition ....	12,000.00	
Farmhouse, according to present condition.....	10,000.00	
		\$497,865.22
<b>Calamba (16,424 hectares 14 ares):</b>		
Rice lands of the first class, 3,991 hectares, at \$150 a hectare.....	598,650.00	
Rice lands of the second class, 883 hectares, at \$125 a hectare.....	110,375.00	
Rice lands of the third class, 883 hectares, at \$80 a hectare .....	70,640.00	
Sugar lands, 4,626 hectares, at \$60 a hectare.....	277,200.00	
Uncultivated lands, 6,036 hectares, at \$5 a hectare...	30,181.20	
Farmhouse, as per present condition .....	15,000.00	
		1,102,046.20
<b>Lolomboy, Polo, Bulacan (106 hectares 53 ares):</b>		
Rice lands and building lots (improved lots) of the first class, at \$150 .....		15,979.50
<b>Lolomboy,<sup>a</sup> Bocaue, Bulacan (4,158—9—66 hectares):</b>		
Rice lands of the first class, 3,326 hectares 69 ares 46 centares, at \$200.....	665,338.92	
Building lots, 164—45—67 hectares, at \$125 .....	20,557.09	
Fisheries, 19—40—70 hectares, at \$250.....	4,851.75	
Uncultivated lands, 647—53—83 hectares, at \$5 a hectare .....	3,237.69	
Improvements, farmhouse, and warehouses for rice..	40,000.00	
		733,985.45
<b>Naic (7,922 hectares and 29 ares):</b>		
Rice lands of the first class, 3,119 hectares 28 ares, at \$200 a hectare .....	623,856.00	
Building lots in the town, 40 hectares 1 are, at \$200 a hectare .....	8,020.00	
Uncultivated woodlands, 4,763 hectares, at \$5 a hectare .....	23,815.00	
Improvements of dams, dikes, and tunnels, according to present condition.....	90,305.76	
Farmhouse and warehouses for the storing of rice..	25,000.00	
		770,996.76

<sup>a</sup>Lolomboy, Polo, Bulacan (second) (65—19—50 hectares): Rice lands and building lots of the first class, at \$150, \$9,779.28. Omitted in error and added to the grand total.

## Orion (2,109—57—24 hectares):

Mexican currency.

Rice lands of the second class, 375 hectares, at \$100 a hectare .....	\$37,500.00	
Sugar lands, 278 hectares, at \$120 a hectare .....	33,360.00	
Improved lots (building lots) in the town, 260 hectares, at \$125 a hectare .....	32,500.00	
Uncultivated waste lands, 1,196 hectares 57 ares and 24 centares, at \$5 .....	5,982.00	
		\$109,342.00

## Santa Cruz de Malabon (8,902—37—50 hectares):

Rice lands of the first class, 4,001 hectares, at \$150 a hectare .....	600,150.00	
Improved lots in the town, 40 hectares, at \$200 a hectare .....	8,000.00	
Uncultivated lands, 4,861—37—50 hectares, at \$5 a hectare .....	24,306.87	
Improvements, dams, and dikes .....	50,000.00	
		682,456.87

## Santa Maria de Pandi (12,069—57—2 hectares):

Rice lands, class 1, 1,016 hectares, at \$200 a hectare ..	203,200.00	
Rice lands, class 2, 1,503 hectares, at \$150 a hectare ..	225,450.00	
Rice lands, class 3, 675 hectares, at \$100 a hectare ..	67,500.00	
Rice lands, class 4, 1,400 hectares, at \$75 a hectare ..	105,000.00	
Rice lands, class 5, 1,450 hectares, at \$50 a hectare ..	72,500.00	
Uncultivated mountain lands, fields, and woodlands, 6,025 hectares 57 ares and 26 centares, at \$25 a hectare .....	150,639.00	
		824,289.00

## Santa Rosa (4,750—14—24 hectares):

Rice lands, first class, 1,000—14—24 hectares, at \$175 a hectare .....	175,024.90	
Rice lands, second class, 1,310 hectares, at \$150 a hectare .....	193,500.00	
Rice lands, third class, 130 hectares, at \$100 a hectare .....	13,000.00	
Sugar lands, first class, 1,010 hectares, at \$150 a hectare .....	151,500.00	
Sugar lands, second class, 1,300 hectares, at \$100 a hectare .....	130,000.00	
Farmhouse, in present condition .....	25,000.00	
Dams and dikes, in present condition .....	12,000.00	
		700,024.90

## San Juan del Monte (156—49—35 hectares):

Rice lands of the second class, 106 hectares, at \$125 a hectare .....	13,250.00	
Improved lots, inside and outside the town, 50—49—35 hectares, at \$100 a hectare .....	5,049.00	
		18,299.00

## Toro (58—23—30 hectares):

Rice lands and sugar lands, 58 hectares 23 ares and 30 centares, at \$150 a hectare .....	8,734.95	
---	----------	--

## ESTATES OF THE AUGUSTINIANS.

## Banilad or Talamban (1,538—43 hectares):

Rice lands, "aventureras," of the first class, 319 hectares, at \$300 .....	95,700.00	
Rice lands of the second class, 345 hectares, at \$200 a hectare .....	69,000.00	
Improved lots in the town, with cocals, 96 hectares, \$200 a hectare .....	19,200.00	
Uncultivated lands, 778 hectares and 43 ares, at \$15 a hectare .....	11,676.45	
		195,576.45

## Dampol, Quincua (962 hectares):

Rice lands and sugar lands of the first class, 902—74—46 hectares, at \$150 a hectare .....	135,411.69	
Improved lots, 60 hectares, at \$125 a hectare .....	7,500.00	
		142,911.69

		Mexican currency.
<b>Mandaloya (4,033 hectares):</b>		
Rice lands, class 1, 570 hectares, at \$150 a hectare...	\$85,500.00	
Rice lands, class 2, 720 hectares, at \$125 a hectare...	90,000.00	
Rice lands, class three, 1,080 hectares, at \$100 a hectare .....	108,000.00	
Uncultivated lands, quarries, and lands used in the manufacture of brick, 1,663 hectares, at \$25 a hectare .....	41,575.00	
Farmhouse of Mandaloya .....	50,000.00	
		<b>\$375,075.00</b>
<b>Muntinlupa (5,397 hectares and 84 ares):</b>		
Rice lands, class 2, "aventureras," 800 hectares, at \$100 a hectare .....	80,000.00	
Rice lands of the third class, "aventureras," 700 hectares and 84 ares, at \$75 a hectare .....	52,500.00	
Rice lands of the fourth class, "aventureras," 500 hectares, at \$50 a hectare .....	25,000.00	
Uncultivated lands, 3,397 hectares, at \$5 a hectare ..	16,985.00	
		<b>174,485.00</b>
<b>Malinta (3,432 hectares):</b>		
Rice lands, class 1, 650 hectares, at \$200 a hectare...	130,000.00	
Rice lands, class 2, 1,620 hectares, at \$150 a hectare.	243,000.00	
Rice lands, class 3, 182 hectares, at \$100 a hectare..	18,200.00	
Mountain lands, uncultivated, 980 hectares, at \$5 a hectare .....	4,900.00	
Improvements .....	5,000.00	
		<b>401,100.00</b>
<b>Tala (5,197 hectares):</b>

### AGREEMENTS TO CONVEY THE FRIARS' LANDS TO THE GOVERNMENT OF THE PHILIPPINE ISLANDS.

---

#### AGREEMENT OF THE BRITISH-MANILA ESTATES COMPANY, LIMITED, TO CONVEY TO THE GOVERNMENT OF THE PHILIPPINE ISLANDS THE ESTATES OF SAN JUAN AND SAN NICOLAS, PROVINCE OF CAVITE.

MANILA, *December 22, 1903.*

The British-Manila Estates Company, Limited, a corporation duly organized under the laws of ———, hereby agrees to sell and convey to the government of the Philippine Islands the two haciendas of San Juan and San Nicolas, in the town of Imus, known usually as the Imus estate, in the province of Cavite, consisting of eighteen thousand four hundred and nineteen (18,419) hectares, fifty-six (56) ares, and twelve (12) centares, formerly the property of the Recoleta order in the Philippines.

This sale and conveyance shall include all the dwelling houses, farmhouses, warehouses, camarines, and other buildings, including sugar and rice mills and machinery, irrigation work, dams, tunnels, ditches, and all other improvements, together with all water and other rights, and all hereditaments belonging to the British-Manila Estates Company, Limited, on every part of the estates hereby agreed to be conveyed; and the British-Manila Estates Company, Limited, agrees that it has a good and merchantable title to all the lands and buildings hereby conveyed, duly registered according to the laws of the Philippine Islands; that it will produce its title deeds for examination by the counsel for the Philippine government as soon as practicable after the signing of this contract, and that it will convey such lands and buildings absolutely and in fee simple, in accordance with this contract, by giving a sufficient deed of general warranty of title to the Philippine government.

The British-Manila Estates Company, Limited, further agrees to furnish to the Philippine government all its books, papers, and other documents which it has either in its possession or under its control bearing upon its ownership or the ownership of its predecessors in title to the lands herein agreed to be conveyed, which shall, in the opinion of the counsel for the Philippine government, be useful to such government in determining who are the rightful tenants on the property, and in showing, in case of litigation, the lawful and peaceable possession of the British-Manila Estates Company, Limited, or its predecessors in title, and especially in showing the lawful and peaceable possession of the Recoleta order in the Philippines during the sovereignty of Spain.

The British-Manila Estates Company (Limited), further agrees to aid the Philippine government in every way by procuring oral or documentary evidence needed in confirming the title hereby conveyed or by showing where such evidence can be procured.

The British-Manila Estates Company (Limited), hereby further agrees that the government of the Philippine Islands may at its own expense make such surveys of the hacienda or haciendas herein agreed to be conveyed as it sees fit in order to determine whether the superficial area of the hacienda or haciendas according to the description thereof in the title deeds is the same as that stated above.

The British-Manila Estates Company (Limited), also hereby agrees to assign and transfer to the government of the Philippine Islands all claims for rents for use of land or buildings herein agreed to be conveyed due to the British-Manila Estates Company (Limited), from tenants which are now uncollected, together with all claims for rents accruing between the date hereof and the consummation of the sale herein agreed to be made, except such rents as may be owing by the United States Government to the said company for the occupation of its houses by United States troops; nor shall this agreement affect the alleged claim which the British-Manila Estates Company (Limited), has against the civil government of the Philippine Islands or the province of Cavite for material used upon roads constructed in the province of Cavite and taken from a building owned by the British-Manila Estates Company (Limited), in the town of Imus.

It is understood that this contract is based upon a series of surveys made by a surveyor named Juan Villegas during the years nineteen hundred and one and nineteen hundred and two, at the instance of the government of the Philippine Islands, in which he classifies and appraises the lands of the British-Manila Estates Company (Limited), herein agreed to be conveyed; that on the basis of this survey, classification, and appraisal the civil governor, on behalf of the government of the Philippine Islands, by letter to Monsignor Jean Baptiste Guidi, archbishop of Stauropoli and apostolic delegate to the Philippine Islands, dated July 5, 1903, made an offer to purchase the lands above described at the price fixed by Villegas, in Mexican currency reduced to gold at the ratio of two to one, and this letter of the civil governor, together with the list of the estates of the Recoletos, so called, which accompanied the letter, and the surveys of Villegas of said estates, is hereby, for the better understanding of this contract, made part hereof as an exhibit by reference.

In consideration of the sale and conveyance of the lands and buildings and of the assignment of the claims for rent, all as above described, the government of the Philippine Islands agrees to pay to the British-Manila Estates Company (Limited), the sum of one million and forty-five thousand dollars (\$1,045,000), in money of the United States, subject to this proviso: That if the Philippine government shall notify the British-Manila Estates Company (Limited), that the area of either hacienda as described in the title deed thereof falls short of the superficial area thereof as shown by Villegas's survey of the same, then the parties hereto shall cause a joint survey of the same to be made by an agent of each, and if the true survey shall show the area of either hacienda to be less than as stated by Villegas and in the description thereof hereinbefore given, then the price herein agreed to be paid shall be abated by an amount to be ascertained by multiplying the number of hectares short into the average value of an hectare in the hacienda in question, as shown by dividing Villegas's total valuation of such hacienda by the total number of hectares contained therein according to his survey, plus twenty-five per cent thereof; and if, on the other hand, the true survey shall show an excess of hectares over the amount reported by Villegas, then the price to be paid shall be increased by an amount to be ascertained in a similar manner.

The government of the Philippine Islands, as a further consideration, hereby agrees to reimburse the British-Manila Estates Company (Limited), in the sum of six hundred and forty-three dollars and fifty-eight cents (\$643.58), paid by Marcus McGregor, the agent of the British-Manila Estates Company (Limited), to the treasurer of the province of Cavite as taxes on the haciendas herein agreed to be conveyed; and hereby further agrees to hold said British-Manila Estates Company (Limited), harmless from liability for the payment of all land taxes uncollected on the haciendas herein agreed to be conveyed and due to the province of Cavite or the municipality in which situate.

It is understood that the government of the Philippine Islands, in order to pay the purchase price hereof, is obliged to sell its bonds under and by virtue of the authority of section sixty-four of an act of the Congress of the United States approved July one, nineteen hundred and two, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes." The government of the Philippine Islands agrees to make every effort to sell the bonds and obtain the proceeds as soon as practicable, and the time for the consummation of this contract by the conveyance of a good and marketable title by the British-Manila Estates Company (Limited), and the payment of the purchase price by the government of the Philippine Islands is fixed as of the end of a period within which such bonds may be engraved, advertised, sold, and the proceeds thereof realized, and the necessary surveys and necessary investigation of the title be made, by prompt action of the Philippine government: *Provided*, That such period shall not exceed six months from the date of this contract.

In witness whereof the two parties to this agreement hereunto affix their signatures: The British-Manila Estates Company (Limited), acting by Marcus McGregor, the attorney in fact of said company, as shown by the attached power of attorney; and the government of the Philippine Islands, by William H. Taft, civil governor, whose authority is shown by a certified copy of a resolution of the Philippine Commission also hereto attached.

THE BRITISH-MANILA ESTATES COMPANY (LIMITED),

**AGREEMENT OF LA SOCIEDAD AGRÍCOLA DE ULTRAMAR TO CONVEY TO THE GOVERNMENT OF THE PHILIPPINE ISLANDS CERTAIN ESTATES, FORMERLY THE PROPERTY OF THE AUGUSTINIAN ORDER IN THE PHILIPPINES.**

MANILA, *December 22, 1903.*

La Sociedad Agrícola de Ultramar, a corporation duly and lawfully organized under the Spanish sovereignty, hereby agrees to sell and convey to the government of the Philippine Islands the following haciendas and parcels of land, formerly the property of the Augustinian order in the Philippines, as follows:

- (1) The hacienda of Banildad or Talamban, containing 1,538 hectares and 43 ares, in the province of Cebu.
- (2) The hacienda of Dampol, in the town of Quingua, in the province of Bulacan, containing 962 hectares, 74 ares, and 46 centares.
- (3) The hacienda of Muntinlupa, containing 5,397 hectares and 84 ares, formerly in the province of Rizal and now in the province of La Laguna.
- (4) The hacienda of Malinta, containing 3,432 hectares, in the town of Polo, in the province of Bulacan.
- (5) The hacienda of Tala, containing 5,187 hectares, in the towns of Novaliches and Caloocan, in the province of Rizal.
- (6) The hacienda of Piedad, containing 3,604 hectares, in the towns of Novaliches and Caloocan, in the province of Rizal.
- (7) The hacienda of San Francisco de Malabon, containing 13,000 hectares, in the province of Cavite.
- (8) The hacienda of Binagbag, within the jurisdiction of the pueblo of Angat, in the province of Bulacan, containing 294 hectares.
- (9) The hacienda of Talisay and Minglanilla, containing 7,362 hectares and 90 ares, in the province of Cebu.
- (10) A parcel of land in Matamo, in the pueblo of Quingua, province of Bulacan, containing 10 hectares, 21 ares, and 33 centares.
- (11) A parcel of land in the barrio of San Marcos, town of Calumpit, province of Bulacan, containing 74 hectares, 82 ares, and 95 centares.
- (12) A parcel of land in Barihan, in the town of Barasoain, province of Bulacan, containing 54 hectares, 29 ares, and 57 centares.
- (13) A parcel of land in the barrio of Daquila, in the town of Santa Isabel, in the province of Bulacan, containing 38 hectares 83 ares and 49 centares.
- (14) A parcel of land in the barrios of Calay-Layan or Anibon, of the pueblo of Santa Isabel, in the province of Bulacan, containing 65 hectares 33 ares and 52 centares.
- (15) A parcel of land in Alang-Ilang, in the town of Guiguinto, province of Bulacan, containing 241 hectares 42 ares and 94 centares.
- (16) A parcel of land in the barrio of Malapad, of the town of Guiguinto, province of Bulacan, containing 7 hectares 20 ares and 8 centares.
- (17) A parcel of land in the barrio of New and Old Recoleta, of the town of Guiguinto, province of Bulacan, containing 456 hectares 95 ares and 16 centares.
- (18) An estate in the province of Isabel, containing 20,419 hectares, patented by the Spanish Government to the Augustinian Order of the Philippines.

This sale and conveyance shall include all the dwelling houses, farmhouses, warehouses, camarines, and other buildings, including sugar and rice mills and machinery, irrigation work, dams, tunnels, ditches, and all other improvements, together with all water and other rights, and all hereditaments belonging to La Sociedad Agrícola de Ultramar on the estates and parcels of land hereby agreed to be conveyed; and La Sociedad Agrícola de Ultramar agrees that it has a good and merchantable title to all the lands and buildings hereby conveyed, duly registered according to the laws of the Philippine Islands; that it will produce its registered title deeds for examination by the counsel for the Philippine government, and that it will convey such lands and buildings absolutely and in fee simple in accordance with this contract by giving a sufficient deed of general warranty of title to the Philippine government.

La Sociedad Agrícola de Ultramar further agrees to furnish to the Philippine government all its books, papers, and other documents which it has either in its possession or under its control bearing upon its ownership or the ownership of its predecessors in title to the lands herein agreed to be conveyed which shall, in the opinion of the counsel for the Philippine government, be useful to such government in determining who are the rightful tenants on the property, and in showing, in case of litigation, the lawful and peaceable possession of La Sociedad Agrícola de Ultramar or its predecessors in title, and especially in showing the lawful and peaceable possession of the Augustinian Order in the Philippines during the sovereignty of Spain.

La Sociedad Agrícola de Ultramar further agrees to aid the Philippine government

in every way by procuring oral or documentary evidence needed in confirming the title hereby conveyed or by showing where such evidence can be procured.

La Sociedad Agrícola de Ultramar hereby further agrees that the Philippine government may, at its own expense, make such surveys of any of the haciendas or parcels herein conveyed as it sees fit in order to determine whether the superficial area of any estate or parcel according to the description thereof in the title deeds is the same as that stated in the above-mentioned list of haciendas and parcels.

La Sociedad Agrícola de Ultramar also hereby agrees to assign and transfer to the government of the Philippine Islands all claims for rents for use of land or buildings herein agreed to be conveyed due to La Sociedad Agrícola de Ultramar from tenants thereon which are now uncollected, together with claims for rents accruing between the date hereof and the consummation of the sale herein agreed to be made, except such rents as may be owing by the United States Government to the said society for the occupation of its houses by United States troops.

It is understood that this contract is based upon a series of surveys made by a surveyor named Juan Villegas during the years nineteen hundred and one and nineteen hundred and two at the instance of the government of the Philippine Islands, in which he classifies and appraises the lands of La Sociedad Agrícola de Ultramar, except an estate of twenty-three thousand hectares in the province of Isabela, above mentioned; that on the basis of this survey, classification, and appraisement the civil governor, on behalf of the government of the Philippine Islands, by letter to Monsignor Jean Baptiste Guidi, archbishop of Staupoli and apostolic delegate to the Philippine Islands, dated July 5, 1903, made an offer to purchase the lands above described at the price fixed by Villegas in Mexican currency reduced to gold at the ratio of two to one, and this letter of the civil governor, together with the list of the estates of the Augustinians, so called, which accompanied the letter, and the surveys of Villegas of said estates, is hereby for the better understanding of this contract made part hereof as an exhibit by reference, it being understood that the estate of Mandaloya, mentioned in the list as belonging to the Augustinians and now the property of La Sociedad Agrícola de Ultramar, is not intended to be included in this contract and agreement to sell.

In consideration of the sale and conveyance of the lands and buildings, and of the assignment of the claims for rent, all as above described, the government of the Philippine Islands agrees to pay to La Sociedad Agrícola de Ultramar the sum of two million two hundred and thirteen thousand seven hundred and seventy-nine dollars (\$2,213,779), in money of the United States, subject to this proviso: That if the Philippine government shall notify La Sociedad Agrícola de Ultramar that the area of any hacienda or parcel as described in the title deed thereof falls short of the superficial area thereof as shown by Villegas' survey of the same, then the parties hereto shall cause a joint survey of the same to be made by an agent of each; and if the true survey shall show the area of the hacienda or parcel to be less than as stated by Villegas and in the list as hereinbefore set forth, the price herein to be paid shall be abated by an amount to be ascertained by multiplying the number of hectares short into the average value of an hectare in the hacienda or parcel in question as shown by dividing Villegas' total valuation of such hacienda or parcel by the total number of hectares contained therein according to his survey plus twenty-five per cent thereof; and if, on the other hand, the true survey shall show an excess of hectares over the amount reported by Villegas, then the price to be paid shall be increased by an amount to be ascertained in a similar manner. If either party desires a survey of the Isabela estate, which was not surveyed by Villegas, it shall be made as above provided, and the price herein agreed to be paid shall be reduced or increased by the number of hectares found to be short or in excess of twenty thousand four hundred and nineteen hectares at the rate of nine dollars and eighteen cents (\$9.18) gold per hectare. The survey above mentioned shall be begun as soon after the signing of this contract as is practicable.

In addition to the other considerations herein stated the government of the Philippine Islands will save harmless La Sociedad Agrícola de Ultramar from the payment of any land taxes due upon the haciendas or parcels herein agreed to be conveyed to the province or municipality in which such haciendas or parcels are respectively situate, and will reimburse La Sociedad Agrícola de Ultramar in the amount of \_\_\_\_\_ dollars (\$\_\_\_\_\_) for taxes already paid by it on such haciendas or parcels of land.

It is understood that the government of the Philippine Islands, in order to pay the purchase price hereof, is obliged to sell its bonds under and by virtue of the authority of section sixty-four of an act of the Congress of the United States approved July one, nineteen hundred and two, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes." The government of the Philippine Islands agrees to make every

effort to sell the bonds and obtain the proceeds as soon as practicable, and the time for the consummation of this contract by the conveyance of a good and marketable title by La Sociedad Agrícola de Ultramar and the payment of the purchase price by the government of the Philippine Islands is fixed as of the end of a period within which such bonds may be engraved, advertised, sold, and the proceeds thereof realized, and the necessary surveys and necessary investigation of the title be made by prompt action of the Philippine government: *Provided*, That such period shall not exceed six months from the date of this contract.

In witness whereof, the two parties to this agreement hereunto affix their signatures: La Sociedad Agrícola de Ultramar, acting by Padre Juan Martin, the attorney in fact of said society, as shown by the attached power of attorney, and the government of the Philippine Islands, by William H. Taft, civil governor, whose authority is shown by a certified copy of a resolution of the Philippine Commission, also hereto attached.

**AGREEMENT OF THE RECOLETO ORDER OF THE PHILIPPINE ISLANDS TO CONVEY TO THE GOVERNMENT OF THE PHILIPPINE ISLANDS THE ESTATE OF SAN JOSÉ, PROVINCE OF MINDORO.**

MANILA, December 22, 1903.

The Recoleta Order of the Philippine Islands, an ecclesiastical corporation, hereby agrees to sell and convey to the government of the Philippine Islands the estate of San José in the island and province of Mindoro, containing twenty-three thousand two hundred and sixty-six (23,266) hectares.

This sale and conveyance shall include all the dwelling houses, farmhouses, warehouses, camarines, and other buildings, including sugar and rice mills and machinery, irrigation work, dams, tunnels, ditches, and all other improvements, together with all water and other rights and all hereditaments belonging to the Recoleta Order of the Philippines on the estate hereby agreed to be conveyed; and the Recoleta Order of the Philippines agrees that it has a good and merchantable title to all the lands and buildings hereby conveyed, duly registered according to the laws of the Philippine Islands; that it will produce its title deeds for examination by the counsel for the Philippine government as soon as practicable after the signing of this contract; and that it will convey such lands and buildings absolutely and in fee simple in accordance with this contract by giving a sufficient deed of general warranty of title to the Philippine government.

The Recoleta Order of the Philippines hereby further agrees to furnish to the

Philippine government all its books, papers, and other documents, which it has in its possession or under its control, bearing upon its ownership or the ownership of its predecessors in title to the lands herein agreed to be conveyed, which shall, in the opinion of the counsel for the Philippine government, be useful to such government in determining who are the rightful tenants on such property, and in showing, in case of litigation, the lawful and peaceable possession of the Recoleta Order of the Philippines or its predecessors in title.

The Recoleta Order of the Philippines further agrees to aid the Philippine government in every way by procuring oral or documentary evidence needed in confirming the title hereby conveyed or by showing where such evidence can be procured.

The Recoleta Order of the Philippines also hereby agrees to assign and transfer to the government of the Philippine Islands all claims for rents for use of land or buildings herein agreed to be conveyed due to the Recoleta Order of the Philippines or its predecessors in title from tenants thereon which are now uncollected, together with claims for rents accruing between the date hereof and the consummation of the sale herein agreed to be made.

The Recoleta Order of the Philippines hereby further agrees that the Philippine government may, at its own expense, make such surveys of the hacienda herein conveyed as it sees fit, in order to determine whether its superficial area according to the description thereof in the title deeds contains twenty-three thousand two hundred and sixty-six (23,266) hectares, as hereinbefore set forth.

In consideration of the conveyance of the lands and buildings and of the assignment of the claims for rent, all as above described, the government of the Philippine Islands agrees to pay to the Recoleta Order of the Philippines the sum of three hundred and six thousand seven hundred and fifty-nine dollars (\$306,759) in money of the United States, subject to this proviso: That if the Philippine government shall notify the Recoleta Order of the Philippines that the area of the hacienda of San José, herein agreed to be conveyed, as described in the title deeds thereof falls short of the superficial area thereof as hereinbefore set forth, then the parties hereto shall cause a joint survey of the same to be made by an agent of each, and if the true survey shows a less area of land in this estate than twenty-three thousand two hundred and sixty-six hectares the price herein agreed to be paid shall be reduced in the proportion which the shortage bears to twenty-three thousand two hundred and sixty-six hectares; and if the estate shall be found to exceed the amount above stated, then the price shall be increased in a similar proportion.

As an additional consideration, the government of the Philippine Islands hereby agrees to hold the Recoleta Order of the Philippines harmless from liability to pay land taxes on the hacienda herein agreed to be conveyed, whether such taxes have already accrued or shall accrue between the date of this contract and the date of the conveyance herein agreed to be made.

It is understood that upon the hacienda of San José, Mindoro, there are about two thousand head of cattle, the property of the Recoleta Order. It is agreed as part of the above contract of sale that the Recoleta Order may pasture these cattle on said estate for one year after the above contract is consummated by the delivery of the deed of conveyance and the payment of the purchase price without the payment of rent, subject, however, to the conditions that, should the Philippine government succeed in selling the San José estate hereinabove agreed to be conveyed, or a substantial part thereof, the said government may require the removal of such cattle on three months' notice.

It is understood that the government of the Philippine Islands, in order to pay the purchase price hereof, is obliged to sell its bonds under and by virtue of the authority of section sixty-four of an act of the Congress of the United States, approved July one, nineteen hundred and two, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes." The government of the Philippine Islands agrees to make every effort to sell the bonds and obtain the proceeds as soon as practicable, and time for the consummation of this contract by the conveyance of a good and marketable title by the Recoleta Order of the Philippines and the payment of the purchase price by the government of the Philippine Islands is fixed as of the end of a period within which such bonds may be engraved, advertised, sold, and the proceeds thereof realized, and the necessary surveys and necessary investigation of the title be made, by prompt action of the Philippine government: *Provided*, That such period shall not exceed six months from the date of this contract.

In witness whereof the two parties to this agreement hereunto affix their signatures, the Recoleta Order of the Philippines, acting by Fr. Valentin Utande, procurator of said order, duly authorized thereunto by power of attorney, a copy of which is hereto attached, and the government of the Philippine Islands by William

H. Taft, civil governor, whose authority is shown by a certified copy of a resolution of the Philippine Commission, also hereto attached.

THE RECOLETO ORDER OF THE PHILIPPINES,  
By VALENTIN UTANDE, *F. Procurator*.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
By WM. H. TAFT, *Civil Governor*.

In the presence of—

JEAN BAPTISTE GUIDI,  
*Archbishop of Stauropoli, Apostolic Delegate.*

MANILA, December 22, 1903.

The Philippine Sugar Estates Development Company (Limited), purporting to be a corporation of the Philippine Islands, duly and lawfully organized, hereby agrees to sell and convey to the government of the Philippine Islands eight (8) haciendas, formerly the property of the Dominican Order in the Philippines, as follows:

- (1) The hacienda of Biñan, in the province of Laguna, said to contain, by the survey of Villegas, a surveyor, 3,739 hectares 10 ares and 15 centares;
- (2) The hacienda of Calamba, in the province of Laguna, said to contain 16,424 hectares and 14 ares;
- (3) The hacienda of Lolomboy, in the province of Bulacan, divided into three parts, the first and second parts at Polo, one containing 106 hectares and 53 ares, and the other containing 65 hectares 19 ares and 50 centares, and the third part in the pueblo of Bocaue, containing 4,158 hectares 9 ares and 66 centares;
- (4) The hacienda of Naic, in the province of Cavite, said to contain 7,922 hectares and 29 ares; and 24 centares;
- (5) The hacienda of Orion, in the province of Bataan, said to contain 2,109 hectares 57 ares and 24 centares;
- (6) The hacienda of Santa Cruz de Malabon, in the province of Cavite, said to contain 8,902 hectares 37 ares and 50 centares;
- (7) The hacienda of Santa Maria de Pandi, in the province of Bulacan, said to contain 12,069 hectares 57 ares and 2 centares;
- (8) The hacienda of Santa Rosa, in the province of Laguna, said to contain 4,750 hectares 14 ares and 24 centares; and,

In addition, a parcel of land in Toro, in the province of Bulacan, said to contain 58 hectares 23 ares and 30 centares, which is really part of either the hacienda of Lolomboy or that of Santa Maria de Pandi;

Reserving therefrom the casa hacienda and camarine in the hacienda and pueblo of Santa Rosa in the province of Laguna, including the land enclosed within the walls surrounding said casa and camarine and two hundred hectares of first-class agricultural land therein to be selected by the agent of the Philippine Sugar Estates Development Company (Limited), in reasonably compact form near the casa hacienda, and selected so as to interfere with the use of the rest of the estate by the Philippine Government as little as possible and so as not to include any part of the poblacion but only agricultural land; reserving also the casa Majala on the mountain side of the Calamba estate, together with eight hundred hectares of cultivated sugar lands extending from the casa Majala toward the town of Calamba, to be selected, by the company's agent in as near a compact tract as practicable and so as not to interfere with the use of the remainder of the estate by the Philippine Government. The reservation of neither of these tracts is to include the source of water supply for the estate from which reserved, and is not to be used by the Philippine Sugar Estates Development Company (Limited), or any successor in title, to the prejudice of the government of the Philippine Islands or any successor in title to the lands hereby conveyed so far as the use of water thereon and the present system of irrigation is concerned, which shall be continued for the benefit of both parties herein in accordance with the law and customs of the Philippines in the year 1898.

This sale and conveyance shall include all the dwelling houses, farmhouses, warehouses, camarines and other buildings, irrigation work, dams, tunnels, ditches and all other improvements, together with all water and other rights and all hereditaments belonging to the company on every part of the estates hereby agreed to be conveyed, except the two houses expressly reserved above, and also excepting a camarine in the población of Orion in the province of Bataan, and a camarine in the población of Calamba, which belonged to the Philippine Sugar Estates Development Company, Limited, but were not valued by Villegas, the surveyor, in the survey hereinafter referred to, from ignorance that they belonged to the company. The land upon which the camarines of Orion and Calamba stand is not included in this conveyance.

It is understood that the Philippine Sugar Estates Development Company, Limited, has sold upward of four hundred hectares of sugar land in the Calamba estate, which is to be included in the eight hundred hectares herein reserved to the company and to be satisfied out of the same. It is also understood that the company has sold ten hectares, more or less, with a rice mill thereon, in Biñan, and town lots in Biñan, Calamba, and Santa Cruz. To make up for this amount and for the two lots in Orion and Calamba, upon which stand the camarines mentioned above, the said company agrees to reduce the reservation of two hundred hectares in Santa Rosa by the amount thus sold in Biñan, Calamba, and Santa Cruz, and by the amount retained in Orion and Calamba.

The Philippine Sugar Estates Development Company, Limited, agrees that it has good and merchantable titles to all the lands and buildings hereby conveyed, duly registered according to the laws of the Philippine Islands; that it will produce evidence of the same for examination by counsel for the Philippine government as soon as practicable after the signing of this contract, and that it will convey such lands and buildings absolutely and in fee simple in accordance with this contract by a good and sufficient deed of general warranty of title to the Philippine government. The Philippine Sugar Estates Development Company, Limited, further agrees to furnish to the Philippine government all its books, papers, and other documents which it has, either in possession or under its control, bearing upon its ownership, or the ownership of its predecessors in title, of the lands herein agreed to be conveyed, which shall, in the opinion of the counsel for the Philippine government, be useful to such government in determining who are the rightful tenants on the property, and in showing, in cases of litigation, the lawful and peaceable possession of the Philippine Sugar Estates Development Company, Limited, or its predecessors in title, and especially in showing the lawful and peaceable possession of the Dominican Order of the Philippines during the sovereignty of Spain. The Philippine Sugar Estates Development Company, Limited, further agrees to aid the Philippine government in every way by procuring oral or documentary evidence needed in confirming the title hereby conveyed, or by showing where such evidence can be procured. The Philippine Sugar Estates Development Company, Limited, further agrees that the Philippine government may, at its own expense, make such surveys of any of the haciendas as it sees fit in order to determine whether the superficial area of any hacienda according to the description thereof in the title deeds is the same as that stated in the above-mentioned list of haciendas and parcels.

The Philippine Sugar Estates Development Company, Limited, also hereby agrees to assign and transfer to the government of the Philippine Islands all claims for rents for use of land or buildings herein agreed to be conveyed due to the Philippine Sugar Estates Development Company, Limited, or its predecessors in title, from tenants thereof which are now uncollected, together with all claims for rents accruing between the date hereof and the consummation of the sale herein agreed to be made, except such rents as may be owing by the United States Government to the said company for occupation of its houses by United States troops.

It is understood that this contract is based upon a series of surveys made by a surveyor named Juan Villegas during the years 1901 and 1902 at the instance of the government of the Philippine Islands, in which he classified and appraised the lands of the Philippine Sugar Estates Development Company, Limited, herein agreed to be conveyed; that on the basis of this survey, classification, and appraisal, the civil governor, on behalf of the government of the Philippine Islands, by letter to Monsignor Jean Baptiste Guidi, Archbishop of Stauropoli and apostolic delegate to the Philippine Islands, dated July 5, 1903, made an offer to purchase the lands above described at the prices fixed by Villegas in Mexican currency reduced to gold at the ratio of two to one, and this letter of the civil governor, together with the list of estates of the Dominicans so called, which accompanied the letter and the surveys of Villegas of said estates, is hereby, for the better understanding of this contract, made part hereof as an exhibit by reference, it being understood that the estate of San Juan del Monte mentioned in the list as belonging to the Dominicans was never conveyed to the Philippine Sugar Estates Development Company, Limited, and is not owned by the said company and is not included in this agreement to sell.

In consideration of the sale and conveyance of the lands and buildings and the assignment of the claims for rent, all as above described, the government of the Philippine Islands agrees to pay to the Philippine Sugar Estates Development Company, Limited, the sum of three million six hundred seventy-one thousand six hundred and fifty-seven dollars (\$3,671,657), in money of the United States, subject to this proviso: That if the government of the Philippine Islands shall notify the Philippine Sugar Estates Development Company, Limited, that the area of any hacienda that is described in the title deed thereof falls short of the superficial area

thereof, as shown by Villegas's survey of the same, then the parties hereto shall cause a joint survey of the same to be made by an agent of each; and if the true survey shall show the area of the hacienda to be less than that as stated by Villegas in the list hereinbefore set forth, then the price herein agreed to be paid shall be abated by an amount to be ascertained by multiplying the number of hectares short into the average value of a hectare in the hacienda in question as shown by dividing Villegas's total valuation of such hacienda by the total number of hectares contained therein according to his survey, plus twenty-five per cent thereof; and if, on the other hand, the true survey shall show an excess of hectares over the amount reported by Villegas, then the price to be paid shall be increased by an amount ascertained in a similar manner.

In addition to the foregoing considerations the Philippine government also stipulates that the Philippine Sugar Estates Development Company, Limited, shall be acquitted of the obligation to pay all the uncollected land taxes on the lands, buildings, and other improvements herein agreed to be conveyed to the Philippine government which are due to the provinces or the municipalities in which the same are respectively situate.

It is understood that the government of the Philippine Islands, in order to pay the purchase price hereof, is obliged to sell its bonds under and by virtue of the authority of section 64 of the act of Congress of the United States, approved July 1, 1902, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes."

The government of the Philippine Islands agrees to make every effort to sell the bonds and obtain the proceeds as soon as is practicable, and the time for the consummation of this contract by the conveyance of a good and marketable title by the Philippine Sugar Estates Development Company, Limited, and the payment of the purchase price by the government of the Philippine Islands is fixed as of the end of the period within which such bonds may be engraved, advertised, sold, and the proceeds thereof realized, and the necessary surveys and necessary investigation of the title be made by prompt action of the Philippine government, not exceeding six months from the date of this contract.

In witness whereof, the two parties to this agreement hereunto affix their signatures, the Philippine Sugar Estates Development Company, Limited, acting by Francisco Gutierrez, the attorney in fact of said company, as shown by the attached power of attorney, and the government of the Philippine Islands by Wm. H. Taft, civil governor, whose authority is shown by a certified copy of a resolution of the Philippine Commission, also hereto attached.

(Sgd.)

THE PHILIPPINE SUGAR ESTATES  
DEVELOPMENT COMPANY, LIMITED,  
By FRANCO. GUTIERREZ, *Attorney in Fact.*

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
By WM. H. TAFT, *Civil Governor.*

JEAN BAPTIST GUIDI,  
*Archbishop of Stauropoli, Apostolic Delegate.*  
A. W. FERGUSON.

## EXHIBIT I.

### REPORT ON RELIGIOUS CONTROVERSIES.

[Cases numbered from 1 to 108, inclusive. Exhibits numbered from 1 to 48, inclusive.]

#### A SYNOPSIS OF THE CASES OF RELIGIOUS CONTROVERSY AND QUESTIONS IN WHICH THE MATTER OF RELIGION IS INVOLVED, ARISING IN THE PHILIPPINE ISLANDS, CALLING FOR ACTION BY THE EXECUTIVE DEPARTMENT OF THE CIVIL GOVERNMENT OF THE ISLANDS, AND STATEMENT OF THE ACTION TAKEN THEREON.

1. ILOILO, ILOILO.—*No date.*—Bishop of Jaro presents in person to the civil governor a petition to the Commission asking that the seminary of Jaro be vacated by the American troops and returned to him as the representative of the Catholic Church.

*May 25, 1901.*—Referred to the military governor of the islands, with request that investigation be made by the military authorities as to the title to the said seminary.

*August 30, 1901.*—Returned to the civil governor, with reports of various military officers.

*September 4, 1901.*—Referred to the attorney-general for opinion as to whether the facts shown do not seem to entitle the Catholic Church to possession of the property.

*September 7, 1901.*—Solicitor-general renders opinion that the claim of the Catholic Church to title is not clearly shown. The record in this case is copied in full and attached hereto and marked "Exhibit No. 1." (No. 936.)

2. ILOILO, ILOILO.—*January 24, 1902.*—The presbyter of the congregation of San Vicente de Paul reports that seditious cries and jeers were uttered against himself and fellow priests in Iloilo and Jaro. States that he was refused protection by the military.

*January 29, 1902.*—Acting civil governor, in a letter to the provincial governor, urges the use of all possible means for the keeping of the peace, and outlines the principles underlying the American policy of separation of church and state. This letter is copied in full and attached hereto and marked "Exhibit No. 2."

*February 10, 1902.*—A copy of this letter was furnished to the chief of the Philippines constabulary, with the request that all constabulary officers be advised of the status of affairs between the church and the state, in order that there might be no confusion in that regard. Copy also furnished to the presbyter of the congregation of San Vicente de Paul for his information.

*March 7, 1902.*—Provincial governor transmits testimony and report of investigation, and states that the complaint put the matter in a light which did injustice to the accused persons, as the assembly was an entirely peaceable one and offered no violence. Cites other instances to show that the municipal authorities are using every effort to prevent such lawlessness as that complained of. (No. 6598-A1 to A3, inclusive.)

3. SAN PEDRO, ANTIQUE.—*February 18, 1903.*—Municipal president forwards for the information of the civil governor a report of the conditions existing in his municipality with reference to the question of religion, his letter leaving the inference that he is having or expects to have trouble along that line.

*April 18, 1903.*—Civil governor in reply states briefly the duties of the municipal president, and refers him to former instructions. This letter is copied in full and attached hereto and marked "Exhibit No. 3." (No. 22107).

4. LAMBUNAO, ILOILO.—*July 17, 1902.*—Parish priest complains of persecution by three councilors of his town, stating that they have prevented children from attending the parish school, fined him twice wrongfully, and prohibited the admitting of corpses into the church.

*August 18, 1902.*—Referred to the provincial governor for investigation and report, and for proper action to prevent a recurrence of such wrongs if it should be found that the same had been committed.

*September 9, 1902.*—Municipal president reports that no abuses against the person of the priest or any other Catholic have been noted; that, when the public school was opened the municipal police were instructed to see that all children attended same; and that the priest was fined for an infraction of the law.

*January 16, 1903.*—Referred by the executive secretary to the provincial board of Iloilo, with statement that the action of the municipal council compelling children to attend the public school, and thus indirectly preventing their attendance at the parochial school, was contrary to law; that the ordinance prohibiting the introduction of corpses into the church, etc., was legal only if drafted and recommended by the municipal board of health; and that the municipal council was not empowered to collect fees or taxes on religious ceremonies, and that such ordinance was illegal. The provincial board was instructed to make necessary representations to the municipal council. This letter is copied in full and attached hereto and marked "Exhibit No. 4."

*July 2, 1903.*—Provincial secretary forwards copy of the withdrawal of the charges by A. P. Cotton, attorney for the parish priest, and favors the dismissal of the case. Accordingly dismissed. (No. 12544 to A1.)

5. JANIUAY, ILOILO.—*April 6, 1903.*—The apostolic delegate forwards to the civil governor a letter from the parish priest of Valladolid, Iloilo, stating that Aglipay has used threats and other undue and unlawful influence to get the parish priest of Janiuay to join his movement.

*April 9, 1903.*—Civil governor replies that, while the conduct of Señor Aglipay may be subject to severe criticism on the ground of taste and morality, the facts as set forth in the statement of the priest do not warrant executive action. The letter of the parish priest and the civil governor's reply to the letter of the apostolic delegate are written in full and attached hereto and marked "Exhibit No. 5." (No. 24132.)

6. SAN JOSE DE BUENAVISTA, ANTIQUE.—*January 17, 1902.*—Provincial governor forwards petition, signed by numerous residents of San Jose, asking for the expulsion of Friar Josac Giraldez, also his reply to the petitioners. The reply was in substance the same as the instructions sent out by the civil governor.

*January 30, 1902.*—Executive secretary, by direction of the civil governor, commends provincial governor's reply.

*January 24, 1902.*—Provincial governor transmits petitions from citizens of San Josac counter to the former petition.

*February 6, 1902.*—Acting civil governor, in a letter to the provincial governor, commends the latter's clear and forcible expression of the attitude of the government toward the religious question. The letter of the provincial governor and the commendatory letter of the acting civil governor are copied in full and attached hereto and marked "Exhibit No. 6." (No. 6764—A1 to A3, inclusive.)

7. BUGASON, ANTIQUE.—*June 18, 1902.*—Provincial supervisor forwards to the acting civil governor copy of a letter from the municipal president of Bugason to the parish priest, dated June 11, ordering the latter to leave the town, and stating that if he did not he would be removed by force. The records show nothing further with regard to this case, but it is evident that the threat of the municipal president was not carried into effect. This and similar cases are treated of in the civil governor's public letter to the provincial governor of Tarlac, dated July 31, 1901, and in circular letters to provincial governors. (No. 10909.)

8. PROVINCE OF CAPIZ.—*January 29, 1903.*—Eight petitions from residents of various municipalities in the province, containing in all 496 signatures and requesting the expulsion of the friars from the Philippines, were received.

*March 7, 1903.*—Petition received, dated Ibajay, Capiz, January 1, 1903, protesting against the return of the friars to the pueblo and requesting that all religious corporations be expelled from the islands. These papers were referred to the apostolic delegate for his information. (No. 20520—A1 and A2.)

9. ROMBLON, ROMBLON.—*August 16, 1901.*—Provincial governor states that the bishop of Jaro is using his position in the Catholic Church to influence the action of the municipal authorities of Romblon, who are Catholics, by threats of severe ecclesiastical penalties in case of failure to comply with his wishes. Incloses letter from the bishop to the municipal authorities; also their reply. The letter of the bishop of Jaro is copied in full and attached hereto and marked "Exhibit No. 7." (No. 1968.)

10. ROMBLON, ROMBLON.—*February 16, 1903.*—Provincial governor states conditions in his province between municipalities and church, and asks for advice in case of future disagreement.

*March 7, 1903.*—Informed that the policy of the executive branch of the govern-

ment is to recognize the right of the last peaceable possessor and to protect him in his possession. The letter of instruction herein referred to is copied in full and attached hereto and marked "Exhibit No. 8." (No. 22204.)

11. ILAGAN, ISABELA.—*December 30, 1901.*—Provincial governor, in a circular to all municipal presidents, requests them to pass ordinances with a view to keeping cemeteries in an improved and sanitary condition.

*February 15, 1902.*—Provincial governor calls the attention of the municipal president of Ilagan to former circular, and instructs him to have the cemetery in his town cleaned, and to present the bill therefor to the parish priest.

*February 17, 1902.*—Provincial governor writes to the archbishop of the Philippine Islands, not, however, as governor, but as a private citizen, relative to abuses by parish priests in the way of excessive charges, etc., and suggests a remedy. The letters in this case are copied in full and attached hereto, and marked "Exhibit No. 9." (No. 6287 to A1, and 7747.)

12. CEBU, CEBU.—*September 13, 1901.*—Provincial governor forwards copy of resolutions of the provincial board, which request, among other things, the expulsion of the friars from the islands. (No. 2964-A1 to A3, inclusive.)

13. CEBU, CEBU.—*July 2, 1902.*—L. J. Carlock, judge of the court of first instance, orders that the bells of the Catholic church adjoining the court room be not tolled during office hours of the court, and threatens to proceed against the director for contempt if order is not obeyed.

*July 9, 1902.*—Rev. W. D. McKinnon forwards to the civil governor a copy of the order, stating that he believes it to be an unwarrantable interference on the part of the court, as the bells are not large, and therefore can hardly be a nuisance.

*August 12, 1902.*—The secretary of finance and justice, in a letter to the judge of the court, states that the facts as set forth by Father McKinnon seem to justify the complaint, and asks that more conciliatory measures be used in the future in dealing with such matters. (No. 12342 to A1.)

14. CEBU, TALAMBAN, TALISAY, AND MINGLANILLA, IN THE PROVINCE OF CEBU.—*November 17, 1902.*—Eighty-two residents of the four towns petition that, in case of accession by the government of friar properties in Cebu, they be given an opportunity to present their claim for adjudication in the courts. Also present protest formerly prepared against the alleged title of the friars to said lands.

*February 20, 1903.*—Eighteen residents of the same towns refer to former petition, and present a new one covering practically the same ground. (No. 18903 to A1.)

15. CEBU, CEBU.—*July 18, 1903.*—Procurator of the Recoletos in Manila requests the return of \$908.25 gold, which was imposed for municipal taxes on the convent in Cebu while same was occupied by the military. The civil governor recommended to the provincial treasurer of Cebu that the collection of the taxes in question be deferred until after the payment of rent by the military for the use of the convent. (No. 28034.)

16. SAN NICOLAS, CEBU.—*March 18, 1903.*—Acting provincial governor forwards copy of protest against the action of the municipality of San Nicolas in imposing an exorbitant and illegal tax upon the cemetery of the town belonging to the church.

*March 26, 1903.*—Referred to the attorney-general for opinion.

*April 3, 1903.*—Opinion rendered that the municipality has the right to impose such tax. On June 1, 1903, however, in the case of the Catholic cemetery at Vigan, Ilocos Sur, which is similar to the above, an opinion was rendered by the acting secretary of finance and justice, and concurred in by the secretary of the interior and the civil governor, declaring such privilege rental or tax illegal. (See Case No. 48; Exhibit No. 28.)

17. ZAMBOANGA, MINDANAO.—*September 2, 1902.*—Division superintendent of schools, in a letter to the secretary of public instruction, Mr. Bernard Moses, states that the Jesuit priests are engaged in seditious practices and machinations against the plans of the government and seriously interfering with the progress of school work in his district.

*September 17, 1902.*—Referred to the civil governor, who in an indorsement stated that he believed there was no ground for the fears of a conspiracy entertained by the district superintendent. Letter of the secretary of public instruction, quoting this indorsement, is copied in full and attached hereto and marked "Exhibit No. 10."

*September 24, 1902.*—District superintendent notified of the civil governor's indorsement and instructed to comport himself accordingly. (No. 14718.)

18. BOAC, MARINDUQUE.—*June 25, 1902.*—Provincial board wires that provincial government is occupying convent, which action is opposed by Bishop Martin; asks if same should be given up without investigation of title.

*June 26, 1902.*—Executive secretary by telegram directs that the convent be returned to the church authorities, and that if the province claims title it should present its claim in court.

*June 27, 1902.*—Hartigan, Marple & Solignac state that order to provincial authorities seems not to have been carried out.

*June 28, 1903.*—Executive secretary wires provincial board asking if property has been turned over as previously directed.

*June 28, 1903.*—Provincial board wires that convent was delivered over immediately upon receipt of former order. (No. 10781.)

19. NUEVA CACERES, AMBOS CAMARINES.—*January 18, 1902.*—Provincial governor telegraphs executive secretary, for his information, a true account of the trial and sentence of Praxido Penosa, a native priest, to imprisonment for three months and a fine of \$500 under the sedition law, stating that the local papers have the account badly mixed. The text of the telegram is as follows:

“NUEVA CACERES, CAMARINES SUR, *January, 18, 1902.*

“FERGUSSON, *Executive Secretary, Manila.*

“In court of first instance yesterday, Judge Carson sentenced Praxido Penosa, a native priest, to three months imprisonment and fine of \$500 under sedition law. Sentence was based on finding by the court that accused, in a sermon delivered from his pulpit at Libmanan, Sunday, December 1, 1901, advised his hearers, among other things, not to obey the constituted authorities, as they only desired to exploit them and to destroy their morals, and because they only wanted to be little kings and to call themselves ‘ilustrados’ and wise. A large number of witnesses were called and a strong and able defense made by Mr. Robert Manly, American attorney from Manila, who has entered appeal. This for your information and publication, if you deem proper, as local newspapers have gotten things mixed up.

“Ross, *Governor.*”

(No. 6543 to A1.)

20. NUEVA CACERES, AMBOS CAMARINES.—*December 1, 1902.*—Parish priest complains of refusal of military authorities to vacate the “Episcopal palace” at that place. Upon suggestion by the civil governor, General Davis ordered the building vacated, which was done on February 11, 1903. (No. 18628.)

21. NUEVA CACERES, AMBOS CAMARINES.—*March 3, 1903.*—Provincial governor informs executive secretary that military are intending to vacate the so-called “Bishop’s palace” at that place upon request of the apostolic delegate, but that the property is claimed by the province, and suggests that it be not turned over to the church authorities.

*March 10, 1903.*—Referred to the chief of the bureau of archives, who, on March 14, 1903, reported that the archives showed that the property belonged to the Spanish Government and not to the Church.

*March 14, 1903.*—Referred to the military authorities.

*May 22, 1903.*—The commanding general of the division of the Philippines ordered the property turned over to the representative of the Catholic Church in accordance with the statement of the civil governor that it was to be delivered to the last peaceable possessor.

*June 20, 1903.*—Building was vacated by the military and turned over to the Catholic priest. The letter of the civil governor to the commanding general of the division of the Philippines is copied in full and attached hereto and marked “Exhibit No. 11.” (No. 22370.)

22. NABUA, AMBOS CAMARINES.—*April 7, 1903.*—The apostolic delegate filed a complaint charging the municipal president with “adopting low means to combat the Church and with violating the free exercise of the Catholic cult.”

*April 11, 1903.*—The case was referred to the provincial governor for investigation. A full investigation disclosed the fact that the charges were without foundation, and on

*June 1, 1903.*—The complainant was so informed. The record of this case is copied in full and attached hereto and marked “Exhibit No. 12.” (No. 24156.)

23. PALANOG, MASBATE.—*July 2, 1902.*—Municipal president forwards copy of petition of parish priest, favorably recommended by the municipal council, requesting the return to the priest of the parish house now occupied by the United States troops.

*July 10, 1902.*—Referred to the major-general commanding division of the Philippines for proper action. (No. 11197.)

*July 14, 1902.*—The commanding general of the Department of North Philippines was directed to vacate the convent at once, and on July 15, 1902, he reported that the necessary orders had been issued to have the building vacated immediately. (No. 11197.)

24. ROSARIO, BATANGAS.—*July 8, 1903.*—Parish priest complains that municipality has taken possession of real estate belonging to the Church.

*July 10, 1903.*—Referred to the provincial governor "for prompt investigation and report."

*August 5, 1903.*—Provincial governor reports that the property in question does not belong to the Church, and that it is and always has been in the peaceful possession of the village of Rosario.

*August 15, 1903.*—Hartigan, Marple, Solignac, McCabe, and Gutierrez were notified of the provincial governor's report, and told that the Church might resort to the courts to show its right to the property. (No. 28778.)

25. TARLAC, TARLAC.—*July 31, 1901.*—The parish priest of Tarlac complains verbally to the civil governor that the municipal council of his town has attempted to regulate by ordinance the fees which he should charge for the performance of religious functions. The civil governor takes this occasion to point out, in a public letter to the provincial governor of Tarlac, the fundamental error of the municipal council in the matter above referred to, and to give such general information on the matter of the attitude of the government in religious controversies as will guide provincial and municipal officers in the future conduct of such matters. This letter is copied in full and attached hereto and marked "Exhibit No. 13."

*August 8, 1901.*—The municipal council protests against the placing of the matter in the light in which it was placed by the parish priest, stating that it had simply called the attention of the priest to the advisability of charging a smaller fee. The record also shows a letter of the parish priest justifying his complaint. (No. 1103-A1 to A9, inclusive.)

26. TARLAC, TARLAC.—*April 24, 1902.*—The municipal council of Victoria, Tarlac, passed a resolution ordering the closing of the Catholic cemetery and forbidding interments therein. Parish priest protests against enforcement of this order.

*April 28, 1902.*—Provincial fiscal renders an opinion that the municipal council is empowered to establish a municipal cemetery, but not to override the rights of the Catholic church by such unjust legislation.

*July 7, 1902.*—Thomas L. Hartigan, attorney, submits to the civil governor copies of the papers in the above matter and asks that the action of the municipal council be disapproved.

*July 8, 1902.*—Acting civil governor confirms opinion of the provincial fiscal, and requests the provincial governor to notify the municipal council that its action was evidently unjust and in excess of its authority. Refers to letter of civil governor to Capt. Wallis O. Clark, former governor of Tarlac, which is mentioned in the preceding case as "Exhibit No. 13," and states that a repetition by the municipal council of such action as that complained of will furnish proper grounds for suspending them from office. (No. 11013-A1 to A3, inclusive.)

27. VICTORIA, TARLAC.—*August 27, 1902.*—The president, vice-president, one councilor, the justice of the peace, and the auxiliary justice of the peace were charged with taking advantage of their respective official positions to insult a minister of the Roman Catholic Church.

*September 22, 1902.*—The accused officers were dismissed from office. The record of this case is copied in full and attached hereto and marked "Exhibit No. 14." (No. 14578.)

28. VICTORIA, TARLAC.—*November 7, 1902.*—Civil governor telegraphs to provincial governor that he has been advised that an attempt will be made to dispossess the parish priest of Victoria of the church and convento by force and put into possession a representative of the National Filipino Church, and requests his cooperation in order to prevent any such unlawful proceeding. States that the representatives of the civil government are not to interfere unless one or other of the parties violates the law or disturbs the peace; and that, if the parish priest in the town is in peaceful possession representing the Roman Catholic Church, the claim of the Filipino Church or its representatives may be presented in court.

*November 10, 1902.*—Provincial governor states everything quiet; that people being Ilocanos, prefer an Ilocano priest, but that there seems to be no likelihood that they will attempt to oust the Roman Catholic priest. (No. 17095 to A1.)

29. BAGUIO, BENGUET.—*June 5, 1903.*—Rev. Jos   Algu  , by direction of the superior of the Jesuit mission, applies for concession of a tract of land in and around Baguio, known as "El Mirador," to be used as a site for a sanitarium for the order.

*June 10, 1903.*—Referred to the Commission and Father Algu   notified thereof by the civil governor. Latter also states that he believes the Commission would grant the concession if it had the power. (No. 27397.)

30. DARAGA, ALBAY.—*June 29, 1902.*—Municipal vice-president, treasurer, secretary, and councilors of Daraga, and others, protest against the designation of a friar as parish priest and request intervention by the civil authorities.

*August 29, 1902.*—Referred to Thomas L. Hartigan, counsel for the bishop-administrator of the archdiocese of Manila.

*September 26, 1902.*—The same officials and other persons request governmental action against the retention of the friars in the pueblo.

*September 30, 1902.*—Referred to T. L. Hartigan. (No. 11663-A1 to A3, inclusive.)

31. LUCENA, TAYABAS.—*June 26, 1903.*—Provincial governor states that a priest in the province refuses to give to the municipal secretary a list of marriages, births, and deaths, and asks what course is to be pursued to secure same.

*June 27, 1903.*—Informed that it is the duty of the municipal secretary to keep a record, which if properly kept would furnish him the material for such a list without reference to the parish priest. Copy of this letter is attached hereto and marked "Exhibit No. 15." (No. 28177.)

32. BOCAUE, BULACAN.—*November 8, 1902.*—Catholic Truth Society, of San Francisco, Cal., calls attention of the civil governor to a letter published in the Gazette, of Galena, Ill., under date of October 23, 1902, and signed by G. M. Palmer, a teacher in the public school department of the Philippines, and protests against his using his official position to engage in the proselytizing business.

*December 24, 1902.*—Referred to the general superintendent of education for action.

*January 13, 1903.*—Returned to the secretary of public instruction, with statement of action taken, and the further statement that Mr. Palmer seems to think his conduct justifiable.

*January 19, 1903.*—Returned to the civil governor, with indorsement by the secretary of public instruction.

*February 13, 1903.*—Returned to the secretary of public instruction, with indorsement by the civil governor. The record of this case is copied in full and attached hereto and marked "Exhibit No. 16." (No. 18782.)

*February 17, 1903.*—Referred to the general superintendent of education, inviting attention to the two preceding indorsements.

*February 20, 1903.*—Papers returned with the report that Mr. Palmer has been reprimanded and transferred to another post, and that a circular on the subject has been sent to all the teachers in the islands. (No. 18782.)

33. PITPITAN, BULACAN.—*February 11, 1903.*—Parish priest states that it is persistently rumored that the priest of the Independent Filipino Church proposes to conduct services in the chapel at Pitpitan.

*February 17, 1903.*—Advised by acting executive secretary that if he wishes to retain the chapel he should put some person in possession of it. (No. 21511.)

34. POLO, BULACAN.—*March 16, 1903.*—Complaint submitted to the civil governor against certain municipal officials of Polo for violation of the Catholic cemetery of the town.

*March 20, 1903.*—Civil governor transmits complaint to the provincial governor for investigation and report, and recommends that, if the facts are found to be as stated in the complaint, the officials involved be removed from office and the provincial fiscal directed to prosecute them.

*March 30, 1903.*—Executive secretary telegraphs provincial governor that no report has been received and urges that action be expedited. Provincial governor in reply states absolutely impossible to hurry more than he is doing.

*May 1, 1903.*—Provincial governor states that results of investigation will be submitted to the provincial board for judgment at its meeting of the 11th instant.

*May 11, 1903.*—Provincial board recommends the removal from office of the vice-president, who was acting president at the time of the violation complained of.

*May 14, 1903.*—Provincial governor formally removes the vice-president from office, and this action was concurred in by the civil governor. Part of the record in this case is copied and attached hereto and marked "Exhibit No. 17." (No. 23279-A1 to A8, inclusive.)

35. SAN RAFAEL, BULACAN.—*March 8, 1903.*—Parish priest complains that the municipal president has caused to be buried in the Catholic cemetery the body of a Protestant, and that he made an undue show of force in doing so. Requests that the body be taken out at the president's expense and that the latter give public satisfaction. The above complaint was presented to the justice of the peace.

*March 8, 1903.*—Justice of the peace states that, on account of the gravity of the case, he refuses to take action thereon, thereby furnishing means for speedy appeal to higher authority.

*March 11, 1903.*—Submitted to the civil governor.

*March 14, 1903.*—Referred to the provincial governor, with the statement that, if the facts are as set forth in the complaint, the municipal president should be removed, and with request for investigation and report.

*April 11, 1903.*—Provincial governor reports that investigation shows that the ground in which the corpse of the Protestant was buried is not a part of the Catholic cemetery. Further statements were put forth by the complainant, and the papers

were again referred to the provincial governor for investigation and report. Report was made substantiating the former one, and the papers were, on

*June 13, 1903*, referred to Hartigan, Marple, Solignac, McCabe, and Gutierrez, with the statement that the cemetery in which the corpse was buried seems to have been in the possession of the municipality, and that the Roman Catholic Church, therefore, if it claims title, may present such claim in the courts. The record of this case is copied and attached hereto and marked "Exhibit No. 18." (No. 22926.)

36. LILIO, LA LAGUNA.—*July 9, 1902*.—T. L. Hartigan transmits copy of a resolution of the municipal council imposing a tax on the ringing of church bells for private parties.

*July 14, 1902*.—Acting civil governor refers papers to provincial governor, saying that if the facts are as stated the municipal council has exceeded its authority, and requesting him to see that the ordinance is repealed. Copy of this letter is attached hereto and marked "Exhibit No. 19." (No. 11259.)

37. CAVITE, CAVITE.—*October 24, 1901*.—Provincial secretary transmits, for the information of the Commission, a resolution adopted by the municipal presidentes of the province at their quarterly meeting in Cavite, expressing their opinion that the question of the friars should be promptly and effectively settled. Copy of this resolution is attached hereto and marked "Exhibit No. 20."

*May 3, 1901*.—Florentin Rallos and 17 others of Cavite province petitioned the civil governor for the expulsion of 6 Augustinian and 2 Recoleta friars recently arrived there. State that they have received civil governor's information that he can not expel the friars, and set forth what seem to them urgent reasons why the friars should not be allowed to remain. (No. 2964-A1 to A3, inclusive.)

38. IMUS, CAVITE.—*October 11, 1901*.—Municipal president forwards a communication from the committee having in charge the conduct of a lawsuit against the Recoleta friars, stating that an American surveyor has been going over the ground with two soldiers, and that his action affects the outcome of the suit. Protest against military escort being allowed. Copy of the record of this case is attached hereto and marked "Exhibit No. 21."

*October 15, 1901*.—Referred to the military governor.

*November 14, 1901*.—Returned with the statement that there seems to be no ground for the complaint. (No. 3751.)

39. LA CARIDAD, CAVITE.—*February 9, 1902*.—Civil governor wires provincial governor that he has been informed forcible possession has been taken of a church in La Caridad which was formerly in possession of a priest of the Roman Catholic Church. States that such dispossession is unlawful and that municipality should present its claim to title in court, and that the provincial governor must see that law and order is preserved.

*November 10, 1902*.—Provincial governor states church is uncompleted and has never been used for any religious purpose. Copy of the record in this case is attached hereto and marked "Exhibit No. 22." (No. 17083 to A1.)

40. CAVITE, SAN ROQUE, AND LA CARIDAD, PROVINCE OF CAVITE.—*June 10, 1902*.—Residents of the three towns petition for the reopening of the Catholic cemetery, which was closed by order of the municipality of La Caridad.

*June 3, 1902*.—Hartigan, Marple, Solignac, McCabe, and Gutierrez complain of the action of the municipal board of La Caridad in the matter above referred to.

*June 28, 1902*.—Civil governor, in a letter to the provincial governor, states that if the facts are as set out in the complaints, the municipal board has usurped rights not properly belonging to it, and directs investigation and report at the earliest practicable moment.

*August 27, 1902*.—Executive secretary calls for report.

*September 3, 1902*.—Provincial governor reports that the cemetery was closed as a health measure, as it was in an unhealthy location and condition, and because it was necessary during the cholera epidemic to bury in a cemetery set aside for that special purpose. The letters in this case are copied in full and attached hereto and marked "Exhibit No. 23." (No. 10850-A1 to A4, inclusive.)

41. SILAN, CAVITE.—*October 7, 1902*.—Hartigan, Marple, Solignac, McCabe, and Gutierrez submit to the civil governor communication from the parish priest of Silan to the archbishop, complaining of the occupation of the convento by the constabulary, and request that the constabulary be directed to return the convento to the priest.

*October 8, 1902*.—Referred to the chief of Philippines constabulary for early investigation and report. After several indorsements by constabulary officers, the papers were, on

*February 20, 1903*, returned to the executive secretary with reports by constabulary officers. The reports were to the effect that the constabulary had been occupying the convento with the apparent good will of the priest, as he had never asked

that it be vacated, but that, upon receipt of the intimation that he desired the building vacated, the constabulary moved out on November 7, 1902.

*February 24, 1903.*—Hartigan, Marple, Solignac, McCabe, and Gutierrez notified. Copy of the record in this case is attached hereto and marked "Exhibit No. 24." (No. 15442.)

42. BACOR, CAVITE.—*December 17, 1902.*—Civil governor telegraphs provincial governor that the bishop of Cebu informs him that the parish priest heretofore in charge of the church at Bacor has left the Roman Catholic faith; that the bishop has ordered him to turn over the church to another Roman Catholic priest; that the former priest has left the church, and that the municipal authorities are in control of same. States that he believes the property rightfully belongs to the Roman Catholic Church, and requests the provincial governor to be governed accordingly in dealing with the matter.

*December 20, 1902.*—Civil governor wires provincial governor that Aglipay has asked to be allowed to submit testimony in the case, and directs that the status quo be preserved until further orders.

*December 29, 1902.*—Hartigan, Marple, Solignac, McCabe, and Gutierrez transmit to the civil governor certified copy of an affidavit made by the former parish priest, declaring that it destroys his claim to the church, and ask that the order of December 20 be revoked.

*January 7, 1903.*—Acting executive secretary calls for full report from the municipal president.

*February 2, 1903.*—Municipal president states that he never took possession of the church, but simply stationed guards there to prevent disturbance, and that the same condition of affairs still continues.

*February 9, 1903.*—Provincial governor directed to advise municipal president to let the matter stand exactly as it is at present, as the right of possession will have to be established in the courts. Copies of the letters in this case are attached hereto and marked "Exhibit No. 25." (No. 18625-A1 to A3, inclusive.)

43. TERNATE (NEAR MARAGONDON), CAVITE.—*February 13, 1903.*—Hartigan, Marple, Solignac, McCabe, and Gutierrez forward, in accordance with verbal instructions of the civil governor, (1) certified copy of the records of the office of the justice of the peace of Ternate, dated January 31, 1903, which shows that the municipal president required the justice of the peace to approve the delivery of the key to the church to the president in order that the latter might deliver same to the representative of Señor Aglipay when said representative should arrive in the pueblo; (2) copy of a letter from the parish priest, dated January 31, to the municipal president, asking to be reinstated in the possession of the church, and reply of the president refusing to do so; and (3) copy of a telegram from the provincial secretary to the municipal president that he should have respected the right of the priest to peaceable possession of the property.

*February 13, 1903.*—Civil governor suspends justice of the peace by telegram.

*February 14, 1903.*—Civil governor orders provincial governor to suspend the municipal president until the latter returns the keys of the church to the Roman Catholic priest, and states that thereafter the municipality may present its claim to title in the courts.

*February 15, 1903.*—Provincial governor reports municipal president and justice of the peace suspended.

*February 20, 1903.*—Acting executive secretary telegraphs civil governor at Cebu, Cebu, stating that he and the solicitor-general went to Ternate on the 19th and interviewed the suspended president and justice of the peace and several principales, and that he is awaiting the return of the sacristan of the church to complete the testimony.

*February 21, 1903.*—Acting executive secretary, in a letter to T. L. Hartigan, urgently requests that the sacristan be found if possible, as he wishes to settle the matter promptly and before the return of the civil governor.

*February 24, 1903.*—Provincial governor submits report, with exhibits, and gives a history of the town and the church.

*February 28, 1903.*—Acting executive secretary informs provincial board of the suspension of the justice of the peace and the charge against him, and directs the board to take action in accordance with act No. 314, which act prescribes the method of procedure in such cases.

*March 7, 1903.*—Civil governor, in a letter to the solicitor-general, requests him to notify the president and justice of the peace that if they will turn over the keys of the church to the priest he will forgive them, but that otherwise he will have them prosecuted to the full extent of the law.

*March 10, 1903.*—Provincial secretary wires that investigation against justice of the peace will take place on March 13. Acting executive secretary wires provincial

board that, unless there are difficulties preventing, the charges against the president should also be heard on the 13th.

*March 9, 1903.*—Papers referred by the civil governor to the solicitor-general.

*March —, 1903.*—Provincial secretary forwards resolutions of the provincial board, adopted March 13, 1903, and the recommendation of the board that the municipal president and justice of the peace be removed from office.

*March 18, 1903.*—Solicitor-general directs the provincial fiscal to prosecute the ex-municipal president and ex-justice of the peace in the court of first instance, and gives detailed instructions for the conduct of the prosecution.

*May 27, 1903.*—Solicitor-general wires provincial fiscal to find out if the keys have yet been delivered to the priest.

*July 17, 1903.*—Provincial fiscal reports that, on account of the promises of the ex-officials that they would deliver to him the keys of the church, he had deferred action, but that on June 13, the promise not having been carried out, he filed indictment against them in the court of first instance; that on July 3, 1903, the two accused appeared before the court, but that the parish priest, though summoned, did not appear; that, by order of the court, the keys of the church were delivered to the clerk of the court for the province, and the priest, Father Villafranca, notified that he could obtain the keys from said clerk of the court. Father Villafranca had not called for the keys to date.

*July 23, 1903.*—Solicitor-general returns papers to the civil governor, with statement of action taken by the office of the attorney-general, as indicated above. Copy of the record of this case is attached hereto and marked "Exhibit No. 26." (No. 21362-A1 to A18, inclusive.)

44. BALANGA, BATAAN.—*July 25, 1901.*—Provincial governor forwards request of Catholic priest that the convento now occupied by American troops be turned over to him for his use.

*August 1, 1901.*—Referred to the major-general commanding Division of the Philippines, the civil governor expressing the hope that the request would be complied with if possible. (No 926 to A1.)

45. DINALUPIJAN, BATAAN.—*August 4, 1902.*—Justice of the peace asks how parish priest may be compelled to furnish original certificates of marriage, the priest refusing to furnish same, stating that church and state are now separate. Informed that the priest may not be compelled to do so. (No. 12740.)

46. LAOAG, ILOCOS NORTE.—*October 4, 1901.*—Provincial governor forwards documents in the matter of the proposal made by one of the members of the municipal council, that the cemetery claimed by and now in possession of the municipality be turned over to the church.

*October 17, 1901.*—Civil governor replies that the municipal council has no power to cede property of the municipality. Copy of the record of this case is attached hereto and marked "Exhibit No. 27." (No. 3802.)

47. SANTA MARIA, ILOCOS SUR.—*August 12, 1901.*—Municipal president forwards copy of resolutions of the municipal council in which it was resolved, among other things, that the friars should be expelled from the islands. With regard to this and similar petitions, see letters of the civil governor and acting civil governor to provincial governors. (No. 4359.)

48. VIGAN, ILOCOS SUR.—*January 15, 1903.*—Hartigan, Marple, Solignac, McCabe, and Gutierrez state that the municipal authorities have forbidden the authorities of the Catholic Church at Vigan to open a cemetery without first paying a tax or license for the privilege of doing so, and protest against such an interpretation of the municipal code as would declare such a tax legal. After reference to the secretary of finance and justice, to the attorney-general, and to the solicitor-general, on

*June 1, 1903,* the acting secretary of finance and justice rendered an opinion, which was concurred in by the secretary of the interior, and the civil governor, that such privilege rental or tax was illegal. This is the opinion referred to in case No. 16. Copy thereof is attached hereto and marked "Exhibit No. 28." (No. 21220.)

49. GAPAN, NUEVA ECIJA.—*February 15, 1902.*—Bishop Martin complains that the municipal council of Gapan has created a tax to be collected from the church on the biers used for the funerals of persons too poor to have their own coffins. States that the church collects nothing for the use of biers from very poor people and can not afford to pay the tax.

*February 18, 1902.*—Referred to the provincial governor with the statement by the civil governor that if the allegations are true the municipal council has exceeded its authority and should rescind the ordinance.

*May 8, 1902.*—Papers returned with the statement that the ordinance had been passed in accordance with the Spanish text of the municipal code, in which there is found a mistake in the translation, and that the ordinance has been repealed. (No. 7086.)

50. PEÑARANDA, NUEVA ECIJA.—*February 18, 1902.*—Thomas L. Hartigan submits telegram from parish priest of Peñaranda stating that the municipal authorities say he shall cease to administer the church cemetery, which the priest states has been church property for fifteen years and still is. Attorney requests action.

*February 19, 1902.*—Referred to the provincial governor with request for investigation, the civil governor stating that if the allegations are correct the municipal authorities have exceeded their powers and should be so informed. Calls for report.

*June 6, 1902.*—Provincial governor returns papers with report that the cemetery, and all the funds collected thereon while administered by the municipality, have been returned to the church. (No. 7130.)

51. ZARAGOZA, NUEVA ECIJA.—*May 21, 1903.*—There was submitted to the civil governor a letter from the parish priest of Zaragoza complaining that the municipal president refused to restrain an intruding priest from using the church in that pueblo.

*May 23, 1903.*—Referred to the provincial governor for investigation, report, and recommendation.

*June 4, 1903.*—Provincial governor reports that, as there was no breach of the peace involved in the contention of the two priests, he could not intervene officially in the matter. Copy of the provincial governor's report is attached hereto and marked "Exhibit No. 29." (No. 26088.)

52. TUGUEGARAO, CAGAYAN.—*October 28, 1901.*—Provincial supervisor, in a letter to the civil governor, states that the sentiment of the people of the province is strongly against turning over to the friars the property claimed by them. (No. 5351.)

53. TUGUEGARAO, CAGAYAN.—*November 24, 1901.*—Dionisio Cosas, abbot of the Dominican Friars of Tuguegarao, requests that the large building now occupied by the military be returned to the use of the order for school purposes.

*March 29, 1902.*—After reference to the military authorities and a number of indorsements by them, the papers were returned to the acting civil governor with the information that the buildings would be turned over to the religious order as soon as those in course of construction for the use of the military should be completed, which would be within a few weeks.

*April 5, 1902.*—Papers returned to the abbot of the Dominican order at Tuguegarao with the information that the civil governor has no jurisdiction in the matter, and that future communications with regard thereto should be directed to the military authorities.

*January 14, 1902.*—An attorney representing the Dominican order, with reference to the same property, requests that the said property be vacated by the military, and that rent, compensation for repairs, etc., be paid for the time it was occupied by the military. These papers went through the same course as the ones just above referred to and were returned to the acting civil governor at the same time.

*May 28, 1902.*—Executive secretary forwards to the provincial treasurer of Cagayan an excerpt from the minutes of the Commission of May 20, 1903, with regard to the suspension of taxes on property of the Dominican Friars during the time same was occupied by the military and requests statement from provincial treasurer of Cagayan with a view to determining if such a resolution should be passed with regard to the property at Tuguegarao. (No. 5507-A1 to A4, inclusive.)

54. TUGUEGARAO, CAGAYAN.—*May 18, 1902.*—Parish priest complains of certain arbitrary quarantine and sanitary regulations of the provincial board of health affecting the church and of the brutal enforcement of the same by the municipal police.

*June 23, 1902.*—Referred to the commissioner of public health with directions to ascertain the facts.

*June 24, 1902.*—Returned to the executive secretary with the statement that the quarantine has been raised.

*June 23, 1902.*—Acting civil governor wires provincial governor for information in regard to the matter.

*June 24, 1902.*—Parish priest wires withdrawal of complaint.

*August 2, 1902.*—Acting provincial governor reports that the three municipal policemen have been punished for their misconduct in the enforcement of the health ordinance. Copy of this report is attached hereto and marked "Exhibit No. 30." (No. 10346-A1 to A4, inclusive.)

55. TUGUEGARAO, CAGAYAN.—*February 23, 1903.*—Parish priest states that law forbidding burials in the Catholic cemetery is still in force, even though death may not have been due to a contagious disease, and asks that it be repealed.

*March 26, 1903.*—Referred to the provincial board of Cagayan for investigation and proper action. (No. 22998.)

56. TUGUEGARAO, CAGAYAN.—*February 25, 1903.*—Parish priest states that he needs

for parish purposes certain buildings now occupied by the volunteer soldiers and by telegraph and municipal officials, and asks that they be vacated.

*March 18, 1903.*—Acting executive secretary asks that the names of the particular buildings desired be furnished. (No. 22997.)

57. CAGAYAN DE MISAMIS, MINDANAO.—*August 5, 1901.*—Jesuit missionaries in the district complain that the presidents of many pueblos are collecting burial fees which rightfully belong to the church.

*August 9, 1901.*—Civil governor sends to the provincial governor of Misamis a copy of his letter to Capt. Wallis O. Clark, governor of the province of Tarlac, on this question, for the information both of the provincial and municipal government officials and of the Jesuit priests complaining. This is the letter referred to in case No. 25, marked "Exhibit No. 13." (No. 1135 to A1.)

58. JIMENEZ, CAGAYAN DE MISAMIS, MINDANAO.—*November 12, 1901.*—Provincial governor transmits petition, signed by leading officers and residents of the pueblo, against the continued residence therein of two friars recently settled there. Informed by the civil governor that the friars have the same rights in the matter of traveling or living where they choose as any other persons, and that they must be protected in those rights. Copy of this letter is attached hereto and marked "Exhibit No. 31." (No. 5237 to A1.)

59. CAGAYAN DE MISAMIS, MINDANAO.—*June 11, 1902.*—Provincial governor transmits, for the consideration of the Commission, the resolutions adopted by the assembly of municipal presidents at their meeting of October 21, 1901, in which it was resolved, among other things, that the religious corporations should be expelled from the province. (No. 4394 to A1.)

60. ARAYAT, PAMPANGA.—*May 8, 1902.*—President of the provincial board of health wires civil governor asking if municipality has authority to close cemetery against the wishes of local priest. States cemetery at Arayat is full, but priest insists that burials should still take place there.

*May 8, 1902.*—Civil governor wires that the municipality has such right, if the cemetery is a menace to the public health. Copy of the record in this case is attached hereto and marked "Exhibit No. 32." (No. 9199.)

61. SAN LUIS, PAMPANGA.—*June 17, 1901.*—Provincial governor, in a letter to the parish priest of San Luis, acknowledges receipt of a communication from the latter, dated June 16, relative to an order which the municipal president of San Luis alleged was issued by the provincial governor relative to the Catholic cemetery at San Luis, and states that he knows nothing about such an order. The records do not show definitely what this order was.

*July 13, 1901.*—Parish priest requests municipal council to rescind a resolution recently passed by it to the effect that the municipality should take possession of the Catholic cemetery. Petition was refused on same date.

*August 9, 1901.*—Civil governor, in a letter to the provincial governor of Pampanga, states that he is in receipt of a complaint from the parish priest of San Luis against the seizure by the municipality of the Catholic cemetery. Sends the provincial governor a copy of his letter to Capt. Wallis O. Clark, governor of Tarlac, and suggests that he send copies to all municipal presidents in his province. (No. 1132-A1 to A4, inclusive.)

62. SAN LUIS, PAMPANGA.—*November 12, 1901.*—Parish priest writes to the bishop of Cebu, administrator of the archdiocese of Manila, that he has presented for assessment the property of the church in the pueblo, and that the municipal council resolved to take possession of the church property, and refused to allow same to be assessed as the property of the church.

*November 20, 1901.*—Acting civil governor addresses the provincial governor about this and kindred matters. A copy of this communication is attached hereto and marked "Exhibit No. 33." (No. 4932-A1.)

63. SAN LUIS, PAMPANGA.—*September 23, 1902.*—Pablo Leuterio, "representing the citizens of the town of San Luis," forwards to the civil governor copy of a petition, dated May 12, 1902, asking the municipal council to set aside its ordinance for the closing of the Catholic cemetery, and requests that the civil governor intervene in the matter.

*October 13, 1902.*—Civil governor returns petition, calling the attention of the petitioner to the recent passage of a law providing a method of procedure in such cases. Copy of this letter and of part of the law referred to are attached hereto and marked "Exhibit No. 34." (No. 15008.)

64. BACOLOR, PAMPANGA.—*March 12, 1902.*—The provincial vicar of the province of Pampanga forwards to the bishop of Cebu, administrator of the archdiocese of Manila, copy of an order of the provincial board of health of Pampanga prescribing the hours during which church ceremonies may be carried on, stating that in his opinion the order is unjust, and asking for advice.

*April 15, 1902.*—Referred by Hartigan, Marple, and Solignac to the civil governor.

*April 22, 1902.*—Referred to the commissioner of public health. No action taken by him. (No. 8779.)

65. LUBAO, PAMPANGA.—*May 23, 1902.*—Provincial governor forwards, with his favorable comment, a copy of the expression of the municipal council that the presence of a friar recently arrived in the town was dangerous to the tranquility of the same, and asking that he be removed.

*May 30, 1902.*—Acting civil governor states that he will present the matter to the church authorities with a view to having the friar withdrawn, but that in the meantime he must be protected from insult or violence. Requests report as to conditions.

*June 20, 1902.*—Executive secretary, in a letter to the provincial governor, requests that the information asked for in the letter of the acting civil governor of May 30 be furnished without delay.

*June 25, 1902.*—Provincial governor reports that the friars are still in the pueblo of Lubao, and renews his recommendation that steps be taken for their removal. Copy of the acting civil governor's letter of May 30 is attached hereto and marked "Exhibit No. 35." (No. 9619.)

66. MEXICO, PAMPANGA.—*June 1, 1902.*—Parish priest forwards copy of ordinance by the municipal council forbidding the ringing of bells between the hours of 6 p. m. and 5 a. m. on ordinary days, and protests that it is an abuse of power.

*July 14, 1902.*—Acting civil governor, in a letter to the provincial governor, calls attention to previous instructions and states that noninterference in church affairs must be insisted on and should be impressed upon municipal councils in his province.

*August 4, 1902.*—Provincial governor returns papers, stating that, after thorough and painstaking investigation, he believes the municipal council was justified in its action, as the almost continuous ringing of the bells became a nuisance.

*December 10, 1902.*—Parish priest, in a letter to the apostolic delegate, requests that the civil governor be asked to intervene and remove the prohibition against the ringing of the bells at 4 o'clock in the morning for the period just before Christmas.

*December 24, 1902.*—Civil governor returns papers to the apostolic delegate, with the statement that, in view of the circumstances attending the case, the matter must be left to the discretion of the municipal authorities. Copy of part of the record of this case is attached hereto and marked "Exhibit No. 36." (No. 11258.)

67. ANGELES, PAMPANGA.—*August 1, 1902.*—Parish priest requests of the civil governor that the parish house in the town be turned over to him, as he is now living in a private house and paying rent.

*August 5, 1902.*—Referred to the provincial governor for report as to who is now in possession of the house and what use is being made of it. The records show nothing further, as the case was handled verbally. The priest is now and has been since October 1, 1902, in possession of the house. (No. 12054.)

68. SEXMOAN, PAMPANGA.—*August 10, 1902.*—Provincial governor transmits petition, signed by many inhabitants of the town, asking that the friar recently appointed parish priest be removed.

*September 2, 1902.*—Referred to Thomas L. Hartigan.

*August 28, 1902.*—Severo Zorras and 50 others state that municipal president and two other persons, accompanied by five policemen, forced the people of the town to sign the petition above mentioned.

*September 13, 1902.*—Referred to the provincial governor, with request that he make a personal investigation and not trust same to the municipal officials.

*October 10, 1902.*—Provincial governor transmits testimony in the case and his report, showing that the persons who signed the petition against the retention of the friar did so of their own free will.

*September 26, 1902.*—Antonio Dagal and 11 others, "leading residents of Sexmoan," confirm the statements in the petition of August 28 that persons had been compelled to sign the petition against the friars, state that the investigation by the provincial governor was not a fair one, and ask the civil governor to investigate the matter in person; also complain of illegal fines and undue interference in church affairs. (No. 13571—A1 to A3, inclusive.)

69. GUAGUA, PAMPANGA.—*February 2, 1903.*—Parish priest, in a letter to the apostolic delegate, complains that the municipal authorities have taken part in the inviting of Señor Aglipay to the community to say mass, baptize, preach, etc., and begs the intervention of the central government; also incloses copies of notices posted in public places, which he says are an insult to him.

*February 9, 1903.*—Civil governor, in a letter to the apostolic delegate, sets forth the position of the church in this and similar matters. Copy of the record in this case is attached hereto and marked "Exhibit No. 37." (No. 20913.)

70. GUAGUA, PAMPANGA.—The municipal council passed a resolution, ordering that

the Catholic cemetery recently established should be closed. No particular reason for this action is assigned in the resolution.

*July 7, 1903.*—The provincial board declares null and void the resolution of the municipal council, and orders the members of the latter body to allow the exercise of the rights of burial in the new cemetery, for the reason that the cemetery is not a menace to public health.

*July 14, 1903.*—The municipal president and council appeal to the civil governor, asking him to set aside the order of the provincial board; state that the location of the cemetery is healthful, but that it is in the inhabited portion of the town and is overflowed during the rainy season; cite orders from the provincial government ordering the establishment of municipal cemeteries, forbidding the interment of the dead within the centers of population, and other details; claim that the resolution of the municipal council was simply in compliance with these orders, and that the last order of the provincial board is in contradiction of same.

*August 8, 1903.*—Executive secretary notifies the municipal president that there is no appeal in this case from the provincial board, and that the decision of the latter stands. (No. 29160.)

71. CALASIAO, PANGASINAN.—*July 12, 1901.*—Captain of the Seventeenth Infantry reports particulars of the insulting of two Dominican friars on June 28, 1901, stating that the demonstration consisted of the taunts and jeers of a dozen or so native men, women, and children, and that no personal violence was offered; states that the reason he did not report it before was that he considered it unimportant. After passing through the hands of several army officers the papers were, on July 24, 1901, referred to the civil governor for his information. The letter of the civil governor to the provincial governor of Tarlac was sent to the governor of Pangasinan and to the municipal president, and they were told that the instructions contained therein were intended to cover this and similar cases. This is the letter referred to in case No. 25, marked "Exhibit No. 13." (No. 736.)

72. DAGUPAN AND LINGAYEN, PANGASINAN.—*April 11, 1902.*—The Dominicans of the Most Holy Rosary of the Philippines, through their attorney, protest against the collection of taxes on property of the order at the places mentioned above while said property is occupied by the military without payment of rent.

*April 19, 1902.*—Referred to the Commission.

*April 24, 1902.*—The Commission passed a resolution to the effect that the provincial treasurer be instructed to suspend the collection of taxes on the property so long as same should be occupied by the military without payment of rent, and that a copy of the resolution be furnished to the parties interested. The resolution referred to in case No. 53, the application of which to that case was contemplated, was similar to this. (No. 8490.)

73. LINGAYEN, PANGASINAN.—*July 3, 1902.*—The vicar of the province of Pangasinan protests against an order of the municipal president closing the church as a health measure, while other buildings in the pueblo remained open to the public.

*July 10, 1902.*—Referred to the commissioner of public health, with directions that the local board of health be properly informed in the matter, in order that they might rescind or modify the order so as to permit church services.

*August 2, 1902.*—Papers returned with statement that orders have been given to allow churches to be opened. (No. 11129.)

74. BINMALEY, PANGASINAN.—*July 22, 1902.*—Parish priest requests that quarantine be raised, and protests against the closing of the church.

*July 29, 1902.*—Referred to the commissioner of public health for proper action.

*July 30, 1902.*—Papers returned with the information that the quarantine has been discontinued. (No. 11650.)

75. MAAO, OCCIDENTAL NEGROS.—*March 19, 1902.*—Municipal council petitions against allowing friars to return to their former parishes, and states that if they are allowed to return the petitioners will have to secede from the Roman Catholic Church. For action in this and similar cases, see note at the end of case No. 84. (No. 8869.)

76. SILAY, OCCIDENTAL NEGROS.—*July 10, 1902.*—Provincial governor informs civil governor of the manifestation which took place in the pueblo of Silay, caused by the presence of two friars. Incloses copy of a proclamation, issued by him in the premises, for the information of the civil governor. Copy of this proclamation is attached hereto and marked "Exhibit No. 36." (No. 11573.)

77. BAGO, OCCIDENTAL NEGROS.—*October 23, 1901.*—Residents petition for the restoration of the cemetery to the Catholic Church, stating that from time immemorial it had belonged to and been administered by the church until the last three years under the provisional government.

*November 13, 1901.*—Referred to the provincial fiscal of Occidental Negros for

investigation and report. This is one of the cases which was taken up by Vice-Governor Wright during his visit to the island of Negros, and, while the record shows nothing further with regard to it, the matter was definitely settled to the satisfaction of all parties concerned. (No. 4593.)

78. BAGO, OCCIDENTAL NEGROS.—*August 20, 1902.*—Parish priest complains to the provincial governor that the municipal council had failed to take any action on a request of the Catholic League of the town that the parish house be ceded to the church to be used as a residence by the priest.

*September 2, 1902.*—Referred, through the provincial governor, to the municipal authorities for such statement as will enable the civil governor to understand the facts.

*September 30, 1902.*—Papers returned with the statement of the municipal president that he has ordered final survey with a view to determining the title to the property, and that he has granted the parish priest the use of part of the house for a residence, the other part being used by the American school-teachers.

*October 20, 1902.*—Acting civil governor writes to the parish priest that the municipality claims title to the estate, and that, as the municipality is in peaceful possession of the same, the representatives of the church may bring suit in the courts in support of their claim to title. The principle here presented is set forth fully and clearly in the circular letter of the civil governor to all provincial governors, dated January 10, 1903, copy of which is attached hereto and marked "Exhibit No. 39." (No. 13595.)

79. BACOLOD, OCCIDENTAL NEGROS.—*December 23, 1901.*—Residents petition against the installation of Friar Andres Ferrero as parish priest, refer to a petition recently sent to the bishop requesting his appointment, and state that the latter petition was signed by a few persons who did not understand its contents.

*January 8, 1902.*—Referred to the provincial governor for report.

*January 18, 1902.*—Provincial governor submits report, which in the main tends to substantiate the facts set forth in the petition dated December 23. The record shows nothing further in this case, but Father Andres Ferrero is now established at Bacolod and has been since the dates above mentioned. (No. 6002.)

80. BACOLOD, OCCIDENTAL NEGROS.—*February 28, 1902.*—Ninety-three residents of Bacolod protest against the return of Father Mauricio Ferrero to the pueblo.

*September 24, 1902.*—Eight hundred and forty residents of Bacolod recount the heroic spiritual labors of Father Mauricio Ferrero and Father Angel Fabo during the cholera epidemic, and request that the civil governor grant the said priests his support. (No. 19257-A1.)

81. BACOLOD, OCCIDENTAL NEGROS.—*May 21, 1902.*—Rev. W. D. McKinnon, in a letter dated Manila, May 21, 1901, transmits to the vice-governor copies of orders promulgated by the president of Bacolod, which he considers as interfering with the internal affairs of the church. The orders in question prohibited processions on the public streets and the taking of corpses into the church, ordered that the church be furnished with a large number of cuspidors, which were to be cleaned daily, and prescribed punishment for failure to comply therewith.

*May 26, 1902.*—Civil governor, in a letter to provincial governor, states that he believes the ordinance is objectionable and should be repealed, and requests information of action taken.

*June 28, 1902.*—Provincial governor forwards letter from municipal council containing in detail the reasons for the passage of the ordinance, charging bad faith on the part of Father McKinnon in misinterpreting the meaning and spirit of the law, and expressing the hope that the acting civil governor will not condemn the action of the municipal council without giving the latter body a hearing.

*November 13, 1902.*—Civil Governor Taft remits parties to an appeal to the provincial board, and subsequently, if bad faith can be charged in the passing of the ordinance, to a resort to injunction before the courts; states that this relieves the chief executive of irregular action in the matter. This letter and the letter of the acting civil governor of May 26, also the letter of the municipal council, are copied in full and attached hereto and marked "Exhibit No. 40." (No. 9497-A1 and A2.)

82. BACOLOD, OCCIDENTAL NEGROS.—*October 23, 1902.*—Provincial secretary forwards to the civil governor a copy of the recommendations made by the municipal presidents of the province at their session of October 20, which were that the friars be withdrawn from the Philippines, and that the churches and conventos in the provinces which were constructed by the people of the towns be considered the property of the towns and not of the church. Provincial secretary states that the provincial board has refrained from indorsing said recommendations. (No. 16889.)

83. BACOLOD, OCCIDENTAL NEGROS.—*October 27, 1902.*—Provincial governor forwards to the civil governor six petitions, having a total of 2,542 signatures, asking that the friars be expelled from Negros and from the islands. In this and similar cases

the only executive action possible is by way of instructions to the executive officials of the province. See note after case No. 84.

84. **BACOLOD, OCCIDENTAL NEGROS.**—No date.—Provincial governor forwards three petitions, with 481 signatures, requesting the expulsion of the friars.

*January 17, 1903.*—Sixty-seven municipal officials and justices of the peace of the province, in meeting at Bacolod, request the expulsion of the friars from the Philippines.

*March 4, 1903.*—Provincial governor forwards petition of 32 residents of Isabela, Occidental Negros, against the permanent residence of the friars in the pueblo and requesting their expulsion.

*March 19, 1903.*—Civil governor, in a letter to the provincial governor, requests that he explain to the people of his province that the government has no power to expel from the province any friar who does not desire to go. States that he understands it to be the policy of the authorities of the Catholic Church not to send friars where the Catholic people of the pueblo do not desire a friar, and that such petitions should be addressed to the apostolic delegate and not to the civil authorities. Copy of this letter is attached hereto and marked "Exhibit No. 41." (No. 19257—A1 to A9, inclusive.)

The records of many of the cases in the island of Negros, and also of cases in Panay and Cebu, are incomplete for the reason that the cases were taken up and settled verbally by the vice-governor during his visit to these islands during the early part of 1902.

85. **DUMAGUETE, ORIENTAL NEGROS**—*July 22, 1901.*—Messrs. Hartigan, Marple & Solignac, in a letter to the civil governor, submit for consideration a petition of the Catholics of Dumaguete protesting against the prohibition of public processions, etc., together with the denial of said petition by the vice-president of the municipality; also copy of a communication sent by the provincial governor to the president of a so-called Catholic society or Catholic board in the pueblo of Bacong, making regulations for the government of the church in that pueblo. The attorneys request action in order that the policy of noninterference by the civil government in matters strictly ecclesiastical may be carried out. A copy of the civil governor's letter to the provincial governor of Tarlac was sent to the provincial governor of Oriental Negros later for his guidance. (No. 626.)

86. **DUMAGUETE, ORIENTAL NEGROS**—*November 1, 1901.*—Provincial secretary forwards to the civil governor copy of the resolutions adopted by the municipal presidents of the province, at an assembly held on October 23, 1901, in which it was resolved, among other things, that the provincial board be empowered to remove from the province certain elements, disturbers of the peace, who, availing themselves of religion to impose upon the ignorant and fanatic people, spread false and calumnious reports in order to discredit the American sovereignty and the legal actions of the constituted government. \* \* \* That the convents and cemeteries be declared to be owned by the municipalities in which they are situated, as the fact is that they were built at the expense of the towns. (No. 4518.)

87. **DUMAGUETE, ORIENTAL NEGROS**—*March 16, 1902.*—Parish priest states that the municipal authorities of Dumaguete and other towns have not yet returned to him the church property, such as cemeteries, etc., taxes on which are being collected, and the canonical books, which are being retained on file in the office of the municipal president, and asks that the said property and the fees collected thereon be returned to him. Vice-Governor Wright, while in Negros, arranged this matter to the satisfaction of the parish priest in question, but, as this was done verbally, the record shows nothing further than the above. (No. 8197.)

88. **DUMAGUETE, ORIENTAL NEGROS**—*April 17, 1902.*—Division superintendent of schools submits official copy of a report made by him to the general superintendent of public instruction relative to the vacating of convents occupied as schools.

*April 28, 1902.*—The general superintendent of public instruction, in a letter to the acting civil governor, asks if the latter had recommended the occupation of convents in certain cases, as implied by the letter of the division superintendent.

*May 1, 1902.*—Acting civil governor replies that all convents and other church property should be vacated as quickly as possible unless agreement to the contrary had been made with the church authorities. (No. 8908—A1 and A2.)

89. **DUMAGUETE, ORIENTAL NEGROS**—*August 2, 1901.*—Civil governor sends to the provincial governor a copy of his letter written to the provincial governor of Tarlac for his guidance in the handling of all matters of a religious nature. Exhibit No. 13. (No. 1103—A1.)

90. **DUMAGUETE, ORIENTAL NEGROS**—*February 7, 1903.*—Provincial governor asks by telegram if he shall order convents which are, and since the departure of the friars have been, occupied by municipalities to be vacated in accordance with the

circular letter of January 10, 1903. This is the circular letter referred to in case No. 78, marked "Exhibit No. 39."

*February 11, 1903.*—Civil governor telegraphs that unless request has been made for the giving up of the convent by the municipality there is no reason for such action. (No. 21077 to A1.)

91. DUMAGUETE, ORIENTAL NEGROS—*May 4, 1903.*—Provincial governor wires civil governor, at the end of a long telegram: "The presence of a friar who landed yesterday from Iloilo caused peaceful demonstration, people asking immediate departure of same. The municipal authorities ordered in consequence protection for the personal effects of the friar, who embarked on the same steamer, which left to-day. Before coming here the friar stopped in Bais, and was forced to leave that place on account of the active but earnest and peaceful demonstration of the people."

*May 9, 1903.*—Saturnino Maquiling and three others, by telegram, protest against the hostile demonstration against the friar. This telegram was received May 10, 1903.

*May 14, 1903.*—Executive secretary telegraphs supervisor of fiscals at Iloilo, directing that as soon as through at that place he should proceed to Dumaguete and investigate and report upon the affair herein mentioned. Papers were mailed the same day.

*June 9, 1903.*—Report of Supervisor of Fiscals Trent, dated Manila, June 9, 1903, in which he recommends: With regard to Bais, that the attorney-general be authorized and directed to institute criminal proceedings against Vicente Villanueva and his two brothers and others; and, with regard to Dumaguete, that the persons named below be dismissed from the government service, and that the attorney-general be authorized and directed to prosecute such of the leaders of the crowd as he may think the proof warrants. The government employees named are the municipal president of Dumaguete, the president of the municipal board of health of Bacon; the deputy provincial treasurer; Federico Fernandez, a clerk in the office of the provincial treasurer; the clerk of the court of first instance; Santiago Gonzalez, a clerk in the office of the provincial governor, and Hermenegildo Villanueva, a member of the board of tax revision.

*July 25, 1903.*—Civil governor, in a letter to the provincial governor, outlines course of action to be taken in accordance with the recommendations of the supervisor of fiscals. Copy of this letter is attached hereto and marked "Exhibit No. 42." (Nos. 25297, 25400, and 25662—A1 to A9, inclusive.) See also Exhibit No. 42-A.

92. JALAJALA, RIZAL—*September 28, 1901.*—Parish priest states that two foreigners have forcibly taken possession of the convent at Jalajala, and asks for redress by the civil governor.

*October 2, 1901.*—Civil governor instructs the provincial governor, if the facts are as stated by the parish priest, to arrest the persons mentioned and to restore the property to the priest. Copy of this letter is attached hereto and marked "Exhibit No. 43." (No. 2304.)

93. TAMBOBONG (near Malabon), RIZAL—*November 23, 1902.*—Communication from Lorenzo Gregorio, acting parish priest, to the effect that in spite of protests on his part the schismatic priest, Gregorio Aglipay, conducted services in the Concepción chapel.

*November 24, 1902.*—Referred to the attorney-general for investigation and report.

*November 27, 1902.*—Civil governor authorizes George H. Harvey, an assistant attorney in the office of the attorney-general, to investigate the disturbances at Tambobong.

*November 28, 1902.*—Mr. Harvey reports that the sexton, or person having charge of the church and of the key thereto, wanted to allow Señor Aglipay to hold services in the church, and that the Roman Catholic priests forcibly defended what they considered their right to possession.

*December 1, 1902.*—Returned to the attorney-general, the civil governor stating that his impression is that a chapel erected by the people of a town and devoted to the purposes of the Roman Catholic Church thereby becomes the property of that church, and that the key is held and the property cared for by any person only as the agent of the Roman Catholic priest or bishop. Asks for opinion of solicitor-general under canonical law.

*December 9, 1902.*—Solicitor-general's opinion was to the effect that the ownership of the property vests in the Roman Apostolic Catholic Church of the Philippines, its administration pertaining to the priest or minister appointed by the bishop of the Catholic Church, subject to the supervision of said bishop and to the eminent domain of the Roman Pontiff.

*December 15, 1902.*—Attorney-general returns papers with report of provincial fiscal. This report can not be found in the records of either the executive bureau or the attorney-general's office.

*December 24, 1902.*—Opinion of the attorney-general that this is a case, not for executive action, but for settlement in the courts. Copy of a part of the record in this case is attached hereto and marked "Exhibit No. 44." Upon these opinions principally is based the circular letter of the civil governor to all provincial governors, dated January 10, 1903, and attached hereto, marked "Exhibit No. 39." (No. 17701 to A1.)

94. TAYTAY, RIZAL.—*December 4, 1902.*—Parish priest complains that the municipal president and council of Taytay have ordered a license fee collected on certain ceremonies of the church, declaring that it is an interference in the internal affairs of the church and outside the jurisdiction of the civil authorities. Asks that the accused officers be removed from office and made to restore the amounts already improperly collected.

*December 22, 1902.*—The municipal president and council were suspended from office pending hearing.

*January 4, 1903.*—Investigation of the case was had, the record thereof covering six pages of typewritten matter. The finding of the provincial board was as follows:

1. That the parish priest, upon filing his complaint, did so not with the purpose of securing the removal of the officials under trial, but in order to secure the rescission of the illegal ordinances interfering with the rites of his church; and that the said priest now desires and requests the reinstatement of the said officials, promising to maintain friendly relations with them in the future.

2. That the illegal municipal ordinances above referred to must be immediately rescinded.

3. That the reinstatement of the suspended officials is recommended.

*January 10, 1903.*—Acting executive secretary concurs in the finding of the provincial board, and directs the reinstatement of the suspended officials. (No. 18245.)

95. SAN ROQUE, SAN JOSE DE NAVOTAS, RIZAL.—*April 17, 1903.*—Jose Evangelista informs the civil governor that the citizens of the barrio have authorized a priest of the Independent Filipino Church to take possession of the chapel at that place. (No. 24707.)

96. LAS PIÑAS, RIZAL.—*July 14, 1903.*—Parish priest reports to the bishop-administrator of the diocese that the municipality has taken possession of property belonging to the church.

*July 17, 1903.*—Referred to the provincial governor of Rizal for investigation and report.

*July 23, 1903.*—Provincial governor reports that the municipality has been in continuous peaceful possession of the property in question since some time prior to 1863. (No. 29302.)

97. MANILA.—*December 26, 1901.*—Captain of the Fifteenth Infantry calls attention to the fact that school boys under the direction of the priests fail to render the customary salute at the playing of the national air on the Luneta.

*January 13, 1902.*—Returned to the major-general commanding Division of the Philippines, with the statement that it is deemed inadvisable to take any official action in the matter. (No. 5915.)

98. MANILA.—*July 14, 1902.*—T. L. Hartigan complains that the Augustinian, Recoleta, Franciscan, and Dominican orders have been refused exemption from taxation on their property in the walled city.

*August 29, 1902.*—Civil governor recommends that remedy be sought in the court of first instance by means of an injunction. (No. 12791.)

99. MANILA.—*September 27, 1902.*—Gregorio Aglipay, "representing the Filipino clergy, and through them the Filipino people," states that the mass of the Filipino people of the Catholic faith do not acknowledge allegiance to the existing church government; that the cathedral of Manila is rightly the property of the Filipino people and not of the Holy See; and asks that, in determining title thereto, consideration be given to the rights of the petitioners.

*October 3, 1902.*—Referred to the attorney-general for investigation of the title to the cathedral. This action placed the matter out of the hands of the executive. (No. 15221.)

100. SAMPALOC, MANILA.—*October 7, 1902.*—Rev. Francisco Cruz, parish priest of Sampaloc, and 25 others, protest against the assumption by Padre Gregorio Aglipay that he represents the Filipino clergy and people. (No. 15221-A1.)

101. PANDACAN, MANILA.—This is one of a number of cases which were handled by the civil governor personally for purposes of dispatch, instead of through the regular routine channels, and there is therefore little or no documentary record of them. A Roman Catholic priest officiating in the Pandacan church applied to the civil governor for relief, stating that he had been libeled in the papers and threatened by his parishioners with personal injury. The civil governor, after hearing the complaint, had the key of the church delivered to the priest, gave the latter a letter to the city

prosecuting attorney of Manila recommending the prosecution of the libelers, and communicated with the chief of police directing him to take the greatest precautions for the protection of the person of the complainant. The records of the executive bureau show nothing whatever of this case, and exact dates can not be learned.

*November 10, 1902.*—J. B. Early, an attorney at law, who represented Señor Aglipay and his following in the above case, requests an interview with the civil governor with regard to same. (No. 17117.)

102. MANILA.—*November 21, 1902.*—Father Gregorio Aglipay and four Ilocano priests called on the civil governor to present their respects. The civil governor outlined to them the policy of the United States Government, which was to take no part in religious matters except to protect each religious organization in its rights under the Constitution. Replying to the statement of one of the visitors that the Filipino people wanted priests of their own nationality, the same as the people of England, Spain, or France, the civil governor stated that he had nothing whatever to do with the personnel of the officers of the church. With assurances of loyalty and good will the visiting priests departed. (No. 23674.)

103. PEÑAFRANCA, PACO, MANILA.—*January 3, 1903.*—Bernardino Sabino, "in the name of the residents of the barrio," states that the chapel erected in Peñafranca belongs to the people of the barrio and not to the Roman Catholic Church, and requests action by the executive in accordance with this view. States that the parish priest refuses to allow Father Gregorio Aglipay to hold services in the chapel.

*January 7, 1903.*—Referred to the municipal board, requesting that the statement of Captain Monett, of the police department, be taken as to the facts within his personal knowledge touching this matter.

*January 15, 1903.*—Returned, with the statement of Captain Monett; also statement of the chief of police that the priest was in possession of the church, and that the persons around the church at the time were told that their only recourse was to present their claim to title in the courts.

*January 23, 1903.*—Referred to J. B. Early, counsel for the Filipino Catholic Church, for comment.

*March 9, 1903.*—Attorney submits an extended argument against the right of the Roman Catholic Church to possession.

*April 1, 1903.*—Civil governor refers the papers to J. B. Early, with the statement that the communications from the chief of police and Captain Monett make it clear that the priest was in possession of the keys of the church, and that he was therefore entitled to protection in such possession, and with the further statement that the people of the barrio may, if they wish, bring suit in court in support of their claim. Copy of this letter is attached hereto and marked "Exhibit No. 45." (No. 19363 to A1.)

104. MANILA.—*May 14, 1903.*—Gregorio Aglipay states that the cathedral of Manila and all other property (public) claimed by the Roman Catholic Church belonged to the Spanish Government, and not to the Church, and that therefore same should be the property of the insular government of the United States. Incloses copies of royal and papal decrees bearing on the subject. (No. 23076 to A1.)

105. MANILA.—*December 20, 1902.*—Civil governor requests opinion of the attorney-general on question as to whether or not a parish priest in actual possession of and administering a Roman Catholic parish church has the right upon leaving the Roman Catholic communion and joining the independent Filipino church to continue in possession of the parish church.

*December 23, 1902.*—The solicitor-general, in an opinion approved by the attorney-general, renders his opinion that the determination of title is not the function of the executive power, and that therefore the person in peaceable possession of the church must be protected by the executive in such possession. Copy of the letter of the civil governor, of the opinion of the attorney-general, and of a letter of the civil governor to the apostolic delegate on this subject is attached hereto and marked "Exhibit No. 46." This opinion is the one referred to in case No. 93 as of December 24. (No. 18745.)

106. MANILA, P. I.—*April 11, 1903.*—Rev. Homer C. Stuntz, presiding elder Methodist Episcopal Church, Philippine Islands, writes civil governor regarding interference with religious service at Calumpit, and requests that necessary action be taken.

*April 14, 1903.*—Referred to the attorney-general, with directions to take prompt steps to punish the offenders.

*April 28, 1903.*—Papers referred to the provincial fiscal at Malolos, Bulacan, directing him to secure arrest of Ignacio Samanyego, Juan Galang, and Sebastian Fajaro (the three men accused in this case). Provincial fiscal returned papers May 18, stating the two men last named were tried and acquitted on account of there being no specific charges against them; that warrants had been issued for the apprehension of Ignacio Samanyego, who was supposed to be in Manila.

*May 20, 1903.*—Attorney-general referred papers to chief of secret service, requesting information as to whether officials at Malolos had asked for apprehension of Ignacio Samanyego, one of the three men accused.

*June 22, 1903.*—Provincial fiscal at Malolos advises solicitor-general regarding investigation in this case; states no evidence against accused except hearsay; that witnesses stated Ignacio Samanyego had confessed to them that the other two accused men had influenced him to disturb the services; Samanyego not yet brought to trial.

*November 11, 1903.*—Attorney-general returns papers, stating that Ignacio Samanyego not yet arrested.

*November 13, 1903.*—Papers referred to Rev. Homer C. Stuntz, presiding elder Methodist Episcopal Church, Philippine Islands, Manila, for his information. (24548.)

107. MANILA, P. I.—*September 7, 1903.*—Richard Campbell, assistant attorney, makes report to attorney-general regarding his visit to the town of Hagonoy, province of Bulacan, for the purpose of investigating charges of disturbing religious worship made against certain inhabitants of that town by Rev. Homer C. Stuntz, presiding elder Methodist Episcopal Church, Philippine Islands. Report copied in full and attached hereto and marked "Exhibit No. 47."

*September 10, 1903.*—Referred to Dr. Homer C. Stuntz for his information.

*September 30, 1903.*—Dr. Homer C. Stuntz returns same to the civil governor, stating report unsatisfactory to him, requesting that the offenders be prosecuted. Letter copied in full.

*November 3, 1903.*—Papers referred to attorney-general, instructing him to proceed with the prosecution of the offenders. (32381.)

108. MANILA, P. I.—*July 6, 1903.*—Communication from Rev. James B. Rodgers, Presbyterian Mission, regarding arrest of Filipinos in Presbyterian Church at Bacoar, Cavite Province, on the night of July 4, 1903, by the president of Bacoar for alleged violation of town ordinances relative to unusual assemblages meeting at late hours of the night in suspicious places. Reverend Rodgers's letter copied in full and marked "Exhibit No. 48."

CAVITE, CAVITE.—*July 8, 1903.*—Provincial governor of Cavite makes report regarding arrest and imprisonment of a number of Protestants by the president of Bacoar, who claimed these people were violating town ordinances relative to unusual assemblages meeting at late hours of the night and disturbing the peace. Recommends removal of said president from office for abusing his authority.

*July 13, 1903.*—Richard Campbell, assistant attorney, makes report to attorney-general regarding arrest of Presbyterian congregation of Bacoar, province of Cavite, for alleged infraction of town ordinances. Incloses statements of president of Bacoar and others regarding religious troubles. Mr. Richard Campbell's report copied and made part of Exhibit No. 48.

*July 14, 1903.*—Provincial governor of Cavite transmits further report regarding religious trouble at Bacoar.

*July 27, 1903.*—Provincial secretary at Cavite forwards resolution of provincial board recommending that municipal president of Bacoar be removed from office on account of having been found guilty of abusing his office and violating proclamation of the civil governor, dated January 10, 1903.

*August 22, 1903.*—President of Bacoar removed from office. Letter notifying to that effect copied and made part of Exhibit No. 48. (28641.)

Exhibits follow.

#### EXHIBIT No. 1.

Bishop of Jaro petitions that the Commission will order seminary of Jaro, now occupied by American troops, vacated and returned to him as loyal representative of Catholic Church, to which property belongs, according to terms of treaty of Paris.

[First indorsement.]

UNITED STATES PHILIPPINE COMMISSION,  
*Secretary's Office, May 7, 1901.*

Respectfully transmitted to the president of the Commission.

A. W. FERGUSON, *Secretary.*

[Second indorsement.]

UNITED STATES PHILIPPINE COMMISSION,  
*Manila, May 25, 1901.*

Respectfully referred to Maj. Gen. Arthur MacArthur, U. S. Army, military governor, with the statement that during the visit of the Commission to Iloilo this petition was presented by the bishop of Jaro in person, and subsequently, in a conference with the Commission, General Hughes, the department commander, stated

that it was his impression that the property did not belong to the church and was not under the legal control of the bishop.

I am directed respectfully to suggest that it would be of very considerable use if the investigation of title and the facts relating to it could be had and returned to the Commission; that the Commission recognizes, of course, that the withdrawal of troops from private property of this sort, if it be private property, is a question for the military commander, but subsequently the question of title may arise between the public and the church, and it would be well to have all the facts on record.

WM. H. TAFT, *President.*

[Third indorsement.]

OFFICE U. S. MILITARY GOVERNOR IN THE PHILIPPINES,  
*Manila, P. I., June 1, 1901.*

Respectfully referred to the commanding general, department of Visayas, for appropriate action, inviting his attention to second indorsement.

By command of Major-General MacArthur:

JOHN BIDDLE PORTER,  
*Major, Twenty-eighth Infantry, U. S. Volunteers,*  
*Assistant Secretary.*

[Fourth indorsement.]

HEADQUARTERS DEPARTMENT OF THE VISAYAS,  
*Iloilo, P. I., July 26, 1901.*

Respectfully returned to the secretary to the military governor, inclosing copy of report of investigation of title to the "seminary" at Jaro, made by Capt. William Tutherly, Twenty-sixth Infantry, U. S. Volunteers.

In addition to Captain Tutherly's finding want of title, I have it from Father Viera himself, while he was acting as agent for the bishop and endeavoring to get payment for occupation, that the church did not own the property, but leased it. Whereupon I informed him that if he would bring me the lease we would take it off their hands and relieve them of any responsibility. Father Viera then remarked that they paid very little rental, but said he would bring the lease, but has never done so.

It is possible there has been some arrangement made by which the church owns this property now, but they have never shown satisfactory evidence to me.

R. P. HUGHES,  
*Brigadier-General, U. S. Army, Commanding.*

[Fifth indorsement.]

HEADQUARTERS DIVISION OF THE PHILIPPINES,  
OFFICE OF CIVIL AFFAIRS,  
*Manila, P. I., July 29, 1901.*

Respectfully returned to the civil governor of the Philippine Islands, inviting attention to the fourth indorsement and inclosed report.

ADNA R. CHAFFEE,  
*Major-General, U. S. Army, Military Governor.*

JOHN BIDDLE PORTER,  
*Major and Judge-Advocate, U. S. Army, Officer in Charge.*

[Sixth indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., August 2, 1901.*

Respectfully returned, through the military governor of the Philippine Islands, to the department commander of Visayas, requesting more definite information as to the possession of the seminary prior to the occupation by the United States troops, and how far back that possession reached, for the reason that where records are so defective the fact of possession becomes most important in the determination of ownership.

WM. H. TAFT, *Civil Governor.*

[Ninth indorsement.]

HEADQUARTERS DEPARTMENT OF THE VISAYAS,  
CHIEF QUARTERMASTER'S OFFICE,  
*Iloilo, P. I., August 24, 1901.*

Respectfully returned to the adjutant-general, Department of the Visayas, Iloilo, P. I.

From such evidence as this office has been able to gather (by questioning several

of the oldest residents of Jaro), it would appear that the so-called seminary building was occupied as follows:

From its completion, about the year 1873, until the year 1898 by the Paulist Fathers as a Catholic school or college; from about November 1 to November 20, 1899, by Filipino insurgents as barracks, when the American troops took possession.

G. G. BAILEY,  
*Captain, Quartermaster, U. S. Army, Chief Quartermaster.*

[Tenth indorsement.]

HEADQUARTERS DEPARTMENT OF THE VISAYAS,  
*Iloilo, P. I., August 25, 1901.*

Respectfully returned to the officer in charge of bureau of civil affairs, headquarters Division of the Philippines, inviting attention to the ninth indorsement.

C. J. CRANE,  
*Major, U. S. Infantry, Asst. Adjt. Gen.,  
in the Absence of the Department Commander.*

[Eleventh indorsement.]

HEADQUARTERS DIVISION OF THE PHILIPPINES,  
OFFICE OF CIVIL AFFAIRS,  
*Manila, P. I., August 30, 1901.*

Respectfully returned to the civil governor of the Philippine Islands, Manila, P. I.

ADNA R. CHAFFEE,  
*Major-General, U. S. Army, Military Governor.*

JOHN BIDDLE PORTER,  
*Major and Judge-Advocate, U. S. Army, Officer in Charge.*

[Twelfth indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., September 4, 1901.*

Respectfully referred, by direction of the civil governor, to the attorney-general, with the request for an opinion as to whether the facts here shown do not seem to entitle the Catholic Church to the possession of the property in question.

A. W. FERGUSSON.

[Thirteenth indorsement.]

OFFICE OF THE ATTORNEY-GENERAL,  
*Manila, P. I., September 9, 1901.*

Respectfully returned to the civil governor, inviting attention to the inclosed opinion by the solicitor-general.

L. R. WILFLEY,  
*Attorney-General.*

[Fourteenth indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., September 18, 1901.*

Respectfully referred, by direction of the civil governor, to the Bishop of Jaro, calling his attention to the prior indorsement, including the opinion of the solicitor-general.

A. W. FERGUSSON,  
*Executive Secretary.*

DEPARTMENT OF JUSTICE OF THE PHILIPPINE ISLANDS,  
OFFICE OF THE SOLICITOR-GENERAL,  
*Manila, P. I., September 7, 1901.*

Hon. WILLIAM H. TAFT,  
*Civil Governor of the Philippine Islands.*

SIR: From the investigation made in connection with the claim presented by the Bishop of Jaro to the honorable Civil Commission, asking that he, as representative of the Catholic Church, be put in possession of the building known as the Jaro Seminary (Iloilo), which he asserts to be the property of the Catholic Church, the clear existence of such right does not appear.

It appears from a letter addressed to the adjutant-general by the judge of the superior provost court of the island of Panay, who was charged with the investiga-

tion of the right asserted by the church, that there has been no title shown by the representative of the church which proves such right to the property of the said seminary. This report of the judge of the superior provost court is corroborated by an indorsement of General Hughes, commanding Department of the Visayas.

With regard to the possession of the building in question, it appears from the ninth indorsement that from the completion of the building, about 1873, until 1898 the building was occupied by the Paulist Fathers as a Catholic school or college; from the 1st until about the 20th of November by the Spanish troops as barracks, and from November, 1898, until February, 1899, by the Filipino insurgents as barracks.

It is possible that the Paulist Fathers had possession of the building in question in the name of the Catholic Church, but it is also possible that they had its possession in the name of the congregation as private property.

Furthermore, a possession must be actual in order that it may have legal effect. A former possession is of no avail unless it is proved that the actual possessor possesses the thing in the name of the former possessor or that the former has been dispossessed by force by the latter. Even supposing that the Paulist Fathers had possession of the seminary in the name of the Catholic Church, in order for such possession to supply the want of title and for the Catholic Church to be entitled to the right to the above-mentioned edifice it would be necessary to prove that the later possession had by the Spanish Government through its troops was not an adverse possession or by virtue of its own right, for in default of such proof and in default of title the later possession by the Spanish Government would exclude the former possession by the church.

It is possible that the Spanish Government had possession of the building by virtue of a gratuitous or nongratuious concession of the church, while, upon the other hand, it is not strange that the building had been possessed by the Spanish Government by virtue of its own right and in the character of owner.

From the foregoing considerations, and the facts as they appear from the investigations made, in the opinion of the undersigned there is no reasonable ground upon which to base a recognition of the right of possession to the Jaro Seminary until the Catholic Church shows unquestionably that the Paulist Fathers did not have the possession of the building in the name of the congregation, but in the name of the church, and that the possession of the building by the Spanish Government was not an adverse possession.

Such is the opinion which I have the honor to submit to your consideration.

Very respectfully,

GREGORIO ARANETA,  
*Solicitor-General.*

EXHIBIT No. 2.

MANILA, *January 24, 1903.*

THE CIVIL GOVERNOR-GENERAL OF THE PHILIPPINE ISLANDS:

I, Domingo Viera, presbyter of the congregation of San Vicente de Paul, in representation of the bishop of the diocese of Jaro, appear and represent that, on the 30th day of December last, under pretext of cheering the Philippines, by reason of the anniversary of the death of Doctor Rizal, seditious cries were directed against the bishop and the three white priests residing in that city in the plaza and the streets of Iloilo; that on the 31st of the said month the same cries were repeated in the city of Jaro against me and my two companions residing therein, with the aggravating circumstances in the latter case of the seditious being headed by the president and justice of the peace and other prominent persons, accompanied by eight policemen with revolvers.

That the bishop having desired, in the exercise of his legitimate right, to remove from the parishes of Jaro, Miagao, and Zarraga the priests in charge thereof, the latter have refused to leave them, instigating the prominent people of the said towns to decline to receive the new parish priests appointed by the bishop, threatening to close the churches and parsonages and take possession of the same.

That this state of sedition in the native clergy and the leading citizens is not only prejudicial to the church and to its representatives in the diocese of Jaro, but also, perhaps, to the public order.

That, having applied to the military authorities requesting protection, they declared they were unable to grant it, being without their jurisdiction; and, it being impossible to request same of the local authorities of Iloilo and Jaro, the undersigned has been compelled to come to this capital and appear before you, confidently believing that you will cause the latter to perform their duties with respect to the protection of aliens who are under the protection of the flag of the United States.

DOMINGO VIERA.

MANILA, P. I., *January 29, 1902.*

Hon. MARTIN DELGADO,

*Governor of the Province of Iloilo, Iloilo, P. I.*

SIR: There has been filed with this office the complaint of Domingo Viera, presbyter of the congregation of San Vicente de Paul, setting forth that he and his associates in the city of Jaro have been subjected to insults and threats by the inhabitants of that town, and that the president and local authorities were prominent among the people thus engaged. A copy of this petition is herewith inclosed for your inspection.

I also notice in the daily papers references to the strained relations between these padres in Jaro and the people, which it is stated are liable to culminate in violence. These statements are confirmed by conversation with the Filipino members of the Commission.

The fact that the friars are unwelcome to large numbers of the people in that and other towns of the archipelago is of course well known to me, but it is well for the authorities charged with the duty of preserving peace and order to keep clearly before them the respective rights, under the law, of these padres and the people.

One of the fundamental principles upon which American government is based is the complete separation of church and state; that is, that no church is allowed to receive the support of the Government, either directly from the public Treasury or indirectly by levying a tax on the people for its support. There is another principle equally well established, and that is that every man has the inherent right to worship God according to the dictates of his own conscience, which includes the right to preach and teach the religious doctrines in which he believes. So long as he confines himself to this he violates no law. His doctrine may be foolish or false and may be distasteful to a large majority of the people, and hence he may be unpopular with them and be regarded as a dangerous character. Nevertheless, he is entitled to the full protection of his person and property by those officials charged with the maintenance of peace and order and the enforcement of the law. It is to be kept in mind and thoroughly understood that under the existing government, whatever may have been the situation in the past, it is now impossible for any priest or religious teacher to exact contributions from anyone against his will, or to compel his attendance on divine services or to compel him to send his children to the parochial schools.

In short, the people of Jaro and the Philippine Archipelago are at liberty to do just as they please in all these matters. They are absolutely free agents. If any man is induced by threats of excommunication or otherwise to do what he does not desire, he has no one to blame but himself. Certainly it does not warrant violence against the priest. Governor Taft some time since addressed a communication to the Hon. Wallis O. Clark, governor of Tarlac, defining at some length the respective rights of priests and people, a copy of which I herewith inclose for your perusal and guidance and also for the information of the municipal authorities of Jaro. This communication so completely covers the entire subject that it need not be further discussed here.

You will readily understand from what has been said above that the assembling of a mob of people and their jeering at and threatening the priests of Jaro was illegal, and that, especially if the president and police participated therein, they were not only guilty of an illegal act, but of official misconduct as well. It is my desire that you should make this known to the municipal authorities of Jaro; and should there be a repetition of such misconduct you are authorized, and it will be your duty under the provincial government act, to suspend the president and prefer charges against him, as is provided in act No. 314, amendatory of the provincial government act. It is my hope, however, that this will not be necessary, and that it will be sufficient to call the attention of the president and officials of Jaro to the contents of this letter and that they will govern themselves accordingly.

Lawlessness at any time in a community is to be deprecated and is productive of unfortunate results, but now it would be especially so for the Filipino people. The Congress of the United States is in session and has before it the recommendations of the Commission, which, among other things, include the establishment of a permanent form of government for these islands. If Congress should adopt our views, the government established will include a popular representative assembly composed of Filipinos. Objection is being made by those who do not believe in the capacity of the Filipinos for self-government, or even partial self-government, that such legislation is premature and unwise. We do not believe this, and Governor Taft is now in Washington for the express purpose of urging the adoption of the views of the Commission. Any outbreak or serious disturbance would tend to weaken his influence and strengthen the opposition.

Among the subjects which the Governor will take up in Washington will be the friar question, and I have every reason to believe that it will be settled in a manner

satisfactory to all concerned. I am sure you will readily understand the necessity of the maintenance of order in your province, and the importance of your exerting your official and personal influence to allay as far as possible any excitement which now exists in the town of Jaro or elsewhere, or which may hereafter arise.

I have the honor to be, very respectfully,

LUKE E. WRIGHT,  
*Acting Civil Governor.*

OFFICE EXECUTIVE SECRETARY FOR THE PHILIPPINE ISLANDS,  
*Manila, P. I., February 10, 1902.*

Official copy respectfully furnished by direction of the acting civil governor to the chief of Philippines constabulary, Manila, P. I., requesting that all constabulary officers be advised as to the status between the church and state in order that there may be no confusion in this regard.

A. W. FERGUSON,  
*Executive Secretary.*

MANILA, P. I., *February 10, 1902.*

Father DOMINGO VIERA,

*Presbyter of the Congregation of San Vicente de Paul, Manila, P. I.*

SIR: In reply to your letter of January 24, I have the honor, by direction of the acting civil governor, to transmit herewith a copy of a letter sent to the governor of Iloilo.

Very respectfully,

A. W. FERGUSON,  
*Executive Secretary.*

The following is a summary translation of the testimony taken in the case and transmitted to the civil governor by the provincial governor with his letter of March 7, which follows later:

TESTIMONY IN REGARD TO THE CHARGES MADE BY FATHER VIERA, GIVEN BEFORE THE  
MUNICIPAL OFFICIALS OF JARO IN FEBRUARY, 1902.

BENITO JALBUENA (municipal president at the time of the alleged disturbances) testified: That, to celebrate the passing of the old year and the advent of the new, he, just as any private individual might have done, arranged with some of his friends to engage a band of music and an orchestra to parade the streets of the town on the occasion indicated; that, at a little after 11 on the night of the 31st, the party, composed of the band and orchestra, children carrying many-colored lights and banners, others dressed up as princes and princesses, a number of private persons, the witness and many of his friends, among them Juan Ladesma, Zeferino Jiz de Ortega, and the American, George Knowles, left the house of the witness and began to parade the principal streets of the town; that no policeman took part in the manifestation or festival, and that therefore the statement that eight of them took part is untrue, especially with revolvers, when there was not a single one, since all the police were on duty that night just as on other nights; that, during the parade, those taking part in the manifestation did not cease to emit cries of joy; that, when the procession reached the corner of Calle Real and Calle Platerias, near the residence of Father Viera and his companions, witness noted a few cries of "Out with Father Viera," to which the multitude responded with vivas; that, aside from the cries referred to, it is untrue that Father Viera and his companions were insulted or threatened, since the procession did not even stop in the place referred to, but, while the cries in question were being given, continued its journey to the house of the witness, where a dance was prepared for the entertainment of the people, to celebrate more joyfully the exit of the old year and the entrance of the new.

That there does not exist any unpleasantness or enmity between witness and Father Viera and his companions, but that, on the contrary, witness formerly believed himself the best friend of these priests, since his house was perhaps the only one where, after the revolution, these priests, and especially Father Viera, were in the habit of visiting.

That the principal and only object of the festival was to enliven the place on the night in question; and, as a proof of this, when some persons, unknown to the witness, shouted "Out with Father Viera," the multitude answered with vivas.

That, while it is true that the determination of the bishop to remove the curate (cura) of this pueblo had made the neighbors indignant, still the festival that was organized had nothing whatever to do with that feeling of indignation.

That the justice of the peace did not assist at the festival; that, before the procession set out, witness sent him a message inviting him to take part, but received an answer to the effect that he (the justice) was tired and so excused himself from coming.

ANTONIO BUENCONESO, chief of police, testified: That it was untrue that eight policemen, with or without revolvers, took part in the parade; that, by reason of the few policemen available, witness had divided up the force into patrols of two men each, which patrols, at a little after 11 o'clock, he found to be at their respective posts on the night in question; that neither he nor any other member of the police force took part in the procession, but that its nature and purpose was well known generally.

(Here witness gives details in regard to its nature and purpose, substantiating in that regard the testimony of the preceding witness.)

GEORGE KNOWLES's testimony is a repetition in different words of that given by the first witness in regard to the object, nature, and incidents of the parade, and the failure of the justice of the peace and the policemen to take part in the festival.

Policeman DOROTEO JALLORINA testified that on the night in question he was on duty with Paulino Silva at the corner of Platerias and Zarraga and saw the procession. His testimony is to the same effect as that of the preceding witnesses in regard to the nature of the parade and the behavior of those who took part, its object and purpose, and the absence from the procession of the justice of the peace and the eight policemen with revolvers.

Policeman PAULINO SILVA, the patrol companion of the last witness, testified in every respect identically with him.

ZEFERINO JIZ DE ORTEGA testified to the same effect as the preceding witnesses in regard to the purpose and nature of the parade and the conduct of those who took part, the presence of the municipal president in his private capacity only, and the absence of the justice of the peace and the eight policemen with revolvers.

BENITO LOPEZ testified that he did not take part in the procession, as he was tired; that during the procession he was at the club, as will be confirmed by those who were there with him, among them Charles Visner, Arthur Thompson, Arsenio Jimenez, Magdalenio Jarrellano, and Salvador Legenda.

Some twenty policemen, among them one sergeant and two corporals, being separately interrogated, testified that, with the exception of those who were sick in bed, they were all on duty on the night in question and did not take part in the procession, and that they believed the occasion of the new year to be the object or reason of the demonstration.

JUAN LEDESMA testified to the same effect as the preceding witnesses in regard to the object and nature of the parade and the behavior of the multitude, the absence of the justice and the eight policemen with revolvers, and the presence, in his private capacity, of the then president, Benito Jalbuena.

ILOILO, *March 7, 1902.*

The CIVIL GOVERNOR PHILIPPINE ISLANDS, *Manila.*

SIR: Referring to your communication of the 29th of January last in regard to the grounds of the complaint filed by the Paulist father, Domingo Viera, I believe it to be my duty to state that Father Viera has endeavored to injure the good name of the authorities at Jaro and Iloilo by presenting the facts in a manner very different from their true nature, qualifying as seditious acts which were in no sense such.

Before receiving your letter I had been informed of what had taken place in Jaro and had also made private investigations, with the object of finding out the true nature of the events; but, as all reports I received agreed in showing that the incident in question was not of a political nature at all, nor in any sense seditious, I took no action in the premises. Upon receipt of your letter, I made fresh investigations, this time officially, to see if my former information was correct or not. Fortunately for this province, both my private and my public sources of information agree in proving that neither in Iloilo nor in Jaro have any seditious acts been committed.

What happened in Jaro (as appears from the investigations made by the municipal officers of that place, to whom your communication was referred, the results of which investigations I have the honor to transmit herewith, and as appears also from the investigations conducted by me) was as follows: On the last day of the year 1901, to celebrate the coming of the new year, there was organized in the house of Señor Benito Jalbuena, then municipal president, a kind of procession with lights, children masked in the costumes of princes and princesses, and a band of music and an orchestra engaged by Mr. Jalbuena and various friends of his, to parade the

streets of the town and enliven the neighborhood. Expansion—the desire to have a pleasant time—was the only object sought in organizing the procession described. At 11 o'clock at night the party, composed of many private individuals, left the house of Señor Jalbuena and gaily paraded the principal streets of the town. Upon reaching the house where Father Viera resides a few shouted, "Out with Father Viera," to which the multitude answered with vivas; but the procession did not stop, nor were any threats or insults offered to Father Viera and his companions.

From the investigation made by me, I am thoroughly convinced that neither the justice of the peace nor the members of the police force, either with or without guns (revolvers), took part in the procession, and that Señor Jalbuena was present simply in his private capacity; that no threats nor insults were offered; that the proceedings were in no sense of a political or seditious character, for, although it is true that some persons shouted, "Out with Father Viera," the cry was nothing more than one of those incidents which, while always unpleasant, it is impossible to prevent in the course of even the most lawful of ceremonies where a number of persons of all classes, from the most illustrious to the most ignorant, take part. And above all, the cries against the father did not form any part of the plans of the party, nor were they authorized by the president nor by the majority of those who composed the party, which, instead of seconding the cries, answered with vivas. And it is painful that a priest, like Father Viera, should falsify the facts in such a manner.

Regarding what took place at Iloilo, it is absolutely false that, during the civil procession which took place on the 30th of December in honor of Rizal, there were any seditious cries in the street against the bishop or the friars, as is stated by Father Viera. Of this the undersigned was an eyewitness, since, together with other members of the provincial board, he took part in the procession. It is to be noted that, when the procession passed through the Calle de General Huguez, we noticed a friar sitting on the sidewalk of a house of a Spaniard, Don Felipe Diez; but, in spite of this, there was no cry uttered, nor was there even the slightest hostile manifestation of any kind, the procession passing on without any notice being taken of the friar. This proves that there did not prevail among the people a spirit of hostility nor a desire to make any manifestation; otherwise the presence of said friar would have offered a favorable opportunity for such demonstration. If, late at night, when the party gathered in the main square, there were one or two cries of "Out with the bishop," I am quite sure that not the real pueblo, not the sensible people, was responsible for this, but simply a few persons who, taking advantage of the protection from discovery afforded by the darkness and by the crowd of people, and without duly estimating their acts, allowed themselves these liberties. For the rest, in the case of an incident of the nature described, it is difficult (not to use the term impossible) to prevent its occurrence, although on the present occasion due warning was given at the time to the directors of the civic demonstration.

Such are the events that took place at Iloilo and Jaro, and, as you will see, they were not in any sense seditious. It does not surprise us that Father Viera as an offended party should have presented the facts in the form which best suited his interests, but what does surprise us is that Father Viera, when misrepresenting the facts, should have added that it was impossible to secure protection from the local authorities of Iloilo and Jaro, a statement which involves a very serious libel against all the authorities here, beginning with the provincial board and the court of first instance, which libel we can not allow to pass without protest. Whence has Father Viera learned that he was not able to secure protection from the local authorities of Iloilo and Jaro? Perhaps he has had recourse to them. And if he has not had recourse to them for help, how does he dare to make such a charge? Does he mean to say, perhaps, that the authorities harbor and protect those persons who would assault a stranger like himself? Father Viera makes the statement that it is impossible to rely upon the local authorities of Iloilo and Jaro for protection, and still he moves about Jaro and Iloilo, which are under the control of said authorities, by day and by night, on foot and in vehicle, with perfect safety, without having been assaulted by anyone. If the acts which he denounces had been really seditious, and he had appealed to this provincial government or to the court of first instance, we are sure he would have received the attention due him and that proper investigation would have been made.

I protest, therefore, in the name of the credit (honor) of the local authorities of Iloilo and Jaro, so seriously libeled by Father Viera, and, to the end that such action should not go unpunished, I pray that permission be granted me to furnish the provincial fiscal with a copy of the charges filed by Father Viera, so that should he (the fiscal) so think proper, he may take criminal action in the premises.

Very respectfully,

MARTIN F. DELGADO,  
*Provincial Civil Governor.*

## EXHIBIT No. 3.

SAN PEDRO, ANTIQUE, *February 18, 1903.*

SIR: In order to prevent difficulties such as have arisen in other parts of the Philippine Islands, and in connection with the circular letter of the central government of the Archipelago to the municipal presidents with relation to the religious question; also to avoid that false reports should reach the ears of the authorities with regard to events that may occur, as it is probable that they will occur in my municipality in the near future, I have the honor to transmit to the civil government at Manila the annexed report.

Respectfully submitted for your approval.

EMIGDIO MOSCOSO, *President.*

SAN PEDRO, ANTIKE PROVINCE, PANAY ISLAND,  
*February 18, 1903.*

THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS.

HONORABLE SIR: Believing that it is my duty as president to put under your superior knowledge the remarkable events that might affect to the public order, I have the honor to report to your superior authority that the people of this town has adopted the resolution of being independent from Roman Church and it has been organized as a Filipino Church without recognizing the temporal dispositions of the Pope of Rome.

The reason of the people is the impossibility of getting justice from the Pope, because the friars prevail upon him, and the people, although they do not hate the friars, but they think that these will never wish the happiness of the Filipino people, for they are pride and vain, and they could not live in this country looking at the development of true democracy. The principles of democracy which inform the lives of American people are discordant with the principles of old monarchism. So the people think.

In the midst of this events my position as a president is very critic. Having received your letter of January 10, 1903, giving instructions to every governor and president of adopting an independent criterion in religious matters, I beg your pardon if I permit myself to say that in all work of the people in that question I shall not use the police, neither the money nor the other things of the municipality, in order to help them, but, not being able to avoid entirely the influence of religion for the reason that my ancestor, my parents, and I myself were and are Catholic. I think that it is not a violation of my duty if I help them as a mere citizen. Perhaps friars will report to your authority that presidents are violating your instructions, therefore I write this letter.

There are three buildings in this town: First, the old and rotten church, 7½ meters high, 5 meters wide, 37 meters long; second, one convento, which is used now as a municipal building—iron roof, wooden and stone wall, 8½ meters high, 28 meters wide, 22 meters long; third, one cemetery, 58 meters square.

Catholic people claim the ownership of the church and convento, for the reason that it has been built by the Catholics.

The municipal council has resolved that the cemetery must be and is belong to the municipality, for the reason that the cemetery is always necessary to every community of men, and although they are not Catholic or although they were not Catholic they should have built a cemetery at any rate.

The people of this town is now preparing to receive Aglipay, and they have built two arches and one chapelle. In one side of one arch they write this inscription:

This honor is not to the person of Aglipay,  
But it is to the idea that Aglipay represent.

In another side they write this inscription:

Americans gave us  
Many schools and liberty;  
What did the friar give us?  
Darkness and inability.

According to your high instruction, I shall take an independent conduct in its case.  
Respectfully submitted.

EMIGDIO MOSCOSO,  
*President of Municipality.*

BAGUIO, BENGUET, *April 18, 1903.*

EMIGDIO MOSCOSO, Esq.,

*Presidente of San Pedro, Province of Antique.*

(Through the governor of the province of Antique.)

MY DEAR SIR: I beg to say that I have received your letter concerning religious matters in your town, and that I do not see from your statements that you have any difficulty in complying with the suggestions of my circular letter to the governors of provinces with reference to possible controversies arising between the Catholic Church and the Filipino Catholic Church. You are not required because you are a public official to withdraw from association in any religious movement which may approve itself to your conscience. The note of warning which I uttered to governors and presidentes was, however, that, in view of the fact that they may become charged with police duties in the settlement of disturbances growing out of such religious controversies, it would be wise for them not to make themselves prominent in such religious movements, and thus give color to the charge that they were using their official positions to favor or enforce their religious views.

With reference to your conduct in case of a controversy over property, I have nothing further to add to the letter of instructions to the governors, which you have already seen.

Very respectfully, yours,

WM. H. TAFT,  
*Civil Governor.*

EXHIBIT No. 4.

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., August 18, 1902.*

Respectfully referred, by direction of the acting civil governor, to the Hon. Martin Delgado, provincial governor of Iloilo, calling his attention to the within complaint of Father Juan Calvo, parish priest of Lambunao. It is desired that the matter be investigated and proper action taken to prevent a recurrence of the act, if upon investigation the complaint is found to be true.

A. W. FERGUSON,  
*Executive Secretary.*

[Second indorsement.]

PROVINCIAL GOVERNMENT OF ILOILO,  
*January 7, 1903.*

Respectfully returned to the executive secretary, inviting his attention to the report of the municipal president of Lambunao, and stating that the delay in transmitting these papers is due to the fact that this office of the governor did not receive the first report referred to by the said president until after a second communication had been sent him in regard to the matter.

MARTIN DELGADO,  
*Provincial Governor.*

[Third indorsement.]

EXECUTIVE BUREAU,  
*Manila, January 16, 1903.*

Respectfully referred to the provincial board of Iloilo, Panay, P. I., inviting attention to the within correspondence and to the following comments thereon:

Charge II. The action of the municipal president and a councilor of Lambunao in instructing the municipal police to enforce attendance at the public school, thus indirectly preventing certain of them from attending the school of the parish priest, was contrary to law.

Charge III. The municipal ordinance prohibiting the introduction of corpses into the parish church, and the holding of the same immediately outside the said church for a longer period than fifteen minutes, is legal only if it was drafted and recommended by the municipal board of health. (Vide act 308, sec. 5.)

Charge IV. The municipal council is not empowered to charge a fee for the solemnization of burials; in other words, it is unlawful to tax religious solemnities which usually accompany an interment. A municipal ordinance, therefore, which requires persons to pay a special license in such cases is illegal.

The provincial board will make the necessary representations to the municipal council of Lambunao in regard to the above matters.

Information is desired as to whether any action was taken in regard to the complaint which the parish priest, Father Juan Calvo, states was forwarded to the provincial board by his predecessor.

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

## EXHIBIT No. 5.

I, Gregorio Yulo y Regalado, an attorney residing in the city of Iloilo; and a notary public, appointed by the judge of the court of first instance of the ninth judicial district of the province of Iloilo, do certify that upon this day and in my office there appeared the priest Sr. Praxides Magalona, of legal age, and a resident of the pueblo of Janiway, where he is the parish priest, holding registration certificate No. 294233, issued on August 30, of last year, and at his instance I do set forth in continuation, by exhibition, a letter and two communications which were presented to me in this act, and which, copied literally, are to the following effect:

VALLADOLID, *March 19, 1903.*

Rev. Sr. D. CORNELIO SALAS, *Molo.*

DEAR BROTHER: I received your letter via the steamer Wednesday and am informed of the contents and instructions therein contained. To-day, with profound sorrow in my heart and with tears in my eyes, I will relate to you the very sad events which happened here during the visit of Sr. Aglipay, and though I shall recount them all fully, I further send Leon in order that you may the better become informed by word of mouth, for he was the one who attended, or one of those who attended, the entertainments and meetings held by the said Aglipay. The whole case was as follows: Monday evening he arrived in the town and went to the house of Francisco Infante, the president of the special committee which had been formed for more than a month. At night two of the members of the said committee came to my house to take me out to greet the guest, and, as a private party and incognito, I went to pay my compliments. Of course he immediately spoke to me of his church matters, I answering him circumspectly. Thus we spent a long time without accomplishing anything, until, becoming tired, I withdrew. On the next day I went to San Enrique, with no other purpose in view than to avoid being present at his meetings. I returned and hid myself while the whole day those of Aglipay's committee were looking and asking for me. As they could not see me in the daytime, all unexpected and unforeseen they surprised me between 8 and 9 o'clock upon the night of Tuesday, and the men and women of the committee began to catechise me and to threaten me that if I did not lend adherence they would leave me in the street and would ask for a priest of the Aglipay communion.

Already wearied with hearing them talk so much, and in order to get them out of the house, I answered with that I did not wish to burden myself with the responsibilities which would be imposed upon me. But they, insisting, told me that they would answer for everything on condition that I should accompany them in their work, and I answered, "We shall see." After an hour Aglipay arrived with Isco Infante, coming for the same purpose, but I showed myself indifferent. They at last departed. At half past 10 the next day they ordered the bells rung, and two of the committee took me from the house to attend mass at the church, and I, being in a hurry, as I had to go to San Enrique to conduct a funeral, went with them to settle the matter at once. But in all these acts which I saw would compromise me I said to myself "I shall protest later," as I now do. After mass I returned to my house, and Aglipay and all his adherents followed. I was surprised, for I knew not why they came, and it was because they obliged me to sign, and, without seeing what, I signed, for I knew not what was passing with me, and I did these things so that they would leave me alone; this they immediately did. But in all these things the people impelled me, saying that they would be responsible and that no responsibility would devolve upon me, and, as I could see that they were not doing anything, after stating to them that I am obliged to give information concerning all that has taken place, I hasten to write you this and to protest and to withdraw my signature from all that there was done here without knowledge of mine, for at that time I was nervous, and what I wanted was some means to get them to go away, and this was the cause for my allowing myself to be deceived by threats. The bearer, Leon, will tell you, verbally, everything else. But especially let this letter serve for the father superior, so that I shall not have to write another to him. Herewith I send you the notes for the bishop, informing him of everything, and so all may be arranged to the satisfaction of the brethren and in defense of our cause and religion. I send an authorization for our board of association, in order that in my name they may protest before the superior of the acts done here, and also an authorization to make retraction before the public in periodicals. And if what I propose is not right, do me the favor to arrange some manner that I may in truth, and upon the word of a priest, be enabled to state and confess that all that was done here was not done by me. It was done with my senses confused with so much talking, promises and threats, so that I was unable to act with entire liberty, but with coercion. Do

you see to it now, for whenever I begin to think of this affair I become nervous, and I can scarcely see that which I am writing. Leon will give you the details, and if you think that this letter can be sent to the bishop, I think that it would be well for him to know everything. Now that God has punished me with this confusion of things, I find but one solution for the matter, which is either my punishment for my sins, or through the protest and the withdrawal of my signature, to have everything done by Aglipay in this pueblo thrown out or annulled.

My head is in a whirl with so much writing and thinking upon this situation which has so involved me.

However, as an afterthought, it has occurred to me that it was not altogether an evil that I signed allegiance to Aglipay, for only in that manner could I retain possession continuously of the church. The reason is that the pueblo adhered to Aglipay, taking possession of the church, and I would have been left out without church or anything else.

Ah, my brother, you can not imagine the situation in which I am placed. I can not find peace. With reference to Bago, there is no other way than for it to remain as it is here, for, as I am also in charge of that church, it is in the same circumstances.

In short, you, who are many, can do more than I. And I recommend that if it is necessary to form or draw up any other manner of protest, that you have it done there, and have Leon bring it immediately, coming through Cabano, let it cost what it may. The question is to accomplish what is desired.

I think that if Aglipay is still there, the board with my note can take up (withdraw) my signature, for the authorization gives full power. And in order to announce our protest, we will do it through the periodicals of most circulation.

For the satisfaction of the bishop, and that he may not believe that what was done was done with my consent, if you believe it to be necessary, you may send this, my letter, to him. In a word, look upon this affair of mine as if it were your own, and let Father Crispino consider that this letter to you shall serve for one to him as superior, and let it also serve for all the other members who should assist each other.

The lowest of your brothers.

LORENZO PALOMA. [Rubricated.]

P. D.—I send you all the notes without envelopes so that you may see them, and separately I send stamped envelopes in the event they should be necessary for any of them.

L. PALOMA. [Rubricated.]

Note or authorization: Upon the margin there is a seal which says, Parish of Valladolid, Bishopric of Jaro, Negros Occidental.

Upon this date I authorize in correct form and give the competent and necessary power to the father superior of the Association of Clergy of this Bishopric of Jaro, Don Crispino Hinolan, in order that he may, in my name and my behalf, protest before the bishop of this diocese concerning the acts which took place in the parish church of this pueblo, for all was done entirely contrary to my will, since I was seduced with promises and with threats.

This I communicate to you for proper action. God keep you many years. Valladolid, March 19, 1903. Lorenzo Paloma. The superior of the Board of Association of Filipino Clergy of the Diocese of Jaro.

Another authorization: Upon the margin there is a seal which says, Parish of Valladolid, Bishopric of Jaro.

As a member of the Association of Clergy of the Diocese of Jaro, upon this date I do authorize in due form, and do give the competent and necessary power in order that the board of the said association may annul any obligations which may have been assumed by the signing of a certain paper which presented to me upon the 18th instant, by withdrawing my signature. This paper having been drawn up by the principal citizens of this pueblo and delivered to Señor Gregorio Aglipay.

And this I have the honor to communicate to you, beseeching your assistance and protection.

God keep you many years. Valladolid, March 19, 1903. Lorenzo Paloma. To the Board of the Association of Filipino Clergy of the Diocese of Jaro.

The foregoing copy is faithfully taken from the originals, to which reference is hereby made. And, at the instance of the applicant, Señor Praxido Magalona, for the guidance of all concerned, I do issue these presents in triplicate at Iloilo, this 28th day of March, nineteen hundred and three, A. D.

Lic. GREGORIO YULO.

My term expires December 31, 1903.

MANILA, April 6, 1903.

Hon. WM. H. TAFT,

*Governor-General of the Philippine Islands, Manila, P. I.*

YOUR EXCELLENCY: With reference to our conversation of Saturday last, I have the honor to forward to you the letter of the parish priest of Valladolid, which, after copying, you will kindly cause to be returned to me.

Its contents will serve to show what peaceful and lawful means Aglipay makes use of for the furtherance of schism. The poor priest in question yielded to sheer force, as you will see, but on the following day wrote the inclosed document reaffirming his fidelity to the Catholic Church.

In view of the pernicious effect which these methods of procedure have, both in the islands and abroad, I would entreat your excellency to issue such orders as will effectually put a stop to this disgraceful state of things.

With assurance of the highest esteem, I have the honor to remain,

Respectfully yours,

JEAN BAPTISTE GUIDI,  
*Archbishop of Stauropoli, Apostolic Delegate.*

MANILA, P. I., April 9, 1903.

Monseigneur JEAN BAPTISTE GUIDI,

*Archbishop of Stauropoli and Apostolic Delegate**to the Philippine Islands, Manila, P. I.*

YOUR EXCELLENCY: I have read the communication from the parish priest of Valladolid, Occidental Negros. I am obliged to say, after reading the same, that, while the method of proselytizing as described in that letter pursued by Señor Aglipay and others may be subject to severe criticism on the ground of taste and morality, there is no statement in the letter of the priest of any fact which would justify the belief that he was threatened with personal violence or suffering. He does not state any specific threat, but says that he was nervous and was overcome by their undue pressure. This does not present a case for criminal prosecution, but is an instance of a nervous, weak old man yielding to importunate and undue influence. The expressions of contrition by the priest, the statement that he first sought Aglipay and called on him, the further statement that the prominent people of his town were all in favor of Aglipay, and that they claimed the church, indicate the character of the pressure that was brought to bear on him to influence him to consent in words, which he did do, though he says that he intended to protest the next day. I confess I can not see that the circumstances present a case for the interference of the executive. He did not attempt to call upon the presidente or any police to eject persons from his premises; he could not testify to any threats of personal violence; he shows no assault of any sort, but merely a working on his nervousness until he was overpersuaded, and against his better judgment consented. It is a case of weakness on the part of the priest, and not a case of crime on the part of those who induced him to take the course which he took. There is no mention of the presence of municipal officers which exercised the influence over him he concluded the next day to protest against.

I have the honor to be, very respectfully,

WM. H. TAFT, *Civil Governor.*

## EXHIBIT No. 6.

## PROVINCIAL GOVERNMENT OF ANTIQUE,

## GOVERNOR'S OFFICE,

*San Jose de Buenavista, Panay, P. I., January 17, 1902.*

EXECUTIVE SECRETARY FOR THE PHILIPPINE ISLANDS,

*Manila, P. I.*

SIR: I have the honor to forward herewith a petition signed by numerous residents of San José de Buenavista, requesting that Friar José Giraldez be expelled. A copy of my reply to the petition is also forwarded.

I send these papers merely to let the Commission know the feeling of the community on the subject.

Very respectfully,

W. A. HOLBROOK,  
*Captain, Fifth U. S. Cavalry, Governor.*

SAN JOSÉ DE BUENAVISTA, *December 31, 1901.*

The PROVINCIAL GOVERNOR:

The citizens of San José de Buenavista protest, through their municipal authorities, against the presence of Friar José Giraldez, who came here a few days ago to take possession of the parish church and is living in the house of the Spaniard, Tobito Tiscar. The antipathy of the people against the friars is general. We believe that they are incompatible with the progress that this country is making since America signed the treaty of Paris with Spain, and the Federal party has stated in its petition to Congress that they were dangerous.

If we look back we see, and most of the Spaniards admit it, that one of the principal, if not the only, cause of the revolution was the politico-financial absorption by the friars of everything which was related with the rights and the future of the Filipino people. Outside of the incompatibility between the Filipinos and the friars, the people find that they are full of backwardness and obscurantism.

Everybody knows the resolution taken without appeal by so many millions of inhabitants, and the impossibility to blot out the recent dramas which have made the friars so odious to the Filipinos, and the whole people of San José ask the provincial government, through its municipal authorities, to expel the friar.

The government must not understand that we want to give up the sacred Christian religion which we practice. If we protest, it is moved by the progress of modern civilization and our new intellectual development, etc. We therefore beg the provincial government to expel Friar Giraldez, as the presence of foreign friars in a town is contrary to the feelings of harmony and of concord of the people.

(The signatures follow.)

PROVINCIAL GOVERNMENT OF ANTIQUE,  
OFFICE OF THE GOVERNOR,  
*San José de Buenavista, P. I., January 18, 1902.*

The PRESIDENT OF SAN JOSÉ DE BUENAVISTA.

SIR: I have the honor to acknowledge receipt of the petition signed by numerous citizens of San José requesting me to expel Friar José Giraldez from this vicinity. While the reasons given may be such as to excite sympathy, yet, under the existing government, which is completely separate from the church, it is manifestly impossible to comply with the request of the petitioners. The petition will, however, be sent to higher authority, that the feeling of this community toward the friars may be known.

Of course, it is understood that Friar José Giraldez has no authority over the people of this community beyond that which in a spiritual way they voluntarily place in his hands, and to which they render voluntary obedience. So long as Friar Giraldez complies with the law of the land he must and will receive the protection of the law the same as any other citizen. If he trespasses the law he will be subject to punishment the same as any other person. If, as a minister of the gospel, he is persona non grata, no one is obliged to attend his church nor listen to his teaching. It would be entirely proper for the dissenters to form a new church, or petition the proper church authorities to recall Friar José Giraldez and send another who would be acceptable to the community.

The fear that the friars or any other church corporation may again obtain a preponderating influence in governmental affairs is groundless. The control they have over the people will be only that which the people themselves voluntarily and individually give them.

Very respectfully,

W. A. HOLBROOK,  
*Provincial Governor.*

MANILA, P. I., *February 6, 1903.*

Capt. W. A. HOLBROOK, U. S. Army,  
*Provincial Governor of Antique, San José de Buenavista, P. I.*

SIR: I have the honor to acknowledge receipt of the petition of the citizens of San José de Buenavista protesting against the presence of Friar José Giraldez in their midst, and copy of your response thereto. I beg to express my entire approval of the contents of your letter. You state clearly and forcibly the attitude which the civil government must take upon this question. While appreciating the prejudice which exists against the friars and the reasons therefor, their right to live in any community and exercise their sacerdotal functions can not be doubted. The friar

question is one of difficulty, but I believe that Governor Taft, who is now in Washington, will probably be able to solve it before his return to the satisfaction of all concerned.

I have the honor to be, very respectfully,

LUKE E. WRIGHT,  
*Acting Civil Governor.*

EXHIBIT No. 7.

OFFICE OF THE BISHOP OF JARO.

The PRESIDENT OF THE MUNICIPALITY OF ROMBLON.

SIR: We have been informed of the intention of this municipality to appropriate ecclesiastical buildings of this parish and take possession of the ecclesiastical books and to take charge of the administration of the parish funds. We do not know if this intention has been carried into practice, and we believe that this municipality, on account of its religious belief and in order not to offend the religious feeling of the people, will never commit the action which would be a direct attack against the rights and interests of the Catholic Church in this parish. In these conditions and before anything is done, as representative of the Catholic Church in Jaro, the Bishop of Jaro, in the accomplishment of his duty as such, finds himself in the painful necessity of protesting before the municipality against such a decision, and to claim his legitimate rights on all the property on which the municipality is about to lay its hands.

Feeling sorry for this parish, which has no place to attend its religious wants, and until such time as we might provide a place, we had appointed as administrator of this property Señor Bonifacio Madrelejos, who has always filled his commission to our complete satisfaction and to the great benefit of the parish. We believe that we are addressing true Catholics, who, as such, are our subjects, and we will simply remind them to-day of the very serious ecclesiastical penalties to which they would be liable if they were to interfere in the jurisdiction of the Church, and we beg all sons of the Catholic Church to give up their project and leave the ecclesiastical authorities in the peaceful possession and administration of their rights, property, and interests. We expect from the religious feeling of all the inhabitants of this municipality and for the salvation of their souls that they will take our protest into consideration, etc.

Iloilo, July 27, 1901.

FR. ANDRES, *Bishop of Jaro.*

EXHIBIT No. 8.

ROMBLON, *February 16, 1903.*

The EXECUTIVE SECRETARY,  
*Manila, P. I.*

SIR: The object of this communication is to lay before you a certain matter for advice, and, in order to make it clear, allow me to state the following facts:

Parish priests detailed for this township of Romblon have from time immemorial enjoyed quiet and unmolested possession of the church, convent, and cemetery.

After certain well known events took place, the parish priest was compelled to leave, thus abandoning said church, convent, and cemetery.

Profiting by the priest's absence, the municipality believing perhaps to have the right of possession to such church, convent, and cemetery, as they had been built by the town, drew up an act setting forth the fact that the municipality was entitled to such possession.

Later on the Roman Catholic Bishop of Jaro detailed to this province a Filipino priest, who, upon his arrival in this town, per se and by virtue of this office took possession of the church, convent, and cemetery without any opposition whatever from the municipality, although upon a certain occasion the municipality seized the keys to the cemetery, appointed a man to take charge of the property, and dismissed the person appointed for the purpose by the Roman Catholic priest.

Notwithstanding this, between the priest and the municipality there has never been the slightest disturbance, although both parties continue to collect their respective fees, which the public pay without any difficulty whatever.

Under the circumstances, should any friction arise between the priest and the municipality, I am in doubt as to whom I am to protect in my official capacity in the enjoyment of possession. As I understand the case, both parties enjoy actual possession of the cemetery, since both exercise at the same time acts of possession.

This particular case is not covered by the circular letter of the honorable civil governor dated January 10, 1903, and I beg to ask you kindly to advise me in the matter for future reference.

Thanking you in advance, I remain,  
Yours, respectfully,

FRANCISCO SANZ, *Governor.*

[First indorsement.]

EXECUTIVE BUREAU,  
*Manila, P. I., March 2, 1903.*

By direction of the civil governor respectfully referred, through the attorney-general, to the solicitor-general, for the expression of an opinion on the question here put.

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

[Second indorsement.]

OFFICE OF THE ATTORNEY-GENERAL PHILIPPINE ISLANDS,  
*Manila, P. I., March 5, 1903.*

To solicitor-general.

[Third indorsement.]

OFFICE OF THE ATTORNEY-GENERAL PHILIPPINE ISLANDS,  
*Manila, P. I., March 5, 1903.*

Respectfully returned to the civil governor.

It appears from the letter of the governor of Romblon that the municipality of Romblon is in actual possession of the cemetery of said municipality at the present time, since it has the keys thereof and has appointed a keeper to care for the same. The act of the municipality in seizing the keys of the cemetery, the same having been in the hands of the parish priest of the pueblo of Romblon, may possibly have been illegal; yet such illegal act, against which there has been no protest on the part of the parish priest, can in no wise operate to cause the executive power, whose province is only to maintain order and to prevent any disturbance thereof, to refuse to accept the fact of the actual possession of said cemetery by the municipality and, in case of any attempt to disturb such possession, to refuse to protect the municipality.

GREGORIO ARANETA, *Solicitor-General.*

Approved:

L. R. WILFLEY, *Attorney-General.*

[Fourth indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
*Manila, March 7, 1903.*

Respectfully transmitted to the governor of Romblon for his information.

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 9.

PROVINCE OF ISABELA, OFFICE OF THE GOVERNOR,  
*Ilagan, Isabela, P. I., December 30, 1901.*

The MUNICIPAL PRESIDENT.

(Sent to all cities in the province.)

SIR: I have noticed with regret that many cemeteries of the province are not kept in good condition, weeds frequently being permitted to grow to an extreme height over all the graves, so that it is impossible to determine where they are, and some vaults and graves being so poorly built that human bones may be seen on the ground.

While the title to said cemeteries is doubtless vested in the Church, it is nevertheless your right and duty to see that they are maintained in a sanitary and decent condition. You will please cause such cemeteries to be frequently cleaned of all brush and loose stone, and request your council to pass an ordinance requiring all interments to be made under at least four feet of earth. If any vaults are used you may order them hermetically sealed after each interment.

With a similar regard for sanitary protection, it is the duty of your council to forbid the burial from the church of any persons dying from contagious or infectious diseases. They should also require the church buildings to be kept cleaner than is now the rule and frequently ventilated to prevent the spread of disease. If the parish priests fail to observe these regulations you will have the church and cemeteries put in sanitary condition and present the bill for expense to the parish priest for payment.

Very respectfully,

WILLIAM H. JOHNSTON,  
*Captain, Sixteenth U. S. Infantry,*  
*Governor Province of Isabela.*

.Official copy respectfully furnished to the executive secretary of the Philippine Islands for his information.

WILLIAM H. JOHNSTON,  
*Captain, Sixteenth U. S. Infantry,*  
*Governor Province of Isabela.*

PROVINCE OF ISABELA, OFFICE OF THE GOVERNOR,  
*Ilagan, Isabela, Luzon, February 15, 1902.*

MUNICIPAL PRESIDENT, *Ilagan, Isabela.*

SIR: Notwithstanding my circular of December 30, calling attention to the abandoned condition of cemeteries in this province, the cemetery of this city is in the same abandoned condition in which it was before that circular was issued. In that circular you were directed, if the parish priest failed to clean the cemetery, to have it cleaned yourself and present the bill to him. If this cemetery is not cleaned out as described below by the 22d instant, you will be suspended from office.

You will first have all the shrubbery and grass cut and removed from the cemetery. You will remove all bamboo or nipa shelters that are built over the graves. You will then mark out paths over which the public may pass, and mark each grave with wood or stone, to prevent interments being made in the same place again. As far as possible these boards will indicate the name of the person buried.

You will caution the parish priest that ground once used for interment must not be used again. If the cemetery is already full, another must be located and prepared. The parish priest derives a large revenue from these interments and can well afford to keep the cemetery in decent sanitary condition. If he fails to observe these regulations in the future, or you find interments made that are not marked, you will collect from him a heavy fine.

I shall inspect the cemetery on the 22d to see if this order has been obeyed. It is hoped with this second warning that your attention need not again be called to the scandalous condition of your cemetery.

Very respectfully,

WILLIAM H. JOHNSTON,  
*Captain, Sixteenth U. S. Infantry,*  
*Governor Province of Isabela.*

ILAGAN, ISABELA, *February 15, 1902.*

Official copy respectfully furnished to the executive secretary of the Philippines for his information.

WILLIAM H. JOHNSTON,  
*Captain, Sixteenth U. S. Infantry,*  
*Governor Province of Isabela.*

PROVINCE OF ISABELA, OFFICE OF THE GOVERNOR,  
*Ilagan, Isabela, P. I., February 17, 1902.*

The Most Reverend ARCHBISHOP OF THE PHILIPPINE ISLANDS,  
*Manila, P. I.*

MOST REVEREND SIR: I have the honor to inform you that, during the past six months of my service as governor of this province, I have received many complaints of excessive charges made by parish priests for marriages, baptisms, funerals, and other ceremonies. Being a Catholic, I deem it my duty to ask that you send some representative to investigate what charges are made and whether many priests are not demanding more even than the scale of prices appointed by the Church.

I am informed that the religious orders never demanded such excessive sums for ceremonies, and some go so far as to say they would prefer to have the former religious in care of the parishes.

My present position does not permit me to express any opinion upon the comparative merits of the two classes of clergy, nor do I presume to advise the Church authorities upon their policy.

My observation of three years in these islands permits me to say that many clergy of this province are doing little, if at all, for the promotion of their religion among the people, for the religious instruction of children in schools, as permitted by law at present, or for the care and preservation of the church buildings and cemeteries.

The abandoned condition of the latter has made it necessary for me to direct all municipal presidents to cause the same to be placed in decent sanitary condition and present the bill for such work to the parish priest, who derives an income from interments made therein.

Much good could be done for religion if the people were told that all sacraments of the Church are free, and that their payments for ceremonies depend upon their free will. If the scale of prices for the latter must be preserved, the people should be discouraged from indulging in expensive functions for which they are unable to pay. Parish priests will receive sufficient for a living without the many fees at present received. People of this city seem to vie with one another to see who can

have the grandest ceremony at a funeral or marriage, while few can afford it. On the other hand, I have never heard a sermon preached in any language in this province during the six months, though I have attended almost all the churches.

These are matters which concern the spiritual rather than the civil government of these people, but I trust my interest in my religion may excuse the presumption I have taken in addressing you this letter of information.

I am, sir, very respectfully, yours,

WILLIAM H. JOHNSTON,  
*Captain, Sixteenth U. S. Infantry,*  
*Governor Province of Isabela.*

ILAGAN, ISABELA, *February 18, 1903.*

Official copy respectfully furnished to the executive secretary of the Philippine Islands for his information.

WILLIAM H. JOHNSTON,  
*Captain, Sixteenth U. S. Infantry,*  
*Governor Province of Isabela.*

EXHIBIT No. 10.

MANILA, *September 24, 1902.*

MR. DANIEL R. PERKINS,  
*Deputy Division Superintendent,*  
*Zamboanga, Mindanao.*

SIR: Your letter of September 2, relating to interference with the public schools, is at hand.

Teachers may be called to account for any direct violation of orders issued by the division superintendent respecting the work in the schools and compliance with these orders insisted upon, but it is not desirable that one should concern himself greatly with the action of any persons not under the authority of the bureau of public instruction. I referred your letter to the governor for his information, and he has sent it back with the following indorsement:

"Respectfully returned to the Hon. Bernard Moses, secretary of public instruction, Manila, P. I.

"I think Mr. Perkins ought to be advised not to allow his suspicions and excitement concerning the Jesuit priests to overcome his judgment. It is well understood that the Jesuit priests are much opposed to schools in which religious instruction is not imparted, and their opposition may be expected. In the absence, however, of Jesuit schools, it will hardly be possible for them to prevent the pupils from attending the public schools. Should they at times attempt to discourage native teachers, it is not to be taken as an intimation of a tremendous conspiracy. If the division superintendent will devote his attention to making the schools under his charge effective, outside interference by the Jesuits will not interpose any great obstacles."

This seems to cover the case, and I am not disposed to think that you or the division superintendent will have any difficulty in securing action on the part of teachers consistent with your orders. If it is impossible to control the teachers in matters in which they should be controlled, the next advisable thing is to try to find substitutes for them who will be more disposed to abide by the rules of the officers of the bureau of public instruction.

Very respectfully,

BERNARD MOSES,  
*Secretary of Public Instruction.*

EXHIBIT No. 11.

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
*Baguio, Benguet, May 14, 1903.*

Respectfully referred to Maj. Gen. George W. Davis, U. S. Army, commanding Division of the Philippines, Manila, P. I.

Responding to the invitation to express my views respecting the disposition to be made of the building in question, contained in the second indorsement, I beg to say that I do not consider it necessary or wise for me to express an opinion on the question of law presented in an issue as to the title to the bishop's palace in Nueva Caceres. It would not be wise because, wherever possible, it is better for the executive to avoid the decision of questions likely to arise in a court of justice hereafter.

It seems to me that a definite conclusion as to what you should do in the premises can be arrived at without reaching any conclusion as to the ultimate question of

title. The undisputed facts are that the archiepiscopal palace in Nueva Caceres has been occupied by the bishop of that diocese for a number of years, down to October, 1898, when the Spaniards were driven from Nueva Caceres by the insurgent forces. It is true that at that time the palace was in the process of a considerable reconstruction, and the insurgents may have more or less completed such reconstruction. It is clear that the taking by the insurgents, however, was forcible and that possession was not yielded by them until in the course of the war they were driven out by the American forces; that then the Army took possession and has occupied the building ever since. This state of facts seems to me to put this building in exactly the same situation as all other church buildings in the islands. The last quiet, peaceable, lawful possession was that of the authorities of the Roman Catholic Church before the American Army took possession, and, now that the American Army is ready to give up possession in case of a disputed title, it seems to me clear that the military commander is not obliged to consider a question of dispute, but is fully justified in restoring the property to the person or persons who were in lawful, peaceable possession next before the occupation by the Army. In other words, I think the general order already issued by you should apply as well to the palace of Nueva Caceres as to any other ecclesiastical building in the Archipelago. If the provincial or the civil government deems that it has any claim to title to the palace it has an opportunity to go into the courts and assert it. I do not mean to say that there might not be cases where the title of the Government was so clear and its deprivation of the title had been under circumstances of fraud so apparent that it would not have been justified in following up the forcible possession by its military arm with a restoration of the same to civil possession. But the present is not such a case. Certainly, under ordinary circumstances, the Government ought to be the last property owner to avoid the burden of litigation in its own courts as a plaintiff by taking advantage of a fortuitous dispossession of one who had been in peaceable, lawful, and quiet enjoyment of the property in dispute.

I hope that I have fully answered the query which you put me in the indorsement, but I can state it more summarily as follows: In my judgment the proper course for you, in your discretion, to pursue is to turn over the bishop's palace at Nueva Caceres to the Roman Catholic bishop of that diocese, or any person acting in that capacity. Who that person is can, of course, be safely determined by the statement of the papal delegate at present in the islands.

WM. H. TAFT, *Civil Governor.*

#### EXHIBIT No. 12.

MANILA, April 7, 1903.

HON. WILLIAM H. TAFT,  
*Governor-General of the Philippine Islands,*  
*Manila, P. I.*

YOUR EXCELLENCY: I have the honor to call your attention to the inclosed document, which I should like to have returned to me after a copy of it has been taken.

A perusal of its contents will demonstrate to you clearly how extremely high-handedly the presidentes act at times, and what low means they adopt to combat the the church.

I feel more than sure that your excellency will put an end to such arbitrary measures on the part of the presidentes, and that you will keep the local authorities within the limits of the law, and thus prevent them from violating the free exercise of the Catholic cult.

I have the honor to sign myself, your excellency,  
Very respectfully,

JOHN BAPTIST GUIDI,  
*Archbishop of Stauropoli, Apostolic Delegate.*

Translation of the inclosure is as follows:

The undersigned affirm under oath that, on the evenings of the 19th and 20th of the present month, there was posted a notice in various parts of this pueblo of Nabua, province of Ambos Camarines, by order of the president, of a proclamation obliging the women to dress with "saya" (sort of overskirt), under penalty of a fine of a half peso Mexican against infractors. The customary dress of the women in this pueblo since time immemorial is the tapis (sort of apron) or "patadion" (tightly wrapped cloth around the loins), and this law was to go into effect upon the 22d instant, which

was Sunday, a mass day. On the 24th the police of this pueblo, near the church, were taking to the municipal building of the pueblo those women who went to mass and communed without wearing the saya, both on Sunday, the 22d, and on the morning of the 24th, although they arrested some of them later in the market place for not wearing the saya, but not with so great rigor as they arrested those who attended church and communed. On the 25th of the same month few women attended church for fear of the fine. On account of the procedure spoken of adopted by the authorities of this locality, and because of the poverty which reigns in this pueblo, making it impossible for very many families to buy "saya," not one-third of the women go to church or comply with their lenten duties; nevertheless many women not dressed in "saya" and who do not go to church are not molested. In order to attest the truth of this fact the present is drawn up in the said pueblo of Nabua, at the request of the reverend parish priest of this pueblo, D. Simeon Oñate, for proper action thereupon, this 28th day of March, 1903.

ANTONIO DELLORO,  
and 6 others.

MANILA, P. I., April 11, 1903.

Rev. H. J. O'CONNOR,

*Secretary to His Excellency, the Apostolic Delegate, Manila, P. I.*

SIR: I have the honor, by direction of the civil governor, to acknowledge receipt of the letter of his excellency, Jean Baptiste Guidi, Archbishop of Stauropoli and apostolic delegate, to the civil governor of the Philippine Islands, inclosing a communication signed by Antonio Delloro and others of the pueblo of Nabua, province of Ambos Camarines, in which complaint is made regarding the arbitrary action of the president of said pueblo with reference to the dress of the women of the pueblo.

In reply, I beg that you will inform his excellency that his letter and the inclosure thereto have this day been referred to the provincial governor of Ambos Camarines requesting that an investigation be had into the truth of this matter, and recommending the suspension and removal of the president of Nabua in the event that the facts set forth in the complaint referred to are found to be true.

Very respectfully,

[First indorsement.]

EXECUTIVE BUREAU,  
Manila, April 11, 1903.

Respectfully referred, by direction of the civil governor, to the provincial governor of Ambos Camarines, Nueva Caceres, P. I., requesting that an investigation be had into the truth of this matter. If it be true, the president of Nabua ought to be suspended and removed.

A. W. FERGUSON,  
*Executive Secretary.*

[Second indorsement.]

OFFICE OF THE GOVERNOR, AMBOS CAMARINES,  
Nueva Caceres, P. I., May 7, 1903.

Respectfully returned to the executive secretary for the Philippine Islands, inviting attention to the accompanying letters and copies of municipal records. From investigation of this matter, I am of opinion that the action of the president complained of was not from any improper motive, but that the same was taken in the belief that the ordinance was within the power of the municipal council to enact, and that it was the president's duty to enforce it. I am also certain that the council acted in perfect good faith and entirely without design to injure the Roman Catholic Church of Nabua or its communicants. Immediately upon being informed by this office that such ordinance was not within the powers of the council as defined in the municipal code, the objectionable enactment was annulled, although, as will be seen by reference to the inclosed correspondence, the members of the council have not given up their belief in the necessity of "dress reform" in their town. I believe, however, that they now understand that such reforms are not to be accomplished by legislation.

I invite attention to the remarks of the council concerning Mr. Simeon Oñate, "cura" of Nabua, which remarks, to the best of my information and belief, are

warranted by the facts. Padre Oñate has for a long time been a disturbing element in Nabua, and I am compelled to state that I believe the complaint in this matter was inspired by him more from a desire to cause trouble and stir up strife than for any other reason.

JAMES ROSS,  
*Governor Ambos Camarines.*

NABUA, P. I., May 2, 1903.

Hon. JAMES ROSS,  
*Provincial Governor, Nueva Caceres, P. I.*

SIR: I have the honor to submit the following report in regard to the complaint filed by the parish priest, Mr. Simeon Oñate, and six or seven residents:

In its ordinary session of to-day the municipal council resolved to repeal ordinance No. 3, passed November 1, 1902, to promote morality.

A few days after this order became effective, without any person having considered it an arbitrary and illegal act, and many persons desirous of the moral and material progress of the pueblo having received it with applause, the aforesaid curate and some of his henchmen, systematically opposed to culture and advancement, filed the complaint with the delegate, Monsignor Guidi, distorting the true facts and stating that the undersigned was abusing the people who were going to hear mass and to attend their religious duties in the church.

Aided by some of his henchmen who were defeated in the last municipal election, this curate has thrown obstacles into the way of the administration of the municipal government of Nabua, attacking the municipal officials or hindering the proper functions of the municipality.

With your leave I shall explain point for point, the anything but correct method of this curate toward the municipal government of Nabua.

On occasion of the municipal election he induced his favorites, of whom there is a number, to protest against the election and cause it to be annulled, because his favorite candidate and protégé, Anastacio Bolivar, had not been elected. In spite of this unjustified protest the election was confirmed by the provincial board. However, the spite of the curate was not satisfied, because, when the public school for both sexes in Nabua was growing considerably and had a daily attendance of from 400 to 500, he told the people, in his great desire to deceive them, that their children would become Protestants if they frequented the public school, and pretended to start a Catholic school, not without first posting provoking proclamations to arouse their minds, for which reason he was prosecuted for sedition, but on account of the amnesty proclamation the case against him was dismissed. But what a school, your honor! The teachers which he employed played the entire day the card game of entrecuatro with him, and I have with my own eyes seen the children play in front of the convent at school hours.

Furthermore, upon instigation of the curate, whose henchmen met in the convent, these and his brother, Valentin Oñate, filed a complaint against the municipal officials and the justice of the peace with the attorney-general and the honorable Civil Commission, charging them with abuses, and, in order to cause the supreme authorities to pay special attention, they forged the signatures of a large number of persons who can not sign their names. A thorough investigation was held, but the result was nothing.

On different occasions he had used the pulpit to revile and upbraid the persons who are not addicted to him, and several times he reviled the pueblo and called it cowardly, because, he said, it did not protest against the municipal ordinances. Likewise he exhorted the pueblo from the pulpit to collect money wherewith to pay the expenses of a lawsuit, stating that he was also collecting money, and that, in case it should give out, he would sell the ornaments, bells, candlesticks, and other equipments of the church. (As if all these things were his!)

Such is the antagonism produced by the curate, Simeon Oñate, causing peaceful citizens to ruin each other, but involving the triumph of his ambition.

From all points of view the crafty anxiety of the curate to protect the interests of his parishioners in regard to the change of dress is gratuitous, because the council only resolved to change the ancient form of the dress of the Bicol women in order to adapt the same to the present advancement in the culture, morality, and civilization of the country, but it was at no time the intention of the council to burden the people with arbitrary measures and to abuse its power.

The council is well aware of the present state of poverty under which the country suffers, but it believes that poverty does not interfere with decency. Knowing that

it is one of the tasks of the council to promote morality, the council of Nabua took it upon itself to pass an ordinance changing the form of the ancient "patadion," which reveals the shape of the woman, while the same patadion cut as saya amply covers her nakedness.

Lastly, I respectfully suggest to you that for the benefit of the peace in this pueblo you cause our complaint to reach Monseigneur Guidi, to the end that he direct the transfer of the curate, Simeon Oñate, to some other place, as his present conduct seriously compromises the peace which the inhabitants of this pueblo have enjoyed for a long time.

I have the honor to be, very respectfully,

JUAN FOLIENTE,  
*Municipal President.*

NABUA, P. I., May 2, 1903.

I, Pedro Regalado y Peñaranda, municipal secretary of this pueblo of Nabua, province of Ambos Camarines, P. I., certify that the foregoing report has been submitted to the council and approved by the same in its special meeting held to-day, as it is made to appear in the book of acts of this office, volume 1, page 70.

PEDRO REGALADO,  
*Municipal Secretary.*

OFFICE OF THE GOVERNOR OF AMBOS CAMARINES,  
*Nueva Caceres, P. I., April 21, 1903.*

The MUNICIPAL PRESIDENT OF NABUA.

SIR: The executive secretary has remitted to this office a letter from the apostolic delegate and annexed to it a petition signed by several residents of your pueblo, protesting against an order which your office directed to be published prohibiting the use of the patadion. I transmit you a copy of the same to the end that you make as soon as possible a detailed report to this office, with copies of the order or ordinances which you published in the premises, and stating whether you have imposed fines for infractions of the said order.

If the use of the patadion has been prohibited by virtue of an ordinance the same should be declared null and void, as it is evidently illegal.

Very respectfully,

JAMES ROSS,  
*Governor of Camarines.*

NABUA, CAMARINES, April 27, 1903.

PROVINCIAL GOVERNOR OF AMBOS CAMARINES,  
*Nueva Caceres.*

SIR: In reply to your letter dated the 21st instant I submit the following report:

1. That it is true that an order has been published in the public streets of the municipality of Nabua to the end of making effective an ordinance passed by the council on the 1st of November, 1902, prohibiting the use of the patadion, and I, as municipal president, being required by law to execute the resolutions of the council, complied with my duty. A copy of this ordinance is inclosed, marked with the letter "A."

2. It is not true that the women who heard mass and communed on Sunday, March 22, were arrested with more rigor than those arrested on the market on the 24th, as stated by the complainants. The law should be enforced equally against all persons who deserve it, and I followed this principle in dealing with the women who violated the municipal ordinance. I beg leave to inclose a list, marked with the letter "B," containing the names of the women who paid fines and of those who were under arrest in their respective houses for one day, not having paid the fine.

3. This ordinance already existed when I entered upon the office of municipal president, end of January, 1903, succeeding Mr. José S. Ocampo, who had resigned, and as at that time there was a rumor to the effect that if this ordinance would not be enforced the council would not take further resolutions only not to be executed, I saw myself under the necessity of issuing an executive order, a copy of which is inclosed, marked with the letter "C," based on the ordinance aforementioned.

4. This ordinance does not necessarily compel the poor people to make more or less sacrifice in purchasing sayas, as the complainants, Valentin Oñate and others, apparently wish to imply, because, interpreting the spirit of this ordinance clearly and faithfully, the poor women can dress in sayas without necessarily having to buy new cloth, as they can reform the patadion which they now possess, cutting it into a

saya, and this, it may be seen, does not cost more than the patadion. This order for the change of costume does not tend to demonstrate an intention to oppress the people; on the contrary, it shows a desire to give another proof of civilization, to place the people of Nabua in particular and the province of Camarines in general, on a level with the most cultured and civilized nations of the world, and cause it not to be inferior to the other principal cities of the archipelago, because the saya is a more decent dress than the patadion, which is so tightly wrapped around the body that it outlines all the forms of the wearer, and the councilors believe that this is contrary to public morality, which should be promoted in our country, as recommended by the Municipal Code, paragraph (j j), section 38.

The foregoing is all I have to say in regard to this matter, in compliance with the letter aforementioned, and I shall call a meeting of the council for the purpose of declaring the ordinance null and void, recommending that this be done. I shall inform the provincial governor of the result.

Very respectfully,

JUAN FOLIENTE,  
*Municipal President.*

[Exhibit "A."]

*Copy of a municipal ordinance.*

Ordinance prohibiting the use of the patadion and the tapis as they are now worn by the women.

It is hereby ordered by the municipal council:

1. That the use of the articles of clothing called patadion and tapis binagabay of any color, as now worn by the women, is strictly prohibited, so that in future the skirts will all be cut on the plan of the "saya."

2. A time of thirty days, beginning with the passage and publication of this ordinance, is hereby granted in which the women who wear the patadion can change the same into a saya, and any women who shall wear the patadion the old way shall be liable to a fine not less than 50 cents Mexican, nor exceeding \$2.50, or to arrest at her private dwelling of from one to five days.

3. Ladies above the age of 50 years who, on account of their inveterate customs, do not want to use the saya shall be exempted from this penalty, but they are informed that they would give a great proof of culture if they also would adopt the saya, thus setting an example to the younger women.

4. This ordinance will go into effect on the 1st of December.

For the municipal council:

JOSÉ S. OCAMPO.

[Exhibit "B."]

(This consisted of the list of the names of the women fined or punished with domiciliary imprisonment for violation of the ordinance in question, showing that when arrested 13 out of the total of 34 were coming from church.)

[Exhibit "C."]

From Spanish translation of the "bandillo" in Bicol.

I, Juan Foliente y Zato, municipal president of this pueblo of Nabua, province of Ambos Camarines, P. I., make it known that, since the bandillo published directing the women to wear sayas, as required by the municipal ordinance of this pueblo of December 1 of last year, I have been very considerate toward them after the expiration of the time, knowing that there is scarcity of food in this pueblo, for which reason I have refrained from imposing a fine of 50 cents Mexican on those women who do not wear sayas. However, I think now that I have given them sufficient time for this purpose, and I have therefore resolved to inform them through this bandillo, for the knowledge of all and that they may not plead ignorance, that on next Sunday any women that shall not wear the saya shall be fined 50 cents Mexican, according to the aforesaid municipal ordinance. You can not blame me, as I have been considerate enough with you, neither can you complain of me, because I have to execute the municipal ordinances; and, if I fail to execute the same, I shall be held responsible, as perhaps none of you will be able to defend me if things go badly with me. I therefore earnestly beseech you to comply with this bandillo.

Municipal building of Nabua, P. I., March 19, 1903.

JUAN FOLIENTE,  
*Municipal President.*

GOVERNMENT OF THE PHILIPPINE ISLANDS,  
EXECUTIVE BUREAU, *Manila, June 1, 1903.*

- Monsigneur J. B. GUIDI,  
*Archbishop of Stauropoli and  
Apostolic Delegate to the Philippine Islands,  
Manila, P. I.*

MONSIEUR: Referring to your communication of April 7, in which you charge the municipal president of Nabua, Ambos Camarines, with adopting low means to combat the church and with violating the free exercise of the Catholic cult, I have the honor to inform you that a full investigation shows the facts in the case to be the following:

Toward the end of last year the municipal council of Nabua passed an ordinance prohibiting the use of the style of dress known under the name of "patadion" on the ground that it "displays unduly the lines of the wearer's form" and is therefore prejudicial to public morals. The ordinance allows a term of thirty days from the date of publication within which women wearing the "patadion" may alter the cut of the same to the style known as "saya," which "covers amply the nudeness" of the wearer. It was the arrest under this ordinance of certain women while on their way to mass that called forth the complaint under discussion.

In view of the fact that the style of dress known as "patadion" has been customary from time immemorial in Ambos Camarines, the ordinance passed by the council was probably "ultra vires." However this may be, the objectionable resolution has since been repealed.

In regard to the charges of arbitrariness and interference with the free exercise of the Catholic cult made against the municipal president, the charge is not borne out by the results of the investigation. On the contrary there appears to be no doubt that not only the president but the council as well acted in perfect good faith. An exhibit submitted in the course of the investigation shows that out of 34 women arrested only 13 were coming from or going to the church.

Attention is respectfully invited to the attached copy of the report of the municipal president and of the indorsement in regard thereto of the whole case signed by Mr. James Ross, governor of the province of Ambos Camarines. It would appear from these that the "cura" of Nabua is a disturbing element in his parish. In compliance with your request the original complaint is returned herewith.

Very respectfully,

A. W. FERGUSSON,  
*Executive Secretary.*

EXHIBIT No. 13.

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., July 31, 1901.*

Capt. WALLIS O. CLARK,  
*Governor of Tarlac, Tarlac, P. I.*

SIR: On July 24 I received a call from Father Eusebio Natividad, a Filipino Roman Catholic priest in the town of Tarlac. He came to complain against the municipal council of the town, that the council was attempting by ordinance or resolution to regulate the fees which he was charging for religious functions performed by him as a priest of the Roman Catholic Church in the church at Tarlac. Similar complaints have come to me from other parts of the archipelago, and I deem it wise, therefore, in a public letter to the governor of the province where there has been such an abuse of civil authority to call attention to it and to point out the fundamental error committed by the municipal council.

The President of the United States in his instructions to the Commission used the following words:

"Upon every division and branch of the government of the Philippines, therefore, must be imposed these inviolable rules: \* \* \* that no law shall be made respecting an establishment of religion, or prohibiting the free exercise thereof, and that the free exercise and enjoyment of religious profession and worship without discrimination or preference shall forever be allowed."

And again, "that no form of religion and no minister of religion shall be forced upon any community or upon any citizen of the islands; that upon the other hand no minister of religion shall be interfered with or molested in the following of his calling; and that the separation of church and state shall be real, entire, and absolute."

What fees or compensation shall be charged by a minister of religion for religious services performed by him is a matter wholly within the control of the church authorities, and is one in which the civil government, whether municipal, provincial,

or insular, can have no voice whatever. No one is obliged by civil law to partake of the sacraments of the Roman Catholic Church; no one is required by law to solicit from the priest the burial ceremony, the marriage ceremony, or the funeral ceremony of the Catholic Church. If he does so, under the government as it now exists in these islands, he does it voluntarily. If, however, his religious conscience requires of him that he should secure the performance of any such ceremony by a priest of the Catholic Church and deems the fee exacted excessive, he can have no recourse to the civil government, but must apply for relief to the superior ecclesiastical authority in the Catholic Church. Under the government instituted here by the United States, neither priest nor bishop has any power, as such, to control the course of the civil authorities, nor can he, as such, take any part in the government or exert any influence upon its course. He may only appeal to the civil authorities as any other citizen or resident may appeal for protection to his life, liberty, or property or that of the religious corporation which he represents. With this entire separation of ecclesiastical influence from civil government must follow, on the other hand, complete abstinence from interference in clerical and ecclesiastical matters by civil officers as such. The right of each councilor or each presidente as an individual, if he be a member of the Catholic Church, to take such action within the church as its rules and discipline prescribe, to prevent the exaction of excessive fees by priests, is of course fully conceded; but when councilors meet in a town council and take official action by municipal ordinance or resolution they were not acting as individual members of the Catholic Church. They were acting as the agents of civil government, and as such they have nothing whatever to do with the government of the church or with any act of its priest which concerns the administering of religious sacraments or the performance of religious functions, unless those services are carried on and those functions are performed in such a way as to affect injuriously the property rights or the civil rights of the general public, whether Catholic or non-Catholic. To give an example: If a priest in charge of a church were to direct the fencing in of a part of a public road in the town, it would not only be within the power, but it would be the duty of the common council to take official action to compel him, by suit or otherwise, to remove the fence or to direct its removal by town officers. On the other hand, if the priest were to bar up certain windows in his church, which the common council should regard as shutting out needed light from the church and preventing the congregation from enjoying the same, the council would have no power by municipal order or resolution, or by any other official action, to require the priest to remove the obstruction to the light. Again, the common council may regulate or prohibit the use of the public streets for religious or other ceremonies if, in the judgment of the council, such processions interfere with the proper use of the streets by the general public, but such regulation or prohibition should be made only in good faith, with a view to the public interest and not to gratify any personal or political feeling; but, on the other hand, the council can not regulate the character of the processions in churches or upon church property.

The common council is authorized to purchase and establish public cemeteries and to provide the fees for interment therein. It is not authorized, however, to regulate the fees charged by the parish priest for performing the burial service and burying the Catholic dead in ground consecrated by the priest and owned by the church. If the council shall in good faith find that the presence of a church or other cemetery within the inhabited portion of the town is a menace to the health of the public, it may require that interments shall no longer be made in such cemetery, and that the bodies of those in the cemetery shall be removed to a place which may be safely used for burial purposes; but as long as the cemetery is permitted to be where it is the fees to be charged for the use of the same, if it is owned by the church, or for burial ceremonies to be performed by a priest therein, are subject to the regulations of church authorities and not of the civil government.

The Government of the United States and all its representatives are thoroughly committed to the doctrine that a separation of church and state is most useful in maintaining freedom of conscience and complete religious liberty, and I believe that a great majority of the people of the Philippine Islands have this same conviction, but they must understand that separation of the church from control over the state involves correlatively separation of the state from control over the church.

To state the principle broadly, it is this: The civil government has no power to regulate the internal working or discipline of the church, its creed, its ceremonies, its methods of raising income, the fees charged by its ministers, or its use of its own property; provided, that the ministers or agents of the church in pursuing the purposes of the church do not injure another in his civil rights, to wit, the right of life, liberty, or property, or the rights to which he is entitled as a member of the general public, or do not violate the criminal law.

I am aware that conflict has arisen in some cases over the exaction by priests of fees

for interment in cemeteries claimed by both the church and the municipal authorities. In such cases, resort should at once be had to the courts to determine the ownership of the land, and meantime unseemly disturbance should be avoided by self-restrain on both sides. In the case in hand, however, there is no question of this kind. Here, the unwarranted character of the council's action as reported is clear.

I will thank you, therefore, to suggest to the municipal council that if they have passed a resolution or ordinance of the character stated to me by the parish priest of Tarlac, they have transcended their authority, and it would be wise for them to rescind the resolution or ordinance at once.

The action of the municipal council I have no authority as civil governor to nullify or control. One proper method by which a parish priest, whose action in the church a municipal council attempts illegally to regulate, may seek his legal rights is to decline to obey the ordinance, to submit himself to arrest and prosecution for its violation, and then by writ of habeas corpus test the legality of the ordinance in the courts, when the courts may authoritatively declare that the ordinance thus passed is null and void, and that the priest must be released. It is thought, however, that in a case so palpable as this, administrative suggestion and advice may prevent abuses of power by municipal councils which it would take a somewhat longer time to remedy in the courts.

You are requested to send a copy of this letter to the presidentes of the various pueblos of your province.

Very respectfully,

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 14.

The preliminary record in this case consists of a copy of the correspondence which passed between the parish priest and the municipal president of Victoria, and covers 26 pages. The copy also includes other correspondence of municipal officials, of the provincial governor, and of Attorney Liongson.

There is shown a letter from the provincial treasurer to the municipal president, inviting him to show to the parish priest a copy of the law on seals and stamped paper; a letter from the parish priest stating that he has not received a copy; a letter from the municipal president to the priest asking him to appear personally in his office so that he may show him said copy; the reply of the priest stating that his duties as a minister of the gospel prevent him from going to the presidency; that there is no reason why he should have to go to the presidency merely to see a copy of a law; that the provincial treasurer has given no instructions to that effect; that if a law has to be communicated to him he can be found in his parish house, as he is the parish priest and nobody's slave, and that there is no law compelling him to go to the presidency merely to receive a communication from the treasurer; a copy of the law on seals and stamped paper; a copy of the charges presented by Lawyer Liongson to the provincial governor against the municipal officials, which are set forth in the investigation hereinafter described; a copy of the document sent by Attorney Liongson to the provincial governor reserving the right of the parish priest to bring suit in court against the accused officials; copy of the charges against said officials sent to the provincial fiscal; a communication from Liongson to the provincial governor in which he informs the latter that the president of the provincial board of health has just visited the town of Victoria (August 22, 1902) and that, among other sanitary measures, he had ordered the municipal cemetery to be closed on account of its unhygienic condition. The municipal president paid no attention to the order and had ordered Catholics, under penalty of a \$100 fine, to bury their dead in the municipal cemetery instead of in the Catholic cemetery. This complaint of the attorney states that the abuses of the municipal officials have arrived at such a point that the provincial authorities should interfere. The next document shown in the case is dated August 27, 1902, and contains the charges presented by Attorney Liongson, on behalf of the parish priest, against the municipal officials, before the provincial board.

---

TARLAC, August 27, 1902.

The board met in extraordinary session for the purpose of making an investigation in regard to the charges brought by Padre Cirilo Vergara, represented by his counsel, Attorney Liongson, against Vicente Rigor, municipal president of Victoria; Ramon Rigor, vice-president; Juan Villa Agustin, justice of the peace; Zoilo Villarta, councilor; Valentin Camolinda, municipal treasurer, and Nazario Samonte, municipal secretary.

After opening the session the governor read article 1 of act 314 and, in virtue of the same, declared all the defendants to be suspended from their offices, except the justice of the peace, who can only be suspended by the civil governor of the islands.

The governor informed President Rigor of the charges brought against him by Lawyer Liongson; defendant answered that he thought he was not guilty, as he had merely complied with the order of the provincial treasurer, which directed him to show the padre the copy of the laws in force in regard to the use of seals and stamped paper for public papers and documents.

PROVINCIAL TREASURER. But I did not direct you to make the padre personally appear before you. President answers that his only purpose was to show the padre the copy of the treasurer's instructions; that he generally communicated to the public the laws, orders, or regulations received from the superior authorities by means of verbal or written proclamations, but in the present he ordered the padre to come to the presidential building because the treasurer had directed him to show him the copy, and he could not himself go to the convent.

The governor remarked that there was no article of the Municipal Code authorizing a president to order a priest to appear before him simply to show him a communication, and asked him if, since he could not or would not go to the convent, he could not have found a proper way of settling the matter by sending him, for instance, a copy of the communication. The president answered that the treasurer had directed him to show the padre the communication.

Lawyer Liongson remarked that the answers of the president showed that he had taken an arbitrary advantage of his situation as president to force the padre to appear before him when he was authorized by no law or rule of the Municipal Code; that if he communicated the laws to other citizens of the public by means of written or verbal proclamations and did not force them to appear before him, he had less reasons to behave as he had done toward the priest of the pueblo, not only on account of his character as priest, but because he was, on this occasion, an authority or public official of the ecclesiastical order; the president was also guilty of a false interpretation when he wrote to the padre on August 2 as if the provincial treasurer had directed him to make the padre appear personally before him for the purpose of showing him a copy of the laws when the treasurer's communication gave him no such instructions whatever.

To a question from the treasurer, asking him if it would not have been more simple to send the padre a copy of the laws, the president answered that he had merely followed his orders as he had understood them.

GOVERNOR. Why did you bring charges against the padre before the justice of the peace for contempt and insults?

PRESIDENT. On account of his answer to my communication. I thought that he had shown contempt for my authority as a representative of the Government of the United States in the pueblo by refusing to appear before me, and insulted me by saying that he was nobody's slave.

To a question asked by the supervisor, the president answers that he had duly published in the municipality the laws mentioned in the treasurer's communication. Lawyer Liongson says that he is ready to prove by witnesses that this is not true.

The justice of the peace is next examined.

The governor states that he has sent him a copy of the charges brought against him and asks him if he holds himself responsible.

JUSTICE. I received from the president a complaint against the padre for contempt and insults, and in the course of the investigation his preventive arrest was decided; but, in view of his character as a minister, I informed him that he was under arrest in the convent and should not leave it. Lawyer Liongson asks that the record in regard to this fact, which had been presented to the court of first instance, be submitted to the board, and called attention to the numerous corrections and changes made between the lines. The justice was asked if these changes existed when he signed the record. He answered that he did not remember, as he did not know Spanish and knew nothing about the contents of the record.

Liongson called the attention of the board to the answer of the justice for future reference. The justice was then asked, at the attorney's request, if, after the padre had given bail, a warrant of preventive arrest had not been simulated against him. The justice answered that, although the bondsmen had appeared before the court, they had not signed their bond.

GOVERNOR. Who were the bondsmen, and when did they sign the bonds, since the counsel for the plaintiff declares that they had been duly sworn, and you say that they had not signed?

JUSTICE. The bondsmen were Caudencio Bernabe and Geronimo Velasco. They presented themselves in the morning and were duly sworn, but as at that time the

padre could not be found, because he had escaped, they did not sign; but they signed in the afternoon.

The governor informs the vice-president, Ramon Rigor, that he is accused of having ordered two policemen to take the padre from the court of justice, where he was under arrest, and conduct him as a prisoner to the president's office. The vice-president answered that he had only ordered the two policemen to see if the padre was under arrest in the court-house, and that, as they found him there, he did nothing.

COUNSEL. I know and can prove by these same policemen that they had received orders to conduct the padre to the president's office, but the justice objected to allow the orders of the vice-president to be carried out.

VICE-PRESIDENT. I do not deny that I ordered the policemen to conduct the padre to the president's office if they did not find him at the court-house, and if the justice was not there; but as the justice was there the policemen went away.

At the request of the attorney, the policemen were summoned to appear September 2, 1902.

The governor tells Zoilo Villarta, councilor and secretary of the justice of the peace, that, among other charges, he is accused of having refused to communicate to the padre the charges which had been preferred against him, thus depriving him of a lawful means of defense. Villarta answers that he thought it was his duty not to show him said charges, because sentence had already been passed in the case, and the record was about to be sent to the court of first instance.

The governor shows the municipal treasurer, Valentin Camolinda, several receipts given by him for money received for burial fees in the municipal cemetery, and tells him that he is accused of collecting fees unauthorized by law and tampering with official documents by misconstruing the requests of the interested parties, since, according to Lawyer Liongson, the bodies were buried in the Catholic and not in the municipal cemetery. The municipal treasurer answers that it is true he has collected the money and given receipts, as provided in an article of the municipal ordinance which he as treasurer had to obey; he denies having tampered with official documents, since when the interested parties paid their fees they declared that they would bury the bodies in the municipal cemetery, and it was not his fault that they did not do so.

At the request of Lawyer Liongson he is summoned for further examination on September 2, 1902.

The governor tells Secretary Nazario Samonte that he is under the same charge as the treasurer, and asks him if he had received fees for entry in the civil register; if he had ever refused to register a death, or required a receipt showing that a payment had been made to the municipal treasury, and if he had entered in his books any amounts paid for registering a death certificate. The secretary answers in the negative.

GOVERNOR. Before entering a death certificate on your books have you ever given the people to understand that they had to pay a certain amount to the treasury before the death was registered?

SECRETARY. No, sir.

The lawyer insists and offers to bring witnesses.

The governor closes the session and raises the suspension from office in the cases of the municipal treasurer and secretary, no serious charges appearing against them.

At the request of Liongson, the assistant justice of the peace, Canuto Aglipay, is summoned for the 2d of September.

(Signed by the provincial secretary.)

---

TARLAC, September 2, 1902.

Ordinary session of the provincial board.

Witness Damaso Baldiviano, a corporal of the police of Victoria, states that he had been ordered by the vice-president to take the padre from the convent to the president's office and from there to the court-house; he says that he had not been ordered to take him from the court-house to the president's office.

The governor asks the vice-president why he had ordered the police to take the padre from the convent and conduct him to the presidency and the court-house. By way of reply the vice-president presented the following documents:

(1) "Victoria, August 3, 1902. To the municipal president. Sir: I have the honor to inform you that in the course of the investigation I am making against the priest, Cirilo Vergara, for contempt and insult, his preventive arrest in his convent has been decided. This communication is made for your information and action. (Signed) Juan Villa Agustin, justice of the peace."

(2) "Victoria, August 11, 1902. To the Municipal Vice-President. Sir: The priest, Cirilo Vergara, having broken his preventive arrest in the convent, as this court is informed, I have the honor to request that you will have him arrested and brought before this court. (Signed) Juan Villa Agustin, Justice of the Peace."

GOVERNOR. These documents do not say that the priest was to be taken from the convent. Why did you send after him? Vice-president answers that, as the priest had escaped and his whereabouts were not known, the policemen had seen him when he returned and arrested him, and, as he wanted to go on toward the convent, he ordered them to take him to the court-house.

Lawyer Liongson asks the vice-president if, after arresting the priest in the convent and taking him to the president's office, he ordered him to be conducted to the court-house as a prisoner. The vice-president answers that he did, in view of the charges filed against him before the court.

Lawyer asks him under what impression he had ordered the arrest of the priest. Vice-president says that it was in view of the communication of the justice.

To a question by the provincial treasurer, the vice-president answers that he had placed no guards about the convent while the priest was under arrest there. Treasurer asks why, since no policemen had been necessary to watch the padre, he had required seven policemen to arrest him and bring him back to the court-house. Vice-president answers that he had received an order of arrest from the justice, and that he had sent seven policemen because the padre had refused to follow one.

LAWYER. Are you absolutely sure of that?

VICE-PRESIDENT. No, sir; it was reported to me by the policeman on guard in the sentry box; and, as I thought that the padre refused to go because he saw no judicial order, I handed the order to the sergeant, who went with a few policemen, and when the padre saw the order he gave himself up.

Lawyer Liongson declares to the board that while he was in the court-house with the vicar of the province, Padre Eusebio Natividad, there came several policemen who said that they had orders to take and bring the priest to the president's office as a prisoner. The vicar finally asked the justice who had the right to dispose of the person of the accused, and the justice answered that he alone and no other had that right.

The board then examined Mariano Eugenio, Feliciano Mallari, Jorge Mariano Gacusan, and Pedro Cagarin, holders of the receipts issued by the municipal treasurer, who was charged by Lawyer Liongson with having collected fees unauthorized by the municipal code and tampered with public documents. The witnesses recognized the receipts which were presented to them by the provincial governor. Asked where they had buried the bodies, they answered, "In the Catholic cemetery." They were asked why they had buried the bodies in the Catholic cemetery when the receipts stated that they could be buried in the municipal cemetery, and said that when they went of their own free will to the treasury in order to pay the burial fees it was their intention to have the bodies buried in the municipal cemeteries, but that, after the bodies had been blessed by the padre, the latter's sexton told them that as the bodies had been blessed they would have to bury them in the Catholic cemetery.

With the permission of the board, Lawyer Liongson asks Canuto Aglipay, assistant justice of the peace of Victoria, if he knew he was accused of prevarication before the court of Victoria.

JUSTICE. Yes, sir.

LAWYER. Have you given your decision in regard to the dilatory plea presented by the parish priest?

JUSTICE. Yes, sir.

LAWYER. Did you consider the facts as constituting a misdemeanor or a fault?

JUSTICE. A fault.

LAWYER. Was your decision of a civil or a criminal character?

JUSTICE. Civil.

LAWYER. Before giving your decision in a civil case was there a civil trial?

JUSTICE. No, sir.

LAWYER. So that you give judgment in a civil case in the absence of either plaintiff or defendant?

JUSTICE. It was a case of "official prosecution."

LAWYER. So that, in a civil trial, you prosecute, answer, and give judgment?

JUSTICE. Yes, sir; as I understand it.

The investigation being closed, the members of the provincial board proceeded to a careful examination of the facts, and by a unanimous resolution decided to make the following recommendation to the civil governor:

1. That the municipal treasurer, secretary, and police be relieved from all respon-

sibility, as they had merely obeyed their orders within the limits of their attributions, and as provided by the municipal law and ordinances.

2. That the president, vice-president, and Councilor Villarta be removed from their offices, they having deliberately taken a wrongful advantage of their positions, blindly obeyed their personal feelings of resentment, and failed in the performance of their duties, by using their official positions in the satisfaction of their personal grudges.

3. That the justice and assistant justice of the peace be suspended from office, if the honorable civil governor should deem it convenient.

(Signed by the provincial secretary.)

On September 9, 1902, the provincial secretary forwarded the minutes of the proceedings as above outlined to the executive secretary, and on September 22, 1902, the following order of the civil governor went into effect:

Vicente Rigor, municipal president of Victoria; Ramon Rigor, vice-president, and Zoilo Villarta, councilor, are, upon recommendation of the provincial board, removed from their respective offices for the reasons stated in the recommendation, to wit, that they have used their official positions to bring contumely and insult upon Padre Cirilo Vergara by causing his arrest and detention without the slightest cause therefor and merely to gratify personal spite. Furthermore, Juan Villa Agustin, justice of the peace, and Canuto Aglipay are suspended from their respective offices, the former for the same offense as that charged against the municipal officers above mentioned, now removed, and the latter for entering judgment against a defendant without giving him any notice or hearing whatever.

Owing to a clerical oversight in the records division, the two last-mentioned officers remained suspended until February 5, 1903. At that time the matter was again brought up, and the officers were removed from office.

#### EXHIBIT No. 15.

LUCENA, *June 26.* (Received June 27.)

EXECUTIVE SECRETARY,  
*Manila:*

A priest in the province refuses to give to municipal secretary a list of marriages, births, and deaths. How can we proceed to procure—in what manner?

PARAS.

[Memorandum—Opinion.]

(Act No. 82.)

By the terms of the municipal code the municipal secretary must keep an official record of all marriages, births, and deaths within the municipality, known as the "Civil Register."

Every person resident within the limits of the municipality who is authorized by law to celebrate marriage is required to forward immediately to the municipal secretary a notification of every marriage which he celebrates, together with the necessary data, for entry in the civil register. (Section 20-d.)

Municipal secretaries are directed to issue, upon the demand of any person, a certified copy of any record "within his control," for which they may charge a certain fee. (Section 20-e.)

If the priest in question, at the time of the celebration of each marriage by him, forwarded to the municipal secretary the notification required by law, the municipal secretary is not empowered to subsequently demand a list. If the municipal secretary's civil register is complete, he has in his possession the material for the list.

Respectfully,

DAVID LEWIS COBB

MANILA, P. I., *June 27, 1903.*

Governor PARAS, *Lucena, Tayabas:*

Referring to your telegram of yesterday, the municipal secretary has no warrant of law to demand of a priest a list of marriages, births, and deaths, it being his own duty to keep an official record of all marriages, births, and deaths. While it is the

priest's duty, whenever he celebrates a marriage, to forward immediately to the secretary a notification of the same, together with the necessary data for entry in the civil register, as required by section 20, letter (d), act 82, this is all that is required of him by law.

FERGUSON, *Executive Secretary.*

Official business.

EXHIBIT No. 16.

CATHOLIC TRUTH SOCIETY, FLOOR BUILDING,  
*San Francisco, November 5, 1902.*

His Excellency WILLIAM H. TAFT,  
*Governor of the Philippine Islands:*

We beg to call your attention to the inclosed letter, published in the Gazette, of Galena, Ill., October 23, 1902, and signed by G. M. Palmer, a teacher in the public school department of the Philippine Islands.

The letter is in many ways objectionable. First, it reiterates the wholesale charge of immorality against the friars, a charge which the official reports and the most reliable testimony declare was grossly exaggerated. This Palmer puts the charge in a specially vicious manner. We refer to the third paragraph of his letter, and especially to the closing sentence of that paragraph. That such accusations and exaggerations should still be published in this country, and particularly by men in the employ of the United States Government, is very annoying to American Catholics and very unjust to the parties accused. The Catholics of this country and all liberal-minded Americans will no longer stand for such injustice.

The Philippine government pays this Palmer to teach school, not to circulate falsehoods in this country.

Such persons as he have done more to stir up strife and make the Philippine question more difficult of solution than anything else.

It is evident from his letter that Palmer is engaged in the proselytizing business. He admits that he inquired about the Bible in his school. He admits further that he invited the school children to visit his house after school hours to inspect this mysterious and unheard-of book called the Bible. And behold, as a result of his pious efforts, "there are quite a number now who wish to study it." If this is not proselytizing in a public official, if this is not using his office as a teacher to interfere with the religion of his pupils, then we do not know what proselytism is.

We submit that this man Palmer demonstrates his unfitness for the position which he occupies. We submit that he and his like are a stumbling block in the way of the United States Government, that it is they who have caused the lack of confidence which exists in this country toward the school department of the Philippines, that it is such tactics that have marred the efficiency of the school department in the islands. We most respectfully call your attention to this case and beg for the favor of a reply.

Very respectfully,

THE CATHOLIC TRUTH SOCIETY  
By PHILIP O'RYAN, *Director.*

[First indorsement.]

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
EXECUTIVE BUREAU, *Manila, December 24, 1902.*

Respectfully referred to the general superintendent of education, through the honorable the secretary of public instruction, for investigation and report. It is requested that copy of the within letter be forwarded to Mr. Palmer.

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

[Second indorsement.]

OFFICE OF THE SECRETARY OF PUBLIC INSTRUCTION,  
*Manila, December 24, 1902.*

Respectfully referred to the acting general superintendent of education for compliance with the first indorsement.

BERNARD MOSES,  
*Secretary of Public Instruction,*  
Per W. H. D.

[Third indorsement.]

BUREAU OF EDUCATION,  
*Manila, January 13, 1903.*

Respectfully returned to the honorable the civil governor of the Philippine Islands, through the honorable the secretary of public instruction, with the statement that the general superintendent has called Mr. Palmer to conference, and inviting attention to the inclosed statement from Mr. Palmer. In my talk with Mr. Palmer he said he was sorry that this matter was brought to the attention of the public, but showed a decided spirit of independence, as is also shown in his written statement, which is herewith submitted.

E. B. BRYAN,  
*General Superintendent of Education.*

[Fourth indorsement.]

OFFICE OF THE SECRETARY OF PUBLIC INSTRUCTION,  
*Manila, January 19, 1903:*

Respectfully returned to the civil governor, in compliance with the first indorsement. Letters such as the printed inclosure serve no useful purpose, unless the arraying of one class of citizens against another on the lines of religious prejudice and hatred may be so considered. Coming from a teacher in the Philippines, where the population is overwhelmingly Catholic, such communications are especially harmful. The distrust of the Filipino people has been rather allayed than overcome, and Mr. Palmer's uncomplimentary, not to say unjust, references to them will not aid the Government in retaining their confidence, neither will his strictures on the ministers of their religion materially increase the attendance at the public school of Bocaue.

If one may judge by his answer to the within charges Mr. Palmer seems to think that his criticism of the prevailing religion of the country and its ministers was strictly within his rights and that no one can say him nay if, taking advantage of his confidential office, he invites pupils to his house for the purpose of giving into their hands religious books of his own selection and inculcating religious principles of his own choosing. Nevertheless, criticisms by teachers of the doctrines of any church, religious sect, or denomination and attempts by them to influence the pupils in any public school for or against any religion are definitely prohibited by law. Under and by virtue of the terms of act 74, section 16, "No teacher or other person shall teach or criticise the doctrines of any church, religious sect, or denomination or shall attempt to influence the pupils for or against any church or religious sect in any public school under this act." Mr. Palmer evidently considered that this law was intended to regulate his conduct in public only and that privately, not to say secretly, the purpose of the enactment might be defeated beneath the shadow of his own roof with impunity. Mr. Palmer was mistaken. The law can not be so construed, and even if it could, Mr. Palmer must not hope to escape administrative condemnation for his attempt to circumvent a law whose purpose is so plain and unequivocal. One of the most serious obstacles which the American system of education has had to encounter and is now encountering in the Philippine Islands is the suspicion of the native inhabitants that the school is to be used to undermine and destroy the faith of their children. That this suspicion is wholly without foundation goes without saying, but the American teacher who fails to recognize that it is a factor to be reckoned with and to conduct himself accordingly is a detriment to the service. Mr. Palmer is not in accord with the first commandment of the insular government—to respect all religions, war with none, favor none, teach none. His failure to be neutral in religious matters, as well as his reflections on the people whose children it is his duty to educate, not only impairs his usefulness and efficiency as a teacher, but also hampers the administration in its work of maintaining good relations with the people of the islands and serves to discredit its frequently announced policy of noninterference in purely religious matters. All that can be said in favor of Mr. Palmer is that he "did not know it was going to be published," and that he thought the law only regulated his conduct in the school building. In this case, taking into consideration all the circumstances, I recommend that the teacher be transferred from the school at Bocaue, that he be reprimanded by the general superintendent, and that a copy of the reprimand be furnished to every division superintendent and teacher in the department. This punishment is not as severe as the nature of Mr. Palmer's offense seems to merit, but inasmuch as a public reprimand and transfer will serve all the purposes of a harsher penalty no other is recommended.

JAMES F. SMITH,  
*Secretary of Public Instruction.*

*Memorandum accompanying fifth indorsement.*

The wrong which Mr. Palmer has done is not to be determined by the truth or falsity of the statements which he has made. The issue as to the justice of what he says is wholly aside from the question. No one in the Government employ has the right to make public statements, whether well founded or not, which put him on one side or another of a controversy and, making him a partisan, unfit him for the duties he has agreed to perform. As the secretary of public instruction well says, the success of our public-school system depends upon the popularity of the teacher, upon his winning the confidence of the people who are near him. If he writes articles to his home papers which criticise severely the people with whom he has to live, and with whom he has to succeed, if he succeed at all; if in these articles he attacks their religion or the religious views of the church to which they belong, no matter how well founded such attacks are from his standpoint, he reduces his usefulness in the administration of the system of public instruction to such a point that the bureau ought no longer to be burdened with his presence. More than this, the government here represents the Government of the United States, which is entirely impartial as between Catholics and Protestants, and as between different methods of study and worship. The question whether the Bible ought to be freely distributed among the people, and whether it ought to be studied without the careful explanation of religious teachers, is one upon which churches have differed. A public school teacher, of course, is entitled to his views; but one may have views and nevertheless be under obligations not to express them when the particular function which he is discharging makes an expression of such views an obstacle to his success. There are many ways by which the actual conditions here can be presented to the American people from various standpoints by Protestants, Catholics, and others, and the refusal to permit members of the educational bureau to express themselves in public letters written to the United States is not intended to keep from the United States the facts as they exist here, whatever they are. The refusal is based on the ground that teachers who are employed for the purpose of making the educational system a success here must not do anything which will hamper them and obstruct them in the performance of their duties. One of the obstacles which we have had to meet here is the charge on the part of a number of Catholics of the United States that we are engaged in proselyting for the Protestant religion. This is not true. But any teacher who publicly announces his views and shows his Protestant bias in this regard, lends weight to such an accusation, and accordingly weakens the force of what we are doing. It increases the fire in our rear. It leads to attacks upon the whole system by sincere Catholics at home, which, communicated to Catholics in these islands, tends to weaken our power for good.

It is easy to say that this is a suppression of free speech. If a teacher desires to resign his place and give his attention to correspondence, there is no law in the islands that prevents him from writing anything he chooses which will not injure the general rights of others; but as long as he is a teacher he does give up the right of free speech so far as its unlimited exercise injures his usefulness as a teacher, just as he gives up the right of going where he chooses. He can not leave his district without permission; so he can not express his opinions in a general way as a teacher, if the expression of such opinions is likely to form an obstacle to his success in his work.

I concur in the recommendations of the secretary of public instruction that Mr. Palmer ought to be separated from the service. It is necessary that we should make an example, and while the case is not so flagrant as some, it nevertheless is a case calling for action, and radical action may prevent mistakes by others while a milder punishment would not.

WM. H. TAFT, *Civil Governor.*

[Fifth indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., February 13, 1903.*

Respectfully returned to the secretary of public instruction, concurring in his remarks made in the fourth indorsement.

I had some doubt at first whether the penalty recommended was adequate, but in view of the fact that the letter seems not to have been written especially for publication, I think the milder punishment sufficient. There are some members of the educational department, and perhaps of other departments of the government, that have ideas with respect to the publication of their views which are radically erroneous. It is usually suggested in defense of publications of this kind that in a government organized under the sovereignty of the United States the right of free

speech should always be protected and its exercise never hampered or punished whenever what is said is neither libelous nor seditious nor treasonable. The remark is true so far as individuals who have no official responsibility are concerned; but when a man assumes a public office in the discharge of the duties of which the publication of his views on certain subjects will very much interfere with his usefulness he does consent, with respect to such subjects, to give up the right of free comment, by either speech or writing.

We occupy a peculiar position in this country in the teaching in the public schools, which grows out of the fact that most people of these islands are Catholics and have been used to the close union of religious and secular instruction. The priests and the people, many of them, are naturally suspicious that the introduction of a new system bodes no good for the orthodox religion. If, now, agents of the government in carrying on its schools manifest opinions which are adverse and hostile either to the church, their ministers, or their religious methods of instruction, they disable themselves from performing the duties which they are employed and paid to perform, and much interfere with their powers for usefulness. The question whether the Bible shall be freely read by young and old without the assistance of ministers and others who can explain its texts is a question upon which churches have differed; and, whatever may be thought of it, it is not for teachers in the public schools in this Catholic country either to encourage the study of the Bible—especially of the Protestant Bible—among their pupils or to say to those pupils anything upon the subject. The policy of the government is not intended to suppress a general knowledge of the conditions here or of the facts, whatever they may be. Anyone not a teacher or public official may go into any town in the islands and write as he chooses concerning the conditions there. What the facts are will come out without the efforts of the members of the educational department. They, however, occupy a position of great delicacy under the circumstances, and must leave it to others to explain to the public the actual situation, looked at from the standpoint of writers of various views. Of course, in a new country, with new conditions, it is most natural that teachers of literary tastes should write their impressions of what they see. If they choose to include such impressions in confidential letters, they must run the risk of the action of imprudent or unfaithful correspondents who betray their confidence to the public. The publication of such impressions, though confidentially communicated, produces just as much evil as if the publication were intended.

WM. H. TAFT, *Civil Governor.*

[Sixth indorsement.]

OFFICE OF THE SECRETARY OF PUBLIC INSTRUCTION,  
*Manila, February 17, 1903.*

Respectfully returned to the general superintendent of education, inviting attention to the fourth and fifth indorsements.

JAMES F. SMITH,  
*Secretary of Public Instruction.*

[Seventh indorsement.]

BUREAU OF EDUCATION,  
*Manila, February 20, 1903.*

Respectfully returned to the honorable secretary of public instruction.  
The following reprimand has been sent to Mr. Palmer:

“MANILA, February 19, 1903.

“MR. GEORGE N. PALMER,  
“*Teacher of English, Bocaue, Bulacan.*

“DEAR SIR: Referring to your letter published in the Gazette, of Galena, Ill., October 23, 1902, I have to say that there is nothing to be gained, either here or in the States, by such a letter even if sent as a private letter. Furthermore, you were inexcusably thoughtless in not requesting your friend to consider such information as confidential unless your purpose was to have it published. More harm has been done and more misunderstanding created at home by just such correspondence than almost anything else. You should know that there are many things which George N. Palmer who happens to be in the islands may do, but which George N. Palmer as a civil employee may not do.

“In addition to this reprimand, I propose to transfer you at the earliest practicable date from your present station.

“Very truly, yours,

“E. B. BRYAN,  
“*General Superintendent of Education.*”

In this connection and touching upon the same subject, I am sending to all division superintendents and teachers a circular which contains the following paragraphs:

"I. Section 16 of act 74 explicitly states that teachers shall not teach or criticise the doctrines of any church, religious sect or denomination, and also explicitly sets forth the conditions under which religious instruction can be given by a priest, minister, or religious teacher for one-half hour three times a week. It seems that, in a few cases, teachers have failed to strictly obey the letter of this law. It is understood, of course, that there is no restriction whatever upon anyone attending the church affiliation or church attendance. While we have certain individual rights which must not be ignored, we likewise have certain social and institutional duties and responsibilities that are equally imperative, and it is to the teacher as a social factor that this law of noninterference applies. The general superintendent will expect full compliance with this law by Protestant and Catholic alike. Failure in such compliance will be considered sufficient ground for immediate dismissal.

"II. Because of your great distance from the States, and the prevailing conditions here being so different from the conditions there, it is very difficult for home people to correctly understand many things that we may be disposed to say to them in letters. They get a wrong impression, talk matters over freely, and frequently allow letters to be published, thus multiplying the wrong impression many times. Recently I have had my attention called to two cases of this kind, which have resulted in great embarrassment to the authors of the letters and considerable annoyance to the civil commission and this office. Teachers are requested to exercise such care as the situation demands, both in their statements and by special direction to correspondents that all private communications shall be treated as such. Any misuse of matter sent to the States will be treated as if authorized by the party sending it."

E. B. BRYAN,  
*General Superintendent of Education.*

[Eighth indorsement.]

OFFICE OF THE SECRETARY OF PUBLIC INSTRUCTION,  
*Manila, February 24, 1903.*

Respectfully returned to the acting executive secretary, inviting attention to the seventh indorsement.

JAMES F. SMITH,  
*Secretary of Public Instruction.*

[Ninth indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
*Manila, February 27, 1903.*

Respectfully returned to the secretary of public instruction. It seems to me that a statement of the case, together with the indorsements of the secretary of public instruction and the governor, ought to be sent to all the teachers in the Archipelago. What is the view of the secretary of public instruction on this subject?

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 17.

LAW OFFICES HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ,  
*No. 7 Calle Audiencia, Manila, P. I., March 18, 1903.*

The CIVIL GOVERNOR, *Manila, P. I.*

SIR: By direction of the bishop administrator of the archdiocese of Manila, we have the honor to submit for your attention the complaint of the parish priest of Polo against the municipality of that town for violation of the Catholic cemetery therein situated, and inclose copies, with translations thereof, of the correspondence which the parish priest sent and received in regard to the matter. The parish priest has received no notification whatever from the governor in regard to his communication, and the matter is of so much importance that it is believed it should be brought immediately to your attention. We are informed that the following parties took part in the breaking open of the door of the cemetery: One Martin, of the police force of the municipality; the vice-president of the town, Geronimo Angeles; the municipal treasurer, Rufino Valenzuela; the municipal doctor, Pio Valenzuela; one Francisco Valenzuela, and one Eugenio Augustines.

Very respectfully,

HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ,  
*Counsel for the Archdiocese of Manila.*

The inclosures with the above letter were as follows:

1. A communication, dated March 12, 1903, from the vice-president of the municipality to the parish priest, asking that, for the sake of the hygiene of the municipality and because there is no other cemetery in the pueblo, the priest will give the proper orders to his watchman of the cemetery to allow the burial of Doña Agustina Evangelista.

2. A communication, dated March 12, 1903, from the secretary of the archdiocese of Manila, as follows:

"ESTEEMED FATHER: The bishop says that when any person dies outside the Catholic Church and is publicly in the Aglipayan communion in no case can he be interred in the parish cemetery. The Catholic Church parish is one thing and the public and municipality is another. That they may claim rights which they have not, and you will protest to the authorities and not permit such atrocities."

3. Communication from the parish priest of Polo, dated March 12, 1903, to the municipal president, as follows:

"Having received notice that the Aglipayans are going to inter in the cemetery belonging to the Roman Catholic Church, which is in my care, the body of Doña Agustina Evangelista, who died publicly in the schism, and in order to stop all disorder and conflict that might occur, I ask you to give sufficient aid in case they make such attempt.

"Awaiting your answer at the earliest possible moment, I am,

"Respectfully,

"LADISLAO SANTOS."

In reply thereto:

"I understand your communication, and will always with the best vigilance attend to those who will violate public order.

"GERONIMO ANGELES."

4. Communication, dated March 13, 1903, from the parish priest to the provincial governor, as follows: "Under date of the 12th of the present month I directed an official statement to the president of Polo, of which a copy is adjoined, and feeling in my heart, Señor Governor, that in place of giving me help as I asked he assisted the Aglipayans with 8 armed constabulary, in whose presence was destroyed the door or the padlock of the Catholic cemetery of the parish, I have the honor to place in your knowledge these facts."

MANILA, P. I., March 20, 1903.

Señor PABLO TECSON,  
*Governor of Bulacan, Malolos.*

My DEAR GOVERNOR: I beg to inclose herewith complaints, with evidence, made on behalf of the parish priest of Polo against certain officials of the town of Polo for violation of the rights of the parish priest by breaking down (open) the Catholic cemetery and burying therein one who is forbidden by the laws of the church to be buried. If the fact are as claimed, it seems to me that you ought to make an example of the officials and remove them and direct the fiscal to prosecute them. Will you be good enough to look into this matter? We can not permit lawlessness on either side of this church controversy, and people must be taught to recognize the legal rights of others, and if they contest those rights to test them in the courts and not by violence.

Very sincerely, yours,

WM. H. TAFT, *Civil Governor.*

[Telegram.]

MANILA, March 30, 1903.

Governor TECSON, *Malolos, Bulacan:*

No report received from you as yet complaints parish priests San Rafael and Polo. Papers referred to you March 14 and 20. Please expedite action and report as soon as practicable.

FERGUSON, *Executive Secretary.*

[Telegram.]

MALOLOS, March 31.

EXECUTIVE SECRETARY, *Manila:*

Acquainted with your wire relating complaints of parish priests of San Rafael and Polo, state Governor Tecson busy operating against ladrones. Am also busy census work and board of revision. Nevertheless, when on inspection work in San Rafael,

made investigations in matter complaints. Owing to want of time could but commence same, and have not determined responsibility of president. Will take every effort to expedite action in matter and will report.

FRANCISCO MORELOS, *Acting Governor.*

Copy furnished T. L. Hartigan for his information.

MANILA, April 24, 1903.

Hon. PABLO TECSON,  
*Provincial Governor, Malolos, Bulacan.*

SIR: Referring to the complaints of the parish priests of San Rafael and Polo in the matter of the alleged violation of the church regulations by the people of said municipalities, I have the honor to request that you make a special effort to investigate the matters complained of and render your report to this office at the earliest practicable date. It is, of course, realized that you have been very busy of late with other matters, but as these complaints have now been pending for some time, it is hoped that you will soon be able to thoroughly investigate and report thereon.

Very respectfully,

A. W. FERGUSON, *Executive Secretary.*

OFFICE OF THE GOVERNOR, PROVINCE OF BULACAN,  
*Malolos, P. I., May 1, 1903.*

The EXECUTIVE SECRETARY, *Manila, P. I.*

SIR: I have the honor to inform you that in view of the investigation I have ordered to be made in connection with the complaint of the parish priest of Polo against the vice-president of said town, I shall submit the results thereof to the honorable provincial board for judgment; and, in regard to that of San Rafael, I have to state that the same was forwarded to the honorable government, with the report of the board, on the 11th of April last.

I beg you to inform the honorable civil governor of the above statements.

Very respectfully,

PABLO TECSON,  
*Provincial Governor, Bulacan.*

There were 14 pages of testimony in the case, and the report of the provincial board was as follows:

The facts charged by the prosecution are admitted by the defendants, and are as follows:

The vice-president, acting as president, having been informed that there existed in the pueblo two corpses in the state of incipient putrefaction, which the parish priest had refused to bury in the Roman Catholic cemetery for the reason that the deceased had not, in view of their faith, been entitled to burial therein, wrote a courteous communication to the priest requesting him to permit the burial of the deceased in his cemetery. The parish priest, however, denied the request. The vice-president then, since there existed no other cemetery in which the bodies could be buried, ordered their interment in the Roman Catholic graveyard, which order was duly executed by the municipal officers.

While the testimony submitted by the board goes to show that the course taken by the vice-president, although clearly illegal, was adopted in good faith and under the impression, probably, that the urgency of the situation justified stringent and desperate measures, still it is believed that the necessity of enforcing a strict and intelligent observance on the part of the municipal and other government officers of the rights of the church in this and similar cases demands the removal of the accused for the sake of example.

It is respectfully recommended, therefore, that Geronimo Angeles, vice-president of Polo, Bulacan, be dismissed from office.

MANILA, P. I., June 9, 1903.

Mr. GERONIMO ANGELES, *Polo, Bulacan, P. I.*

SIR: The charges, evidence, and recommendations of the provincial board of Bulacan in the case against you having been received and duly considered, you are informed that the findings of said board are concurred in, and you are accordingly hereby dismissed from the office of municipal vice-president of the municipality of Polo, province of Bulacan.

By direction of the civil governor:

Very respectfully,

A. W. FERGUSON,  
*Executive Secretary.*

Before the letter last above written, however, there was sent a telegram as follows:

MANILA, *May 26, 1903.*

TECSON, *Governor, Malolos, Bulacan:*

Report mentioned in your letter of 1st instant re complaint of parish priest Polo against vice-president of Polo not yet received. Telegraph action taken thereon by provincial board, and when papers will be sent to this office.

FERGUSON, *Executive Secretary.*

[Telegram.]

MALOLOS, *May 27.*

EXECUTIVE SECRETARY, *Manila:*

Referring to telegram 26th, complaint parish priest Polo against vice-president, papers and resolution of board relative to said matter were forwarded on 14th instant. Copies of resolution and communication forwarded to-day.

FRANCISCO MORELOS,  
*Provincial Secretary of Bulacan.*

The communication referred to in the last telegram is as follows:

PROVINCE OF BULACAN,  
OFFICE OF THE SECRETARY.

I do hereby certify that the following resolution has been passed by this provincial board of the province of Bulacan in a special meeting held on May 11, 1903:

*Resolved*, That the vice-president of Polo, having been found guilty of violating the law by infringing on the right of the parish priest in that he ordered the burial in the Catholic cemetery of a body which according to the law of the Catholic Church was forbidden to be interred there, is hereby removed from his office, to take effect May 11, 1903, subject to the approval of the honorable civil governor of the Philippine Archipelago.

FRANCISCO MORELOS,  
*Provincial Secretary of Bulacan.*

MALOLOS, P. I., *May 27, 1903.*

EXHIBIT No. 18.

SAN RAFAEL, *March 8, 1903.*

JUSTICE OF THE PEACE, *San Rafael, Bulacan.*

Bonifacio Ycasiano, parish priest of San Rafael, appears before you, accusing in legal form the señor presidente of this town, Don Victorino de la Fuente, for the following fact:

Having been informed by my sacristan mayor, Teodoro Lopez, that some persons were disposed to bury the corpse of one Leodegario de Guzman, a Protestant, I immediately proceeded to protest in legal form, as shown by the document hereto annexed, and, far from answering in the form becoming a public officer, or even that of a courteous man, he returned the protest saying that no one could oppose his will when he ordered that a corpse should be buried in any place he wanted, be it sacred or not, and in case anyone should oppose his sovereign determination, he ordered all the police to be armed and to accompany the corpse, with definite orders to fire on the first who should mutter a word or oppose the burial in the Catholic cemetery, and publicly cried out, ordering his policemen that if I or the sacristan mayor appeared on the scene to tie us and shoot us on the spot. From what I have stated results: First, that the señor presidente, being a Protestant, takes advantage of his authority to impose on the Catholics, thus trampling upon the provisions in force upon the freedom of worship; second, that he has usurped a property of the Catholic Church, violating, moreover, a sacred place, for henceforth there can not be buried in said place the corpse of anyone who dies in the communion of the Catholic Church until the corpse of the said Protestant is taken out, all of which constitutes a grave injury; and third, the threat with armed force directed against peaceful citizens who have no other crime than that of defending the legitimate rights of the church against unlawful actions. By virtue of which I ask—first, that the corpse in question be taken out at the president's expense, which by orders of his has been buried in said place; and second, that, without prejudice to the criminal proceedings to which he has given occasion according to law, he should give public satisfaction to the persons offended and scandalized by the afore-said actions of his.

Respectfully,

BONIFACIO YCASIANO.

Subscribed and sworn to before me this 8th day of March, 1903, at 4.30 o'clock p. m.

AMBROSIO VALERA,  
*Justice of the Peace.*

COURT OF THE JUSTICE OF THE PEACE OF SAN RAFAEL,  
*March 8, 1903—5 p. m.*

The honorable judge said: That, acknowledging receipt of the aforesaid accusation, he refuses to take any legal proceedings in view of the conduct shown by the municipal president of this town, Señor Victorino de la Fuente, at the time when the complainant asked protection of the said president, who proceeded not only by refusing the protection solicited, but by arming the municipal police force under his control, with definite orders against anyone opposing his will; therefore, he believes that it is not wise to interfere in the affair, because the gross conduct of the municipal president was not directed at the force of the law, but at the law of force, while the defendant may be in a condition to trouble anyone; thus it is that he provides for an appeal to the superior, so that convenient measures may be taken. It is thus ordered.

AMBROSO VALERO.

SAN RAFAEL, *March 8, 1903.*

MUNICIPAL PRESIDENT, *San Rafael, Bulacan.*

SIR: The undersigned, parish priest of this town, protests against the burial of a corpse of a Protestant in the holy cemetery with the rites of the Roman Catholic Church; and, therefore, abiding by the provisions in force, asks protection so that the burial of one Leogario de Guzman in the sacred ground will not take place, and asks you to acknowledge receipt of this for consequent results.

Respectfully,

BONIFACIO YCASIANO.

NO. 2 CALLE ARZOBISPO,  
*Manila, P. I., March 11, 1903.*

The CIVIL GOVERNOR, *Manila, P. I.*

SIR: By direction of the bishop-administrator of the archdiocese of Manila, we have the honor to present for your consideration the inclosed documents from Rev. Bonifacio Ycasiano, parish priest of San Rafael, Bulacan, with translations, and to request your attention to the same.

Very respectfully,

HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ.

[First indorsement.]

EXECUTIVE BUREAU,  
*Manila, P. I., March 14, 1903.*

Respectfully referred to the governor of Bulacan for his action, if the evidence discloses the facts as stated herein by the parish priest. If the municipal president has thus resorted to violence to compel the priest of the Roman Catholic Church to permit the burial of a person whose burial is forbidden by the laws of the church in a cemetery in the possession of the church, and has enforced his will by violence, he ought to be suspended and removed. He has no right to take the law into his own hands. He has no right to infringe the rights of property of the Roman Catholic Church and its right of possession. Even if he claims that the church is not the owner of the cemetery, the church is in possession, and it is a gross violation of his duty to violate that possession by force. The question of the right of property can be tested in the courts. I trust that you will look into this matter, as I know you will, impartially, and act, as I know you will, as justice dictates.

WM. H. TAFT, *Civil Governor.*

Here follows the report of the acting governor of the province, Francisco Morelos, which, together with the testimony accompanying it, covers 7 typewritten pages. The report is to the effect that the ground in which the corpse was buried is outside the Catholic cemetery and forms no part of it. The testimony, while conflicting in some of its details and not definite, seems to substantiate this opinion.

[Second indorsement.]

(This indorsement is the reference of the above-mentioned report to the civil governor.)

[Third indorsement.]

EXECUTIVE BUREAU,  
*Manila, April 23, 1903.*

Respectfully referred to Messrs. Hartigan, Marple, Solignac, McCabe & Gutierrez, attorneys at law, Manila, inclosing additional information in this case, and requesting prompt return of all papers with such comment as they may see fit to make.

A. W. FERGUSON,  
*Executive Secretary.*

[Fourth indorsement.]

MANILA, *May 2, 1903.*

Respectfully returned to Hon. A. W. Fergusson, executive secretary, asking attention to the further statement of the parish priest of San Rafael and the affidavit of Rev. Juan de la Rosa, who consecrated the cemetery in the year 1882, with translations thereof.

HARTIGAN, MARPLE, SOLIGNAC, MCCABE & GUTIERREZ,  
*Counsel to the Archdiocese of Manila.*

(What the additional statement was, which is mentioned in the fourth indorsement, does not appear from the record.)

[Fifth indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
BAGUIO, BENGUET, *May 9, 1903.*

Respectfully returned to the governor of Bulacan, inviting attention to the additional evidence submitted by the parish priest, together with the affidavits of the priest who blessed the cemetery, and requesting that a much fuller investigation be made, not only as to the case of where the cemetery was, but as to what was used as a cemetery at the time of the burial, and whether what was used included the place of burial in this instance. The question is one of actual possession, not title.

WM. H. TAFT, *Civil Governor.*

[Sixth indorsement.]

OFFICE OF THE PROVINCIAL GOVERNOR,  
PROVINCE OF BULACAN,  
*Malolos, P. I., May 26, 1903.*

Respectfully returned to the executive secretary, together with the information and papers in this matter.

PABLO TECSON, *Provincial Governor.*

(This second report of the provincial officials covers seven pages, and confirms and strengthens the former.)

[Seventh indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
Baguio, Benguet, *June 13, 1903.*

Respectfully referred to Messrs. Hartigan, Marple, Solignac, McCabe & Gutierrez, inviting attention to the decision of Governor Tecson upon the question of actual control of the cemetery where the burial took place and the evidence upon which his decision proceeded.

It seems to me that the decision is correct and that the cemetery was a municipal cemetery de facto. Whether the title was in the church is a question for adjudication which may be raised in the ordinary way, but the action of the president in ordering the burial to take place where it did take place was an order affecting property in actual control and custody of the municipality, and therefore offers no occasion for discipline of the president. The church authorities may have recourse to the court of first instance to test the title and oust the municipality, if it has been and is in unlawful possession. The return of these papers is requested.

WM. H. TAFT, *Civil Governor.*

## EXHIBIT No. 19.

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., July 14, 1903.*

Respectfully forwarded to the Hon. Juan Cailles, provincial governor of La Laguna, calling his attention to the within communication. If, as stated, the municipal council of Lilio has passed an ordinance levying a tax upon the ringing of church bells when certain ceremonies are performed, the councilors have acted improvidently and in excess of their authority. The only authority given the municipal council to levy taxes is found in the municipal code, in which the subject of taxation is specifically enumerated, and any others are prohibited. It is desired that you promptly notify the municipal council of Lilio of the impropriety of its action and see that the ordinance is repealed.

LUKE E. WRIGHT, *Acting Civil Governor.*

## EXHIBIT No. 20.

OFFICE OF THE SECRETARY, PROVINCE OF CAVITE,  
*Cavite, P. I., October 24, 1901.*

Honorable CIVIL GOVERNOR, *Manila, P. I.*

SIR: In the minutes of the quarterly meeting of the municipal presidents, prescribed by article 4 of act No. 136, held in Cavite on the 21st of the current month, appears the following, which, having been submitted for approval by the provincial board in their regular session of this day, I have the honor to transmit to the United States Philippine Commission through your honored self:

"VII.—*Resolved*, On motion of the municipal president of San Roque, to recommend to the Civil Commission, through the provincial board of Cavite, the unanimous expression of opinion of the municipal presidents of the pueblos of this province that the question of the friars should be promptly and effectively settled, as it is a matter of primary importance, for the friars, or those who purport to represent them, are making manifestations of such a character that (although, fortunately, up to the present date they have been peaceable) they may result any day in tumult and a breach of the peace, a condition that would be very subversive to the well-being of the inhabitants of this province, which should be the supreme care of the government of the Philippines, according to the wishes of the unfortunate ex-President of the United States, Mr. McKinley, expressed in the instructions given to the Civil Commission in regard to the form of government in these islands."

I have the honor to transmit the above resolution, that due notice may be taken thereof.

Respectfully,

DANIEL TIRONA,  
*Provincial Secretary, Cavite.*

## EXHIBIT No. 21.

IMUS, *October 11, 1901.*

SR. FELIPE CALDERON,  
*Legal Adviser of the Municipality.*

SIR: The committee of the lawsuit against the Recoleta friars sends me the following communication:

"THE MUNICIPAL PRESIDENT OF IMUS.

"SIR: This committee has the honor to inform you that this morning Mr. Gregor, agent of the house which is the so-called purchaser of the San Juan estate, has gone over the land of this pueblo from the bridge of the barrio of Palico to the boundary of Bacoor, with an apparatus or instrument similar to those used for surveying, stopping at the street corners, accompanied by two American soldiers armed with rifles. As this affects or prejudices the lawsuit which is being followed by the pueblo, the committee begs you to take the necessary action for this gentleman to be prevented to go on with his operation and to apply to the proper authorities so that he may not be given a military escort, under whose protection he is acting to the prejudice of the rights of the pueblo."

I, in my turn, communicate the facts to you, and beg you to see the constituted authorities, so that the military commander of this pueblo be restrained from giving his help to said Mr. Gregor in a matter which is before the courts, and in order to avoid disorders which might have serious consequences.

LINRIO TOPACIO,  
*Municipal President.*

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., October 15, 1901.*

Respectfully referred to the commanding general Division of the Philippines and military governor.

This subject of friars' lands in Cavite is a most delicate one. On some accounts it is the most troublesome question that we are likely to have here. I have been attempting, through an agent whom I have sent down into Cavite, to obtain some idea of the value of the lands with a possible view to their purchase by the insular government, but the agent whom I sent, I have been informed, was turned back from the land by two soldiers. I respectfully request that the officer in command be directed not to interfere with my surveyor. The frenzy that these people can get into in regard to the friars' lands is almost impossible to believe. I suggest that each party would better be left to his legal rights, without assistance except from the officers of the court.

WM. H. TAFT, *Civil Governor.*

HEADQUARTERS DIVISION OF THE PHILIPPINES,  
*Manila, P. I., October 17, 1901.*

Respectfully referred to the commanding officer, Imus, Cavite, for report and explanation as to why soldiers are acting as escort to and guarding any surveyor. This is not a soldier's duty and should not be permitted unless ordered by higher authority. A full explanation of this incident will be made.

These papers to be returned through military channels.

By order of Major-General Chaffee:

J. S. KERR,  
*Assistant Adjutant-General.*

[Third indorsement.]

IMUS, CAVITE PROVINCE, P. I., *October 23, 1901.*

Respectfully referred to First Lieut. A. V. P. Anderson, Sixth Cavalry, who was in command of this station October 11, 1901. Information is desired as to whether a guard was furnished Mr. McGregor from this station on or about October 11, 1901; also whether, to his knowledge, any American soldiers have turned back a surveyor sent here by the civil governor or have had any orders to do so.

B. T. SIMMONS,  
*Captain, Fourth Infantry, Commanding.*

[Fourth indorsement.]

IMUS, CAVITE PROVINCE, P. I., *October 25, 1901.*

Respectfully returned with the information that Mr. McGregor was furnished with no escort on or about October 11, nor upon any other date during the time I commanded this post. At about the date above mentioned there were two enlisted men from San Francisco de Malabon (headquarters of the Fourth Infantry) making an authorized road sketch of the country in the vicinity of this post and Bacoar, with an armed escort, and it occurs to the undersigned that Mr. McGregor may have been seen by some native in conversation with this detachment. I have reason to believe that Mr. McGregor, on the occasion of his recent visit to Imus, had in his possession no scientific instrument other than a camera. To my knowledge no surveyor has been turned back from this town by American soldiers. In the early part of this month a native surveyor presented me with a memorandum note from Maj. C. W. Mason, Fourth Infantry, stating that he (the surveyor) was in the employ of the civil government and that he desired access to a certain large blue-print map of the friars' lands in question. I gave this man permission to copy this map, and took him in person to the place where it hangs. He was, however, not satisfied, and desired the use of the tracing from which the blue print was made. I explained to him that we did not have the tracing, whereupon he left. I can hardly credit his statement, as there have been native surveyors employed by the pueblo frequently working in this vicinity, and they have never been molested by the troops.

A. V. P. ANDERSON,  
*First Lieutenant, Sixth Cavalry.*

[Fifth indorsement.]

IMUS, CAVITE PROVINCE, P. I., *October 27, 1901.*

Respectfully returned through military channels to the adjutant-general, Division of the Philippines. An escort was furnished to Mr. McGregor to San Nicolas on or about July 20, 1901, in compliance with instructions from the adjutant-general, first district, Department of Southern Luzon. Since that date no guard has been furnished him or any surveyor. If any American soldier has turned back any surveyor sent to this station by the civil governor he has done so without authority. I do not believe such to have been the case.

In justice to the officers who have commanded or may command this station, it is requested that credence be not given to statements made by natives concerning the official acts of those officers until they have been investigated.

B. T. SIMMONS,  
*Captain, Fourth U. S. Infantry, Commanding.*

[Sixth indorsement.]

HEADQUARTERS THIRD SEPARATE BRIGADE,  
DEPARTMENT OF SOUTHERN LUZON,  
*Batangas, Batangas Province, P. I., November 3, 1901.*

Respectfully forwarded to the adjutant-general, Department of Southern Luzon. There does not seem to have been a guard furnished as reported (October 11, 1901). The records of this office show a guard was furnished Mr. McGregor on July 18. I was absent from my headquarters at that time and can not say why such detail was made. I am aware of the strong feeling about these lands, and have always been averse to the question coming up under present unsettled conditions.

S. S. SUMNER,  
*Brig. Gen., U. S. Army, Commanding.*

[Seventh indorsement.]

HEADQUARTERS DEPARTMENT OF SOUTHERN LUZON,  
*Manila, P. I., November 8, 1901.*

Respectfully returned to the adjutant-general, Division of the Philippines; attention invited to the fourth, fifth, and sixth indorsements.

J. P. WADE,  
*Brig. Gen., U. S. Army, Commanding.*

[Eighth indorsement.]

HEADQUARTERS DIVISION OF THE PHILIPPINES,  
*Manila, P. I., November 14, 1901*

Respectfully returned to the Hon. Luke E. Wright, vice-civil governor of the Philippine Islands, Manila, P. I., inviting attention to preceding indorsements.

There does not appear to be any ground for the within complaint.

ADNA R. CHAFFEE,  
*Maj. Gen., U. S. Army, Commanding.*

EXHIBIT No. 22.

[Telegram.]

MANILA, *November 9, 1902.*Governor TRIAS, *Cavite:*

I have been informed that forcible possession has been taken of a church in Caridad which has been until now in the peaceable possession and under the control of a priest of the Roman Catholic Church. Such dispossession is an unlawful act. If the church building is claimed by the municipality, its rights must be asserted in court. They can not be vindicated by the strong hand under a government of law and order. I rely on you to preserve the peace and to prevent the people of a municipality from violating the law. You ought not to take sides, as governor, in the religious controversies, but you must preserve the law and restrain its violation, no matter who is the violator. I rely on you to do so.

TAFT, *Civil Governor.*

[Telegram.]

CAVITE, November 10, 1902.

Governor TAFT, Manila:

Church in La Caridad is a building in construction since long ago without being completed, and was not under any possession, control, nor had been used for any religious purpose. Since last Saturday up to date I did not assist in any religious festival during the fiestas of Cavite and San Roque. Last Saturday I had been, for precaution, at the place in Cavite where they were going to say mass in the new church, and without alighting from my carriage, in order to see personally the appearance of things, and it is not true, as per newspapers, that I had been present at the time, as at the said time I was holding a meeting of the provincial board. No official or employee of the government has taken part officially in the various fiestas in Cavite, for it is a custom—there is a board of festival which has the official representation, composed of civilians, and the said board is in charge of the organization of the fiesta and its carrying into effect, and the town expenses. It is also not true that the municipality of La Caridad had invited Priest Aglipay to the said town, but a committee composed of civilians.

TRIAS, Governor.

EXHIBIT No. 23.

CAVITE, June 10, 1902.

The CIVIL GOVERNOR OF THE PHILIPPINES:

The undersigned, natives and residents of Cavite, San Roque, and La Caridad, say that they are deeply aggrieved by the prohibition made by the municipality of La Caridad to bury any more bodies in the Catholic cemetery, which has been built in an isolated lot north of La Caridad for the use of the three pueblos; it has existed sixty years without ever being closed, even during the terrible epidemic of 1882, and there is no law authorizing such a measure, which hurts deeply the feelings of all good Catholics. If the prohibition has been decided as a sanitary measure, it is a serious mistake, as the place which has been chosen by the municipality for a burial ground is in the pueblo itself and is not fenced around, so that the bodies may be dug out by stray animals and become their prey, whereas the Catholic cemetery is built of stone and mortar and surrounded with a wall. Since the Catholic cemeteries of Manila are open, as well as those of the other pueblos of the province, the undersigned protest against the closing of their graveyard, which deprives Catholic families of the consolation of having their dear ones buried in holy ground, and beg you to order that the Catholic cemetery be reopened and that the municipality of La Caridad be enjoined from taking any measures against the burial of Catholics therein.

(Signed by J. C. Ruyman and many others.)

OFFICE OF HARTIGAN, MARPLE & SOLIGNAC,  
ATTORNEYS AND COUNSELORS AT LAW,  
Manila, P. I., June 3, 1903.

The ACTING CIVIL GOVERNOR, Manila, P. I.

SIR: We are directed by the bishop-administrator of the archdiocese of Manila to ask your attention to the action of the municipal board of La Caridad, in the province of Cavite, in relation to the Catholic cemetery situated in that town, and used as a cemetery for the towns of Cavite, San Roque, and La Caridad. On May 23 of this year the man in charge of the cemetery reported to Father Caballeria, of Cavite, that he had received instructions to allow no more interments in the cemetery. Later the president of the town of La Caridad informed Father Caballeria that this order had been issued because the cemetery was in an unsanitary condition and because what was to be interred passed through the town of La Caridad. We are further directed to state that it is believed the cemetery is in good sanitary condition.

Immediately thereafter Father Caballeria, for the archdiocese of Manila, was granted a cemetery in a place called Lascaran in the pueblo of La Caridad by the owners thereof for use as a Catholic cemetery. The town authorities of La Caridad will not allow Father Caballeria to bury anyone in this latter ground, as they claim they want to use it for a municipal cemetery and a source of revenue to the municipality.

We are, very respectfully,

HARTIGAN, MARPLE & SOLIGNAC,  
Counsel to the Archdiocese of Manila.

MANILA, P. I., June 28, 1902.

Hon. MARIANO TRIAS,  
*Governor of the Province of Cavite, Cavite, P. I.*

SIR: I have the honor to inclose herewith a copy of a letter received by me on the 3d instant from Messrs. Hartigan, Marple & Solignac, counselors of the bishop-administrator of the archdiocese of Manila, complaining in behalf of their client of the action of the municipal board of La Caridad in your province.

If the facts with reference to the action of the municipal board of La Caridad are correctly set forth in said communication, it is a manifest usurpation of authority. Undoubtedly the council of the municipality, under the provisions of the municipal code, has the right to abate a nuisance threatening the health or lives of the people of the community, but it is equally clear that they have not the right, by virtue of this right, to declare a cemetery which is in fact sanitary to be a nuisance and forbid interments therein. It is equally clear that the church authorities have the right to establish a cemetery of their own, and that the municipal authorities can not, merely because they desire to get revenue from a cemetery of their own, forbid the use of the church cemetery or prevent interments therein.

It is desired that you shall make investigation as to all these matters at as early a date as practicable and report thereon. If you find that in point of fact the cemetery at La Caridad is sanitary and not a menace to the public health, then it is suggested that you should call the attention of the municipal authorities to the impropriety of their action in ordering it closed up. In making this investigation it is suggested that you call on the president of the provincial board of health for aid in the matter to assist you in reaching a proper conclusion.

It is also desired that you call the attention of the municipal authorities of La Caridad to the invalidity of their ordinance forbidding burials to be made in the new cemetery if, as stated, the purpose is to force interments in the municipal cemetery. Governor Taft is now at Rome engaged in negotiation with a view to settling all vexed questions between the church and the insular government. In the meantime it is very desirable that acts of mere reprisal because of supposed wrongs in the past should not be indulged in by municipal authorities. All churches have equal rights, and are entitled to build churches or establish cemeteries for the burial of the dead at will, the only limitation upon their power being the right of the municipality to see that they are sanitary.

It is hoped that you will arrange this matter upon the lines suggested, and that there will be no occasion for further legitimate complaint to this office.

I have the honor to be, very respectfully,

LUKE E. WRIGHT, *Acting Civil Governor.*

(Through a clerical error the papers in the case were not inclosed with the above letter, and the matter was thus delayed. Papers were sent to the provincial governor on July 23, 1903.)

MANILA, August 27, 1902.

Hon. MARIANO TRIAS,  
*Provincial Governor, Cavite, P. I.*

SIR: Referring to the acting civil governor's letter of June 28, 1902, and indorsement of this office dated the 23d ultimo, in the matter of a complaint against the municipal board of La Caridad in respect of the parish cemetery, I have the honor to invite your attention to the request that the matter be investigated and reported upon at as early a date as practicable. Such report has not been received as yet, and the civil governor will be pleased to receive it at an early date.

Very respectfully,

A. W. FERGUSON, *Executive Secretary.*

OFFICE OF THE GOVERNOR, PROVINCE OF CAVITE,  
*Cavite, P. I., September 3, 1902.*

Hon. CIVIL GOVERNOR OF THE PHILIPPINES,  
*Manila, P. I.*

SIR: In answer to your esteemed favor of the 23d of June, 1902, forwarding to me the claim entered by Messrs. Hartigan, Marple & Solignac, in the name of the bishop-administrator of the archdiocese of Manila, anent the closing of the Catholic ceme-

tery of the pueblo of Caridad of this province, as a result of the investigations made by this office, I have the honor to inform you:

First. That on account of the cholera of 1882 at "Lascaran," in the barrio of San Ignacio of the town of Caridad, there was already a temporary cemetery where the victims of the cholera were interred.

Second. That on account of the present epidemic, on the 16th of May of the present year the municipality of Caridad decided to open same, and on the 23d of the same month, on motion of the municipal board of health, it was ordered to close the old cemetery which was in charge of Padre Cavalleria, based upon the reasons that, on account of being located in the center of the settlement, its oldness and its state of saturation, it was lacking in hygienic conditions; it was a constant menace to the public health and a cause for alarm to the neighborhood, because in order to reach said cemetery from any point whatever it was necessary to carry the corpses along streets inhabited and populous.

Third. That on the same date of May 22, 1902, the municipal council enacted an ordinance more or less to the following effect: (A) It was ordered to open a general municipal cemetery in the barrio of San Ignacio, and also the permanent closing of the old cemetery; (B) there was definitely selected a place next to the cemetery of the Chinese, along the shore of Manila Bay, in the barrio of San Ignacio, for all kinds of burials, either from cholera or from any other sickness; (C) the burial in the new cemetery was prohibited without the respective receipt of the municipality for the payment of \$1 Mexican for each corpse in coffin and 50 cents without coffin; and (D) A fine was imposed of \$5 Mexican upon any cemetery allowing burial without this requirement having been complied with.

Fourth. The Padre Cavalleria, upon being informed of this ordinance, immediately presented due protest before the provincial board of health on May 24, 1902, which board thereupon called for due information from the municipal council of Caridad.

Fifth. That this information was provided on May 27, 1902, and consisted of the transmission of the cited municipal ordinance, the municipal president of Caridad adding upon his own responsibility that the closed cemetery "belonged to the Spanish Government and to no Catholic church whatsoever."

Sixth. That the said information was conveyed to the representatives of the insular board of health, Messrs. C. N. Demay and G. Parker Dillon, and according to the same on the 24th of June, 1902, the provincial board of health approved in every particular the action of the municipality of Caridad, the secretary being instructed to inform the parties interested of this decision.

Seventh. All the foregoing is taken from a copy of the records in the office of the secretary of the provincial board of health, to which as soon as there was received in this office the letter of your honor with the complaint of the bishop of Manila it was transmitted for their due information.

Eighth. That the president of the provincial board of health, besides furnishing the said copy to this office, in an indorsement of the 16th of August, 1902, added that the provincial board of health, composed of Messrs. C. M. Demay and G. Parker Dillon; representatives or commissioners of the insular board of health, T. A. Hessler, surgeon, U. S. Navy; T. Ejercito, provincial president of sanitation; and Walter B. Buxton, provincial inspector, made investigation for themselves of the exceedingly bad hygienic condition of the cemetery under consideration, and being ratified, together with the assistance of Dr. J. E. Gartner, U. S. Navy, again approved the decision of the local authorities of Caridad.

Ninth. In the cited indorsement, immediately following, the said president stated that the board under his presidency "had never refused to allow the establishment of any Catholic cemetery subject to due sanitary inspection."

Tenth. That on account of the context of the letter of your honor, on the 12th instant at 4 o'clock exactly in the afternoon, accompanied by Mr. Ejercito, provincial president of sanitation, I proceeded to the closed Catholic cemetery, and though beautifully and nicely arranged, I satisfied myself that there was not a span of ground in length and depth that did not contain particles of human bones; that same is in the center of the town, surrounded by houses, in proximity to a girls' school, and in order to convey thither corpses, come from wherever they may, it was necessary to carry them through populous streets of some travel.

Eleventh. Thereupon we proceeded to the new cemetery established by the municipality at the place "Lascaran." We were attended by the vice-president of said municipality. This cemetery extends along the Bay of Manila, and coming from the town one passes first by the Chinese cemetery. It is located in such a direction that the prevailing winds of any season of the year can not convey the miasmata or emanations toward the populated district. From the 23d of May, when the location of same was decided upon, until that day, according to the statement of the sexton, there had been buried there more than 150 corpses, during the height of the

prevalence of cholera, brought from the three towns of Cavite, San Roque, and Caridad; there were days when the number reached 14 of those buried. On the afternoon of the visit there were 3, and it was noted that the graves were dug to a considerable depth, reaching even the salty seepage of the sea. The ground is somewhat uneven but spacious, and sufficient for the sole burying ground for the three towns. It is well watched and cared for, and as the income is increased it is being leveled and surrounded with a fence with stone foundation, upon which latter will be built a railing of cane or lumber. It is accessible by land and sea from Cavite, and to any part of Caridad by unfrequented paths, although somewhat traveled, one can reach the same without traversing any settlement.

Twelfth. The closed Catholic cemetery was a public cemetery for the three towns of Cavite, San Roque, and Caridad, and on account of not having any ground for building one of its own, fearing that the corpses of Cavite would not be allowed burial in the new municipal cemetery of Lascaran, and endeavoring to obtain some privilege or at least some of the equipment of the closed cemetery, the municipality of Cavite, upon being informed of this circumstance, on June 28, 1902, forwarded the following data to this office: (A) That it was formerly the custom in Cavite to bury their dead within the church or in the churchyard, and for the common people or the poor there was a common cemetery in front of the church called San Pedro, or the Parochial, bordering on the yard of the same; (B) that the burials of the town of San Roque were made on the right side of said town church; (C) that the Spanish Government, appreciating the danger to the public health on account of such burials for the three towns of Cavite, San Roque, and La Caridad, ordered the construction of a general cemetery in the last-named town, and located at the place where the closed cemetery now is, appropriating for the purpose about \$1,000 for equipment, two arsenal foremen to direct the work, and as laborers the men of the three towns who were subject to public work on the streets and buildings; (D) it was called the "public cemetery" of Cavite, San Roque, and Caridad, and the Spanish politico-military government of Cavite took upon itself the management of the same, turning it over to one of the civil employees in its office; and (E) that, having discovered irregularities in the management of said employee, the government delegated the management to the parish priest of San Roque, and, as he also fell into the same practices, it was transferred to the parish priest of Cavite, until the month of May, 1898, when it passed into the hands of the municipalities of San Roque and Caridad, and in the year 1899, because of its abandonment, the Padre Cavalleria assumed charge of the said cemetery.

Thirteenth. That since the Padre Cavalleria was claiming possession of the location called "Lascaran" of Caridad, alleging prior rights, this office desirous of information from the municipality of the said town, the following data were received: (A) The place of the cemetery closed by ordinance of the aforementioned council, with the approval of the provincial board of health, belongs to the barrio of San Ignacio; (B) there is a locality called "Lascaran," distant from the village about 1,800 meters; (C) in this place there existed in 1882 a temporary cemetery for the cholera-stricken, and on the 16th and 22d of May of this year, it was not only rededicated to the same object, but also to all kinds of burials, by decision of the municipal council and in accordance with the board of health of the municipality; (D) the owner of the location "Lascaran" was Doña Maria Bartolo Franco, proprietor also of the whole village of La Caridad; (E) the said owner had died, leaving heirs, and as executor-heir there appears at the head of the estate Mr. Jose Rodriguez; (F) this gentleman rented to the municipality of Caridad, for a cemetery, the site of "Lascaran" for an indefinite period, and upon payment as a fee of the sum of \$1 Mexican per month; and (G) it had been prohibited by the municipality of Caridad to the Padre Cavalleria "to make his interments in the cemetery located at the site of 'Lascaran,'" nor is there any notice that the said padre had directed any since the date of inauguration until August 20, 1902; "but if the said padre had so directed" it would have been permitted him on payment to the municipality of the respective fees.

Fourteenth. That in order to expedite the investigation and to determine whether the municipality of Caridad acted in an absolutely legitimate manner or not and in accord with paragraph (p) of article 39 and paragraph (e) of article 43 of the municipal code, in order to adopt some measure of conciliation in the matter, this office also invited information directed from Mr. Jose Rodrigues, which same is as follows: "(A) That the site called 'Lascaran,' in the barrio of San Ignacio, of this province, in the jurisdiction of the town of Caridad, is our property, since said location is included within the boundary of our estate called 'San Isidro' or 'Estanzuela;' and (B) as heir of my deceased father, D. Enrique Rodriguez, and lessee of the said estate of my two aunts, Doña Carmen and Doña Josefa Rodriguez, and not as executor-heir of the property of the deceased Doña Maria Bartolo Franco, I have ceded in

sublet to the municipality of this town of Caridad, for the annual rental of \$1 Mexican a part of the ground which was temporarily designated for burying the cholera-stricken in the year 1882 in the said site of 'Lascaran,' for the purpose that the municipality may this day establish a municipal necropolis to the extension of 6,000 or 7,000 meters." (September 1, 1902.)

The above is the result of the investigation made by this office under my charge.  
Very respectfully,

MARIANO TRIAS,  
Governor, Province of Cavite.

[First Indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
Manila, P. I., September 15, 1902.

Respectfully referred to Messrs. Hartigan, Marple & Solignac, calling attention to the evidence herein contained that the cemetery which was closed was properly closed because it was unhealthy for the population to use for interment.

WM. H. TAFT, Civil Governor.

EXHIBIT No. 24.

SILAN, September 20, 1902.

SECRETARY OF THE COUNCIL AND ADMINISTRATION  
OF THE ARCHDIOCESE OF MANILA.

SIR: I hereby comply with my duty and inform you that the constabulary stationed in this town have taken the convent of the town of Silan, Cavite, away from me by force and are, since the beginning of the present month, using as barracks. You will excuse me for not informing you of this sooner, but I hoped to arrange the matter privately, and now I see that unless I produce the title deeds the inspector stationed here will not return the convent to me, by order of the chief of constabulary.

This occupancy will certainly cause more wear and tear to the property, and it is not known whether or not they will pay rent, and, although it is the only convent that they occupy, this is of great inconvenience for the transfer of the service to the big church on account of the close connection of the two buildings, whereby the church is much exposed to irreverence and profanity.

I beg to inform you of this for your opinion, and that you may inform the bishop, for the knowledge of H. I.

LINO CAJILI.

HARTIGAN, MARPLE & SOLIGNAC,  
ATTORNEYS AND COUNSELORS AT LAW,  
No. 2 Calle Arzobispo, Manila, October 7, 1902.

The CIVIL GOVERNOR, Manila, P. I.

SIR: By direction of the bishop of Cebu and administrator apostolic of the archdiocese of Manilla, we have the honor to ask your attention to the accompanying complaint of the parish priest of Silan, Cavite, and further ask that the constabulary be instructed to return the convent to him.

Very respectfully,

HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ,  
Counsel to Archdiocese of Manila.

[First Indorsement.]

EXECUTIVE BUREAU,  
Manila, October 8, 1902.

Respectfully referred, by direction of the civil governor, to the chief of Philippines constabulary for investigation and report. Early action, with return of papers to this office, is requested.

BEEKMAN WINTHROP,  
Acting Executive Secretary.

[Second Indorsement.]

HEADQUARTERS PHILIPPINES CONSTABULARY,  
Manila, P. I., October 9, 1902.

Respectfully referred, by direction of the chief, to the senior inspector, Cavite, Cavite, for report concerning the occupation of the convent in question.

F. E. COFRE, Adjutant.

[Third indorsement.]

PHILIPPINES CONSTABULARY, OFFICE OF THE SENIOR INSPECTOR,  
Cavite, Cavite, November 1, 1902.

Respectfully referred to Inspector Green, Silan, who will acquaint himself with the contents and make a report of the circumstances attending the occupancy of the convent, and will also state if he has ever been requested by the local priest to vacate it. He will also investigate the relations that exist between Inspector Estrella and the priest, and the relations that exist between the priest and the presidente, Benjamin, and Victor Kiamson and make a report of what he finds. He will also refer this paper to Inspector Estrella, with instructions to make a full report of the circumstances of the occupancy of the convent by constabulary, how it came to be occupied, and if he was ever asked to vacate it; and to promptly return this paper.

T. B. HYSON, *Senior Inspector.*

[Fourth indorsement.]

SILAN, PROVINCE OF CAVITE, November 8, 1902.

Respectfully referred to Inspector Estrella, in compliance with orders conveyed in third endorsement, for report.

WILLIAM GREEN,  
*Second Class Inspector, Philippines Constabulary.*

[Fifth indorsement.]

MAGALLANES, PROVINCE OF CAVITE, November 23, 1902.

Respectfully returned to the senior inspector, province of Cavite, inviting attention to the inclosed report.

JUAN ESTRELLA.

The report referred to is as follows:

MAGALLANES, November 23, 1902.

SENIOR INSPECTOR, PHILIPPINES CONSTABULARY,  
Province of Cavite, P. I.

SIR: I have the honor to reply to your indorsement with reference to the complaint of the parish priest of Silan with regard to the occupation by the constabulary under my command of the convent in said pueblo, that such occupation had his consent and good will, as is proved by his silence during the long period during which they occupied it. Demands of such a malicious nature, therefore, are very extraordinary, for only two inspectors have been occupying the convent, and no such claim has been made before.

My occupation of the convent had the entire sanction of the priest.

Very respectfully,

JUAN ESTRELLA,  
*Subinspector, Philippines Constabulary.*

[Sixth indorsement.]

PHILIPPINES CONSTABULARY, OFFICE OF THE SENIOR INSPECTOR,  
Province of Cavite, February 14, 1903.

Respectfully returned to the adjutant, Philippines constabulary, inviting attention to the indorsements and reports of Lieutenant Green and Subinspector Estrella.

PATRICK BRUIN,  
*Captain and Inspector, Philippines Constabulary,  
In absence of Senior Inspector.*

The report of Lieutenant Green, mentioned in the last indorsement, is as follows:

INDANG, CAVITE, November 8, 1902.

SEÑOR INSPECTOR PHILIPPINES CONSTABULARY,  
Province of Cavite.

SIR: In compliance with orders conveyed by third indorsement, I have the honor to submit the following report: When I relieved Inspector Toanes at Silan, October 5, 1902, the constabulary were occupying the convent and continued doing so until November 7, 1902, when I was ordered to vacate that post. I was never requested to leave the convent by the church officials or anyone else.

In regard to other orders embraced in the third indorsement, I respectfully invite attention to fourth indorsement.

WILLIAM GREEN,  
*Second Class Inspector, Philippines Constabulary.*

[Seventh indorsement.]

HEADQUARTERS PHILIPPINES CONSTABULARY,  
*Manila, P. I., February 20, 1903.*

Respectfully returned to executive secretary, inviting attention to indorsements and reports of Lieutenant Green and Subinspector Estrella.

HENRY T. ALLEN,  
*Chief of Constabulary.*

MANILA, P. I., *February 24, 1903.*

MESSRS. HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ,  
*Counsel to Archdiocese of Manila, Manila.*

GENTLEMEN: With reference to your communication of October 7, 1902, inclosing a complaint from the parish priest of Silang, Cavite, in which he complains of the occupation of the convent at that place by the constabulary, I have the honor to advise you that, from information received by this office, this convent was vacated under date of November 7, 1902; further, that no requests from church officials to this effect were ever received by the occupants of said convent.

Very respectfully,

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

EXHIBIT No. 25.

[Telegram.]

MANILA, P. I., *December 17, 1902.*

Governor TRIAS, *Cavite:*

Am informed by the counsel for the bishop of Cebu, administering the archdiocese of Manila, that the parish priest heretofore in charge of the parish church at Bacoor on behalf of the archbishop of Manila for the Apostolic Roman Catholic Church has left the Roman Catholic Church and has been ordered to turn over the church by the bishop to another priest of the Roman Catholic Church; that the priest has left the church, and that municipal authorities are in control.

In my judgment the church is in the lawful possession of the Roman Catholic Church until it is judicially established otherwise, and under the control of the bishop of the diocese. For that reason, please direct the municipal president at once to put into possession of the church the priest presenting proper authority from the bishop of Cebu administering the archdiocese of Manila. This is not intended as a decision as to title, which may be adjudicated in the courts, but it is necessary in the interests of law and order that lawful possession should be protected, and in my judgment the parish churches occupied by priests of the Roman Catholic Church are in possession of the bishop of the diocese, and that possession should be respected by all executive officers.

TAFT, *Civil Governor.*

[Telegram.]

MANILA, *December 20, 1902.*

TRIAS, *Governor, Cavite:*

Hold matters in statu quo at Bacoor until further orders. Aglipay has asked to submit evidence to me showing circumstances changing the condition from that which I thought to exist.

TAFT, *Civil Governor.*

LAW OFFICES HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ,  
*No. 2 Calle Arzobispo, Manila, December 29, 1902.*

The GOVERNOR, *Manila.*

SIR: On behalf of the bishop-administrator of the archdiocese of Manila and in connection with the Catholic Church at Bacoor, which is now before your excellency, we have the honor to transmit certified copy of the affidavit made by the former Roman Catholic priest of Bacoor, Fortunato Clemena, on September 1, 1902, to the municipal secretary of Bacoor, and to recommend your attention to the fact that said Clemena in this affidavit describes himself as representative of the I. C. A. R. (Iglesia Católica Apostólica Romana) and the church as the provisional church of the town of Bacoor.

It is respectfully submitted that this affidavit destroys his alleged claim that he is the owner of the church, and we respectfully request that the executive order directing a stay of proceedings in the matter, dated about December 20, 1902, be revoked and that the executive order of December 17, 1902, telegraphed to Governor Trias be enforced.

Very respectfully,

HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ,  
*Counsel to the Archdiocese of Manila.*

The affidavit mentioned above is a declaration of real estate, sworn to before the provincial secretary September 1, 1902. It has no special significance aside from that mentioned in the letter, that he states he is the representative of the Roman Catholic Church.

CAVITE, P. I., *January 2, 1903.*

CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila.*

SIR: In consequence of your telegram with regard to the religious question in Bacoar the municipal president of said town states to the provincial government of Cavite:

"PROVINCIAL GOVERNOR OF CAVITE.

"SIR: There appeared before me to-day Padre Policarpo Villafranca, appointed by the bishop of Cebu to take charge of the church of this town, in virtue of a communication of said bishop of the 17th instant, which was exhibited to this presidencia. When I was about to make the delivery in compliance with the order of the provincial government, dated the 18th instant, I received another communication from said government instructing me to leave all matters in the town as they were at the time. I therefore did not turn the church over as ordered, and beg to inform you thereof for your subsequent action. I beg to state that Padre Policarpo Villafranca is awaiting the decision of this government.

"Very respectfully,

"FELIX CUENCA,  
"Municipal President."

I have the honor, by direction of the provincial governor, to transmit this to you.  
Very respectfully,

DANIEL TIRONA,  
*Secretary, Province of Cavite.*

[First indorsement.]

EXECUTIVE BUREAU,  
*Manila, January 7, 1903.*

Respectfully referred to the secretary of Cavite Province, by direction of the civil governor, with a request that the president of Bacoar make a full statement as to how he came into possession of the church at all, and if he was in possession, who was in actual possession when he came into possession, and all the circumstances surrounding the case of the possession of the church. This must be known to this office before any definite orders can be issued.

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

[Second indorsement.]

PROVINCIAL GOVERNMENT OF CAVITE, OFFICE OF SECRETARY,  
*Cavite, P. I., February 2, 1903.*

Respectfully returned to the honorable executive secretary, inviting attention to the accompanying letter marked "D."

DANIEL TIRONA,  
*Secretary, Province of Cavite.*

The letter referred to in the second indorsement is as follows:

CAVITE, P. I., *February 2, 1903.*

The EXECUTIVE SECRETARY, *Manila, P. I.*

SIR: In compliance with your indorsement of January 7 last, I have the honor to transcribe you herewith the reply of the municipal president of Bacoar with respect to the religious question:

"In compliance with your instructions contained in the letter of the 14th instant,

I have the honor to state that I must give the following replies with regard to the points set forth in the same:

"1. That I have never been in possession of the churches of this town, neither of the old parish church, now in ruins, nor of the provincial church.

"2. That I have never taken possession of said churches.

"3. That, after the death of Mr. Cornelio Ignacio, late parish priest of this town, on October 14, 1899, the provisional church which existed (?) was formed by the town in the barrio of Malicso, which has been removed to the town itself, it being reconstructed, and has been until this day occupied by the priest Fortunato Clemencio.

"Before closing this report I beg to state that I have not meddled with any of the two churches, but that, in order to prevent disturbances, I was compelled to station guards (there), not taking any further steps. When the telegram of the civil governor, directing me to turn the church over to the Roman Catholic father who would apply to me was received, and when I was about to comply with said telegram and turn the church over, in accordance with Father Fortunato Clemencia, who was present in said act, having been invited by me, there arrived another telegram from the same authority instructing me to leave matters at their present status, which I did."

Very respectfully,

DANIEL TIRONA,  
*Secretary Province of Cavite.*

[Third indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., February 2, 1903.*

Respectfully returned to the governor of the province of Cavite, with directions to advise the president of the town of Bacoar that he should allow the possession of the church to be exactly where it is now, and to take no steps with respect to the dispossession of any person in possession. The rights of the parties must be worked out in the courts.

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 26.

LAW OFFICES HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ,  
*No. 7 Calle Audiencia, Manila, P. I., February 13, 1903.*

The CIVIL GOVERNOR, *Manila, P. I.*

SIR: In accordance with your verbal instructions of yesterday, we have the honor to inclose herewith (1) certified copy of the record from the office of the justice of the peace of Ternate, Cavite, dated January 31, 1903; (2) copy of letter from Rev. Policarpo Villafranca, of the province of Cavite, dated January 31, 1903, and answer of the president of Ternate thereto; (3) copy of telegram from the acting governor of Cavite Province to the municipal president of Ternate, dated February 3, 1903, and translations of the same.

We respectfully recommend your attention and action on the same.

Very respectfully,

HARTIGAN, MARPLE, SOLIGNAC, McCABE & GUTIERREZ.

(No. 1.)

Señor Valeriano Ybañes, justice of the peace of the town of Ternate, province of Cavite, certified that there is a record in the archives of the court of the justice of the peace which, translated literally, is the following:

In Ternate, on the 28th of January, 1903, the undersigned justice of the peace was required by the municipal president of this town to approve the delivery of the church keys, which the whole town, in company with the chief sexton, requires to be made to the president.

The whole town protests against the instruction of Father Policarpo Villafranca in the administration of the parish of this town, as he is a priest of low manners and deserves only the aversion and contempt of the town. The said town moreover says that it is the absolute owner, with full power over the church, ornaments, sacred vases, and other utensils, including the images found on the altars, especially that of the Sacred Child, Excelso Paterno Tutelar, of this same town, which our ardent progenitors brought here from the Moluccas, arriving at this port in the year 1653. Since then we have rendered worship and adoration unto so miraculous and venerated an image, our ancestors paying for the foundation of the church and we for its preservation until this day. And in view of this authority, asks that it be

made justifiable that it, with its power to dispose of it without prejudice to anyone for having adhered to the Philippine Church, make donation of the church and temple and all its ornaments, utensils and images, which are stamped in Christian worship, to the priest appointed by the Bishop Maximo Eminentísimo (Gregorio Aglipay, so that he may take possession of the said church and administer the parish of the above-mentioned town, and meanwhile that the keys be deposited with the municipal president, as representative of the same town, until the arrival of the Bishop Maximo Padre Gregorio Aglipay and a priest appointed to take possession of the church and recover the keys.

Which terminates this record, subscribed and sworn to before me.

VICTORIANO YBAÑES, *Justice of the Peace.*  
By MIGUEL RAMOS, *Municipal President*),  
(and thirty-seven other persons.

There is a note on the margin of the first page which says: "Justice of the peace of Ternate: This is faithfully and legally taken from the original, to which I refer, and on a petition of the Presbyter Señor Policarpio Villafranca, I issue this certificate, which I signed in Ternate on the 31st of January, 1903."

VICTORIANO YBAÑES.

TERNATE, *January 31, 1903.*

The MUNICIPAL PRESIDENT OF TERNATE:

The undersigned priest of this town applies to you, being the executive power, asking help to put me in possession of the church of this town, in compliance with the instructions of the honorable governor-general of the islands, dictated on the 10th instant, for, according to the record drawn out in the court of the justice of the peace, the citizens, together with the municipal president, Señor Miguel Ramos, have taken from Agent Simplicio Dirain the keys of said church, possessing themselves of the same.

Very respectfully,

POLICARPIO VILLAFRANCA.

Being acquainted with your communication, I take the pleasure to answer that I can not give the help asked for—the mentioned possession of the church—on account of its being in the possession of the citizens of this town, without detriment to what the honorable governor-general of the Philippines may dispose.

Very respectfully,

ANDRES NINON.

TERNATE, *January 31, 1903.*

I have this day received your communication referring to the protest against the refusal of my assistance to put you in possession of the church.

ANDRES NINON.

FEBRUARY 3, 1903.

The MUNICIPAL PRESIDENT OF TERNATE (via Naic):

Received act; acquainted with same. Forewarn you that whole town shall be arrested for noncompliance with circular-letter of the honorable civil governor forwarded by the government to that presidency on the 16th of January, 1903, if they do not respect the possession of church by the Roman representative, P. Policarpo Villafranca. Look out for order and protect possession of this, without prejudice to the right of the town to establish their right to the property before the tribunal of justice.

———, *Acting Governor.*

(The above are the inclosures mentioned in the letter of Messrs. Hartigan, Marple, Solignac, McCabe & Guiterrez, dated February 13, 1903.

[First indorsement.]

EXECUTIVE BUREAU,  
*Manila, February 13, 1903.*

Respectfully referred to J. B. Early, esq., attorney at law, 37 Plaza Cervantes, Manila.

BEEKMEN WINTHROP,  
*Acting Executive Secretary.*

EARLY & WHITE, ATTORNEYS AND COUNSELORS AT LAW,  
23 Plaza Cervantes, Manila, February 16, 1903.

Hon. WILLIAM H. TAFT,  
Governor of the Philippine Islands, Manila, P. I.

SIR: Archbishop Aglipay herewith presents his reply to the statements made by the Roman Catholic priest, Padre Policarpo Villafranca, in regard to the Ternate chapel in Cavite Province. This reply will give you an idea of the other side of the controversy, and from his statements it seems as if the Roman Catholic priest was never in possession. We called to-night to see you, but you were busy, and this will be presented to you if possible by Archbishop Aglipay in person.

Yours, very respectfully,

J. B. EARLY.

(The inclosure with the above letter was the following:)

*Exact information relating to question of Ternate, Cavite Province.*

First. The people of Ternate were the proprietors and possessors of the church property, and are so still, which can be proven by an official document which is attached.

Second. The Roman Catholic priest, Padre Policarpo Villafranca, lived in Maragondong, near Ternate, and only went to Ternate to officiate when employed and paid by the people of Ternate.

Third. The people of Ternate have a proper person who is in charge of the church property, who was an assistant to Padre Villafranca whenever he was called to officiate.

Fourth. The people of Ternate have changed their faith; they have left Rome and joined the Independent Catholic Church, and without usurping the church building, the keys, or any other property; these stayed in the possession of the people who were the actual possessors. Consequently, the president of Ternate, the justice of the peace of Ternate, and the governor of Cavite Province are obliged to obey the instructions of the honorable Governor Taft in his circular letter to provincial officials, ordering them to protect the rights of those actually in charge of the property.

Fifth. In this case, Padre Villafranca, of the Roman Catholic Church, who never resided in Ternate, never had possession of the said church, never had possession of the keys, seeks to reverse this order. He is therefore obliged to test his claim to possession in the courts, and not the people of Ternate, who are the possessors. The fact that Padre Villafranca first made his demands before the justice of the peace in Ternate shows that he began the proceedings in the right way. Then he came to Manila and attempted to reverse the facts. In consequence of the misrepresentations made to Governor Taft by Padre Villafranca Governor Taft ordered the president of Ternate and the justice of the peace of Ternate suspended, and also ordered that the people make their claim for possession before the courts.

Sixth. In view of the foregoing, Obispo Maximo Aglipay respectfully petitions Governor Taft to reinstate the president of Ternate and the justice of the peace of Ternate, and direct Padre Villafranca to continue his case in the courts, because it appears to me to be the simple act of justice, in view of the fact that the people who were the defendants before the justice of the peace are by this action of Governor Taft compelled to be plaintiffs.

16th of February, 1903.

GREGORIO AGLIPAY.  
OBISPO MAXIMO.

MANILA, February 13, 1903.

Governor TRIAS, Cavite:

Please have following message delivered as soon as possible:

JUSTICE OF THE PEACE, Ternate:

You are hereby suspended from your office of justice of the peace, on the ground that you took part in a conspiracy to compel the sacristan of the Roman Catholic Church to deliver the keys and possession of the church, which was in his possession as agent of the Roman Catholic Church. This suspension will continue until you and the president, whom I have already directed to be suspended, shall restore the church to the possession of the sacristan. If the people of the church then claim ownership and possession of the church, with the power to dispose of the same, they must make that claim through the courts. Your action was in direct contravention of the governor's letter of instructions, and might properly subject yourself and your fellow-

citizens to prosecution for sedition. It is hoped that this telegram and a similar telegram to be sent by the governor to the municipal president will lead to the restoration of the church and remove further necessity for action and a termination of the proceedings of suspension.

WINTHROP, *Acting Executive Secretary.*

MANILA, *February 14, 1903.*

Governor TRIAS, *Cavite:*

Desire you to suspend the president of the town of Ternate for having forcibly dispossessed, through the agency of the justice of the peace of that town, the lawfully appointed agent of the Roman Catholic Church in possession of the parish church, in violation of my instructions to governors and presidents. If the town claims the church, the claim must be presented in court. The town can not thus take possession by duress and force against the sacristan holding the keys for the Roman Catholic Church.

TAFT, *Civil Governor.*

CAVITE, *February 15, 1903.*

ACTING EXECUTIVE SECRETARY, *Manila:*

Have just arrived at Cavite. Municipal president and justice of the peace of Ternate are suspended, per your telegrams 14th and 15th. I had not ordered these suspensions before, because, according to reports, I did not see reasons for so doing. I send report by mail.

M. TRIAS.

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., February 16, 1903.*

MY DEAR WINTHROP:

Aglipay and Early have been to see me about this Ternate business. It seems to turn on the question whether the sacristan willingly gave up that key or was compelled through fear to do so. Of course, he was in actual possession of the church because he had the keys. Now, it seems that the question of ownership of the church is one that has been mooted down there, and if he turned over from the Roman to the Church of Aglipay, and recognized the right of the people to control the custody of the church, and so gave up the key, then my instructions were not violated, and the president and justice of the peace should be restored to their offices. It is very difficult to determine the fact, and the only thing I see to be done is for you or somebody in the attorney-general's office to go down to Ternate on a launch and interview the sacristan and find out the facts. If the facts are that he gave up the key voluntarily, and really turned over the church willingly, then there was no violation of my instructions, and the president and justice of the peace should be restored. Look into this matter. I have told Bishop Aglipay that this is the result. I send you the papers which Early has prepared.

Sincerely,

WM. H. TAFT,  
Per CARPENTER, *Secretary.*

OFFICE OF THE FISCAL, PROVINCE OF CAVITE,  
*Cavite, P. I., February 19, 1903.*

Mr. BEEKMAN WINTHROP,  
*Acting Executive Secretary, Manila, P. I.*

SIR: Yesterday morning at half past 10 I received your telegram requesting me to go to Ternate at 1.30 in the afternoon. I replied that, owing to lack of steamer, I was unable to reach the town mentioned; the road not being easy for vehicles, the latter being in poor condition, and the distance from this town to Ternate being great.

In the afternoon I went to Manila, and there was informed that there was no steamer for Ternate, but was one for the town of Naic leaving Manila to-morrow, Friday, the 20th instant. I therefore returned this morning to Cavite, where the court was holding session.

I have the honor to inform you in order to explain my failure to be present at the town of Ternate.

Respectfully,

F. SANTAMARIA,  
*Fiscal, Province of Cavite.*

(The telegram to which the above was a reply is not shown by the records.)

MANILA, P. I., *February 20, 1903.*

Governor TAFT, *Cebu, Cebu.*

Araneta and I went to Ternate Wednesday. Interviewed the suspended president, justice of the peace, and several principales. The sacristan was not at Ternate nor at Maragondon. I have telegraphed for him, and he is expected to be in Manila today. From the statement of the president, justice of the peace, and principales of Ternate, it appears probable that the sacristan was compelled to turn over the keys to the president, and that therefore the suspension of the president and justice of the peace was proper. Matter can not be finally decided until evidence of sacristan is had.

WINTHROP, *Acting Executive Secretary.*

MANILA, P. I., *February 21, 1903.*

MY DEAR MAJOR HARTIGAN:

Where is the sacristan of Ternate? We must see him before the Ternate church question can be decided. It seems strange that Padre Villafranca can not be found, or at least can not let us know where the sacristan is. I wanted to settle this matter before Judge Taft comes back, and I want to do so still; consequently, if you can get hold of the sacristan and can come to the office to-morrow morning about half past 9, I will be there. Telephone me (No. 58) early to-morrow morning whether you can find the long-lost individual.

Very sincerely, yours,

BEEKMAN WINTHROP.

To Maj. T. L. HARTIGAN,  
*No. 2 Arzobispo, Manila, P. I.*

OFFICE OF THE GOVERNOR, PROVINCE OF CAVITE,  
*Cavite, February 24, 1903.*

HON. WILLIAM H. TAFT,  
*Civil Governor of the Philippines, Manila, P. I.*

SIR: I have the honor to submit to you the following report in regard to the religious events which have taken place in Ternate, a pueblo of this province:

#### A LITTLE HISTORY.

In 1653, Señor Seminiano Manrique de Lara being governor-general of the islands, there landed, coming from the Moluccas, the Mardicas, on the northwest coast or "bar" of this province, who constituted themselves into a barrio of the pueblo of Maragondon, and later into an independent pueblo called Ternate. The expedition, consisting of seven individuals, all males, reached the said place in a small boat and brought with them the image of the "Holy Child, Jesus," who is now the patron saint of the pueblo.

The organization of Ternate into an independent pueblo took place in 1857, and in 1858, on the site of the chapel where the image was worshiped, there was begun the building of a church at the expense and with the work of the pueblo, not excepting the women and children, who were engaged in the work of carrying the sand and water.

The feasts of the image are held by the people from the 1st to the 6th of January of each year, and to them there proceed such large pilgrimages from the neighboring pueblos and near provinces that these feasts were formerly among the most renowned, and second only in this province to those of Porta-Vaga, in this capital.

The church was opened for worship on January 2, 1863, and on the 30th the Archbishop of Manila wrote to the gobernadorcillo, or municipal president of Ternate, requesting information as to the distance between Maragondon and Ternate; to the number of contributors that the pueblo could count upon; whether the church existed; what was the material used in its construction, and whether there was some house devoted to the use of the parish priest; and, in a contrary event, whether there would be any difficulty in furnishing the same. The gobernadorcillo having reported that there was some distance between Maragondon and Ternate; that the pueblo had a sufficient number of parishioners; that the church was of masonry construction, and had a dwelling place for the parish priest, in February of the same year the pueblo and the church had a permanent priest.

The inhabitants of Ternate do not speak Tagalog, but almost Spanish, and they are proud of this and do not permit themselves to be confounded with the general run of those in the province.

## ANTECEDENTS OF THE INCIDENT.

Thirty-seven years ago Father Esteban del Rosario was in charge of the church of Ternate. To the distinct annoyance of the pueblo he was transferred to the pueblo of Indan in November of last year, and, notwithstanding the fact that the priest was content (satisfied) with his new church, it appears that several times he asked for his return, which was not granted.

Upon his departure Father Esteban delivered the keys of the church, together with a communication in writing, to the municipal president of Ternate, in whose possession they remained until the 30th of December, 1902, when the municipio decided to intrust them to the sacristan, Simplicio Dirain, who was not such until after his appointment, to the end that he might take charge of the coming feasts in January. Before the election fell upon Simplicio Dirain there were two other candidates who did not care to accept the office.

Father Policarpo is the parish priest of Maragondon, and perhaps as "Vicar Foraneo" of the province he took charge officiously of the charge without the consent of the pueblo. In effect, it is not explained for what reason, on November 14, 1902, the municipal president being absent from the pueblo, the justice of the peace (auxiliary) received word from Father Villafranca that he was corralled (acorrallado) inside the church by the women of the pueblo and could not get out. The auxiliary justice of the peace could do nothing until the return of the president, who pacified the women, made them desist from their attitude, and protected the departure of Father Policarpo. On the 21st of December it was recorded in a resolution (first exhibit) that the pueblo was disgusted with Father Villafranca, because he did not appear more than (irregularly) on Thursdays of each week to hold mass; because he refused frequently to give spiritual assistance to the dying; because he would not permit that in the church there should be lighted any other candles than those bearing the mark or seal of the said priest, and because during his absence the church remained closed, thus preventing the residents from complying with the religious regulations on feast days.

## THE ATTACHED EXHIBITS.

The first exhibit is a copy of the resolution placed on record on December 21, 1902, and sets forth that the municipal president, being compelled thereto by (the resolution says on petition of) the residents, had to call together a session of the council to take up the matter of possession (the exhibit says ownership) of the church, presenting to that end the above complaints against Father Policarpo Villafranca and requesting that the municipio take charge of the possession of the church for the reasons appearing in the history of the same.

The third exhibit is a copy of a resolution drawn up in triplicate on January 24 last, and is nothing more than a simple statement of the separation of the pueblo from the Roman Catholic Church and an adhesion in the meanwhile to the Independent Filipino Church, until the Pope should see fit to recognize the rights of the Filipino clergy, when they would immediately again submit to his authority; and it has been transmitted to this government in the erroneous belief that it had something to do with this case.

As a result of both exhibits there was issued by the provincial secretary a telegram, of which the third exhibit is a copy. (This is the telegram of February 3, 1903, written on page 2 of this "Exhibit No. 26.")

At that time I was ignorant in regard to all these points, when the fourth exhibit was presented to me, which is a protest against the threatening telegram of the secretary, the said protest stating furthermore that if the people were prosecuted they would flee to the country. It is not true, as would appear from said exhibit, that the residents of Ternate, besides being in the judicial courts, were also cited to appear before the administrative authorities. The provincial secretary sent the telegram in question as a preventive measure, and in compliance with the terms of the circular of your office of January 10 last.

In view of the said protest, since the matter was subjudice, I sent out two telegrams, copies of which form exhibits 5 and 6. In the first I annulled the telegram of the provincial secretary; in the second I requested Father Policarpo Villafranca to be careful not to create a disturbance of the peace in Ternate, for fear that there might be a repetition of the events at Pandacan.

The seventh exhibit is a certified copy, accompanying the fourth exhibit, of the letter of the archbishop of Manila, and the answer of the gobernadorcillo of Ternate, to which I have already referred in giving the history of the church of Ternate.

To my telegram of the 12th instant, Father Policarpo Villafranca answered with a letter in which, among other things, he states that: (a) On January 28 of the present

year the keys were taken away from the sacristan, and from then until I do not know what date the church was guarded by policemen, so much so that on the 30th, Thursday, Father Villafranca was not able to hold mass, because they thus advised them; (b) on the 31st of January, because the municipal president of the pueblo refused to hear the protests of the said priest and help him to recover possession, suit was brought before the justice of the peace praying for the closure of the church until the matter was closed; (c) that during the feast of the patron saint, which are held between January 1 and 6, Father Policarpo Villafranca officiated; and (d) that it was true that the latter had come near being assaulted, which showed the wisdom of my preventive or admonitory telegram, and at once I sent an answer to that effect. These exhibits are Nos. 8 and 9.

The tenth exhibit is the document to which Father Policarpo Villafranca refers in his letter.

The twelfth and thirteenth exhibits are relative to the cessation in office of the municipal president and the taking of possession of his successor.

Before closing I would call your attention to the signature to this last exhibit, it being the same as that affixed to the protest against the aforementioned telegram of the provincial secretary.

I greet you.

Very respectfully,

MARIANO TRIAS,  
*Governor, Province of Cavite.*

[Indorsement.]

EXECUTIVE BUREAU,  
*Manila, March 9, 1903.*

Respectfully referred to the solicitor-general, by direction of the civil governor.

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

MANILA, P. I., *February 28, 1903*

PROVINCIAL BOARD, PROVINCE OF CAVITE,  
*Cavite, P. I.*

GENTLEMEN: I have the honor to inform you that the justice of the peace of the municipality of Ternate, Victoriano Ybañez, has been suspended by the civil governor, being charged with compelling the sacristan of the church to turn over the keys of the church to the municipal president of Ternate, in violation of law and of orders of the civil governor issued by a circular letter of January 10, 1903. The provincial board of Cavite will, by direction of the civil governor, take action in accordance with act No. 314.

Very respectfully,

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

OFFICE OF THE CIVIL GOVERNOR,  
*Manila, P. I., March 7, 1903.*

Señor GREGORIO ARANETA,  
*Solicitor-General, Manila.*

(Through the attorney-general.)

MY DEAR SIR: You are familiar with the facts with respect to the taking of the Roman Catholic parish church in the pueblo of Ternate, in Cavite, from its sacristan, who was holding it, under orders from Padre Villafranca, for the Roman Catholic Church, the priest of Maragondon. I have ordered both the president and the justice of the peace suspended and directed them to be tried by the provincial board. I am convinced from the evidence as reported to me by Mr. Winthrop that the justice of the peace and the president used their official power to extort the keys from the sacristan, that they had no right to do so, and that in doing so they violated the law. I am willing to forgive them if they will turn the keys over to the sacristan, but if they do not, I desire them prosecuted, both before the provincial board and before the court of first instance, for an abuse of their office. I request that you examine the criminal code in force in order to determine which section of that code they have violated and that you then take steps by issuing an order to the fiscal to secure their arrest and prosecution. They should, if possible, be brought before the court of first instance. You can notify the fiscal to direct them to appear before him and to have them understand that if they will turn the keys back to the sacristan and give the

possession to the person who had it when they engaged in their unlawful enterprise the proceedings will be discontinued, but that otherwise they will be prosecuted to the full extent of the law.

Very respectfully,

WM. H. TAFT,  
Civil Governor.

[Telegram.]

CAVITE, March 10, 1903.

Honorable EXECUTIVE SECRETARY, *Manila*:

By order provincial board, dated 7th instant, investigation of charges against justice of the peace, Ternate, to take place 13th instant.

(Signed by the provincial secretary.)

MANILA, March 10, 1903.

PROVINCIAL BOARD, *Cavite*:

Reference telegram 10th. Unless there are difficulties in the way, charges against president, Ternate, should also be investigated 13th.

WINTHROP, *Acting Executive Secretary*.

CAVITE, March 11, 1903.

Honorable EXECUTIVE SECRETARY, *Manila*:

By order provincial board, charges against president, Ternate, will be investigated on 13th instant. In your letter of February 28 no reference was made to president, solely justice of the peace.

(Signed by the provincial secretary.)

OFFICE OF THE SECRETARY, PROVINCE OF CAVITE,  
*Cavite, P. I., March, 1903.*

Honorable EXECUTIVE SECRETARY, *Manila, P. I.*

SIR: I have the honor to forward the following resolutions of the provincial board of Cavite, held at Cavite on the 13th day of March, 1903, with evidence taken in the investigation of the charges brought against the former president and justice of the peace of the town of Ternate.

*Charges:* "That they compelled the sacristan of the church at Ternate to turn over the keys of the church to the municipal president in violation of law and of the orders of the honorable civil governor issued by circular letter of 10th of January, 1903."

The former president and justice of the peace of Ternate were before the board to answer the charge of taking the keys of the church from the sacristan.

The following facts appear:

First. That the people in the town of Ternate rebelled against the authority of the priest and went over bodily to the new church.

Second. The priest, Policarpo Villafranca, is not liked by the people, and had only one witness to testify for him, the sacristan.

Third. That the action taken to get the keys was not solely the action of the justice of the peace and the president, but was the joint and united action of the people. The officers were overpersuaded and overcome by moral force. It was in the nature of mob violence backed by public sentiment.

Fourth. It is feared that trouble may result when the priest takes charge of his church.

Fifth. The people claim they built the church for their own use and that the church goes with them into whatever religion they care to follow.

Sixth. The president and justice of the peace testified that they did not receive the honorable civil governor's letter of the 10th of January until January 29.

Seventh. That before this date the people had registered their act of taking the church, in the office of the justice of the peace.

Eighth. That the justice of the peace did not sit as a justice of the peace to try a case at law, but simply registered the expressed will of the people.

Ninth. That the keys are still undelivered.

Tenth. That the president, Miguel Ramos, and the justice of the peace, Victoriano Ybañez, should be removed from office for having permitted the said forcible action, and having acquiesced in the same instead of endeavoring to uphold the law.

The evidence taken is to be forwarded to be read in connection with the original documents heretofore forwarded to the honorable civil governor, copies of which are in the hands of the board.

Very respectfully,

DANIEL TIRONA,  
*Secretary, Province of Cavite.*

(Here follows the testimony of the following witnesses, in the order named: Simplicio Guiray, sacristan mayor of the church; Blas Catamisan, an assistant of the church; Father Policarpo Villafranca; Sr. Miguel Ramos, municipal president; Victoriano Ybañez; Valeriano Ramos, a fisherman, landowner, and taxpayer. The testimony is in Spanish, and no translation thereof has been made and for this reason it is not copied here. The substance of the testimony is fairly indicated in the above report.)

EXECUTIVE BUREAU,  
*Manila, P. I., March 28, 1903.*

Sr. VICTORIANO YBAÑEZ,  
*Justice of the Peace, Ternate, Cavite, P. I.*

SIR: The charges, evidence, and recommendations of the provincial board of Cavite in the case against you having been received and fully considered, you are informed that the findings of said board are concurred in, and you are accordingly hereby dismissed from the office of justice of the peace for the municipality of Ternate, in the province of Cavite.

By direction of the civil governor.

Very respectfully,

A. W. FERGUSON,  
*Executive Secretary.*

MANILA, P. I., *March 28, 1903.*

Official copy respectfully furnished to the provincial board, province of Cavite, Cavite, P. I.

A. W. FERGUSON,  
*Executive Secretary.*

[Telegram.]

MANILA, *May 27, 1903.*

SANTAMARIA, *Fiscal, Cavite:*

Inform this office immediately result of your action in matter of Ternate church. Have keys been delivered to the priest? Prompt reply is desired. If nothing has been done yet, comply immediately with your instructions.

ARANETA, *Solicitor-General.*

MANILA, *May 28, 1903.*

Copy sent to Messrs. Hartigan, Marple, Solignac, McCabe & Gutierrez.

MANILA, P. I., *March 18, 1903.*

Sr. D. FRANCISCO SANTAMARIA,  
*Provincial Fiscal, Cavite, Cavite, P. I.*

SIR: I have the honor to transmit herewith copy of a translation of a letter directed to me by the civil governor under date of the 7th instant, with reference to the matter of the church at Ternate, in your province, in order that you may comply with the orders contained therein, so far as they concern you. I have studied this case, and it is my opinion that the justice of the peace, as well as the municipal president, of the pueblo of Ternate took advantage of his official position to extort the keys of the Ternate church from the sacristan charged with the custody thereof, and that in doing so they infringed section 217 of the Penal Code, which prescribes as follows:

"SEC. 217. The public official who shall condemn the property of a person, unless by virtue of a mandate from the competent authority for reasons of public utility,

before proper indemnification has been made therefor, shall incur the penalties of suspension in its medium and maximum degrees and a fine of 625 to 6,250 pesetas.

"He who shall disturb any person in the possession of his property, unless by virtue of a judicial writ, or a mandate from the competent authority issued in accordance with the express provisions of law, shall incur the same penalty."

I inclose herewith a copy of the document drawn up in the office of the justice of the peace of the pueblo of Ternate, approving the delivery of the keys to the municipal president, and the action of the municipal council of the pueblo declaring, without authority therefor, that the church belonged to the municipality.

From the investigations which, by order of the civil governor, the executive secretary and I have made in this matter, I am convinced that the municipal president, in his capacity as such official, disturbed Father Policarpo Villafranca in his possession of said church, taking part as president in the action of the municipal council of Ternate declaring, without competent authority for so doing, that the ownership of said church vested in the municipality of Ternate, and taking part, in his capacity as president, in the action of the residents of Ternate of taking the keys from the hands of the sacristan, who, under the orders of Father Villafranca, had the care of the church and as president receiving said keys; and that the justice of the peace assisted in such dispossession, authorizing as justice of the peace this action of the municipal president.

The fact that in both cases it was recognized that Father Villafranca had the administration of the church is shown by the sacristan having had possession of the church.

In accordance with the instructions contained in the civil governor's letter, you are to give the municipal president and justice of the peace to understand that, if they return the key to the sacristan and give up the possession of the church to the person who was in possession when they carried out their illegal enterprise, they will not be proceeded against. In case they do not, you will immediately file complaint in the court of first instance, asking for preliminary investigation and the arrest of the accused if in the judgment of the court there is sufficient ground therefor.

Report to this office your action and the result thereof.

Very respectfully,

GREGORIO ARANETA,  
*Solicitor-General.*

CAVITE, P. I., *July 17, 1903.*

The SOLICITOR-GENERAL.

SIR: I have the honor to send you the following report upon the matter of the church at Ternate:

Complying with instructions received in March of this year I made the municipal president, as well as the justice of the peace, of Ternate understand the illegality of the act committed by them when they availed themselves of their public functions in order to evict from the possession of the Ternate church the priest vested with the administration of said church.

Said president and justice of the peace, apparently convinced, offered me to return the key of the church to the sacristan in charge thereof, from whom they had taken said key. But, after two months had passed, I again required of said functionaries the fulfillment of what they had offered to do; they answered that such failure was due to the absence and unknown whereabouts of the sacristan in charge of the church.

Then, believing it opportune to take legal action, on the 13th of June last past I filed an indictment against said Miguel Ramos and Victoriano Ybañez, formerly municipal president and justice of the peace of Ternate, accusing them of violation of the provisions of article 217 of the penal code.

Upon the presentation of my indictment, and on my petition, the honorable judge of the court of first instance for this province issued a subpoena duces tecum against the accused in my indictment, for them to appear before that court, bringing with them the key which they had taken possession of; and he also ordered the appearance of the priest, Señor Policarpo Villafranca.

On the 3d of the present month the said ex-municipal president and justice of the peace of the pueblo of Ternate appeared before the court and delivered up to the judge the key to the church of their pueblo, for what he should think expedient according to their statement. On the same date, the judge having to leave the province to hold a session in another, he decreed that the clerk of this court keep on deposit the key delivered by them, that the summons ordering the appearance of Señor Policarpo Villafranca be again issued, and that upon this person's appearance the said key be delivered to him.

The clerk of the court has issued summons to Manila and to the pueblo of Maragondon, in this province, directed to Señor Policarpo Villafranca, without his having appeared up to this time. The one directed to Manila was returned by the sheriff of that city, on account of the absence of the priest Villafranca.

The key to the church of Ternate is deposited with the clerk of this court.

This is the condition in which the matter is found, mentioning the action taken by me.

A copy of my indictment is attached.

Respectfully,

F. SANTAMARIA,  
*Fiscal, Province of Cavite.*

---

INDICTMENT.

*United States v. Miguel Ramos and Victoriano Ybañez.*

In the court of first instance for Cavite, province of Cavite, June 13, 1903.

The undersigned accuses Miguel Ramos and Victoriano Ybañez of the crime described and punished by article 217 of the penal code, committed as follows:

That said Miguel Ramos, taking advantage of his functions and authority as municipal president of the pueblo of Ternate, on or about the 28th of January, 1903, in the pueblo of Ternate, province of Cavite, evicted from the church of Ternate and disturbed in the possession of the same the priest, Señor Policarpo Villafranca, taking the keys of said church from the sacristan in charge of them; and in the same pueblo and on the same date, said Victoriano Ybañez, taking advantage of his functions and authority as justice of the peace of the pueblo of Ternate, officially authorized and aided in said eviction from the church and despoiling of the same; done by the accused without the mandate of any authority and in violation of the law.

F. SANTAMARIA, *Fiscal.*

Witnesses: Policarpo Villafranca, the sacristan of the church, and Andres Ninon, councilor of Ternate.

---

DEPARTMENT OF JUSTICE OF THE PHILIPPINE ISLANDS,  
OFFICE OF THE ATTORNEY-GENERAL,  
*Manila, P. I., July 23, 1903.*

Hon. WM. H. TAFT, *Civil Governor.*

(Through the Attorney-General.)

SIR: I have the honor to return herewith the papers relating to the controversy had between the parish priest of Maragondon, Father Villafranca, and the municipal president and justice of the peace of Ternate with respect to the church of said town.

In compliance with your letter of March 7, I addressed a communication to the provincial fiscal, a copy of which is herewith inclosed, accompanied by a translation of your letter, directing him to comply with your instructions in so far as they concerned him, making, moreover, certain suggestions and recommendations with respect to what should be done in the matter. I have the honor to call your attention to the inclosed communication from the provincial fiscal reporting his action in the matter. The keys of the church are now in the possession of the clerk of the court at the disposition of Father Villafranca.

Very respectfully,

GREGORIO ARANETA,  
*Solicitor-General.*

EXHIBIT No. 27.

LAOAG, *October 4, 1901.*

The governor of Ilocos Norte forwards to the civil governor an official letter and certain documents for such action as he may deem advisable.

To the HONORABLE CIVIL COMMISSION:

Agudo Agbayani, governor of Ilocos Norte, forwards to the Commission copy of the act of a session of the municipal council of Laoag, which was sent to him for his approval of the different resolutions taken by the said council; a proposal made by Councilor Severino Palting, asking that the cemetery of the town be given back to the church, is deemed by the governor to be anomalous and contrary to the provi-

sions of the municipal code, which prescribes that property belonging to the municipality in virtue of its former organization shall belong to it under its new organization; article—— also prescribes that the municipal council shall administer the property of the municipality; Councilor Severino might really be charged with maladministration, since, on August 30, 1900, when the municipality was constituted under General Orders No. 40, and had not yet been organized under law 82, the cemetery had been recognized as the property of the pueblo, and the revenue derived therefrom figures in the estimate of receipts in the pueblo. As I consider that the councilor has been guilty of maladministration in making such a proposal, I inclose herewith a copy of the act of the council, in the session of which the cemetery was recognized as municipal property, and of that in which Councilor Palting presented his proposal for proper action on the part of the Commission.

AGUDO AGBAYANI, *Governor.*

MUNICIPAL COUNCIL OF LAOAG,

[Session of August 27, 1900.]

\* \* \* The secretary read an order of the colonel commanding the province fixing the burial fee at 1 peseta.

[Session of September 2, 1900.]

\* \* \* The object of the meeting was to know if the cemetery had been built by the pueblo or at the expense of the church. The two oldest councilors declared that, if the church was built on the proposal of the parish priest who was then in office, all the inhabitants of both sexes contributed to the work and supplied free of charge the materials, such as bricks, stones, mortar, etc.; the lot on which the cemetery was built was given to the pueblo by Señora Macaria Guerrero; once, when repairs were made to the church or chapel, which is inside the cemetery, the work was done for the account of the pueblo. The other councilors also declared that they know from hearsay that the cemetery was built at the expense of the pueblo, and that the church or the priest took no part therein.

[Session of August 29, 1900.]

\* \* \* The secretary read an order of the commanding officer, declaring that if the cemetery had been built by the pueblo and was its legitimate property, the burial fee of 1 peseta should be paid to the municipality and the cemetery known as the "Municipal Cemetery." The municipal council then declared that the cemetery belonged to the pueblo, although the initiative thereof belonged to the parish priest; that the work and materials were supplied free of charge by the people, etc. (See session of September 2.) By an unanimous vote the council decided that the burial fee would be paid to the municipal treasury and would be double for foreigners.

The income from burial fees appears in the municipal budgets for 1900 and 1901.

During the session of the council of August 23, 1901, Councilor Severino Palting proposed that the cemetery of the pueblo be returned to the church. The municipal council decided to request the opinion of the provincial fiscal in the matter.

MANILA, P. I., October 17, 1901.

Señor AGUDO AGBAYANI,  
*Governor of Ilocos Norte, Laoag, P. I.*

SIR: I am in receipt of your communication of October 4 concerning an attempt of the council of Laoag to cede to the church the cemetery. If the cemetery belongs to the municipality it would hardly be within the power of the municipality to thus part with the property of the municipality. The question of ownership is one on which there may be different opinions, but if the municipality is in possession of the cemetery and the municipal council believes that it belongs to the town, then it is their duty to hold the cemetery until by proper judicial proceedings it shall be recovered by the church, if it belongs to the church.

I have the honor to be, very respectfully,

WM. H. TAFT, *Civil Governor.*

## EXHIBIT No. 28.

[Fourth indorsement.]

DEPARTMENT OF FINANCE AND JUSTICE,  
*Baguio, Benguet, June 1, 1903.*

Respectfully referred to the honorable secretary of the interior, Baguio, Benguet, as requested in the first indorsement hereon.

Section 43, paragraphs (e) and (f), of Act No. 82, known as the "Municipal Code," enumerates among the revenue resources of a municipality the following:

"(e) Rents and profits from all property belonging to the municipality, tolls from ferries, municipal stables, markets, slaughterhouses, public bath houses, and cemeteries belonging to the municipality.

"(f) Rentals for the privilege of establishing and maintaining the same."

The solicitor-general contends that the words "the same" in subdivision (f) refer to cemeteries in general and not to those belonging to the municipality, and that authority is thereby given to the municipality to levy a license or privilege tax on all cemeteries established or maintained within the municipality. The Catholic Church, represented by Messrs. Hartigan, Marple & Solignac, declares that "burying grounds, churches, and their adjacent parsonages or conventos, and lands and buildings used exclusively for religious, charitable, scientific, or educational purposes, and not for private profit" shall be exempt from taxation, and that the Commission did not intend to confer upon municipalities the power of imposing any tax on cemeteries or to derive a revenue from any cemeteries other than those belonging to the municipality, or established or maintained on lands belonging to the municipality.

Subdivisions (e) and (f) of section 43 give no authority of any kind or character to a municipality to impose any tax, privilege tax, or direct tax, on property. That section merely specifies the income which the municipality may derive from its own property or from property in which it has an interest. Under subdivision (e) the city may itself establish ferries, municipal stables, markets, slaughterhouses, public bath houses, and cemeteries on its own property and rent them or derive a profit from them through their use by others. Under subdivision (f) the municipality may permit others to establish ferries, stables, markets, slaughterhouses, bath houses, or cemeteries on its property and may derive a rental or income from the privilege so conceded. In a word, section 43 provides for four classes of income:

- (1) From taxation, subdivisions (a), (b), (h), and (j);
- (2) From services rendered by the municipality in consideration of fees paid, subdivisions (d) and (g);
- (3) From punishments, subdivision (i); and
- (4) From property of the municipality, subdivisions (c), (e), and (f).

The terms "rents," "rentals," "profits," used in subdivisions (e) and (f), are terms used to signify an income from property, but can not be so construed as to give a power to tax. Had it been the intention of the lawmakers to permit the municipality to derive an income from cemeteries in which it had no interest whatever, words other than "rent," "rental," or "profits" would have been used. "Rent," "rental," or "profits" might be derived by the municipality from cemeteries in which it had an interest, but certainly not from cemeteries in which it had no property interest whatever.

Once settled that subdivisions (e) and (f) are not tax provisions, but provisions authorizing the municipality to rent its own property and secure an income therefrom, the difficulties presented by this case may be easily solved, inasmuch as it is admitted that the cemetery in question neither belongs to the municipality nor is established or maintained on property of the municipality.

JAMES F. SMITH,  
*Secretary of Public Instruction.*

## EXHIBIT No. 29.

[Second indorsement.]

OFFICE OF THE PROVINCIAL GOVERNOR OF NUEVA ECIJA,  
*San Isidro, June 4, 1903.*

Respectfully returned to the executive secretary of the Philippines, Manila, P. I., with the following information:

I have investigated this matter and find that the question is simply one of jurisdiction, in which it is desired to secure the intervention of a municipal president to settle a difference where the adjusting of the matter belongs exclusively to the

immediate ecclesiastical superior of both parish priests. A president is not called upon to settle contentions of peaceable jurisdiction between two priests belonging to the same church, but to assist the man in actual possession in the event of violent intrusion by another. Otherwise the president would be the intruder. Father Mariano de la Paz, the Roman superior in this province, informs me that this case has already been determined ecclesiastically.

Regarding the cockfights on February 20, 21, and 22, 1903, this was in accordance with act No. 638, approved on February 11, 1903, since the occasion was the celebration of the feast of the patron saint of the municipio.

Since the question of limits of jurisdiction has already been the origin of unpleasantness, and I believe that this case arose in that way, I am of the opinion that there should be suggested to the proper party that the parish priests who control pueblos of one province should not control others of another province. In this way there would be avoided ridiculous petty squabbles between brothers of the cloth who ought to respect one another.

EPIFANIO DE LOS S. CRISTOBAL,  
*Provincial Governor Nueva Ecija.*

## EXHIBIT No. 30.

OFFICE OF THE PROVINCIAL GOVERNOR CAGAYAN PROVINCE,  
*Tuguegarao, August 2, 1902.*

The CIVIL GOVERNOR, *Manila, P. I.*

SIR: Following instructions of your indorsement of June 21, on a letter, No. 10346, of Esteban Guzman, parish priest of Tuguegarao, toward municipal police interfering with church services, I have made an investigation of the case, and it appears that Policemen Ignacio Saquin, Federico Batulan, and Guillermo Mapagu, misunderstanding orders given to them by the sergeant of that body, and therefore exceeding their authority, did enter the church as stated in the letter.

For this I find that they were, by the municipal council, arrested fifteen days and advised if it occurred again they will be permanently separated from the police service and turned over to the courts, and though it seems to me that their punishment was insufficient, yet I think that they can not be punished twice for the same offense.

I transmit this information to the parish priest, who I think will be satisfied.

Very respectfully,

PASTOR SALO,  
*Acting Governor of Cagayan.*

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., August 26, 1902.*

Respectfully referred, by direction of the civil governor, to the Rev. Esteban Guzman, parish priest, Tuguegarao, Cagayan, P. I., for his information, and trusting that the unfortunate incident is closed.

A. W. FERGUSSON,  
*Executive Secretary.*

## EXHIBIT No. 31.

MANILA, P. I., *December 12, 1901.*

HON. MANUEL CORRALES,  
*Governor of Misamis, Cagayan, P. I.*

SIR: I have the honor to acknowledge receipt of your communication of the 12th ultimo, inclosing the protests of the people in the pueblo of Jimenez against two friars being allowed to locate in that pueblo. I beg to say in reply that there is no law which forbids friars from going to or remaining in any town of the archipelago. In this regard religious persons stand upon precisely the same footing as other people; their right of free locomotion stands upon the same footing in every particular as that of any other citizen. So long as they do not violate the law, they should not be interfered with and are entitled to the protection of those civil officials charged with the enforcement of law and the protection of individuals. Of course, if they violate the law, they are amenable to its provisions, just in the same way as are other people.

It is to be regretted that these padres should insist upon remaining in a community which does not desire their presence or ministrations, but their right to do so is unquestionable and must be respected. One of the fundamental principles of

American Government is the complete separation of church and state, and another is the right of every person within the jurisdiction of the United States to worship God according to the dictates of his own conscience. It is therefore impossible for any priest or religious teacher to exact contributions from anyone against his will, or to compel his attendance upon divine service; so that the people of Jimenez, if they elect to do so, may remain away from church whilst these padres officiate, and are not compelled in any way to contribute to their maintenance. This being so, it is not easy to perceive why the presence of two padres in the pueblo of Jimenez can in any wise injuriously affect the people.

Governor Taft some months ago addressed a communication to the Hon. Wallis O. Clark, governor of Tarlac, defining at some length the respective rights of priests and people, a copy of which I herewith inclose for your perusal and guidance, and also for the information of the municipal authorities of Jimenez. This communication so completely covers the entire subject that it need not be further discussed here.

Very respectfully,

LUKE E. WRIGHT,  
*Acting Civil Governor.*

EXHIBIT No. 32.

[Telegram received.]

ARAYAT, PAMPANGA, *May 8, 1902—11.25 a. m.*

GENERAL WRIGHT,  
*President Civil Commission, Manila:*

Has any municipality the right to close a cemetery against the wishes of the local priest? Graveyard at Arayat is full, but local priest insists that burials shall still take place there. Have I authority to use my own judgment? Please answer at once here, as I am on inspection tour.

DE MEY,  
*President Board of Health, Pampanga Province.*

[Telegram sent.]

MANILA, P. I., *May 8, 1902.*

DE MEY,  
*President Board of Health, Arayat, Pampanga:*

Reference your wire this day, under paragraph (p), section 30, Municipal Code, the municipal council has the right to prohibit the burial of dead within the centers of population and provide for their burial in such proper place and in such manner as the council may determine. Municipal board of health has power to abate nuisance endangering public health, under section 5 of act 308. Law is that the municipal council and board of health must act subject to the supervision and control of the provincial board of health, but not to the judgment of any one member thereof.

FERGUSON, *Executive Secretary.*

EXHIBIT No. 33.

MANILA, P. I., *November 20, 1901.*

HON. CEFERINO JOVEN,  
*Governor of Pampanga, Bacolor, P. I.*

SIR: As will appear from the inclosed documents, the complaint of the Rev. Victor Mendoza, parish priest of San Luis, your province, of the action of the municipal council of that municipality in declining to permit the assessment by the municipal board of assessors of certain buildings and lands alleged to belong to the Roman Catholic Church, and furthermore of the action of the president and municipal council in ejecting him as the representative of the Catholic Church from possession of the church, convento, cemetery, and other lands alleged to be church property, has been filed with this office. He has also filed a copy of the complaint made by him to you as provincial governor of such illegal action, and your reply thereto, copies of which are inclosed herewith.

I beg to say that, if the action of the municipal council, as appears from what purport to be copies of its records, is authentic, then it has clearly acted in violation of the provisions of the Municipal Code and in excess of its authority. By the terms of section 43 (a), all real property is subject to assessment for taxation, and, in case

of doubt or difficulty as to who the true owner is, said property is required to be assessed in the name of the person in possession. By section 49 (a) of said code, a board of assessors is created, composed of the president, the municipal treasurer, and a specially authorized deputy of the provincial treasurer, which board is denominated the municipal board of assessors. This board is given sole authority to assess property for taxation. The municipal council has no jurisdiction over the subject, and of course has no power or authority to determine what land shall or shall not be assessed for taxation, or in whose name the same shall be assessed. If, as it seems to be clearly the case, the parish priest, as the representative of the church, was in possession of the property now claimed to belong to the municipality of San Luis, the property should have been assessed in the name of the church. Furthermore, it is entirely clear that it was a palpable and gross usurpation of authority for the president and municipal council to eject the representatives of the church thus in possession of the property. If the municipality of San Luis claims to be the true owner of any property in the possession of the parish priest or the duly constituted church authorities or agents, in such case the proper course for the municipality to pursue is to bring suit in the court of first instance of the province for such possession. By this method the real rights of the parties in controversy will be asserted in a way consistent with justice and good order. Any other course is productive of injustice and disorder and can not be tolerated. The letter written by Governor Taft to Capt. Wallis O. Clark, governor of Tarlac, covering the general subject of the relations of the church and state in these islands, was, I believe, sent you for your guidance and for distribution among the various municipal authorities of your province. Possibly, however, it may not have reached you, and I therefore now inclose a copy of the same for the purposes indicated above. This letter so thoroughly explains and defines the respective rights and duties of municipalities and church authorities, and of the course to be pursued in the unfortunate event of differences between them, that I need not further elaborate the matters therein discussed, contenting myself with requesting your careful study thereof and that you follow out the lines therein indicated for your government.

I desire furthermore to comment briefly upon the position taken by you in your letter of June 17, 1901, to Padre Mendoza, to the effect that you have no supervision or control over the municipal authorities of San Luis and are in no way obligated to correct any illegal action on their part. This seems to me a grave error. By the provisions of section 7 of the provincial act you are declared to be the chief executive of the province, and it is made your duty to see that the laws are faithfully executed by all officers in the province. In addition, you are given authority to suspend any official in the province for misconduct, if in your judgment such a course is necessary, reporting your action to the civil governor; and, finally, it is made your duty to hear all complaints made against the conduct of any executive officers and to take the steps indicated in said section.

Instead, therefore, of declining to take cognizance of the complaint made by Padre Mendoza, you should have given it careful investigation and taken such action as the facts and the law demanded. This criticism is made in the kindest spirit, fully recognizing the difficult position in which controversies of this character place the provincial governor; but it must not be overlooked that the only way in which good government can be maintained in these islands is by an honest and intelligent enforcement of the law on the part of all officials, and especially those high in authority.

In no well-organized community can disputes as to property rights be determined by force or violence, but must be submitted to the impartial determination of the courts of justice. If it be true that in times past, by reason of incompetence or corruption, the courts of the islands failed in the performance of their duties, this, too, is equally true, that now no such unfortunate condition of affairs exists. The judges appointed for the purpose of determining controversies are able and impartial and may be relied on to do even-handed justice.

I beg, therefore, that you will, on receipt of this, investigate the complaint made by the Reverend Mendoza, and if you find the facts to be as stated by him call the attention of the municipal authorities of San Luis to their illegal action. If they refuse to revise same and restore the status quo, it would seem to be a case for you to suspend them for official misconduct. You will report your action in the premises to this office.

I have the honor to be, very respectfully, yours,

LUKE E. WRIGHT, *Acting Civil Governor.*

## EXHIBIT No. 34.

[First indorsement.]

EXECUTIVE BUREAU,  
*Manila, P. I., October 13, 1902.*

Respectfully returned to Pablo Leuterio et al., petitioners herein, calling attention to the passage of a law in respect to cemeteries and possessions modifying the present municipal code and enabling the petitioners first to apply to the provincial board, and, if that board concurs with the municipal authorities, then to apply for an injunction in the court of first instance.

WM. H. TAFT, *Civil Governor.*

[Inclosure—Act 469.]

Section 1 of act No. 469 reads as follows:

SECTION 1. In all cases of municipal ordinances regulating possession or closing municipal cemeteries, an appeal may be taken from the enforcement of such ordinance or ordinances to the provincial board of the province by the persons interested therein. The provincial board, upon a sufficient notice to the interested parties, and upon hearing, shall confirm, modify, or nullify such ordinance or ordinances as it may deem best for the public interest, its decision in the matter to be final: *Provided, however,* That where such ordinance or ordinances have been enacted, not for the public good, but in bad faith and because of prejudice or hatred, the court of first instance having jurisdiction of the municipality and province shall have power, upon complaint properly filed, to enjoin the enforcement of such ordinance or ordinances in whole or in part, because of such bad faith, prejudice, or hatred only. Upon questions involving the public health the opinion of the president of the provincial board of health shall be requested by the provincial board, but his opinion shall be advisory only.

## EXHIBIT No. 35.

OFFICE OF THE GOVERNOR OF PAMPANGA,  
*Bacolor, May 23, 1902.*

HON. ACTING CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS.

SIR: I have the honor to send you herewith the minutes of the session of the municipal council of the pueblo of Lubao, in which said council protests with the greatest energy against the arrival and the presence in the pueblo of a friar of the Agustino order, named Gallo M. de la Calle.

I believe that the presence of said friar must necessarily contribute more or less to disturb the peace of mind and the tranquillity of the inhabitants of the pueblo, and recommend, as a preventive measure, that the superior authority take the matter into consideration, and that, if possible, said friar be removed from the pueblo.

Very respectfully,

C. JOVEN,  
*Governor of Pampanga.*

At the extraordinary meeting of the municipal council of Lubao, held on May 19, 1902, the president said: "I have called this meeting for the purpose of submitting to your consideration a fact which might be an obstacle to the measures which you have adopted in former ordinances in regard to public health, the policing and good appearance of the pueblo, and development of the municipal estate, all of which were intended to consolidate the peace and the tranquillity which we enjoy at present. I suppose that you have heard about the arrival here of a friar named Gallo de la Calle, who used to be parish priest of this pueblo, and who is said to have come to take charge of the parish; I now hope that you will take a decisive resolution in the case; I need not remind you of all we have suffered from the friars, who are the cause of our misfortunes, and are responsible for the death of so many innocents, and the sufferings of so many others who were banished; yet all know that it was on their account that we were compelled to appeal to arms."

The members of the municipal council then declared that before the meeting they had consulted the inhabitants of their respective districts, and that all protest against the presence of the friar and ask that he be promptly removed. The antipathy of all the inhabitants makes them fear that an attempt against the life of the friar might be made if he remained any longer in the pueblo.

And in view of such a possibility, which they wish to avoid, they resolve by a unanimous vote to forward a copy of the present minute to the civil governor of the province, as a protest against the presence of the friar, for such action as he may deem convenient.

EUGENIO FERNANDEZ,

(Follow the signatures of the members.)

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., August 29, 1902.*

Respectfully referred, by direction of the civil governor, to Maj. Thomas L. Hartigan, counsel for the bishop-administrator of the archdiocese of Manila.

A. W. FERGUSON, *Executive Secretary.*

MANILA, P. I., *May 30, 1902.*

Hon. CEFERINO JOVEN,  
*Provincial Governor of Pampanga,  
Bacolor, P. I.*

SIR: I have the honor to acknowledge receipt of your communication of the 23d instant, inclosing copy of resolution of the municipal council of Lubao protesting against the presence of a friar, who, it is alleged has been sent to take charge of the parish church of that town. I will at once take up the matter with the church authorities here, with a view, if possible, of having the objectionable priest withdrawn. In the meantime, however, you are expected to see that no act of insult or violence is perpetrated against him by the people of Lubao. Kindly inform me as to whether the friar is now in charge of the church or still in the town.

I have the honor to be, very respectfully,

LUKE E. WRIGHT,  
*Acting Civil Governor.*

OFFICE OF THE EXECUTIVE SECRETARY  
FOR THE PHILIPPINE ISLANDS,  
*Manila, June 20, 1902.*

Hon. CEFERINO JOVEN,  
*Provincial Governor of Pampanga,  
Bacolor, Pampanga, P. I.*

SIR: Referring to your communication of May 23, inclosing copy of resolution of municipal council of Lubao protesting against the presence of a friar who, it is alleged, has been sent to take charge of the church at that town, and to letter dated May 30 from the acting civil governor requesting information as to whether the friar in question was then in charge of the church or still in the town, I have the honor to inform you that as yet no reply has been received from you. The acting civil governor directs that the information requested in his letter of the 30th ultimo, be secured and furnished this office with the least practicable delay.

Very respectfully,

A. W. FERGUSON, *Executive Secretary.*

PROVINCIAL GOVERNMENT OF PAMPANGA,  
*Bacolor, June 25, 1902.*

Hon. EXECUTIVE SECRETARY:

SIR: I have the honor to inclose the information requested by the civil governor in his communication of the 20th instant. I had not thought it necessary to send a written report, as I had talked about the matter with the governor when I last came to Manila.

I confirm what I recommended in my communication of May 23, viz, that the friars be removed from certain pueblos of this province as a measure of precaution.

Very respectfully,

C. JOVEN, *Governor.*

LUBAO, June 4, 1902.

The GOVERNOR OF PAMPANGA.

SIR: Referring to your communication of the 2d instant, with the answer of Governor Wright to the protest of this pueblo against the presence of the friar Gallo de la Calle, I must inform you that said friar is still in the pueblo, with another friar, named José Rodriguez, who arrived a few days after the 1st and took charge of the parish in virtue of a communication of the bishop, which he showed me.

In regard to insults or acts of violence on the part of the people of Lubao, I will try to prevent them, as I have done hitherto, as much as I can; but, in view of the antipathy of the people against the friars, I can not guarantee that they will not be assaulted, as I can not always be looking after them, and do not hold myself responsible for what might happen to them, especially at night. For this reason I am anxious that they should leave the pueblo, as not even the constabulary force stationed in the pueblo would be sufficient to preserve them from the hatred of the people.

EUGENIO FERNANDEZ,  
*Municipal President.*

LUBAO, June 14, 1902.

The GOVERNOR OF PAMPANGA.

SIR: The pueblo being alarmed by the presence of another friar, named Pedro Dias Ubierna, who arrived yesterday afternoon, I went to see him, with the sergeant of the constabulary in charge of the post, and told him that his presence in the pueblo was impossible, in view of the alarm which it caused among all the inhabitants, and that it would be better for him to leave. At that moment a hostile crowd gathered in the street, shouting, "Away with the friar!" and if it had not been for me and the sergeant there would have been serious trouble.

The friar said that he had come to take care of the friar Gallo de la Calle, who was sick, and to be his assistant in the parish, by order of the bishop, as the other friar, José Rodriguez, was in poor health. I informed him that Friar Gallo de la Calle had died and that the other had gone back to Manila. He said that he would wait for the decision of the bishop, to whom he would report all that had happened. The insistence of this friar to remain makes me fear a conflict, and I therefore beg you to decide what you will deem advisable in order to avoid trouble, which I would not be able to prevent, such is the hatred of the people against the friars.

EUGENIO FERNANDEZ, *President.*

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., August 29, 1902.*

Respectfully referred, by direction of the civil governor, to Maj. Thomas L. Hartigan, counsel for the bishop-administrator for the archdiocese of Manila.

A. W. FERGUSON, *Executive Secretary.*

EXHIBIT No. 36.

MEXICO, PAMPANGA, June 1, 1902.

(Directed to the bishop-administrator of the archdiocese of Manila.)

The undersigned, parish priest of Mexico, is sorry to send you herewith a copy of a municipal ordinance in which the municipality interferes with the church.

By said ordinance the municipality absolutely forbids the ringing of the church bells, and sets the hours for mass on Sundays and feast days, and also on week days. My parishioners find that it is an outrage, but they do not dare protest, as they fear the municipal secretary, at whose suggestion it appears that such an abusive measure was taken.

(Signed by the parish priest.)

MUNICIPAL ORDINANCE OF MAY 17, 1902.

It shall be contrary to law for any person to make, order to make, or cause to be made any noises which might cause an inconvenience or a prejudice to the health, the good order, the tranquillity, and the comfort of the pueblo and of its inhabitants. Such are, ringing peals, chimes, or ringing the bells at full swing, beating drums,

blowing trumpets (except in the case of members of the army, constabulary, or municipal police) or horns, lighting of fire crackers, etc.

The church bells shall only be allowed to be rung for the purpose of calling the people to worship in churches, temples, or chapels belonging to any sect or religion, but not earlier than 5 a. m. nor later than 6 p. m. Shall also be authorized such chimes as are sanctioned by custom to mark certain hours of the day; also the ringing or pealing of bells to be as a sign of rejoicing, for the celebration of a happy or memorable event authorized by law, such as on the following Catholic feast days: All Sundays, New Year's Day, Three Kings', San José, Annunciation, Ascension, Corpus Christi, Assumption, Virgin's Birthday, All Saints' Day, Purísima Concepción, and Christmas; also the ringing of bells as an alarm in case of fire, or for a lawful civic event, or for a baptism, or for a burial ceremony, the fiesta of a barrio, or the thanksgiving masses of religious feast days, so long as they are not novenaries: *Provided*, That for all these it shall be necessary to have the consent of the municipal council, its executive chief, or the local authority.

It shall be necessary to ask the permission of the municipal president before parading through the streets, for any purpose whatsoever, with music, drums, etc., giving serenades before houses, on the plazas, or in the streets, or having processions.

Any person or persons found guilty of transgressing the present ordinance, by the municipal court, shall pay a fine of not less than \$3, Mexican, nor more than \$15, or be imprisoned for not less than three days nor more than fifteen days, or both, at the discretion of the municipal court.

This ordinance shall take effect on its passage and as soon as published.

A true copy:

THE MUNICIPAL SECRETARY.

---

HARTIGAN, MARPLE & SOLIGNAC,  
ATTORNEYS AND COUNSELORS AT LAW,  
*Manila, July 9, 1903.*

The VICE-CIVIL GOVERNOR,  
*Manila, P. I.*

SIR: By direction of the bishop-administrator of the archdiocese of Manila, I have the honor to submit the inclosed communication from the parish priest of Mexico, province of Pampanga, and to respectfully ask your attention to the same.

Very respectfully,

THOMAS L. HARTIGAN,  
*Counsel for the Archdiocese of Manila.*

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., July 14, 1903.*

Respectfully forwarded to Hon. Ceferino Joven, provincial governor of the province of Pampanga, calling his attention to the within complaint of the bishop-administrator of the archdiocese of Manila. Information is desired as to whether the ordinance complained of has, in fact, been passed; if so, it would seem to be a manifest abuse of the police power by the municipal authorities. While undoubtedly the municipal council has the right, by proper ordinance, to prevent unseemly noises in the streets, it has no right, under the guise of the exercise of such power, to require that before any church bell can be rung a permit must be obtained from the president. Besides, the ordinance is vague and indefinite as to what authority is authorized to grant the permit. The same criticism suggests itself with reference to the latter part of the ordinance, requiring permit by the municipal president as a prerequisite to having church processions in the streets. Whilst it is undoubtedly true where such processions operate as an obstruction of the street, they might be regulated or forbidden in extreme cases, yet it is not perceived how, in a rural community like Mexico, a procession could by any reasonable possibility have such an effect, nor is it believed that that is the purpose of the ordinance. The undersigned has heretofore on several occasions called your attention to similar violations by municipal councils in your province and regrets to be again compelled to do so. Noninterference by municipal councils with church affairs and by the church with municipal affairs must be insisted on and should be impressed upon the municipal councils of your province.

LUKE E. WRIGHT,  
*Acting Civil Governor.*

[Second indorsement.]

PROVINCIAL GOVERNMENT OF PAMPANGA, OFFICE OF THE GOVERNOR,  
*Bacolor, P. I., August 4, 1902.*

Respectfully returned to the honorable acting civil governor, with the following statements and remarks: I have taken considerable pains to investigate so as to place an answer suitable and just. In the first place, this was referred to me by the municipal president of Mexico, this province, April 28, 1902, stating that the people, or some of the people, of said municipality had complained of the many unnecessary noises in the town. In the communication the continuous ringing of the bells was mentioned as the most unnecessary noise that they were compelled to endure, stating that from the hour of 4 a. m. until 10 p. m., the bells were kept ringing almost continuously. As the communication was signed by some of the leading inhabitants of the municipality of Mexico, and signed also by the American schoolmaster at that place, I deemed it my duty, as governor of the province, to give the president of Mexico such information on the subject as was lawful, citing the municipal code, also part of a letter from the honorable Governor Taft to the governor of the province of Tarlac. From the contents of the ordinance of the municipality of Mexico, I do not see just where there is anything that even suggests or limits that the church bell shall not ring at all unless permission is first requested from the president. The ordinance gives the church the privilege to ring the bells on all days that are recognized by the Catholic Church laws as feast days, Sundays, etc. It also states that beating of drums, trumpet blasts, blown within the limits of said municipality, was a nuisance, and that it would be contrary to participate in such noise unless permission was given by the president. In regard to the procession, the ordinance does not intend to conflict with the processions held and passed through the streets of the town from the church. The processions mentioned in the ordinance are ones participated in at all hours of the day and night (not through the heat of the day), but from 5 a. m. until midnight, and with chants, singing, music, loud beating of drums, and causing much dust to arise; and during the ravages of the present plague it is very dangerous to all participants as well as to those who do not participate. These processions are called and used to attract the attention of Saint Roque, so as to prevent the cholera from entering the town, and by these processions through the streets at 11 p. m., and oftentimes later, it caused the more sensible inhabitants to protest. In regard to the bells, irrespectively state that its usages according to the laws and customs of the Catholic Church in the municipality of Mexico were overstepped, inasmuch as the bells were rung at all hours for a gain; in cases of deaths, marriages, or baptisms, those who can pay, having bells rung according to the amount of money donated. In many instances the bells are rung at 4 a. m., and the large bell is used at this hour, and it is impossible to sleep, also when the bells are rung at 10 p. m. If anyone should be sick from a fever and could not rest during the day, the bells make it impossible to rest at night. This can be investigated, as there are many now residing in Mexico who are perfectly willing to state the facts in the case. Respectfully inclose a copy of the complaint and of the signatures of the complainants, trusting that the honorable acting civil governor will see that it is not my intention to, or to allow the municipal council to, impose any ordinance that would in anyway work a hardship on anyone; but the only instance of the contrary is that the padre can not make as much money as he could while allowed to ring the bells at night. The padre had the perfect right, and the ordinance gave him the privilege, to ring the bells or cause them to be rung at all hours between 6 a. m. and 6 p. m., but forbade the ringing of said bells during the night and the very early hours of the morning. The provincial secretary, referred to in the inclosed, had nothing to do with the communication, and it is a mistaken idea on the part of the inhabitants of Mexico that they need fear any unlawful action from the source mentioned.

C. JOVEN, *Provincial Governor.*

The inclosures with the preceding indorsement are: (1) A complaint signed by 24 residents of Mexico against the noises mentioned; (2) letter of the municipal president to the provincial governor transmitting the complaint and asking advice, and (3) letter from the provincial governor to the municipal president citing the municipal code and the civil governor's letter to the governor of Tarlac (Exhibit No. 13), and stating that, if conditions are as alleged in the complaint and the municipal president's letter it is the duty of the municipal council to abate the nuisance.

[Third indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
*Manila, P. I., November 18, 1902.*

Respectfully referred to Major Hartigan, calling attention to second indorsement and to the passage of an act on this general subject by the Commission, a copy of which is inclosed.

WM. H. TAFT, *Civil Governor.*

(There is nothing in the record to show what act was referred to here, but it is presumed that it was act No. 469, enacted on October 6, 1902, part of which is copied in Exhibit No. 34.)

The MOST EXCELLENT AND MOST ILLUSTRIOUS

DEPUTY OF THE HOLY SEE IN THESE ISLANDS:

The parish priest of Mexico, Pampanga, undersigned, with the greatest consideration and most profound respect, before your excellency sets forth: That, desiring to celebrate the coming Christmas season, since such is the wish of his parishoners, who are anxious to continue the old custom of celebrating the same with a novenary, or nine days of mass, regularly known as "cockcrow masses," and since the undersigned parish priest is forbidden by the municipal president to ring the bells at the hour of 4 in the morning:

Therefore, the said parish priest and his parishoners humbly pray that you will see fit to seek from the government of these islands the necessary permission, or the absolute removal of the prohibition above alluded to, which is prejudicial to nearly all the parishoners of this pueblo who remain good apostolic Roman Catholics.

This is a boon which it is hoped will be obtained from your excellency, whose important life your humble servants desire that God shall protect for many years.

ISIDORO SARUA Y SALATBAT.

TEMPORARY PARISH HOUSE OF MEXICO, *December 10, 1902.*

[First indorsement.]

MANILA, *December 24, 1902.*

Respectfully returned to his excellency the apostolic delegate. The question of the ringing of the church bells at such an hour as 4 o'clock in the morning is a question largely within the control of the municipal council. I can not say on the face of things that the action of the council and the president in forbidding the ringing of the bells at 4 o'clock in the morning is such an abuse of power as to call for extraordinary intervention. It has been held that the ringing of church bells under certain circumstances could constitute a nuisance, and it must rest with the discretion of the municipal authorities to pass on such questions.

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 37.

APOSTOLIC DELEGATION, *February 5, 1903.*

DEAR MR. WINTHROP: The delegate has requested me to send you the inclosed letter from the parish priest of Guagua, asking you at the same time to kindly bring its contents to Governor Taft's notice. As you will see, it is apropos of a committee which has been formed to institute celebrations, etc., and invite Aglipay to them. The members of the said committee are all government officials or people in the employ of the same, thus infringing orders recently sent out by the governor to the various municipalities.

With kindest regards, believe me, very sincerely, yours,

M. J. O'CONNOR,  
*Private Secretary.*

MOST EXCELLENT AND REVEREND SEÑOR APOSTOLIC DELEGATE:

In compliance with my duty as parish priest of this pueblo of Guagua, province of La Pampanga, I have to inform you that a committee has been formed composed of Don Mariano Santos, Padre Reyes, Vicente Tagle, Hilario Bisda, and Fulgencio Francisco, for the purpose of inviting Señor Aglipay to the feast of the barrio of Santo Niño, of this parish, to say mass, preach, marry, baptize, and confirm in the said barrio next Sunday, the 8th instant.

Since these acts of a people in whom there exists but one faith and one religion can accomplish nothing less than discords, dissensions, and divisions, which easily degenerate into fatal collisions, which not only disturb public order, but also affect even the government itself, which is bound to watch over the peace of Catholic consciences; on account of the circumstances, serious in my opinion, that persons charged with official positions intervene as promoters, I deem it a conscientious duty for me to convey this information to you and keep you posted as to the occurrences at this place.

On Tuesday, the 27th of January last, when I had the honor to confer with you, during my absence, the Aglipayans posted several lampoons in this pueblo of Guagua in which they insulted me; and I send you one of these.

On Saturday, the 31st of the same month, the rumor was circulated in this pueblo that if I preached on the following day, Sunday, the Aglipayans would hiss me in the pulpit. I notified the municipal authorities of this, and through their mediation nothing happend.

The Aglipayan committee is composed of the following men: Señor Mariano Santos, municipal sanitary physician of this pueblo, first propagandist and president; Señor Pedro Reyes, collector of the provincial treasury of Pampanga; Señor Vicente Tagle, municipal secretary of this municipality, a most bitter Aglipayan; Señor Fulgencio Francisco, school teacher of this municipal government; Señor Hilario Bisda, a clerk of said municipality.

I beg that you will bring this to the notice of the first civil authority of these islands, in order that he may put an end to the misconduct of the Aglipayans, and above all of the employees who head this commotion against the Catholic and Apostolic Roman Church.

God preserve your reverence many years.

MAXIMO VIRON.

GUAGUA, *February 2, 1903.*

[Copy.]

**THE MOST WORTHY FATHER:**

In consequence of your sermon, preached on the 25th instant, you stated therein three errors which fall at the least blow, for they are not founded upon palpable reasons.

The preaching was thus:

Kings and emperors have sought to destroy the religion of Christ; they were unable to destroy it. Can it now be destroyed by Aglipay and his party? Can the blind free the blind?

Most worthy father, to the first error I have to answer: Kings and emperors could not destroy the religion of Christ, I agree, because it is the true religion. One truth can not be contrary to another truth; then we shall not destroy it.

Second error: Can it be destroyed by Aglipay and his party? Father, you have misunderstood us, because we and Father Aglipay do not prepare instruments to attack the religion of Christ, which is the true one, as I have stated before, nor do we desire that said religion be destroyed by us, for we are Christians; but, on the contrary, we seek means of purifying the religion of Christ, and to give the public the sight through glasses of the treasures of the Pope, acquired by bulls and indulgences and others which it takes time to enumerate. I believe, most worthy father, that the treasure of bulls and others are not merits of Christ, because Christ obtained the treasure through his sufferings and not through his merits; then merits are not treasure.

Third: The blind can not free the blind. In this case you are understood to mean that Father Aglipay and we are deprived of the faculties with which God endowed us. As a consequence it is shown that you are above the blind. Why do you not desire to free us from the claws of the Pope (by means of instruction), the cause of the grievous injuries to our country? And why do you, a Filipino from head to foot, our natural brother, defend with all your mantle the hypocrisies of the friar, all except Father Aglipay, when you can not affirm to me that the blind nor yourself \* \* \*.

Time will tell.

SNAG R. BUAN.

GUAGUA, *January 26, 1903.*

---

[A literal copy of the lampoon in Pampanga translated into Spanish and from that language into English.]

In answer to your talk, or sermon, this pueblo of Guagua has become perfectly acquainted with your true custom; to-day it has become convinced that until the

present you have been desirous of continuing the deceit and abuse of your fellow-man that you have learned from the friars. Ah, ill-thought man, how can you possess a conscience and continue to wish for those of your nation to remain in obscurity? Remember your soul; place your hand upon your breast and meditate upon your deeds, and it may be the Holy Spirit will enlighten your understanding and you will repent of your deeds; then will the hatred which this people feels toward you vanish, and you will not be cast out as were two friars who came here, so that you must remember the people do not love the partisans of the friars such as you, and will never accept these conscienceless persons.

The Catholics of the Independent Church.

[First indorsement.]

EXECUTIVE BUREAU,  
Manila, P. I., February 11, 1903.

Respectfully referred to the secretary of public instruction, inviting attention to the letter herein prepared, but which I am not certain of the wisdom of sending.

WM. H. TAFT.

The letter referred to is as follows:

MANILA, P. I., February 9, 1903.

Monseigneur GIAMBATISTA GUIDI,  
*Archbishop of Stauropoli and Apostolic  
Delegate to the Philippine Islands, Manila, P. I.*

YOUR EXCELLENCY: Mr. Winthrop has handed me a letter which your secretary, Father O'Connor, wrote him, inclosing a complaint from the parish priest of Guagua, Pampanga. The first complaint is that a committee has been formed to invite Señor Aglipay to the feast of the barrio of Santo Niño, of the parish of Guagua, to say mass, preach, marry, baptize, and confirm in said parish. Certainly, so far as the government is concerned, the organization of a committee to invite Señor Aglipay into the parish is not a matter of which any cognizance can be taken, whatever discord, dissensions, and divisions it may occasion.

Secondly, it is said that the Aglipayans have posted several lampoons in the pueblo of Guagua. I have examined the so-called lampoons, and from the statement they appear to be replies to certain arguments advanced by the priest in his pulpit against Señor Aglipay and the cause which he represents. I do not find any insult, in the sense in which that term is ordinarily used, to the priest. The priest can not expect to advance arguments or use strong expressions in his denunciation of the Aglipay movement without meeting on the part of those who sympathize with the movement counter expressions equally strong. I am sure that an American priest would not regard such a statement as this as any other than a natural outgrowth of a discussion, unpleasant it may be, but not calling for remedy by the police.

The next charge is that the rumor was circulated that if the priest preached on the following Sunday the Aglipayans would hiss him. In respect to this he said he notified the municipal authorities, and through their mediation nothing happened, which seems to indicate that the municipal authorities were alive to their duties and properly prevented a disturbance in the Roman Catholic Church which would have justified a public prosecution.

The next charge is that, upon the committee organized to invite Señor Aglipay into the parish, was a municipal sanitary physician, an employee of the provincial treasurer's office, the secretary of the municipality, a school teacher, and a clerk, and it is suggested that this infringed the orders sent out by me to the various municipalities. The order refers specifically to the governor and the municipal presidents of the province, in which a word of caution is given them not to make themselves so prominent in the movement on either side that charges may be made against them that they are using their official influence in favor of either the Roman Catholic Church or the Filipino. The letter expressly states that officers of the state, as individuals, may take an interest in religious controversies and may aid the churches of which they are members, as individuals. It is not understood that the committee are acting or threatening to act in any official capacity, nor is it apparent how these subordinate officials referred to are using their official authority to further the interests of the Aglipay movement. Neither the health officer, nor the secretary of the municipality, nor the school teacher, nor the clerks of the provincial treasurer, or the municipality have any official power which in the slightest degree affects the exercise of police authority in the municipality or in the province. The mere fact that they happen to hold municipal positions is no reason why they

should not take part, peaceably and properly and with due propriety, in a church movement which shall invite Señor Aglipay to organize his church in that vicinity.

I answer this letter with considerable detail, because I wish to avoid as far as I can a misunderstanding of the attitude of the government with respect to this schism and other religious movements. I am most anxious to cultivate the most friendly relations between the government and the authorities of the Roman Catholic Church; but, on the other hand, it is my duty to make it known that the mere fact that a religious movement is directed against the Roman Catholic Church and involves a schism in that church does not make what is done in support of that movement unlawful, and does not call for its condemnation by the government unless some civil law is violated. It does not violate the civil law for any official to take part in a religious movement. What was said in my letter to the governors was a mere friendly caution, as a matter of good policy, to avoid making themselves prominent, merely to escape charges that they were using their official authority in the interest of a particular church, but it must be observed that any support on their part of any religious movement does not become illegal unless it appears that in some way their official action is partial and unduly aids one religious faction as against another. Were a president to engage in this matter, in view of the fact that he might have to act as a police officer, I should use my discretion, but probably should caution him that he might put himself in a position where it would be difficult for him to act impartially; but the mere circumstance that subordinate officials have nothing to do with the police jurisdiction should take an interest in a religious movement does not call for a renewed warning, in my judgment.

Very respectfully, yours,

WM. H. TAFT, *Civil Governor.*

[Second indorsement.]

OFFICE OF THE SECRETARY OF PUBLIC INSTRUCTION,  
*Manila, March 5, 1903.*

Respectfully returned to the honorable the civil governor. I have carefully read the complaint in this case, and the only matter which appears to me to be a threatened violation of the law and of public peace or order which would justify executive interference is the threat of the Aglipayans to hiss the regular priest of the parish in the church. It seems, however, that the parish priest made his complaint in this matter to the municipal authorities, and that in consequence the threatened disturbance was not carried into effect. In the United States none of the matters set out in the letter of Reverend Father Maximo Viron would be at all considered as a justification for executive interference, except the one matter already mentioned of the threatened disturbance. No one can regret more than I do the intrusion of Aglipay and his schism into a situation already sufficiently complicated. I consider him to be a man absolutely destitute of all principle and an all-around bad man, with a shrewdness which enables him to just approach the border line of law and order without passing beyond it. Nevertheless, to say that the executive has the right and the authority to prevent him from entering a town, or to prohibit the people of a town, or officials, in their private capacity, from inviting him to visit them and enunciate his doctrines, if such they may be called, would be, to my mind, a most dangerous principle to establish either here or in the United States. Certainly such an interference by the Executive in the United States would not be tolerated even for the fraction of a second. Such executive interference exercised to-day against Aglipay might be exercised against the Catholic or some other religion to-morrow. I see no objection to the letter which you propose sending, inasmuch as it is a clear statement of principles well recognized in our country and which of necessity must be recognized in this. The above is in accordance with my views expressed to you verbally a few days ago.

JAMES F. SMITH,  
*Secretary of Public Instruction.*

EXHIBIT No. 38.

PROCLAMATION.

I have been informed of what happened at Silay on the 6th instant, on account of the presence of two friars in the pueblo, and, in order to avoid the repetition of such facts, which might have lamentable consequences and cause crooked interpretations, it is my duty to make a few recommendations which may guide the people in its future behavior.

Under the government established here by the United States, as Governor Taft has said so well, no minister of any religion can be molested or interfered with in the exercise of his ministry, provided he harms no one in his civil rights, such as the right of life or liberty, or of property, or in his rights as one of the public, and does not transgress the criminal laws. Any act which would interfere with the liberty of a minister of a religion, except in the above-mentioned cases, is against law and reason, and the more so since no pueblo is forced to accept a minister it does not want, the separation of church and state being complete, positive, and absolute.

Personal liberty is a principle admitted by all polished nations, and can be denied to nobody, without exception of classes or conditions.

Furthermore, the honorable acting civil governor has informed me, in a letter dated the 16th of May, that we will soon have the resolution of the problem of the friars, since Governor Taft is in Rome for the purpose of settling the question, among others. In the meantime you must avoid all acts or manifestations which can only cause a prejudice to all who take part in them, as it is an essential principle of the American Government that each one is free to worship God according to his own conscience, and that nobody can prevent him from so doing. If a person does not agree with the friars he has the remedy in his own hands and has only to refuse to contribute to their maintenance; but he can not prevent a friar from exercising his ministry, or other persons from accepting said ministry.

L. LOCSIN, Governor.

BACOLOD, July 9, 1902.

EXHIBIT No. 39.

MANILA, P. I., January 10, 1903.

Señor \_\_\_\_\_,  
Governor of the Province of \_\_\_\_\_.

MY DEAR SIR: The schism in the Roman Catholic Church and the establishment and organization of an Independent Filipino Church, because of the zeal and heat which frequently accompanies religious discussion, and especially because of the conflicting claims with respect to church property, may result in attempts at dispossession of those in charge of the churches and consequent disorder and disturbance of the peace. I have thought it necessary, therefore, to write you a letter calling your attention, and, through you, that of the municipal presidents to the functions which it is proper for civil executives to discharge in respect to religious controversies involving disputes over property. The policy of complete separation of church and state is enjoined upon those who serve under the American sovereignty. This does not mean that officers of the state, as individuals, may not attend church and may not take an interest in religious controversies and may not aid the churches of which they are members, but it does mean that no officer of the government has the right to use his official position or the authority which he exercises as an official to further the interests of the church of which he is a member as against the rights and privileges of other churches to which he may be opposed in his views. In these islands it is difficult for the man to separate himself from the office in the eyes of the people, and I therefore extend a word of caution to you and to the municipal presidents of your province against making yourselves so prominent in the religious controversies which I have referred to, on the one side or the other, that charges may be made against you that you are using your official influence and exercising your official authority in favor of either the Roman Catholic Church or the Filipino Catholic Church. You should, as far as possible, as an official, pursue a line of conduct absolutely impartial between the two conflicting parties, and you should only intervene as officials whenever the public peace is disturbed and must be restored and conserved. To deal justly with all individual interests should be the pride of every government, and the capacity of a people for self-government may be largely measured by the ability and courage of their elective officers to do justice in the face of clamor or passion or prejudice of some of those who elected them. No controversy so arouses the participants to passion and violence as that which grows out of religious differences, and if peace can be maintained where the people of a country divide under a new schism into two religious bodies without violence it speaks volumes for the law-abiding character of the people and for the capacity and ability of their self-chosen officers. I urge upon you, therefore, and upon the municipal presidents over whom you so worthily exercise supervisory and disciplinary authority, to use your every effort now and in the months to come to prevent the religious schism which exists in parts of the islands from resulting in any disturbance of the peace.

Again, let me call your attention to one phase of the schism which is most important, and that is as to the possession of churches and conventos. Executive officers

have no function whatever to perform in respect to the determination of the question who owns private property. The questions of ownership or title, and even the right of possession, are questions to be decided by courts, which are open to all parties in interest for the purpose of settling just such questions. The only function of the executive is to see to it that the peace is not disturbed by attempts on the part of one not in possession forcibly or by fraud to disturb another in the possession of property and to deprive him of it. Where, therefore, the priest or other representative of the Roman Catholic Church shall be in possession representing his church, it is not your function to decide that the people of the town, who, because they may have assisted in building the church, believe themselves to be the owners of the church, may oust him and let the priest of the Independent Filipino Church into possession. Whatever you may think of the merits of such a question, it is your duty to preserve the possession of the Roman Catholic priest or representative by arresting any person who attempts forcibly to dispossess him or actually succeeds in doing so and allow the priest or representative having had peaceable possession to resume it, but beyond this you can not go. Such rights as the people of a town may have to either ownership or possession of the church property must be asserted in the courts. They can not assert such rights by force. On the other hand, should a priest in possession leave the Roman Catholic communion, and, retaining possession of the church property, allow it to be used for the ceremonies and services of the Filipino church, it is not for you to decide that this is an unlawful act on his part and to seek to remedy it by dispossessing him of the church, because the change which is effected is not effected by a disturbance of the peace, and the remedy for the wrong done, if it be a wrong, can only be had in the courts organized to decide such questions. You must respect the person in peaceable possession, and you must protect him against dispossession, no matter how lawful or equitable in your opinion are the claims to the property on the part of the attempted dispossessor. If he has a lawful right he can have it vindicated in the court. He can not be permitted to take the law into his own hands. To allow him to do so would be to produce riot and confusion throughout these islands. The question is one of actual possession, not of constructive possession. Indeed, the question, so far as you and the presidentes are concerned, is really one not of possession at all, but of disturbance of the peace.

Should any priest or other person in charge of a church or convent notify a president that he has reasonable ground to suspect that an attempt will be made to dispossess him, the president should detail policemen to maintain him in his possession and prevent an assault or forcible dispossession. A failure on the part of the president to protect with energy peaceable possession of church property will be good cause for removal.

If the course which I have attempted to mark out for executive action be followed, the conflicting parties will be remitted to the courts to vindicate their rights, and the peace, which is so absolutely essential to the welfare of the country and to the conduct of decent government, will be fully preserved. With the confidence that you will observe the rules laid down in this letter and will see to it that your municipal presidents do the same thing, I beg to subscribe myself,

Your very obedient servant and wellwisher,

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 40.

MANILA, May 20, 1902.

Hon. LUKE E. WRIGHT, *Vice-Governor, Philippine Islands.*

MY DEAR GOVERNOR: I inclose herewith three orders issued by the municipal president of Bacolod, Negros Islands, which I think interfere unduly with the church of that town.

The right reverend bishop has requested me to call this matter to your attention, as he feels confident that you will not countenance any such interference with church affairs on the part of any civil official.

Regretting having to bother you with such matters, I remain, as ever,

Sincerely and respectfully, yours,

W. D. MCKINNON.

MUNICIPIO OF BACOLOD, NEGROS OCCIDENTAL, P. I.,  
PRESIDENT'S OFFICE.

SEÑOR MAURICIO FERRERO.

SIR: Consideration having been given to your petition of yesterday's date, in which you ask for "permission for passage through the principal streets of this town on

Holy Thursday, Good Friday, and Resurrection Sunday of the processions which from time immemorial it has been customary for the Catholic people to hold on the days indicated," the municipal council has resolved that since the said processions pass precisely through the principal streets of this town and the "processions which from time immemorial have been formed by the Catholic people" on Holy Thursday, Good Friday, and Resurrection Sunday are an outward manifestation of the faith, in which manifestations there are to be found, besides a compact multitude of people, many platforms carrying images of saints, which unquestionably are an obstacle and an impediment to the rapid transit of the non-Catholic people, who have an equal right to the use of the streets, the council, I repeat, bearing in mind this point, as well as the ordinance in regard to the use of the streets and squares, has unanimously resolved to deny the permission which you request.

The above is communicated to you for your information.

Yours, very respectfully,

J. V. L. GONZAGA,  
*Municipal President of Bacolod.*

---

MUNICIPIO OF BACOLOD, NEGROS OCCIDENTAL, P. I.,  
PRESIDENT'S OFFICE,  
*Bacolod, March 29, 1902.*

The CATHOLIC PARISH PRIEST OF BACOLOD.

SIR: I have the pleasure to transmit to you the resolution passed by the municipal board of health of this pueblo in regard to hygiene and health that you may duly comply with the same, it being as follows:

"1. That it is strictly prohibited to take corpses into the church, even in normal times, and the bodies of persons dying of contagious diseases, such as smallpox, measles, tuberculosis, and others, must be conveyed directly to the cemetery without passing through the depository for corpses.

"2. That the parish priest shall be obliged to furnish the church as soon as possible with 100 spittoons, conveniently distributed, so that persons attending the church may not spit on the floor. Each of these spittoons shall be filled up to one-third of its total capacity with quicklime or with a one per thousand solution of corrosive sublimate. Every morning, at the termination of the religious functions the floor of the church shall be mopped and the contents of the spittoons shall be discharged upon the beach and the spittoons washed with salt water. The parish priest shall also be compelled to keep clean the chapel used as a depository for corpses."

Respectfully, yours,

J. V. L. GONZAGA,  
*Municipal President Bacolod.*

---

MUNICIPIO OF BACOLOD, NEGROS OCCIDENTAL, P. I.,  
PRESIDENT'S OFFICE,  
*Bacolod, March 31, 1902.*

The CATHOLIC PARISH PRIEST OF BACOLOD.

SIR: You are informed by the present communication that the ordinance in regard to health and hygiene, of which you were apprised by my letter of the 29th instant, has been enacted because approved by the municipal council, and has the force of law after five days, counting from to-day, March 31, 1902, and a failure to comply with the provisions of said ordinance will be punished by a fine of 200 pesos or six months' imprisonment, or by both penalties, according to the circumstances which attend the infraction of the law.

Respectfully, yours,

J. V. L. GONZAGA,  
*Municipal President Bacolod.*

---

MANILA, P. I., May 26, 1902.

HON. LEANDRO LOCSIN,  
*Governor of Occidental Negros, Bacolod, P. I.*

SIR: I have the honor to send herewith a communication from the Rev. W. D. McKinnon inclosing copies, which no doubt are accurate, of certain ordinances enacted by the municipal council of Bacolod, of which complaint is made by the authorities of the Catholic Church.

Upon an examination of these ordinances I am impressed with the belief that they are objectionable and should be repealed. While municipal authorities have an undoubted right to regulate street processions when the object is to prevent obstruction and disorder, they have no right under this guise to prevent a church procession because either the religion or the priest is obnoxious to them. It is difficult to understand how a religious procession in the streets of Bacolod, conducted in the ordinary way, could to any appreciable degree interfere with the use of the streets for ordinary purposes. It is hardly to be doubted that the authors of this ordinance would themselves admit that its real purpose is as stated.

The second ordinance is equally objectionable in the extreme to which it goes. Undoubtedly municipal authorities have the right by proper ordinance to prevent the spread of contagious diseases, and might well provide that the bodies of persons dying of such diseases should not be taken into churches where large numbers of people are congregated, but it is not perceived upon what proper theory the municipality can forbid the taking of the bodies of any deceased persons into churches for funeral purposes. An ordinance so broad as this is calculated manifestly to interfere with the free exercise of religious observances.

Again, to require the parish priest to furnish his church with 100 spittoons, conveniently distributed, and requiring them to be filled with quicklime or other disinfectant solution, and that every morning their contents should be discharged upon the beach and the spittoons washed with salt water, is, to say the least of it, a most extraordinary ordinance, and one evidently directed against the priest and his congregation rather than for the purpose of protecting the public health.

On my last visit to Bacolod I was made aware of the feeling of a considerable portion of the people against certain Catholic priests then officiating in that city. It is to be hoped that the cause for this feeling will be speedily removed; and Governor Taft is now en route to Rome with a view, among other things, of accomplishing this end. Extreme action such as has been taken by the municipal council of Bacolod can only have the effect of embarrassing him in his efforts. Aside from this consideration, as I had the honor of explaining to the municipal authorities of Bacolod, it is a fundamental principle of American government that every man shall have the right to worship God according to the dictates of his own conscience, without interference from any source. Manifestly such legislation as the above does operate directly to interfere with the exercise of this right, and can not be justified or permitted. As I was careful to explain to the municipal authorities of Bacolod, under the existing régime no one can be compelled to contribute against his will to the support of any church; and if the Catholic priests now in charge in that city are objectionable to the people, they have the matter in their hands by refusing to contribute to their maintenance, but they can not, by legislation of the character referred to above, interfere with these priests in the exercise of their functions, or with such persons as choose freely to seek their ministrations.

Governor Taft some months since wrote a letter covering this general subject to the Hon. Wallis O. Clark, governor of the province of Tarlac, a copy of which I herewith inclose for your perusal. It is a clear and admirable statement of the relations between church and state, which makes further elaboration on my part unnecessary. I hope, therefore, that you will, upon receipt of this, call the attention of the municipal authorities of Bacolod to the objectionable nature of these ordinances and impress upon them the necessity of their immediate repeal. It is also my desire that you inform me of what action has been taken.

With sentiments of distinguished consideration, I have the honor to be,  
Very respectfully,

LUKE E. WRIGHT, *Acting Civil Governor.*

Official copy respectfully furnished, by direction of the acting civil governor, to the Rev. W. D. McKinnon, Manila, P. I., for his information.

A. W. FERGUSON, *Executive Secretary.*

OFFICE OF THE PROVINCIAL GOVERNOR OF OCCIDENTAL NEGROS,  
*Bacolod, Occidental Negros, June 28, 1902.*

CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS, *Manila, P. I.*

SIR: I have received your favor of May 26 last, together with a communication from Rev. W. D. McKinnon and copies of certain ordinances passed by the municipal council of Bacolod.

Pursuant to instructions contained in the last paragraph of the aforementioned letter, I remitted the same and the accompanying documents to the municipal president of Bacolod, besides having a talk with him.

Having brought the matter before the municipal council of Bacolod, the president returned the documents I had sent him, together with the answer of his council.

As you have expressed the desire to know what steps would be taken in the matter, I beg to remit you herewith the answer of the municipal council of Bacolod; I also inclose the communication of Rev. W. D. McKinnon and the copies of the ordinances.

Very respectfully,

L. LOCSIN RAMA,  
*Governor, Occidental Negros, P. I.*

---

MUNICIPALITY OF BACOLOD, *June 22, 1902.*

PROVINCIAL GOVERNOR OF OCCIDENTAL NEGROS, *Bacolod.*

SIR: The council has informed itself of the communication of the civil governor of the Philippine Islands relative to the complaint made by Father McKinnon with regard to several resolutions of this municipality, which bad faith and the inveterate habit of misinterpreting meanings have qualified as an interference with church affairs, thereby making the municipality of Bacolod appear before the superior authorities as an entity sowing discord, or, what is still worse, as an oppressor of legitimate rights.

This is not true, and this municipal council, convinced that it has acted lawfully, honorably, and justly, believes to be entitled to defend itself and to explain its conduct, expecting from the justice of the honorable the civil governor that he will not hurl an anathema at this council without first hearing it.

We will be brief with our explanation. Here it is:

The ordinance in regard to the use of the streets:

This ordinance has been passed with a view to regulate the use of the streets, and does not refer to any certain congregation, as certain persons have tried to make it appear, but applies alike to all public gatherings and processions, profane or religious, and the sole object of the council, which was acting in virtue of the authority conferred upon it by law, was to do what it said, to regulate the use of the streets and squares for the purpose of avoiding disorders and to procure that traffic be unobstructed in the streets. The ordinance simply requires a permit to be applied for, in order to enable the authorities in charge of the maintenance of public order to take the proper measures to avoid conflicts and disorders if the permit is given.

On a certain day the Catholic priest of Bacolod solicited permission to hold processions through the principal streets on Holy Thursday and Friday and on Easter Sunday, but the council disallowed his request, taking into consideration that these processions would doubtless obstruct the free circulation of the public in the streets, which are very narrow here, as the said processions move along in a compact mass, carrying with them numerous images on carts and platforms. If we should have to go back—God forbid—to the times of Spanish rule, when the state was intimately associated with the church and the latter was an omnipotent power in the Philippine Islands, a religious procession on Holy Thursday would have been perfectly in order in the streets of Bacolod, even if the latter would be narrower than they are, because the procession would move along undisturbedly, for the simple reason that nobody would dare to use either streets or squares while that manifestation of the Roman Catholic faith would be taking place.

But to-day, when, with the separation of church and state and with religious tolerance, the situation has undergone a thorough change and has made way to a respectable state of affairs, a procession like that requested by the Catholic priest, as they used to be held, would cause many objections on the part of non-Catholics and of Catholics considering processions through the streets as outward manifestations of the faith which might just as well take place within the church or in its front yard. These objections or protests might assume serious proportions at the present time when the animosity toward the friars is so marked, it being public and notorious that the majority of the people here were opposed to the friar coming to take charge of this parish, and there has been considerable excitement over it, as the civil governor was informed during his visit to this town. This feeling might easily have given rise to disorders, as the friar, who had arrived only recently, was to participate in the procession, and the council therefore tried to avoid such a possibility.

It appears from the communication of the civil governor that the ordinance passed by this municipality with regard to the use of the streets had been made for the sole object of prohibiting religious processions, while it refers to all and any gatherings or processions, whether of a profane or religious character, and was passed by this council in good faith and in the interest of the general public, whom it believed to serve.

Furthermore, when the aforementioned ordinance was passed the narrowness of the streets was principally taken into consideration. On this account the municipal council of Bacolod saw fit to regulate, and later on to prohibit, their being used for religious processions, which in the opinion of its members were liable to obstruct the rapid transit of the public. This opinion, which is equally rational and in harmony with the present state of affairs and not in opposition to law and justice, is corroborated by theory, or, better, by the opinion expressed by the illustrious Mr. Taft, who says in his letter to the governor of Tarlac: "The municipal council may also regulate or prohibit the use of the public streets for processions, whether religious or not, if in its judgment they obstruct the free circulation of the public in the streets."

To do the opposite, or, in more concrete terms, to grant the Catholic priest the permission to hold processions, would have caused many protests from persons who had to use the streets freely, or at least would have compelled the municipality to make a distinction in granting privileges, which is always and everywhere objectionable.

One must see, or rather have seen, what the Holy Week processions were like in Bacolod. If a person who has seen them would claim that they were not liable to obstruct the rapid transit in the streets, one may with right presume that that person does not know or understand what an obstruction of the streets means.

As one of the worthy members of the civil commission, Mr. Luzuriaga, is from Bacolod, we would appeal to his gentlemanly and truthful disposition and ask him to state whether or not the religious processions in Bacolod obstruct the free circulation of the public in the streets, if the honorable civil governor would have reasons for doubting the word of an honorable council.

The motives of the council in passing the ordinance above mentioned must not be attributed to bad will toward the priest, because nearly all the members of the municipality, being Catholics, would first consider, not the priest—that would be the least—but the religion which they profess, if their duties as councilors, representatives of the government, and therefore without official religion, would not oblige them to consider before and above anything the welfare of the community which they represent, which is composed not only of Catholics but also of people pertaining to other religious communities.

We believe that we have given a sufficient explanation of the conduct of the municipal council of Bacolod in the matter of the prohibition of processions as far as the use of the streets and squares of the town is concerned, and ask the civil governor, not seeing any transgression of the law or rights in the said ordinance, to consider it legitimate.

The ordinance relative to corpses and the hygiene of the church as a public building. This ordinance provides for:

1. The prohibition of the taking of corpses into the church.
2. The direct conveyance to the cemetery of the corpses of persons who have died from a contagious disease.
3. The cleaning up and placing in a sanitary condition of the church as a public building, ordering the administrator or owner of the establishment to provide cuspidors with disinfectants to destroy the microbes.

This ordinance was passed by the municipality, as they believed, in good faith, to contribute thereby toward the laudable object of protecting the public health. Furthermore, this provision was already made by the Spanish laws.

In fact, the sanitary laws issued by the Spanish Government, of which we beg to inclose a copy, prohibited absolutely the holding of burial services over the corpse within the church, and in the royal order of April 16, 1856, the Spanish sovereign said as follows:

"The depositing of corpses is permitted for the period advised by science and compatible with the public health in chapels independent of the churches in normal times, but not when there is any epidemic in the country, providing that these chapels be completely separated from the churches; that they be not habilitated for religious services, in order that not for this nor for any other reasons worshipers be allowed to enter them, and that the sanitary precautions in regard to ventilation and disinfection be strictly observed."

The order of the board of health to which we refer is therefore not new, but has had the effect of law before, with the only difference that in those times the priests did not pay any attention to the laws if it was not favorable to their interests to do so. Everybody knows how powerful the monastic orders used to be in the Philippine Islands.

Sanitary regulations have also been established relative to private dwellings, and if the orders of the board of health are obligatory for them there is no reason why public buildings and establishments frequented by many people should be exempt.

The sanitary regulations should even be stricter for them than for private dwellings, the number of persons assembling there being larger.

In compliance, at least apparently, with the orders of the Spanish authorities, the priest ordered a chapel built adjacent to the church, but separate from the same. As that order of the Spanish Government is still in force, the council being of this opinion for the reason that the ordinance objected to providence, and as in these times of epidemic the public health should be the principal consideration, disregarding all petty interests and monastic pride, what trouble would it be for the Catholic priest of Bacolod to hold the last rites over corpses in the chapel constructed for the purpose, instead of doing so within the church itself. Does he not receive the same fee?

However, these are only profane considerations. This council does not know what scientific considerations may have prompted the municipal board of health to issue ordinances which are now considered in opposition to religious rites. The sanitary regulations in force at the present time are made so oppressive by the circumstance that their whole weight falls naturally on the poor people and on their way of living, the more respectable the poorer they are, but not in religious rites. However, the poor people bear this burden with smiling faces, as the public health demands this sacrifice.

The same is the case with the cuspidors.

Orders have been issued that every public establishment be cleaned up and provided with cuspidors, but nobody has complained except the Catholic priest, who, by the way, used to keep his church in an extremely filthy condition before the ordinance referred to was issued. If no private dwelling, evangelic church, or public establishment is excused from the most rigid compliance with the sanitary ordinances, and all have to be kept clean within and without, no matter who are the inhabitants or owners, why should just the Catholic Church be exempt?

The foregoing considerations have induced this council to pass the sanitary ordinance in force in Bacolod. If, contrary to the opinion of the council, these ordinances should be deemed in opposition to the free exercise of religious rites, the fault of the council consists in its desire to protect thereby the public health, but it must never be said that these ordinances were directed only and exclusively against the friar and his congregation, although the friars deserve that laws be made against them which might wipe out forever in the Philippine Islands their footsteps soiled with blood and crime, because in its resolutions the council always considers the public best and does not care whether its ordinances meet with a good or bad reception with the people of the surplice.

The priest, Father McKinnon, who, by order of the bishop, filed a complaint with the civil governor regarding the ordinances of the municipality of Bacolod, told a falsehood when he qualified them as an interference with church affairs. It is evident that it would be an interference with church affairs to meddle with the inner workings, the discipline, rites or ceremonies of the church, but the municipality of Bacolod has not done this; it has simply passed ordinances with regard to hygiene and the use of the streets, and does not believe to have interfered with church affairs in doing so, unless the church is considered above all law and under the protection of the despised cloak of immunity as in times which have fortunately passed.

The municipal council believes that the foregoing is a truthful statement of its motives in connection with the public welfare which prompted it to pass the ordinances referred to. They were not promulgated—as certain persons have tried to make the superior authorities believe—with the sole object of bothering the friar, but have a general character and are obligatory for everybody.

Begging your pardon for these necessary remarks the municipal council of Bacolod closes this report, explanation of its conduct in passing the ordinances referred to.

For the municipal council of Bacolod:

J. V. L. GONZAGA,  
*President, Bacolod, P. I.*

MANILA, P. I., November 15, 1902.

Governor LEANDRO LOCSIN,  
*Governor of Occidental Negros, Bacolod, P. I.*

MY DEAR GOVERNOR: I find on my desk your letter of the 28th of June to the acting civil governor concerning a communication from the Rev. W. D. McKinnon, and copies of certain municipal ordinances passed by the municipal council of Bacolod interfering with church affairs.

Since this letter was written the Commission has taken action, and has remitted the parties to an appeal to the provincial board and subsequently, if bad faith can

be charged, to a resort to injunction before the courts. This relieves the chief executive of irregular action in the matter. I inclose a copy of the act, and when complaint is made to you concerning such matters it will call your attention to the proper course to be taken.

I have the honor to be, sincerely yours,

WM. H. TAFT,  
Civil Governor.

(It is not definitely indicated what this inclosure was, but it is presumed that it was Act No. 469, part of which is copied in Exhibit No. 34.)

EXHIBIT No. 41.

MANILA, P. I., *March 19, 1903.*

SEÑOR LEANDRO LOCSIN,  
*Governor of Occidental Negros, Bacolod, Negros.*

MY DEAR SIR: I beg to inclose to you a petition from Cenon Rosado and 51 others of Isabela, Negros, asking that there be a decree requiring the expulsion of Friar Malchior Ardanas on the ground that he is unwelcome to the people. I beg that you will explain to the petitioners that there is no power in the civil government to expel any minister of religion who does not desire to go. The question whether the people will attend church is a question they may settle. There is no compulsion that they shall receive ministrations from the friar or that they shall attend church where he performs his functions as a priest; but on the other hand, in a government where the state is completely separated from the church, as under the present Government of the United States, it is not possible for the United States to intervene in the Roman Catholic Church to say who its ministers shall be. Please explain this to the people.

I understand it to be the policy of the Roman Catholic Church not to have friars stationed in any pueblo where the Catholics of the pueblo do not desire a friar to be placed. Their petition, therefore, should be addressed to his excellency the apostolic delegate, and not to the civil authorities.

Very respectfully,

WM. H. TAFT,  
Civil Governor.

EXHIBIT No. 42.

MANILA, P. I., *July 23, 1903.*

HON. DEMETRIO LARENA,  
*Governor of Oriental Negros, Dumaguete.*

MY DEAR GOVERNOR: I beg herewith to inclose a copy of a report made to me by Grant T. Trent, supervisor of fiscals, in respect to the treatment of Claudio Argote, a Spanish friar and the secretary of the bishop of Jaro, in the town of Bais and in the town of Dumaguete, in your province, on the 2d and 3d of May of this year. The investigation and this report were made by my order after complaints had been filed by residents of Dumaguete in respect to the matter. From this report and the evidence taken by Mr. Trent, it appears that Mr. Argote was taking a vacation as secretary and was traveling for his health on a coastwise steamer which stopped at a number of towns in Oriental Negros; that when the steamer stopped at Bais he went ashore and called on the padre and also upon a Spanish friend, a Mr. Prast; that upon invitation he stayed at Mr. Prast's house; that certain brothers Villanueva, hacenderos of influence in the town of Bais, organized a mob for the purpose of driving Señor Argote out of Bais by force; that they presented a petition to the president requesting him to order Señor Argote to leave the town, and that the president was terrorized into making the request of Señor Argote on the ground that if he did not go violence would ensue; that some members of the mob were armed with revolvers and others with sticks; that many of them were drunk and that their appearance was most threatening; that Señor Argote had every reason to believe that unless he did leave the town he would be subjected to physical violence, and that it was only by reason of the threat of violence that he was induced to go. It further appears that the municipal president had only seven policemen, poorly armed, and it may be inferred from the circumstances that he sincerely believed that he had no power with the policemen to control the mob. He made, however, no effort to quiet the mob or to ascertain who were the leaders or to direct their arrest. He did not even leave his house. He does not seem to have been a party to the movement, and the only just criticism which can be made upon him is in his lack of courage in attempting to quell the riot and to prosecute those engaged in it. With respect to

him, therefore, it seems to me that charges should be filed against him for a failure of duty in at least attempting to quell the mob and taking active steps in the protection of Señor Argote.

With respect to the case at Dumaguete, the facts are much more serious. There, the facts as shown by the examination of Mr. Trent and his conclusions were that Señor Argote landed from the steamer at Dumaguete, went to the priest's house, and was invited by the priest to remain with him overnight until the steamer should depart; that about 9 o'clock the municipal president, Señor Melito Larena, with a crowd of one hundred people behind him, visited the convento and requested Señor Argote at once to leave the town; that this was in pursuance of a petition signed by one hundred people and that among the petitioners and among those in the crowd were the following persons: Ramon Cuadra, president of the municipal board of health of the pueblo or Bacon; Epifanio Montebon, deputy provincial treasurer; Federico Fernandez, clerk in the office of the provincial treasurer; Juan Saavedra, clerk of the court of first instance; Santiago Gonzalez, clerk in the office of the provincial governor; and Hermenegildo Villanueva, member of the board of tax revision. In the crowd there were 5 persons armed with revolvers, and 2 of these were Epifanio Montebon, deputy provincial treasurer, and Santiago Gonzalez, a clerk in the governor's office. J. S. Mohler, senior inspector of constabulary, was present in the town and knew that there was a plan on foot to drive the fraile out of town. He said that he started to ascertain the source of the plot and to arrest the parties instigating the same, but was unable to do so. It is very plain from this evidence, which was taken in a judicial way, that the municipal president violated his duty, violated the rights of Señor Argote, and was in fact a part of the mob; that the other officials named were engaged with him in the unlawful purpose, by threats of physical force, of expelling from town Señor Argote. The question whether the people desired to have as their spiritual advisers and ministers Spanish friars or not is not the question here presented. That is a matter for them to settle with the Roman Catholic Church, if they are members thereof. They are not obliged to attend a church in which a friar preaches. They are not obliged to have any relations whatever with the friar when he visits the town; but the friar is a Spanish subject and under the treaty of Paris entitled to be in these islands and pursue his lawful calling and to visit any part thereof without molestation, so long as he keeps within the law and violates the rights of no one. No official, insular, provincial, or municipal, and no citizen of these islands, has any right to interfere with his stay in any town which he may choose to visit. It is the duty of the insular government as much to protect him in those rights as it is for the Government to protect an American citizen or a citizen of the Philippine Islands in the enjoyment of the same rights. The honor of the American Government is involved in making good this obligation assumed under the treaty of Paris. Any other view can not for a moment be tolerated, in view of the principles which the American Government is pledged to carry out here, and it would be a fatal inconsistency were such a violation of personal rights as this to be winked at or passed over without the severest condemnation.

I am deeply regretful that this occurred in the province of Oriental Negros, especially in the town of Dumaguete, which has shown so much sympathy with American principles and so great a desire for progress in free government. Free government, however, is absolutely impossible if a majority of the people do not understand that the legal rights of the minority must be sacredly preserved. A tyranny by the majority and the disregard of the rights of the few by the majority may make much more of a despotism than the absolute rule of one man, if that rule is beneficent and just, and the capacity of a people for self-government is largely measured by the power of the majority to restrain itself in dealing with the rights of the minority.

For these reasons I must ask you to institute at once disciplinary measures with respect to the presidents of Bais and Dumaguete. You should begin by suspending them both and filing charges against them both. In the case of the president of Bais, the charge should be that he failed to make any effort to restrain the mob, and that he permitted himself to be used by the mob to accomplish its purpose of driving Señor Argote from Bais, in violation of his rights secured under the treaty of Paris.

Your charges against the president of Dumaguete should be that he took part in and assisted in a demonstration of force, in order unlawfully to expel from Dumaguete, by threat and duress, Señor Argote, a Spanish subject who had the right, under the treaty of Paris, to be in the town of Dumaguete and to be unmolested in his stay. You should also suspend Ramon Cuadra, president of the board of health of Bacon, for taking part in an unlawful riot, and an attempt by force and threat of violence to expel Señor Argote from the town of Dumaguete in violation of his rights under the treaty of Paris. You will also request the provincial treasurer to hear the charges against Epifanio Montebon, his deputy, and Federico Fernandez, a clerk in

his office, and take proper action. I must also ask you to hear the charges against Santiago Gonzalez, a clerk in your office, for being concerned in this matter, and take the proper action.

I have sent a letter to Juan Saavedra, clerk of the court of first instance, and to Hermenegildo Villanueva, member of the board of tax revision, inviting attention to the charges made against them by Mr. Trent, and advising them in preparing an answer that they can examine the evidence and the recommendations of Mr. Trent in the copy which I have sent to you. Will you be good enough to allow them to examine the copy sent you, and themselves to take a copy if they desire.

I shall send a copy of the report of Mr. Trent in Spanish as soon as it can be made, in addition to the English copy which I am inclosing herewith.

I have directed the attorney-general to take steps to prosecute the brothers Villanueva, and I have ordered the chief of constabulary to look into the conduct of Inspector Mohler to determine whether he was not derelict in his duty in not suppressing the lawlessness which ended in Señor Argote's forced withdrawal.

Very respectfully, yours,

WM. H. TAFT, *Civil Governor.*

#### EXHIBIT No. 42 A.

REPORT OF AN INVESTIGATION MADE BY THE PROVINCIAL BOARD, PROVINCE OF ORIENTAL NEGROS, IN RE THE EXPULSION OF A FRAILE FROM DUMAGUETE, ORIENTAL NEGROS.

THE PROVINCIAL GOVERNMENT OF ORIENTAL NEGROS,  
*Dumaguete, September 24, 1903.*

The Hon. W. H. TAFT,  
*Civil Governor, Manila.*

SIR: The following report is submitted in compliance with instructions contained in your letter to the provincial governor, dated July 23, 1903.

Meliton Larena was suspended from the office of presidente of the municipality of Dumaguete by the provincial governor, August 12, 1903. The provincial governor submitted to the provincial board charges that the said Meliton Larena, on the night of May 3, 1903, headed a mob of 100 people, and by means of threats and duress unlawfully expelled from the town of Dumaguete a Spanish subject, Señor Argote, in violation of the provisions of the treaty of Paris.

On the 17th day of August, 1903, at which time the case had been set for hearing, the presidente appeared before the provincial board and asked that the inquiry be postponed until August 20, 1903, in order to enable him to prepare his defense to the charges against him.

The case was taken up August 20, the time fixed, and the inquiry continued from day to day without any unnecessary delay until completed.

The board has given this inquiry the labor and care commensurate with its importance to the individual and the community.

The testimony was carefully translated and reduced to writing at the time, and in each and every case carefully read to the witness in the language in which it was given, before it was signed.

The testimony shows that Señor Argote, a friar, arrived in Dumaguete by the steamship *Ysabel* about 4 o'clock in the afternoon of Sunday, May 3, 1903, and disembarked and went to the convent where he was the guest of Gervasio Galopin, the resident priest.

At 6 o'clock the same evening a large procession, with floats bearing images, with bands of music, and the people singing songs, paraded the principal streets. The assistants or managers, it is not clear which, of this procession were Gervilano Mapeso, Gregorio Maputi, Saturino Maquiling, and Magno Generoso, all of whom are workers in the Roman Catholic Church, and were the signers of the telegram of complaint sent to Manila upon which this inquiry is based.

Soon after this procession completed its work, as the testimony shows, a procession of thirty or forty persons, with a band of music, started from near the cockpit in the north part of town, going south on the street which runs parallel with the convent and church on the south side of the plaza. This demonstration was organized by Benito Gallardo and Froilan Flores, as shown by the testimony, and was composed of members of or persons friendly to the Aglipay Church. A protest against the presence of the friar had been prepared and signed by many of the persons composing this assembly. It is not definitely known from the evidence how many names were signed to this paper or who they were, or its exact wording, as the paper seems to have been lost during the ex-parte examination of witnesses in this matter by Judge Trent. This procession marched to the residence of Meliton Larena, in the

south part of town, where the protest was presented to him. The testimony contains many conflicting statements as to the number of persons present at the residence of the presidente, as well as to his statements to the assemblage. It seems, however, fairly shown by the testimony, that there were about forty persons, excluding the band. There is no conflict in the testimony as to the fact that the presidente ordered the people to go to their homes and that he would take care of the friar. The crowd and band then left the residence of the presidente, as shown by the testimony, by the main and direct street leading to the north part of town, from whence the procession had originally started. This street passes immediately in front of the convent grounds and church. When the procession arrived in front of the main entrance to the convent grounds a halt was made and the crowd cried, "Long live Aglipay," and "Out with the fraile," and then moved on north and after passing the main business part of town, dispersed. The testimony is unanimous on the point that no threats were made against the friar or hostile demonstrations during the halt in the street in front of the convent grounds. It is also shown by the overwhelming preponderance of the testimony that the presidente did not head the procession when it left his house and did not accompany it to the convent. It shows he went to the convent and was met there by four members of the police force which he had sent for. He presented the protest of the people to the friar. It is also equally clear from the testimony that at the same time he assured the friar he would protect him and that was the reason he was there. He did not threaten the friar or coerce him. And when the friar announced his purpose to go aboard the boat accompanied and furnished him a guard to the boat. The priest, who is the best witness on this part of the subject of investigation, says: "There were no threats made against the friar. I do not think now, and did not then, that the friar was in any danger from violence or being interfered with in any manner."

There was no desire on the part of the friar, as the testimony shows, express or implied, or on the part of friends in his behalf, to remain, and he went on board the boat of his own volition, as is shown by the testimony of the resident priest.

The main question in this inquiry is conclusively settled by the testimony of the priest, who was present at the interview between the presidente and the friar, and is the only disinterested witness as to what actually occurred and what was said. He says the presidente was not accompanied "by a mob;" that he did not threaten the friar in any manner or order him to leave town; he acted like an educated gentleman.

The demonstration was a peaceable one and orderly, as is shown by the testimony of all the witnesses; free from any act of turbulence or violence; and as a body of marching people created no more, if as much, attention as the processions which from 7 to 9 o'clock almost nightly parade the principal streets of Dumaguete with lights and singing songs, and not infrequently with bands of music.

The testimony shows it was a very small demonstration, and at the time created no attention from the public generally. But it was the first public demonstration of the Aglipay Church and its friends in Dumaguete, and for that reason, and that alone, attracted the attention it would not otherwise have received.

The evidence is conclusive that there was no purpose or thought of interfering with a citizen and subject of the Spanish Government. It was a movement against the friar, not by any official, but by private and reputable citizens, organized and managed from its inception by the members of the Aglipay Church and the friends of the church, and to publicly demonstrate their adherence to the new church and the opposition to the presence of a friar, which is widespread and far reaching, and is not by any means confined to the members of the new church. The nationality of the friar was not known or spoken of by any man in the demonstration.

There were no arms or clubs carried by any person in the demonstration, as is shown by a preponderance of the testimony and the sworn statements of the men named as carrying revolvers.

The testimony shows there was nothing in the demonstration or the conduct of any man who took part in it to offend or insult the most sensitive Spanish citizen resident of or in Dumaguete, unless it be accepted that a demonstration of the members and friends of the Aglipay Church is an insult or offense to Spanish citizens; and that can not be accepted under the American Government, which guarantees religious freedom to all citizens. Neither will it do to admit that one class of citizens may peaceably and orderly parade the streets at will and deny the right to any and all other citizens. The first act of the American people after the adoption of the Constitution was to write in the organic law an amendment guaranteeing the right of the people to peaceably assemble and give expression to its will by petition.

This inquiry was originally instituted in response to a complaint sent by telegram from here. This action was right and proper and is not subject to criticism, but on the contrary is to be commended. This telegram was signed by four men, all

of whom are workers at the Catholic Church. It is disclosed by the evidence that not one of these men could write a telegram, and that a man of "much learning" was called to do the writing. It is also equally shown that none of these men knew the contents of the telegram signed and sent. They are all laboring men of less than average intelligence. One of the number pays no taxes, while the other three each pay a small amount; one of the number 56 or 57 cents, Mexican currency. Magno Generoso, who paid for the telegram, swears it cost over \$15, Mexican currency, and that he paid for it, but was to be reimbursed by payments and equally divided between all. Cervillano Mapeso swears he paid 1 peso. Gregorio Maputi swears the telegram cost \$15.62½, Mexican currency, and that he paid \$1.50, and was never asked to pay any more. Saturnino Maquiling swears he paid 60 cents for his share. This makes \$3.10 paid by three of the persons who signed the telegram, leaving \$12.52½ to be paid by Magno Generoso, who Cervillano Mapeso swears was "a kind of a leader."

The reasons for sending the telegram were about as conflicting as any of the testimony submitted by the board. Cervillano Mapeso says: "We were not mad, but were unwilling for that kind of a demonstration; that they did not mention in the telegram anything about the very large demonstration which paraded the streets at 6 o'clock the same evening; I do not think one procession has as much right to parade the streets as another."

Gregorio Maputi swears he signed the telegram sent to Manila, but did not put anything in it about the big demonstration at 6 o'clock the same evening because he thought that was "natural."

Saturnino Maquiling says he signed the telegram on account of the people in the demonstration crying, "Long live Aglipay!" and "Out with the friar!" "I have not sent a telegram to Manila about the nightly processions in the streets because it conforms to my will. And I did not refer to the large demonstration which paraded at 6 o'clock Sunday evening, May 3, 1903, because I don't think the procession which paraded about 9.30 o'clock the same evening had the same right to parade as the one at 6 o'clock."

All four of these men swear they never sent or received a telegram before this telegram was sent, and Bernabe Amor, who was called to write the telegram, says he "wrote something, but would not dare to call it a telegram; that he never saw a telegram, and calls the telegraph wires a telegram."

The next day, after testifying in this case that he "had no personal knowledge of such a telegram being sent," Antonio Oria informed a member of the provincial board that he had seen the telegram which was sent to Manila. The testimony shows that two of the witnesses, Antonio Oria and Macario Lezana, who testified in this case and also in the ex parte inquiry, swear they were in the shade when near the cockpit, and were near the door of the church while the procession was in front of the convent grounds. It will be observed that Gregorio Maputi swears that he entered the convent grounds in company with Cervillano Mapeso, Magno Generoso, and Saturnino Maquiling, and passed near the door of the church, but did not see Antonio Oria and Macario Lezana. To this extent it casts a doubt upon the statements made by them.

The progress of civil government in this province has been marked by its freedom from any turbulence and the enthusiasm by which it has been accepted by a large majority of the people. Nowhere has there been an organized movement against the government. Every law of the Commission and ordinance and regulation of the provincial government has been cordially accepted and enforced with fidelity on the part of the presidentes of all the municipalities, and in this the presidente of Dumaguete has been conspicuous for the promptness and vigor with which the laws have been enforced.

Meliton Larena has not only served the American cause in civil affairs, but was a soldier in the revolutionary period in this province and performed gallant and meritorious service in behalf of American supremacy, and as the executive of the municipality of Dumaguete has been honest, capable, and efficient. From the organization of civil government in this province he has been a conspicuous character in leading the people in the permanent establishment of a government "of the people, by the people, and for the people."

The question of protecting the rights of the minority from the arbitrary acts of the majority is not the overshadowing question determined by this inquiry, but it is a question of guaranteeing to the people the right to peaceably assemble regardless of their religious views. Behind all this lies local prejudices and long-standing bitterness engendered during and since the revolutionary period in this province, the latent fires of which have been smoldering and will continue to be a factor for years to come. Around this storm center has waged, in addition, the accumulated bitter-

ness on the part of many against the presence of the friars. This prejudice is not confined to church demonstrations, but is a factor in the politics of the province. In the effort to crush out a competing religious organization is being fought the preliminary contest of the December municipal elections by striking down the active progressive agents who have been most potent factors in effecting the permanency and stability which has marked the progress of civil government in more than two years of its history in which the municipal and provincial governments have been administering with even-handed justice for all and special privileges for none.

A careful examination of the testimony submitted herewith shows that the charges are not sustained by the evidence; the board, therefore, recommend that Meliton Larena be restored to the office of presidente of the municipality of Dumaguete from which he was suspended by the provincial governor August 12, 1903.

HENRY A. REED,  
*Provincial Supervisor-Treasurer.*

HENRY W. LANGHEIM,  
*President Provincial Board of Health.*

I was present at the examination of all the witnesses in this case but took no part in the proceedings. I concur in and approve the recommendation of the members of the provincial board in this report.

DEMETRIO LARENA,  
*Provincial Governor.*

UNITED STATES OF AMERICA, PHILIPPINE ISLANDS,  
*Province of Oriental Negros.*

I, José A. Erquiaga, provincial interpreter and translator, province of Oriental Negros, do solemnly swear that I will faithfully, accurately, and honestly, translate the testimony given before the provincial board in the case of the trial of Meliton Larena, presidente of the municipality of Dumaguete on the charge of misconduct in office, he having been suspended from office by the provincial governor August 12, 1903, and all papers, letters, and telegrams and records pertaining to the trial of said case. That I will not disclose the testimony or any part of it to any person, or the contents of any letter, or any part of it, to any person, or the contents of any letter, telegram, official record or paper, submitted to or referred to by the provincial board, whether admitted as evidence or not, or read or referred for information, or any telegram, letter, or paper received by said board or any member of it, or sent by the board or any member of it. That I will not talk with any person not a member of said board about the testimony or any matters pertaining to this inquiry. So help me God.

JOSÉ A. ERQUIAGA.

Sworn to and subscribed before me this 15th day of September, 1903.

[SEAL.]

JUAN MONTENEGRO,  
*Provincial Secretary.*

OFFICE OF THE PROVINCIAL GOVERNOR, ORIENTAL NEGROS,  
*Dumaguete, P. I., August 12, 1903.*

*To the Provincial Board, Province of Oriental Negros.*

GENTLEMEN: I have the honor to submit herewith charges against Meliton Larena, presidente of the municipality of Dumaguete, province of Oriental Negros, for misconduct in office:

That the said Meliton Larena, presidente of the municipality of Dumaguete, province of Oriental Negros, did, on the night of the 3d day of May, 1903, in charge of a mob consisting of about one hundred people, unlawfully expel from this locality by means of threats and duress the Spanish subject, Mr. Argote, who, by the way, had landed from the steamer *Isabel* to stay in the convent overnight, compelling him to embark that same night. Under the treaty of Paris said Mr. Argote had perfect right to be unmolested during his stay here.

DEMETRIO LARENA,  
*Provincial Governor.*

DUMAGUETE, ORIENTAL NEGROS, *September 15, 1903.*

In the matter of Meliton Larena, Presidente municipality of Dumaguete.

At this time come the members of the provincial board of the province of Oriental Negros in special session for the purpose of hearing the testimony in the case of

Meliton Larena, for misconduct in the office of presidente of the municipality of Dumaguete, who was, on the 12th day of August, 1903, suspended from said office by the provincial governor.

The provincial governor was present but did not take part in the proceedings of the board, he being legally disqualified by reason of the fact that Meliton Larena is his brother.

José A. Erquiaga, provincial translator and interpreter, filed his oath as translator.

The said Meliton Larena, being present, the following charges filed by the provincial governor, dated the 24th day of August, 1903, were read to him and in his hearing:

"Meliton Larena, presidente of Dumaguete, is accused that in the night of the 3d day of May last, in charge of a mob consisting of about one hundred people, unlawfully expelled from this locality by means of threat and duress, the Spanish subject, Mr. Argote, who by the way, had landed from the steamer *Isabel* to stay in the convent overnight, compelling him to embark that same night. Under the treaty of Paris, said Mr. Argote has perfect right to be unmolested during his stay here."

To all of which said charges the said Meliton Larena pleaded not guilty. Thereupon the said Meliton Larena, being duly sworn according to law, declared as follows in his own behalf:

"My name is Meliton Larena; I am 53 years of age; my residence is Dumaguete, and I am a farmer. I resided in Dumaguete since the year 1876. I have been presidente of the municipality of Dumaguete nearly four years. On Sunday May 3, I left my house at about 6 o'clock and went out into one of the adjacent barrios, returning in about one hour. As I came back the people were talking some about a fraile being in town, having arrived by the boat *Isabel*. When I arrived near the municipality, I met Laureano Flores, vice-president of this municipality; I inquired of him if he knew anything about the presence of a fraile, and he said that he did not. I was inspector of customs at that time and went to my house and sent for Augustin Apostol, my clerk, and asked him if there was a fraile in the list of passengers of the *Isabel*, which had arrived some time during the day; the clerk informed me that there was no fraile among the list of passengers. I then sent the clerk to the office to bring me the list. He brought the list and I examined it, but did not find the name of the fraile. It was developed later, however, that the fraile was in the list of passengers, but I did not know the name of the fraile. I then concluded that the people were mistaken, told my clerk to go home, and sat down to dinner with Mr. Greer in my house. After dinner I heard the band playing. It did not seem to be on the "playa," as was usual on Sunday evenings, but from another direction. After dinner I was resting with Mr. Greer, at my house, until some time near 10 o'clock, when the band came to my house, accompanied by about 200 men. They stopped in front of my house and presented me with a petition signed by a large number of persons. The paper was a protest against the presence of a fraile in town and said the fraile was not wanted. They desired me to have him leave town in the most legal way. The crowd were crying "Long live Aglipay!" "We do not want friars!" They were not drunk, and I did not see any of them who was under the influence of intoxicants. They were not armed, and I did not see any man with arms. It was not an assemblage of irresponsible parties, but was pacific in its tone and attitude, and was composed of good citizens, many of whom occupied prominent positions in social and business lines, and taken altogether it was an assemblage of representative citizens of the town of Dumaguete. I do not remember the names of the persons who signed the petition, and the paper is not in my possession, and I don't know where it is. I gave it to Mr. Trent and he did not return it to me. When this petition was presented to me I hurriedly read it, and told the people I thought they were mistaken and that there was no fraile in town. The people insisted that there was a fraile then at the convent. I then told them to go to their homes and I would settle the question with the fraile. The crowd then left my house, as did also the band, and went west. I supposed the crowd were going to their homes, as I had ordered them. I could hear the band playing after it left my house. I sent for the police force, and went out from my house to the convent. The police arrived at the convent at the same time as I. I went to the convent alone, and the band and the crowd did not accompany me or follow me. There was no crowd or any person around the convent when I arrived. The door was closed, and there was no guard in or about the convent. I knocked at the door and it was opened, and I went upstairs, where I found Friar Claudio Argote and Padre Gervasio Gallofin. I went to the convent to comply with the promise I had made to the people to settle the fraile question and to show the fraile the petition and advise him of the action of the people. The fraile read the petition

and then said: "What do you say to that?" I replied: "It is up to you; you have a better judgment than I." After thinking a long time the fraile said: "Aren't we, the strangers, protected under the American law?" I told him yes, and that my purpose there was to advise him of what the people have done in their protest and to learn his decision. About this time the band and a crowd of people passed the street in front of the convent. The band was playing and the crowd cried: "Long live Aglipay!" "We don't want frailes!" The streets along which the band and the crowd passed is about 80 yards from the convent door. I did not see the crowd, as I was then talking with the fraile. About this time the fraile told me to send two policemen to advise the crowd to go to their homes, as he would embark. I sent the police to inform the crowd of the fraile's decision. When the band ceased playing the fraile asked me who would be responsible for his getting aboard of the boat. I told him I would. When he got ready I went with him to the boat, taking along with me four policemen. When I went down the stairs of the convent there were three or four soldiers of the constabulary force on duty at the wall inclosing the convent ground. There was no crowd at the beach when we arrived there. A small squad of constabulary soldiers were near there, but I did not know whether they were on duty or not. I was not in charge of a mob in the night of May 3, 1903, neither was I controlled by a mob that night, and my action was not influenced by a mob. I did not expel the fraile from the municipality of Dumaguete, and did not threaten him with violence or in any manner, and did not compel him to embark on board of a boat that night. I had a police force with me to protect the fraile when I went to the convent, and so informed him. He went on board of the boat that night of his own free will. I performed some military services in making civil government possible in this province. On the 27th day of July, 1899, I was besieged by an armed force of "babylaners" in the town of Siaton, which threatened to reach this capital, when I was then military chief of that section, maintaining the integrity of the sovereignty of the United States, and assisted next day by the regular force under the command of Lieutenant Edwards.

MELITON LARENA.

Rev. Father Gervasio Gallofin was produced, sworn, and declared as follows:

My name is Gervasio Gallofin, my age is 43 years, and I am the priest in charge of the church at Dumaguete. Between 9 and 10 o'clock at night, Sunday, May 3, Meliton Larena, presidente, came to the convent and inquired if there was a fraile there; I told him the secretary to the bishop, a fraile, was there, and that he had come to bring the "holy oil." This conversation took place at the head of the stairway, where I met the presidente; the fraile was then in the "sala." The presidente told me he had come on account of the demonstration of the people; that he had a protest on the part of the people who did not want the fraile to stay in town. He told me he should not have come out from his house at this time, but on account of the protest of the people it was his duty to do so. I did not read the protest, but took the presidente into the "sala" where he met the fraile about the center of the room. Both men saluted each other and the presidente stated that he had come in the name of the people, and handed the fraile the protest; I do not remember whether the fraile read it or not. After the fraile was convinced of the reasons of the presidente, he asked whether he would be abused or not; the presidente replied that that was the reason he came, and that he would be responsible for any abuse made to him; he said he would protect him against anyone interfering with him. The presidente came to my house alone, but in two or three minutes after his arrival I noticed some of the police force were there, two or three of them coming near where we were talking and into the parlor after we went in. This was between half past 9 and 10 o'clock. The fraile left the convent in company with the presidente and I supposed went on board of the boat, as that was where he said he was going. I do not think any people came inside the wall inclosing the convent grounds; there was no hollowing or loud noise that I heard; the band was playing, but there was no noise such as throwing stones. After the presidente and fraile left the convent I closed the building and heard no demonstration, before that time or afterwards, that night, except the band playing. I think the fraile went on board of the boat as a result of the conference with the presidente; I do not think now, and did not then, that the fraile was in any danger from violence or being interfered with in any manner. I did not hear any threats made against the fraile by the crowd if there was one, or by any person. The presidente was not accompanied by a mob or any person, except as I have stated, when he came to the convent. The presidente did not threaten the fraile in any manner or order him to leave town; he acted like an educated gentleman.

GERVASIO GALLOFIN.

SEPTEMBER 16, 1903.

James W. Greer, on being sworn, declared:

My name is James W. Greer, my age is 34 years, my residence is Dumaguete, and I am coast district inspector of customs. I have been a resident of Dumaguete since the 29th of April, 1903. I was at the residence of Meliton Larena, municipal presidente, on the night of May 3, 1903, as I was then taking my meals at his house. About 6 o'clock, the presidente and I started out for a walk about the town; among other places we went to the "playa." We returned to the house about half past 7 o'clock, and at about 8 o'clock we had our dinner. About the time we completed it, though we were still at the table, I heard the band playing, which stopped in front of the house. I was in the room and did not go to the door. The band played a while and I heard some one hollow "Long live Aglipay!" The presidente went to the window, but I stayed back in the room. After the band quit playing I asked the presidente, "What does this mean?" "What is it?" I don't remember the words of his reply, but I think it was to the effect that it was a matter of no importance, and I did not go to the window to see; I thought at the time that it was some people out for a good time. The presidente said something to the crowd, but it was in Bisayan and I don't know what it was. The crowd went away after that; I don't think they were there more than five minutes, possibly ten. I do not know where they went, as I went to bed after they left. I did not hear or see anything more of it that night. The presidente had not left the house when I went to bed, and I don't know anything about whether he went out or not. At that time I did not know there was a fraile in town. It was not a noisy crowd and the only thing I heard was the band playing and what I have stated before. I have no idea of how many people were in the crowd, and there was nothing to indicate that it was a mob. If I had thought that it was a mob, I would have gone to the window to see what was going on.

JAMES W. GREER.

Ramón Cuadra, being duly sworn, declared:

My name is Ramón Cuadra, my age is 29 years, my residence is Dumaguete, and I am a clerk in the coast district inspector of customs office. I am a member of the Aglipay movement and hold my membership with the congregation at Bacong, where I was employed until the last day of May; my residence was here during the time; I went to Bacong every morning, returning in the evening. I am secretary of the board of the congregation of Bacong. There is an organization of the Aglipay Church here, though I never attended its meetings. I have heard that there are over twenty members here. Benito Gallardo was one, Zacarías Alo; I do not remember any other at this moment. I have personal knowledge of a meeting of citizens of Dumaguete on the night of May 3 by being a member of this meeting. I do not know who notified me of the meeting; the purpose was to let the fraile know that we were adherents of the Aglipay Church. At the time of the assemblage of this people we knew there was a fraile in town, and that he was then in the convent. It was not the purpose of this demonstration to interfere with the Spanish subject, as we did not know the nationality of the man; but the demonstration was against the fraile as a fraile, and not against him as a man and citizen of Spain. The presidente had no knowledge of this meeting of citizens, and did not assist in the movement in any manner. I do not think there were more than twenty persons in this assemblage besides the band. I saw and signed a petition requesting the presidente in a legal way to let the fraile know of our adherence to the Aglipay Church rather than to the Roman Catholic Church and our dissatisfaction at the presence of the fraile in town. I did not go upstairs at the presidente's house, and don't know who gave the petition to the presidente. The presidente told us to go home and he would take care to state the petition to the fraile. We then left the house of the presidente and went home. There were no arms in the crowd and no sticks other than such as are carried on ordinary occasions by a man when walking. There were no stones or clubs thrown at or in the direction of the convent, and no threats against anyone. The crowd was composed of good people, and it was a peaceful demonstration and there was no disorder. All the persons in the crowd were adherents of the Aglipay Church. I mean that the people in the demonstration were all members of the Aglipay Church or sympathizers with the movement. The presidente was not at any time and he is not now a member of the Aglipay organization, to my knowledge.

RAMÓN CUADRA.

Augustín Apostol, on being duly sworn, declared:

My name is Augustín Apostol, my age is 35 years, my residence is Dumaguete, and I am a clerk in the office of the coast district inspector of customs. I went to the house of the presidente about 7 or half past 7 o'clock on Sunday night, May 3, 1903,

in response to an order from the presidente who was then the collector of customs. The presidente inquired of me if, in the list of passengers by the steamer *Isabel*, there was a fraile; I told him no; he told me then to go to the office and bring him the list. I went and got the list and gave it to the presidente; he examined it and said the people were mistaken about there being a fraile among the passengers. I then left the residence of the presidente, took the list back to the office, and went to my home; I did not see or hear any demonstration of people that night.

AUGUSTÍN APOSTOL.

SEPTEMBER 17, 1903.

Zacarias Alo, being duly sworn, declared:

My name is Zacarias Alo, my age is 36 years, my residence is Dumaguete, and I am a merchant. I have been a resident of Dumaguete about five years. I am a member of the Aglipay Church, which was organized at Dumaguete about eight months ago. I am the representative of the committee to organize in Dumaguete. There are many members of the church in Dumaguete and have been since its organization; I can name some of them, but not all. Among those who are members I remember the names of Claro de León, Filemon Mercado, Andrés Cortez, Generoso Apostol; that is all I remember now. Melitón Larena is not now, and never was, a member of this church. I remember the fact of a demonstration on the night of May 3, 1903, but I do not know who organized it, and did not see anything of it, as I was confined to my house on account of illness at the time. Next morning I learned from talking with some of the members of the Aglipay Church that it was a peaceful demonstration, the purpose of which was to show the fraile that he was not wanted here on account of former events. The demonstration, as I learned, was not against this man as a Spanish subject or as a man, but against him as a Friar. There was nothing said about him as a subject of Spain, and all the people knew was that he was a fraile. I have never heard that there was any throwing of stones at or in the direction of the convent, or any hostile demonstration on the part of the people at the time; it was stated and understood to be a peaceful protest against the presence of a fraile, and the crowd, as I was informed next morning, had no arms.

ZACARIAS ALO.

Antonio Oria, being duly sworn, declared:

My name is Antonio Oria, my age is 29 years, my residence is Dumaguete, and I am a farmer. I was born in Dumaguete, and this town has been my home all my life. About half past 7 o'clock on Sunday evening I was walking in the playa in the Paseo Rizal and heard a rumor that a hostile demonstration was being organized against the friar then in town. This was the first that I heard of the presence of the fraile. I do not remember who told me about this matter. In view of these rumors, myself and Macario Lezana went to the vicinity of the cockpit, stopping about 30 meters from the cockpit to one side of the street, so that we were concealed from public view, but had a good view of the crowd which was assembled in the street. It was a clear, bright, moonlight night, and I could distinguish the number of persons and the names of three. There were eight persons in all, three of whom were Froilán Flores, Ramón Cuadra, and Hermenegildo Villanueva. I do not know the names of the other five. I could not hear the conversation of the persons, if any, but the three persons I have named had revolvers; the others did not. We remained about two or three minutes and then continued our walk, but I don't remember whether we went back to the beach or went to the store. About 8 o'clock I went to my house and took supper, after which, at about 9 o'clock, I came out and went to the store of Pedro Teves, where I had agreed to meet Macario Lezana. We had agreed to meet at this place to take a walk and see if the rumors he had heard were being carried out. Macario Lezana and myself went from the store to the main door of the church. We went there for curiosity and not for the purpose of being present at any demonstration. We took a position beside the door of the church, close to the wall, so as to be concealed by the shade, and remained there until the fraile left the convent. No one was with us. We did not have any arm, and I don't remember whether Macario Lezana had a cane or not. It is a custom to carry a cane. There was no other person concealed or stationed in or about the church or convent grounds, to my knowledge. About half past 9 o'clock the band, accompanied by about forty persons, came from the residence of the presidente, and when they arrived in front of the convent stopped for four or five minutes. The band ceased playing and the crowd cried: "Long live Aglipay!" "Out with the fraile!" After this the presidente came out of the crowd with five policemen, went to the door of the convent, which was closed, and knocked

on it two or three times, saying: "Justicia" (justice). The door was opened and the presidente and the police force entered the building. I do not know what occurred inside the building. The band and the crowd remained until the presidente came out with the police and accompanied by the fraile. The presidente and fraile went toward the beach and the band and crowd went on north. I did not see any stones, missiles, or clubs thrown at or in the direction of the church or the convent, and there were no threats of violence uttered by the crowd or any member of it toward the fraile or any other person. Froilán Flores, Epifanio Montebón, Ramón Cuadra, Hermenegildo Villanueva, and Juan Saavedra carried revolvers. I did not see any other arm in the crowd, though some carried canes. The barrels of the revolvers protruded below the coat of the persons who had them. The revolvers were not carried in the hands of the men or in any way except as I have stated. About ten of the crowd whom I knew were representative citizens of Dumaguete, and others I think the laboring classes, and about ten of the number were children. Eight or ten of the crowd came inside the wall inclosing the convent grounds, but did not go near the church or convent. The demonstration was not against the man as a subject of Spain or as a man, but against the fraile; nothing was said about his being a subject of the Spanish Government. I do not think the fact that the man was a subject of the Spanish Government, if he was one, had anything to do whatever with the demonstration. As a matter of fact I do not know who organized the demonstration, but from seeing Froilán Flores, Ramón Cuadra, and Hermenegildo Villanueva I thought they organized the demonstration. Froilán Flores is not and was not then in the employ of the provincial government, Mr. Hermenegildo Villanueva was vice-president of the municipality of Bais, and Ramón Cuadra was then president of the municipal board of health of Bacong. I do not remember to have stated that ten or twelve of the crowd carried revolvers, but if I did make such a statement it was a mistake, and I am satisfied that not more than five carried revolvers. While the crowd was in front of the convent I was at the door of the church, which is about 45 or 50 meters distant. I am fully convinced that I saw revolvers on the persons that I have named, as the moon was shining very bright and the revolvers were in holsters.

After hearing my testimony read, I desire to say that I do not mean that any of the crowd were representative citizens, and where it is recorded that the presidente took with him five policemen it should have been written four, as that was the correct number.

I do not know whether the crowd was composed of members of the Aglipay church or not, but suppose they were, by their cheering him. I regarded the demonstration a peaceful one, as there were no violent acts on the part of anyone, but as the result was in the expulsion of a stranger from town the demonstration could not be a legal one. It is only a presumption on my part that the demonstration expelled the fraile from town, as I have no personal knowledge of the matter. I did not confer with the civil authorities of the municipality or the provincial government that night or at any time about the demonstration. I did not think I had authority to determine whether the demonstration was legal, illegal, or a peaceable one, is the reason I did not apply to the provincial governor. I did not then and have not since presented the matter to the provincial governor, or any provincial or municipal officer; neither did I present that matter that night or at any other time to any military officer, and I did not then and have not since presented the matter to any insular officer. I did not write a letter or send a telegram to the civil governor at Manila in regard to the demonstration, and I did not sign a telegram to be sent to the civil governor at Manila, and I have no personal knowledge of such telegram being sent. If the people knew that the fraile was a Spaniard then the demonstration was offensive to Spanish citizens, but if they did not know it at the time it could not be offensive to the Spanish citizens of the town, though they should have supposed that he was a Spaniard, because there are no other frailes of different nationality in the islands. The demonstration here took place on Sunday night, May 3, 1903. While I was standing at the church door some four or five persons came inside the convent grounds, standing in front of the bell tower; they did not have any part in the demonstration and were doing nothing that I saw. I think they were laboring people and went there out of curiosity. I am a citizen of the Philippine Islands.

ANTONIO ORIA.

SEPTEMBER 18, 1903.

Macario Lezana, being duly sworn, declared :

My name is Macario Lezana; my age is 28 years; my residence is Dumaguete, and I am a farmer. I was born and reared in Dumaguete. On Sunday night, May 3, 1903, I was walking on the playa with Antonio Oria when I heard some one passing

talking about a demonstration, and that people were then assembling at the cockpit for that purpose; we went there by way of San Jose street, stopping at one side of the street in the shade of a small house about 30 meters from the cockpit. We saw about eight men, three of whom we recognized, and who were Froilán Flores, Ramón Cuadra, and Hermenegildo Villanueva. They were talking in the street; we could distinguish them very readily because it was a moonlight night, but could not hear what was said. Some of them were walking back and forth in the street. The three persons I have named had revolvers which I could recognize by the bulk on their hips and see the revolvers protruding from under their coats; the revolvers were in holsters, and protruded about 2 inches below their coats. That is all we saw there; we remained about two or three minutes, and then separated and went to our homes to dine, agreeing, however, to meet at the store of Pedro Teves after supper and take a walk. We met at Pedro Teves's store about fifteen minutes after 9 o'clock. I found Antonio Oria awaiting me; he was in the store with Pedro Teves, one door being open. There was no light in the store, but there was one in the back room; there was no other person there. We met at the store because we wanted Pedro Teves to go with us, but he would not. We went immediately to the main door of the church, where we remained; being behind the columns in front of the door, we were concealed from public view. We went there out of curiosity and to see if the demonstration we heard of was carried out; I was carrying a cane which I always carry, but we had no arms. No one directed us to go to the church and take station there. The demonstration I had heard talked of was being organized against the fraile who had arrived in town. There was nothing said about an organization against the Spanish subject, but nothing else was talked of except the fraile. I had returned from Iloilo on the boat by which this fraile came, and we arrived here about 4 o'clock. I do not know the purpose of the fraile's visit here. A few minutes after we took station at the church door the band and about thirty or forty persons came from the direction of the residence of the presidente and stopped at the street in front of the convent, but four or five came inside the convent grounds. The band ceased playing and the crowd crying "Long live Aglipay!" "Out with the friar!" About this time the presidente and four policemen came out of the crowd and through the main entrance of the convent grounds, and went to the convent door and knocked on it saying "justicia" (justice); the door was opened, and the presidente and the police went inside. The presidente and the police could not get into the convent ground by the main entrance without coming through the crowd. The crowd and the band remained there four or five minutes, when the presidente and four policemen and the fraile came out of the convent and went in the direction of the beach, passing in front of the band and the crowd in the street. As the presidente and the fraile passed the crowd it cried "Long live Aglipay!" "Out with the friar!" The band then began to play and all moved off toward the north, and I saw nothing more of the demonstration that night. It was a peaceable demonstration. I did not see or hear of any stones, missiles, clubs, or anything else being thrown at or against the convent or church, or to any person. Juan Saavedra, Ramón Cuadra, Hermenegildo Villanueva, Epifanio Montebón, and Froilán Flores had revolvers in holsters which protruded from under their coats, and some of the others were carrying canes. I have no personal knowledge, but from the action of the crowd I think it was composed of members of the Aglipay church. So far as I know no one saw and recognized us while we were behind the pillars in front of the church door. We did not leave our place of concealment until the people had all gone, and then we went to our homes. It was about half past 9 o'clock when the crowd in the street in front of the convent grounds left.

MACARIO LEZANA.

Juan Saavedra, being duly sworn, declared:

My name is Juan Saavedra; my age is 46 years; my residence is Dumaguete, and I am the clerk of the court of first instance. On Sunday night, May 3, 1903, I was in my house, when close to 9 o'clock I heard the band playing, and thinking it was a procession of the Holy Cross of May I went out and came up with it near in front of the residence of the provincial supervisor, on the east side of the plaza. I found from forty to sixty persons, including the band, in the street going south. I was informed they were going to the residence of the presidente to present to him a petition showing our dissatisfaction of the presence of the fraile in Dumaguete and our sympathy with the Aglipay movement. I signed the petition. We went to the presidente's house and presented him with the petition. He read it and told us to go home and he would confer with the fraile. The crowd then left the presidente's by way of the main street leading from his house north, and we arrived in front of the convent in the street; we stopped about one minute and gave out the cry,

"We don't want frailes," "Long live Aglipay," and then went on and dispersed to our homes. It was about 9.30 or 9.40 p. m. when the crowd dispersed. I did not have a revolver and did not see one in the crowd; there was no occasion for revolvers, as the demonstration was a peaceful one. I saw Froilán Flores, Ramón Cuadra, Hermenegildo Villanueva, Epifanio Montebón, and Santiago Gonzales; none of these persons had revolvers, and to my knowledge Gonzales does not own a revolver. There were no stones, missiles, clubs, or anything else thrown at or in the direction of the convent, church, or grounds, or at or in the direction of any person. There was no threat of violence against the fraile or any person. Many of the crowd were men who would not be guilty of any such thing and would not have permitted it had any attempt been made. The demonstration was against the fraile and not against him as a man or as a subject of the Government of Spain; no nationality was thought of in the matter. There was nothing in the demonstration intended or which could be construed to be offensive to Spanish citizens residents of Dumaguete. It was solely against the fraile as a fraile. The presidente did not go with the crowd from his house to the place where it stopped in front of the convent grounds; when we left his house he remained inside. I do not remember to have seen any person go inside the convent grounds. The presidente and the fraile did not come out of the convent grounds and pass in front of the crowd and go in the direction of the "playa" while the crowd was halted in front of the convent grounds. I did not see the presidente after the crowd left his residence, and he did not go to the convent while the crowd was halted in front of the grounds. I was not a member of the demonstration, but accompanied it at a short distance behind, but I had a full knowledge of what transpired from the time I came up with it until it dispersed and went home.

JUAN SAAVEDRA.

Santiago Gonzales, being duly sworn, declared:

My name is Santiago Gonzales; my age is 44 years; my residence is Dumaguete, and I have until a few days ago been a clerk in the office of the division superintendent of schools. I came to Dumaguete January 15, 1903, as a clerk in the census bureau; I lived in Bais prior to that time. I am the secretary of the committee of the Aglipay Church at Bais, and I never moved my membership to Dumaguete. On Sunday night, May 3, 1903, in company with Hermenegildo Villanueva I took supper with Juan Montenegro, at his house; while at supper we heard the band playing, and after completing supper Hermenegildo Villanueva left the house to ascertain what was the occasion of the band playing, and as he did not return I sent my son to ascertain what it was for. He returned and told me it was some people going with the band in the direction of the church; I went out with my son immediately and came up with the crowd in front of the convent, in the street. I think there were about forty persons in this crowd, as my son told me; my sight is so deficient at night that I do not go out without some one to lead me. I had nothing whatever to do with the demonstration, but signed the protest in the street near the bell tower. I could not distinguish who gave it to me, but on reading the heading I saw it was for a good purpose and I signed it. The crowd stopped in the street in front of the convent, and the band ceased playing just the sufficient time for the crowd to cry "Long live Aglipay!" "We don't want friars!" and then the band began to play and all went off north, and I returned to my house. I did not have a revolver, and did not then own one. I only heard two cheerings as I have named. There were no clubs, stones, or missiles, or anything else thrown at or in the direction of the convent or church, or any other direction, and there were no threats of violence or any other kind made against the fraile or any other person. The demonstration was not against the fraile as a man or subject of the Government of Spain, but solely against him as a friar and as a member of a corporation of frailes. There was absolutely nothing at all in the demonstration to be offensive or an insult to Spanish citizens of Dumaguete, and nothing of the kind was thought of or spoken of. I did not see the presidente that night, and my son told me he was not in the crowd.

SANTIAGO GONZALES.

Pedro Teves, being duly sworn, declared:

My name is Pedro Teves; my age is 34 years; my residence is Dumaguete, and I am a merchant. About 9 o'clock Sunday night, May 3, 1903, Antonio Orio and Macario Lezana came to my store, Antonio Orio arriving first. They wanted me to go with them in front of the convent to see if the demonstration against the fraile was carried out. I did not go with them because I was going to my brother-in-law's, Ramón Pastor, for supper. I closed my store, and went to bed early that night, and

was called by Antonio Orio. I thought it was a moonlight night, but after examining the calendar I find I was mistaken; but there was light enough to see a man's face when I opened the door, but I do not know whether that came from the lamp in the street a short distance from my store. After Orio and Macario left the store I went to the residence of Ramón Pastor, some distance west, and remained there until after 10 o'clock, when I returned to my store to go to bed. I did not see the demonstration, but heard some noise which was so far away that I could not distinguish what it was. While the calendar shows that it was not a moonlight night, I think it was.

PEDRO TEVES, M.

SEPTEMBER 19, 1903.

Hermenegildo Villanueva, being duly sworn, declared:

My name is Hermenegildo Villanueva; my age is 27 years; my residence is Bais, and I am a farmer. I was in Dumaguete Sunday night, May 3, 1903; about half past 6 I left my house for a walk in the playa, and about fifteen minutes later went to the residence of Juan Montenegro and took supper by previous invitation. I arrived at Mr. Montenegro's house about 7 o'clock, and remained there until about half past 8 when we took supper, after which I went out, having heard the band playing in the northern part of the town while we were still drinking coffee. The music created some wonder between us, Santiago Gonzales being present also at supper. I left the house in the first place because it was time for me to return to my house, and the second consideration was to satisfy my curiosity over the band playing; it was then about a quarter of 9 o'clock. I went in the direction of the house where I was stopping and crossed the "plaza" diagonally from the southwest to the northeast corner. When I arrived near the house of the fiscal, which is in the northeast corner of the plaza, I met about forty or forty-five persons, including the band which was playing. I asked what they were there for, and Benito Gallardo, if I am not mistaken, answered it was a mere demonstration to show their sympathy with the new Filipino independent church on account of the presence of a friar in town. In view of the fact that it was a peaceful demonstration, and which purpose was only to show their sympathy to the new Filipino independent church, and their dissatisfaction on account of the friar, I had no objection to follow them behind. The demonstration went on south along the street on which the "gobierno" (government building) is situated to the residence of the presidente, situated a little southeast of the provincial government building. When I arrived opposite the government building a paper was handed to me, but I do not know by whom. I went to the door of the government building and read it by the light of a lantern, and on seeing that it was to be presented to the presidente, and that the contents of the petition did not contain anything in conflict with the present constitution, nor to public order, but it was a mere statement showing our dissatisfaction on account of the presence of the fraile, I signed it. When the demonstration arrived at the residence of the presidente, I was some distance apart from the crowd; I saw a man with the paper go up stairs in the house of Melitón Larena, then presidente. About six or eight minutes after the man went upstairs the presidente came to the window and told the people to go home, and he would have an interview with the fraile. The presidente did not say that he would make the fraile leave town, or that he would take his police force and take him out of town. I did not go inside the house of the presidente, but remained downstairs. I don't know the name of the man who went upstairs; it was impossible for me to distinguish him in the crowd, because I was some distance away, about 7 or 8 meters. The crowd and the band then left the presidente's house for the business part of the town, passing directly in front of the convent grounds. The presidente's house is situated on Rizal street, south of the convent. I remember that the band and the crowd stopped in the street in front of the convent grounds just long enough for the crowd to cry "Long live Aglipay!" "We don't want friars!" but that was not over one minute, and then went on north, and at the Escolta I left it, as I remembered I had to go to Mr. Alo's house, and that was the last I saw of it. When the demonstration left the residence of the presidente he was upstairs standing at the window; he did not accompany it to the convent, and was not with the crowd in front of the convent grounds and did not go inside the convent grounds while it was there. The presidente did not come out of the convent grounds with four policemen and the fraile while the crowd was in front of the convent grounds and passed in front of or through the crowd and go in the direction of the beach. The crowd did not stop long enough as the presidente was at his house when it left. I did not see any stone, missiles, clubs or anything else thrown at or in the direction of the convent or church, or at or in the direction of any person. I did not hear any threats of violence to the fraile or any other person. The demonstration was against the fraile as a fraile, and

not against him as a man or subject of the Government of Spain, as his nationality was not known or talked of. The demonstration was not intended and did nothing to offend or insult Spanish residents of Dumaguete, as they only cried "Long live Aglipay!" "We don't want friars!" None of the crowd went inside the convent grounds. I did not see any person in the crowd who had a revolver; I did not have a revolver. I did not aid or assist or have anything to do with organizing the demonstration. I was not at or near the cockpit or in the street in front of it, at any time in the afternoon or night on that day. I do not remember whether it was moonlight or not, but if it was it was cloudy, as I could not distinguish a man at a short distance from me.

HERMENEGILDO VILLANUEVA.

SEPTEMBER 21, 1903.

Froilán Flores, being duly sworn, declared:

My name is Froilán Flores, my age is 27 years, my residence is Dumaguete, and I am a farmer. I have not been in the employ of the provincial government or held any official employment under the civil government of the province of Oriental Negros since about January, 1902. On Sunday night, May 3, 1903, myself and Juan Fulvayre were walking on the beach, and in continuing our walk about 8 o'clock went to the house of Benito Gallardo over the post-office at the escolta. When we arrived there, Mr. Gallardo showed us a petition protesting against the presence of a fraile, which I read and found that it contained nothing against the law and was only to avoid the presence of the fraile. I signed the petition and so did Mr. Fulvayre. Mr. Fulvayre's residence is in the barrio of Tinaugan, town of Majuyod, about 55 kilometers from Dumaguete. Myself, Fulvayre, and Gallardo left the house and went north on the street passing the cockpit. When near the front of the cockpit we met Marcelo Enriquez, of Dauin, and five or six musicians whose names I do not know. We remained there about ten minutes and then started to the residence of the presidente, in the south part of town, for the purpose of giving him the petition. When we left the front of the cockpit the crowd consisted of the persons I have named and some children. I can not remember how many there were in the crowd at the time we got to the presidente's, but there were probably about thirty in all, as others had joined it on the way. The demonstration was organized by Benito Gallardo, whose present residence I do not know, and I assisted him. No person connected with the civil government of the province of Oriental Negros was present at the cockpit at the time the demonstration was organized, or had anything to do with organizing it, to my knowledge. I was with the demonstration from the time it started until it dispersed. The presidente told us at his house to go home and he would take care of conferring with the fraile. The crowd then left the house of the presidente and went north on Rizal street, which is the direct street leading from the house of the presidente to the escolta in the main business part of the town, and when it arrived in front of the convent grounds stopped about one minute, the band ceased playing and the crowd cried, "We don't want friars!" "Long live Aglipay!" and then went on, and when we got to the escolta dispersed. When the crowd halted in front of the convent grounds it did not cry to the fraile to come out of the convent or they would come and take him out, or any words of that kind. The sole exclamation was as I have stated. The crowd did not at any time or place call to the fraile to come out of the convent or it would come and take him out, and no such language was uttered by any member of the demonstration at any time or place. The presidente was not with the crowd when it halted in front of the convent grounds, and did not come out of the convent with four policemen, or any number and the fraile, and passed in front of the crowd or through it and go in the direction of the beach. When the crowd was halted in front of the convent grounds I saw José Vizmanos and Andrés Cortes on the outside of the fence inclosing the convent grounds. These men had not been with the demonstration before that, and I think did not go away when we left. I did not see any person inside the convent grounds, or at or near the convent, or the door to the church. I did not have a revolver and did not see one in the crowd. I think the moon had been shining, but it was dark when we left the house of the presidente.

FROILÁN FLORES.

Saturnino Maquiling, being duly sworn, declared:

My name is Saturnino Maquiling, my age is 39 years, my residence is Dumaguete, and I am a laborer. I had no employment between the 3d and the 10th day of May, 1903. I saw the demonstration Sunday night, May 3, 1903. At about half past 9 o'clock I was returning from the house of Ponciano Distrito, and when I arrived opposite the convent grounds there was a demonstration of people there who remained

two or three minutes and then all went north. All they did was to cry out "Long live Aglipay!" "Out with the fraile!" and "Abajo con el convento!" The demonstration had already gone north when the presidente arrived at the convent with four policemen and went upstairs in the building, and that was the last I saw of the presidente, as I went on home. I did not see the fraile that night. The convent door was open when the presidente arrived at the convent. On the 6th day of May, myself, Gregorio Maputi, Cervillano Mapeso, and Magno Generoso, and Bernabé Amor were at my house when Bernabé Amor wrote a telegram, which was in Visayan, to be sent to the civil governor, which the first four named signed. I don't remember what was in the telegram, except that we stated that us four had nothing to do with the demonstration. The telegram was prepared at my suggestion and written by Bernabé Amor, who is very learned. I do not know how much the telegram cost, but I gave 60 cents, which is all I paid, and I do not owe anything on the cost of my share of the cost for sending the telegram. I do not know who furnished the balance of the money to pay for the telegram. I do not know how much each of the other three men who signed it paid toward the expense of the telegram, and I have never been asked to pay any more than the 60 cents. I do not know what was done with the telegram after we signed it. I got an answer from Manila to the telegram we sent, but I don't know when it was. It was in English. I gave it to Magno Generoso and never saw it afterwards. I sent the telegram to Manila on account of the people in the demonstration crying, "Long live Aglipay!" "Out with the fraile!" There was no disturbance other than this. There are processions in the streets every night now. I have not sent a telegram to Manila about this, because it conforms to my will. About 6 o'clock Sunday evening, May 3, a very large demonstration or procession, carrying torches and images and singing songs and with the band of music, passed through the principal streets of town, but I did not refer to it in my telegram to Manila, because I don't think the procession which paraded the streets about half past 9 o'clock have the same right to parade as the one at 6 o'clock. I paid over five pesos land tax on property, which belongs to myself and brothers jointly, for 1902.

SATURNINO MAQUILING.

Magno Generoso, being duly sworn, declared:

My name is Magno Generoso, my age is 33 years, my residence is Dumaguete, and I am a laborer, but have no regular employment. However, I have an agreement with Antonio Oria and Chino "Chiquito," both agents of different firms, to unload boats arriving here. On Sunday night, May 3, 1903, I had been to a prayer meeting in the house of Ponciano Distrito, called the Chapel of the Holy Cross, and as I returned home I saw a demonstration of people going from the residence of the presidente on the street leading north, and when it arrived at the convent grounds it stopped and cried "Long live Aglipay!" "Out with the friar!" and then they continued walking toward the north. I did not hear the crowd or any person in it call to the fraile to come out of the convent or they would come to take him out. No stones or anything else were thrown in the direction of the convent. Juan Saavedra, Hermenegildo Villanueva, Epifanio Montebón, Ramón Cuadra, and Froilán Flores had revolvers. I was on the inside of convent wall, inclosing the grounds while the crowd passed along the street in front; it was a moonlight night. I was about 3 "brazas" distant from them; the revolvers were worn on the left side in holsters and protruded from the width of one finger to that of two fingers. It was between 9 and 10 o'clock. I saw the presidente; he accompanied the crowd from his house and when it halted he went to the convent. The crowd had gone on north and there was nobody there then but the presidente and four policemen. The presidente remained in the convent a short while—I can not say how long—and then came out accompanied by the fraile and went toward the beach, and that was the last I saw of him that night. About three or four days after this demonstration I agreed with Cervillano Mapeso, Gregorio Maputi, and Saturnino Maquiling, all of whom are cousins of mine, to send a telegram to the civil governor in reference to this matter. We met at the house of Saturnino Maquiling and Bernabé Amor wrote the telegram. It has been so long, I have forgotten what was in the telegram. I read the telegram before I signed it; it was written in Visayan. We took it to Antonio Oria to be translated into Spanish, but not to send it. I then took the telegram to the telegraph operator to be sent to Manila. Antonio Oria translated it into Spanish, and it was sent in Spanish. I paid for it, but do not remember how much. Each one of the four furnished the money. There were but four names signed to the telegram. No one except those whose names are signed to the telegram suggested that a telegram should be sent to Manila about the demonstration; we did not show the telegram to anybody except to Oria. I remember that I took two copies of the same telegram to the telegraph office, one of which was in Spanish and the other in English. I do not know who Mr. Oria had

to translate the telegram. I do not remember what was in the telegram, but I do remember that we stated in the telegram that we were not in the demonstration. Antonio Oria gave two copies, one in Spanish and one in English, of the same telegram and said, Here is the Spanish translation, and in order that the operator may understand it better, I have had a copy made in English; the English copy was sent and I don't know what I did with the Spanish copy. This conversation occurred in the house of Antonio Oria and no one was present but us two. Mr. Oria did not give me the money to pay for the telegram or tell me how much it would cost; I remember now I paid over fifteen pesos. I paid the cost of the telegram out of my own money, but the other three had agreed to pay their part, but the payment has never been made to me in full. All that has been paid was by Saturnino Maquiling \$2 (pesos) and Cervillano \$1 (peso), and Gregorio had paid something which I don't remember how much. I had not been working for anybody on the day I sent the telegram or for several days previous to that time. My wife died on the 1st day of May, and this cost me nearly all the money I had, except over \$20 which I had left; the burial of my wife cost me \$33, the coffin costing \$2 and the church fees \$31. I own a small tract of land on which the taxes last year were less than 1 peso, and I had to pay cedula tax. We did not send a telegram to anybody except the civil governor about this demonstration. I got an answer to this telegram, but I haven't it with me. I never sent or signed any other telegram in my life, and never received one except the one we received in answer to the telegram sent by us. This telegram which I received was in English. I took this telegram to Antonio Oria and asked him to have it translated into Visayan and Spanish. I can read Spanish some. I was in the house of Saturnino Maquiling when I received the telegram; it was in the daytime, but I don't remember the hour. The telegram was brought to me by a messenger from the telegraph office. I did not state to anybody at any time that the crowd while stopping in front of the convent or any member of it called to the fraile to come down; that if he did not come down they would take him out. Aside from the cry "Out with the fraile!" "Long live Alipay!" it was a quite peaceable and orderly crowd. I did not see the presidente in the convent that night, but saw him entering the building.

MAGNO GENEROSO.

SEPTEMBER 22, 1903.

Gregorio Maputi, being duly sworn, declared:

My name is Gregorio Maputi, my age is 39 years, my residence is Dumaguete, and I am a tailor. On Sunday night, May 3, 1903, myself, Cervillano Mapeso, Saturnino Maquiling, and Magno Generoso were passing through the convent grounds going to our home from the house of Ponciano Distrito. We entered from the south entrance, which is at the side of the church, and went around the church, passing very near the church door, and stopped in the grounds a short distance from the wall. There was no person at or near the church door, or behind or near the pillars of the front of the church, and there was no one else within the convent grounds. This was close to 10 o'clock. We stopped five or six minutes. There were over thirty persons and the band in the street. The band stopped playing and I only heard the people cry, "Long live Alipay!" "Out with the fraile!" As soon as this cry was made the people went on north. They cried this many times and stopped four or five minutes. As soon as the crowd went on I saw the presidente separating from them; that is the first I had seen of the presidente. The presidente and four policemen went to the convent and in the building; the door was open. I did not see the presidente in the convent. The next we saw of the presidente he was accompanied by the fraile and the four policemen and going toward the beach. We were all four together and had gone but a short distance from the convent grounds when the presidente passed toward the beach. The band and the people had all gone when the presidente came out of the convent. When the crowd was near the convent grounds or halted in front of the convent there were no threats of violence against the fraile or that it would take him out of the convent. There were no clubs or stones or anything else thrown at or in the direction of the convent. I did not see Antonio Oria or Macario Lezana at or about the door of the church or in or about the convent grounds that night. The demonstration was noisy but not disorderly. This demonstration was more noisy than the large demonstration or procession which had paraded the main streets of Dumaguete with music, lights, and images, and in which the people were singing songs, about 6 o'clock of the same evening. I signed a telegram which was sent to Manila about this demonstration; I did know something of what was in it at the time, but I have forgotten now. I did not put anything in the telegram about the big procession at 6 o'clock the same evening, because I thought that was natural. All four of us took part in the procession at 6 o'clock, because we are assistants in the church.

I did not talk to anybody except those who had signed it, about the telegram. Magno Generoso paid for the telegram, as he had some money of his own; I don't know who gave it to him; he sometimes goes to the cockpit and wins some money. I think the telegram cost \$15.62½. I have no account, but I think I have paid Magno \$1.50 on account of the cost of this telegram. I do not pay any taxes except the cedula tax, as I have no real estate. Five of the crowd had revolvers and some had canes. Ramón Cuadra, Hermenegildo Villanueva, Epifanio Montebón, Froilán Flores, and Juan Saavedra had revolvers. I saw the bulk of the revolvers and the ends protruding; they were worn on the right side. We were walking slowly, and at the distance of 6 brazas we could distinguish the revolvers, which were in holsters, some of which were black and some brown.

GREGORIO MAPUTI.

Bernabé Amor, being duly sworn, declared:

My name is Bernabé Amor, my age is 59 years, my residence is Dumaguete, and I have no business but in seasons buying and selling cotton and teach children how to make pottery. I do not have a patente for selling cotton, because I only had 50 cents to buy it. I do not remember that I wrote a telegram for anybody about the 8th or 9th of May, 1903, or at any time. I never saw a telegram; I call the telegraph wires a telegram. I never received a message which came over the telegraph lines or saw one, and I never wrote one to anybody to be sent over the telegraph lines. I was at the house of Saturnino Maquiling some day in the month of May, when Magno Generoso, Gregorio Maputi, Cervillano Mapeso, and Saturnino Maquiling were present. I did some writing at their dictation, but would not dare to call it a telegram, as I do not know what a telegram is. I have forgotten what I wrote about. We had met at this house to decorate an image for the church and there was no one present except those I have named. I do not know what I was writing about, who signed it after I got done, or what was done with it. I did not talk with anybody else about this writing and no one else talked to me about it.

BERNABÉ AMOR.

Cervillano Mapeso, being duly sworn, declared:

My name is Cervillano Mapeso, my age is 33 years, my residence is Dumaguete, and I am a tailor. About half past 9 o'clock Sunday night, May 3, 1903, I was returning to my home from the house of Ponciano Distrito, and went into the convent grounds by way of the south opening in the fence, and then passed east to the front of the church and the convent, 4 or 5 brazas from the door of the church at the front, and then went on to my home. I did not see any person about the front door of the church, or behind or near the pillars in front of the church door, or anywhere else in the convent grounds. I saw the band and a crowd of people going from the residence of Melitón Larena north on the street passing the convent. When the crowd arrived in front of the convent a stop was made just long enough for the crowd to cry, "Long live Aglipay!" "Out with the fraile!" and then it went on north and I did not see anything more of it. The cry from the crowd I have named was all that was made by it, or any member of it. When the crowd stopped I saw the presidente and four policemen; he passed through the crowd and went to the convent and went in the building. I do not know whether the door was open or not. The crowd was moving north and leaving the street in front of the convent grounds when I first saw the presidente. I did not see the presidente in the convent building, but after that I was at the northeast corner of the plaza, near the house of the fiscal, and saw the presidente and four policemen, with the friar, pass and go toward the beach. At that time the band and the demonstration had gone far away from the convent grounds. It was a peaceful demonstration; they were just walking. While the crowd was halted in front of the convent grounds there was no cry to the fraile that if he did not come down they would take him out, nor was such a cry made at any other time or place. Epifanio Montebón, Ramón Cuadra, Froilán Flores, Hermenegildo Villanueva, and Juan Saavedra had revolvers. I could see the revolvers by the bulk and the end shining. Our kind of a leader, Saturnino Maquiling, told us that we would do something to send to Manila. We were discussing the matter about sending a telegram on account of a crowd crying, "Long live Aglipay!" "Out with the fraile!" We were not mad, but were unwilling for that kind of demonstration. We did not say anything about a very large demonstration or procession with lights, music, images, and in which the people were singing songs, which paraded the principal streets of Dumaguete at about 6 o'clock of the same evening. I do not think one procession has as much right to parade the street as another. At the house of Saturnino Maquiling, myself, Magno Generoso, and Gregorio Maputi met by agreement, and Bernabé Amor wrote the telegram for us. We

all four signed it, but I don't know what was done with it, as it was given to Magno Generoso. We told him to pay for it and we would pay him. I paid 1 peso and was never called on to pay any more. I have forgotten what was in the telegram. I paid in land taxes for the year 1902, 56 or 57 cents, Mexican currency.

CERVILLANO MAPESO.

SEPTEMBER 23, 1903.

Tomás Suarez, being duly sworn, declared:

My name is Tomás Suarez, my age is 32 years, and I am a corporal in the Philippine Constabulary force, stationed at Dumaguete. On Sunday night, May 3, 1903, I was on duty in the street in front of the convent, having with me two soldiers. I went on duty between 7 and 8 o'clock and returned from that post about fifteen minutes before 10. When we arrived in front of the convent grounds there were a few people just on the inside of the fence inclosing the convent grounds. I did not know the names of any of them; they remained about fifteen minutes and went away. What I mean to say is that there were many people there with the band. They shouted twice only, "Long live Aglipay!" "Out with the fraile!" and then left, going north. The crowd did not say—or any member of it—for the fraile to come out of the convent, or it would go and take him out. It was an orderly crowd. I saw two stones thrown in the direction of the convent, but did not reach the convent. I did not see the persons who threw the stones. My instructions were to go there and remain until 10 o'clock, and if there were any persons with arms to stop them and examine them, and to tell them in a good way, without forcing them, to go to the quarters, and if they refused I was to go and report it to the commanding officer. There were no arms on the persons in front of the convent and none of them carried arms. The presidente was not there, and I did not see him while the crowd was in front of the convent grounds. At about 9 o'clock the presidente, with four soldiers, came from toward the north, going south, and passed the convent, but did not go inside the grounds or convent, and I don't know where he went. The crowd had then all gone away from the street in front of the convent. The crowd and the band which I found in front of the convent grounds when I went there did not return, or any part of it. I did not see the presidente that night with the band and the crowd in front of the convent grounds, or at any place with the crowd. When the crowd passed, myself and the two soldiers were under a tree, near the bell tower, which is south of the entrance to the convent grounds. I did not state to any person, at any time, that I saw one man, or five men, in the demonstration who had or carried revolvers. I did not go near the entrance to the convent grounds, and was some distance from where the crowd was. I did not hear the presidente, while the crowd was in front of the convent, tell the people to go to their homes, and I did not tell any person, at any time or place, that I heard the presidente make such statement. I did not state to any person, at any time or place, that when the crowd was going toward the convent the presidente was with them.

TOMÁS SUAREZ.

Federico Fernandez, being duly sworn, declared:

My name is Federico Fernandez; my age is 28 years; my residence is Dumaguete, and I am a clerk in the office of the provincial treasurer. I did not get up the demonstration against the fraile May 3, 1903, and had nothing to do with getting it up. I think the demonstration was gotten up by Benito Gallardo and Froilan Flores, for the reason that as I passed the street in front of the cockpit I met them and they told me they were going to get up a demonstration against the presence of a fraile. I had been out walking and was passing the street where the cockpit is situated; I was alone at the time of the walk. There were from fifteen to twenty there, including the band. I signed a paper which was a statement to show our sympathy with the new Filipino Church. Then, accompanied by the band, we all went to the residence of the presidente, in the south part of the town. When we arrived at the house of the presidente and our purpose had been made known to him, he said to us not to be uneasy; that he would take care of not letting the fraile stay in town. After we left the presidente's house, Gallardo said to us that it was necessary for the demonstration to let it be heard by the authorities, and we went by the house of the provincial secretary, and then to the convent. While we were in the presidente's house he told us to go to our homes. When we arrived in front of the convent grounds, we stopped just time enough to give out the cry "Viva la Iglesia Filipina," "Viva Aglipay," and then went on north, and when we arrived at Santa Catalina street we dispersed to our homes. The presidente did not accompany the demonstration when it left his house, and was not with it when it was in front of the convent grounds, or at any time or place. It was a peaceful

demonstration. I did not have a revolver and never had owned one since I was born, and never carried one, and I did not see any man in the crowd with a revolver. I did not see any clubs, stones, missiles, or anything else thrown at or in the direction of the convent or ground while the demonstration was passing there or halting in front of it. There was no cry made by the crowd or any member of it to the fraile that if he did not come down out of the convent it would come and take him out. The demonstration was solely against the fraile as a fraile and not against him as a man or a subject of the Government of Spain. After we had left the presidente's house I did not see him again that night, and he was not with the crowd in front of the convent, and did not go into the convent grounds or the convent while the crowd was in front of or passing the convent grounds. After the crowd left the convent we went to the residence of the provincial governor, and the governor said he would present it to the provincial board. None of the crowd had been drinking.

FEDERICO FERNANDEZ.

Epifanio Montebón, being duly sworn, declared:

My name is Epifanio Montebón; my age is 30 years; my residence is Dumaguete, and I am a deputy in the office of the provincial treasurer. I did not organize the demonstration against the fraile Sunday night, May 3, 1903, or assist in any way in making the organization, and was not present at the cockpit when it was organized. I was invited to a meeting at the house of Catalino Pinili, and while passing at the corner near the cockpit, accompanied by Marcelo Enriquez, secretary of Dauín, we were attracted by the music playing in front of the cockpit and went to see what it was for. This was about 8 o'clock. About thirty persons, some of whom were children, were present. The only name I now remember is that of Benito Gallardo, who gave me a petition which was addressed to the presidente, requesting him in a legal way to avoid the stay of the fraile in town. I read the petition and signed it. The crowd was almost beginning to march when I arrived at the cockpit, going in the direction of the presidente's house, and as I wanted to see the result of the protest, I followed along. At the presidente's house the protest was presented and the presidente said to us to go to our homes and he would inform the fraile of the protest. The crowd went from there north on the street, passing in front of the convent, and when opposite the convent grounds, without stopping, Benito Gallardo cried, "Viva Aglipay," which was followed by all in the cry of "Long live Aglipay;" "We don't want friars." The crowd did not stop in front of the convent grounds, and no person went inside. The crowd and no member of it called to the fraile to come out of the convent or it would come and take him out. No stones, clubs, or missiles, or anything else were thrown at or in the direction of the convent or grounds by the crowd, or any member of it. I did not have a revolver, and no man in the crowd had a revolver. The presidente did not accompany the crowd from his house to the convent, and I did not see him with the crowd at any time, and he was not in the convent or grounds while the crowd was there or passing in front of it. He was standing at the window when the crowd left his house. The crowd went on north to Santa Catalina street, where it dispersed, and I went to my house. It was a peaceable crowd and orderly demonstration; if it had been otherwise, I would have denounced it. The demonstration was purely against the fraile and against his qualities as a fraile, and not against him as a man and a subject of the Government of Spain. I did not know he was a subject of Spain, and nothing was said about it by the crowd. On hearing my testimony read, I want to correct it to the extent of saying that the band and people were at the corner of the streets San José and Santa Catalina, and not in front of the cockpit. In view of the protest being a reasonable one, I signed it.

EPIFANIO MONTEBÓN.

Charles M. Colton, being duly sworn, declared:

My name is Charles M. Colton; my age is 30 years; my residence is Dumaguete, and I am chief clerk and deputy in the office of the provincial treasurer. On Sunday night, May 3, 1903, myself and four other gentlemen, all Americans, were in my house, on the south side of the plaza, almost directly opposite the convent, when, at a little after 8 o'clock, we heard the band playing in the north part of the town. One of the boys, whose home was in Bais, remarked that the band was playing the same tune it played in Bais the night before when the fraile was there. We all went to the window and could see the band coming, then about a block and a half distant. It came on and passed my house and went toward the south part of town. There were then about 50 persons in the crowd, including the band. After the band passed my house we returned to a game of cards we were playing. We remained

there half an hour, or possibly more, when our attention was attracted by hearing the band playing again. We went to the window and saw the band and a crowd of people going north on the street on the opposite side of the plaza, and were then near the street which runs east to the church. When the crowd reached the second entrance of the walls inclosing the convent grounds it stopped, I should say about two minutes, and were yelling, but we could not tell whether they spoke in Spanish or Visayan, or what was said. They did not yell in a concerted manner, but sometimes one and sometimes three or four, and they soon passed north and disappeared behind the buildings. We immediately got our hats and went down to Mohler's, at the constabulary headquarters, to learn if he knew what was going on. We found that he knew the crowd was out, and said he had his men out around the town to report to him if there was any disturbance. We stayed there but a few minutes and then returned with Captain Mohler and took a walk in the streets around the convent grounds. As we passed the convent grounds we saw two of Mohler's men, one of whom was at the main entrance to the convent grounds and the other was farther down toward the tower. Everything was quiet, the band had disappeared, and the crowd dispersed, so far as we can tell, and we did not see anybody at all. It was not a mob and was a peaceful demonstration, and I saw and heard of no disturbance. I did not see the presidente that night. I did not see any arms in the crowd. It was somewhere between 9 and 10 o'clock when we returned from our walk on the streets surrounding the convent grounds and in other parts of the town. The crowd was not carrying clubs, and there were not enough canes in the crowd to make it specially noticeable. It was not a moonlight night, but there was light enough for us to see the crowd across the plaza, but not to distinguish anyone. The band was the Dumaguete band and was playing the same tune which had been played in Bais the night before, as stated by one of the boys in the room with me.

CHARLES M. COLTON.

EXHIBIT No. 43.

MANILA, *September 28, 1901.*

THE CIVIL GOVERNOR OF THE PHILIPPINES.

SIR: I am sorry to have to inform you that two foreigners have established themselves two weeks ago, by orders of the Belgian consul, in my convent in the pueblo of Jalajala, province of Rizal, without my knowledge or my consent, and that not only are they occupying my convent, but they have had the impudence to tell me to get my things out of said convent as soon as possible.

The undersigned, parish priest of the pueblo, is too small a personality to be able to oppose the arbitrary acts of these foreigners, but has decided to present his complaint to the superior authority, so that proper action may be taken against the two foreigners, and that my right to the possession of my convent be duly acknowledged.

You will thereby deserve the thanks of the people of Jalajala and the blessings of a Catholic priest who is happy of this opportunity of manifesting his respect and his attachment for the illustrious person of the civil governor and the government over which he so happily presides.

LORENZO FERNANDEZ.

[First indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., October 2, 1901.*

Respectfully referred to the governor of Rizal for investigation.

If it is true that the two persons have ousted the padre in peaceable possession of the convent in the pueblo of Jalajala, province of Rizal, and taken possession, this is a violation of law. They should be arrested, and the padre should be restored to his possession. If, then, the strangers have a claim of title to the property, they can assert it in a legal way by taking proceedings; but it is unlawful, under both the Spanish and the common law, for one to take forcible possession of property from another in peaceable possession, no matter what the title of the disposessor.

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 44.

TAMBOBONG (near MALABON), *November 26, 1902.*

APOSTOLIC ADMINISTRATOR OF THIS ARCHDIOCESE, etc.:

With the greatest respect I have the honor to inform you that this morning about 8 o'clock I received notice from Padre Candido del Rosario and Padre Leandro de Pineda, by means of three persons who came, requesting that I go to Concepción

Chapel, in the jurisdiction of this parish, because the schismatic priest, Gregorio Aglipay, and other of his followers were attempting to officiate in said chapel. I went immediately, going first to the house of the acting president, begging the intervention of his authority in order that he might keep the public peace, and explained to him the information which I had received. He replied that he would go, which he indeed did, meeting each other on the return to the parish house. When I arrived at the chapel I found the two padres at the altar, surrounded by a large crowd, who were defending the rights of the Catholic Church to said chapel, and several were exercising force to get the priests from the altar. When they saw that I could not reach them on account of such a large crowd, they asked me to call the police, which I did, without succeeding in getting any one of the police to follow me, and they merely told me that their lieutenant was already in the chapel. When I returned there I found that there was no crowd in the chapel, and one person told me that the two priests had been arrested or were in prison. Not having seen them on account of the large crowd I do not know if they were injured. Therefore, I went back to this parish house in order to inform your excellency immediately of what has occurred this morning in the aforementioned chapel, not knowing what further occurred, nor whether said schismatic priests came officially or not.

God keep you many years, etc.

LORENZO GREGORIO.

BISHOP'S PALACE, November 28, 1902.

MR. WILLIAM H. TAFT,  
*Governor-General Philippine Islands, Manila.*

DEAR MR. TAFT: The delegate has asked me to send you the inclosed letter, which relates to the disturbance of which we spoke yesterday. The circumstances seem to be getting worse, as you will see from the inclosed. With respectful regards from the delegate and myself, believe me, very sincerely, yours,

M. J. O'CONNOR, *Secretary.*

[First indorsement.]

EXECUTIVE BUREAU,  
*Manila, November 24, 1902.*

Respectfully referred to the attorney-general for immediate investigation and report.

BEEKMAN WINTHROP,  
*Acting Executive Secretary.*

[Second indorsement.]

OFFICE OF THE ATTORNEY-GENERAL OF THE PHILIPPINE ISLANDS,  
*Manila, November 25, 1902.*

Respectfully forwarded to the provincial fiscal of Rizal for further thorough investigation of the facts relating to the within communication.

Prompt return of these papers with report is requested.

L. R. WILFLEY, *Attorney-General.*

[Third indorsement.]

OFFICE OF THE ATTORNEY-GENERAL OF THE PHILIPPINE ISLANDS,  
*Manila, December 13, 1902.*

Respectfully referred to the honorable the civil governor, inviting attention to the inclosed report of the provincial fiscal of Rizal.

L. R. WILFLEY, *Attorney-General.*

(The report mentioned in the preceding indorsement can not be found.)

(The opinion of the attorney-general dated December 23, 1902, instead of December 24, 1902, is copied in full and marked "Exhibit No. 46.")

MANILA, P. I., November 27, 1902.

To whom it may concern:

This is to certify that Mr. George H. Harvey, the bearer of this letter, is an assistant attorney in the attorney-general's office, and especially deputed by me to visit Tambobong and investigate the circumstances of the alleged disturbance in the chapel of that barrio.

Very respectfully,

WM. H. TAFT,  
*Civil Governor.*

DEPARTMENT OF JUSTICE OF THE PHILIPPINE ISLANDS,  
OFFICE OF THE ATTORNEY-GENERAL,  
*Manila, P. I., November 28, 1902.*

Hon. L. R. WILFLEY,  
*Attorney-General, Manila, P. I.*

SIR: Pursuant to your instructions and the deputation of the civil governor, dated November 27, 1902, I went to Malabon yesterday afternoon for the purpose of investigating the circumstances of the alleged disturbance in the "Ermita de la Concepción," in the barrio of Tambobong. I was accompanied by Inspector Boone, of the Philippines Constabulary.

Upon arrival in Malabon, we went to the convent and interviewed Señor Lorenzo Gregorio, the curate of the parish, who made the complaint to the archbishop in this matter. He knew but little of the facts in connection with the alleged disturbance. He told me that he had understood that Padre Candido del Rosario and Padre Leonardo de Pineda, the two Catholic priests who were in the chapel at the time of the disturbance, had been arrested at the time, but that yesterday afternoon they were in Tondo Convent in Manila; hence, I was unable to interview them.

Father Gregorio furnished us with transportation and a guide to the chapel where the disturbance took place. Adjoining the church or chapel is the police station of the barrio, and upstairs is the "presidencia." The president was not there, but I interviewed the lieutenant of police in charge of the police station, and he gave me a fairly complete story of the occurrence, and it may be best told in his own language, as follows:

"At half past 6 o'clock on Wednesday morning, November 26, I was here in the sacristy and saw Padre Candido del Rosario enter the sacristy of the church. A moment later Don Lorenzo Tuason, who was in charge of the church in the absence of his brother (who was the 'hermano mayor de la visita'), arrived in the sacristy. He asked Padre del Rosario what he wanted, and the padre answered that he was going to obey the orders of the bishop, and prevent anybody of the Independent Filipino Church from celebrating mass in this church. Don Lorenzo Tuason asked the padre by what right he would prevent them, and he answered that in former times only the Romanists celebrated mass in this church. Then Don Lorenzo Tuason said that neither the bishop nor any Romanist could prevent Father Aglipay or others of the Filipino Church from celebrating mass in this church, because it is the property of the barrio, and that the church is in the possession of the barrio. In spite of this the Romanist padre insisted that he would prevent the celebration of mass in this church by Aglipay or others of the Filipino Church.

"A few moments later Father Aglipay and a companion arrived and went into the sacristy. He asked the Romanist padre why he prevented the celebration of mass, and he answered that it was the order of the bishop that he should prevent it, even though it cost him his life. Then Father Aglipay replied, 'If you have the right of property in the church you should resort to the courts of justice to establish it and not prevent me from celebrating mass,' and the Romanist padre told him that he would prevent him from celebrating mass in the church because it was the order of the bishop.

"During this conversation Leonardo Taylo (the same person who is referred to above as Leonardo de Pineda), a companion of Padre del Rosario, arrived at the sacristy. A moment later Padre Taylo went in front of the altar and said that he would put out anyone from the Filipino Church who tried to celebrate mass in this church. Then the Romanists in the church said that they would not stay to hear mass in the church. In view of this Padre Aglipay and companion left and went upstairs into the presidencia. Father Aglipay then said that he did not care to discuss the question, and that they would hold mass somewhere else. When they were preparing outside of the church to put up an altar to celebrate the mass Don Leonardo Tuason started to take 'la piedra ara' (the consecrated stone on which a consecrated linen is laid during the celebration of the mass) from the altar in order to make an altar outside of the church. When Don Lorenzo Tuason had that stone the two priests went and took it away from him. During this struggle I was upstairs and heard that they were calling policemen, and I went down, and when I arrived there I saw the people were all right, because the municipal secretary told them to be quiet and that they had to speak politely. Then I asked the people whose was that stone, and Don Leonardo Tuason said that he was in charge of it and that these two priests were taking it away from him. First letting them know that I was a lieutenant of police, and that beside me was the sergeant of police, I told these two priests to give this stone to the man who was properly in charge of it, or to me that I might arrange the matter. The two priests did not obey me. Then I told the sergeant to take the stone from him and to take the two priests and Tuason to the police station.

They did not even recognize my authority, and I told the corporal to arrest Padre del Rosario, and by another guard to arrest the other priest and also Don Lorenzo Tuason, for their disorderly conduct. The people in the church, seeing the resistance of the two priests, wanted to go against them, and then we protected the priests, and I received a blow on the head, and I think my finger is broken. (A finger of the lieutenant was wrapped with a cloth.)

"Then when Don Lorenzo Tuason and the priests arrived at the police station, I sent them upstairs to the presidencia, charging them with disorderly conduct and making known to the president what had happened; and I stated that the two priests seized the stone from the hands of Lorenzo Tuason, and there was a tumult and scandal inside the Church of the Conception, in front of the altar. The president sent the matter to the justice of the peace, and said that he had no authority to proceed against them, because the complaint did not state the charges against them. Then the justice of the peace sent the case back to the president, who told Tuason and the two priests to go to another court, where they could make complaint. Then they were released.

"Father Aglipay held a mass outside of the church during the time that the two priests and Lorenzo Tuason were under arrest. Some one of the Filipino Church asked the president if he could not get the stone for them in order that they might hold a mass outside of the church, and the president got the stone, but I do not know from whom he got it. There was no further trouble. After the mass was over everybody left in peace. Don Lorenzo Tuason was in charge of the church during the absence of his brother, and he took charge of the stone when the mass was over. Don Samuel Tuason, the 'hermano mayor,' is the man who had charge of the church, but he is absent in Pampanga, and his brother, Don Lorenzo Tuason, was in charge yesterday in his absence.

"During the tumult in the church, I did not see Father Lorenzo Gregorio, the curate, but he may have been there. After the mass had been held outside I saw him in the presidencia. I do not know whether the two priests (del Rosario and Taylo) are here now. Padre Candido del Rosario is in charge of a little chapel in the barrio of Flores, and Father Leonardo Taylo lives in Navotas. Father Aglipay celebrated mass in this church last Sunday."

Father Lorenzo Gregorio told me that he was recently placed in charge of the parish and was unacquainted with the people who were in the church at the time of the disturbance, except the two priests. He had made no subsequent investigation, and was unable to give me any facts in addition to what he had stated in his communication to the archbishop, which communication I attach hereto.

Very respectfully,

GEORGE R. HARVEY,  
*Assistant Attorney.*

[First indorsement.]

OFFICE OF THE ATTORNEY-GENERAL OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., November 28, 1902.*

Respectfully forwarded to the honorable the civil governor, inviting attention to the within report of Mr. George R. Harvey in regard to the alleged church disturbance at Tambobong.

L. R. WILFLEY, *Attorney-General.*

[Second indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., December 1, 1902.*

Respectfully returned to the attorney-general, requesting the expression of an opinion by the solicitor-general as to the ownership and possession, under canonical law, of churches erected in barrios by the people of the barrio for the celebration of mass by a Roman Catholic priest at stated or infrequent intervals. My impression is that where people erect a chapel and devote it to the purposes of the Roman Catholic Church, it thereby becomes the property of the church and subject to the disposition of the bishop, solely, however, for the benefit of the Roman Catholics of the barrio in which it is erected; and that the retention by any member of the barrio of the key is as the agent of the priest or bishop of the diocese, and that the possession is therefore the possession of the Roman Catholic Church. I should be glad to be advised, however, by one familiar with the subject, as is the solicitor-general. An immediate opinion is requested.

WM. H. TAFT, *Civil Governor.*

[Third indorsement.]

OFFICE OF THE ATTORNEY-GENERAL OF THE PHILIPPINE ISLANDS,  
*Manila, December 15, 1902.*

Respectfully returned to the honorable the civil governor, inviting attention to the inclosed opinion of the solicitor-general.

L. R. WILFLEY, *Attorney-General.*

DECEMBER 9, 1902.

HON. WILLIAM H. TAFT,  
*Civil Governor of the Philippines.*

SIR: I have the honor to reply to your request for an opinion regarding the ownership and possession, under canonical law, of chapels erected in barrios by the people of the barrio for the celebration of mass by a priest of the Roman Catholic Church at stated intervals.

OPINION.

"Certain small churches situated in the country or in the towns, as well as those erected in houses by private individuals, extraordinarily dedicated to divine worship, are called chapels or oratories. There are public oratories and private oratories. The doors of the former are open to the public, and any one who desires may enter therein, while a private oratory is exclusively at the disposition of the owner." (Devoti, Canonical Institutions, Sec. III, Title VII, Book II.)

"A public oratory, once dedicated to divine worship, may not be put to profane uses, this not being true of private oratories. In public oratories the faithful not only engage in prayer, but in them the holy sacrifice is also celebrated before a duly consecrated altar. Therefore the authority of the bishop should intervene in their erection. It is necessary that they should be blessed, and they have a bell to call the people to religious worship." (Idem.)

"As to the private oratory, any person may have one, but may not celebrate the sacrifice of the mass therein without obtaining this privilege from the Apostolic See." (Idem.)

Under the canonical law, public oratories are entitled to the consideration given to sacred ecclesiastical places or things.

Canonists differ as to the entity in whom vests the ownership of ecclesiastical property.

Devoti, in Title XX, Book II, of the work above cited, says: "Ecclesiastical property is that which belongs to the church, the revenues from which should be applied to the maintenance of the ministers of the altar and the sustenance of the poor. It is said that this property belongs to the church, because the church has the administration and custody thereof; but in reality God is the true owner, and for this reason such property is excluded from the traffic of men."

Gomez Zamora, in his Spanish and Indian Royal Patronage, Chap. XXI, page 632, says: "Canonists differ as to the person in whom vests the ownership of ecclesiastical property. Some say it is the Pope, others the clergy, others the poor, others the universal church, and still others the individual churches. Without going into an examination of each of the opinions mentioned, we deem most preferable the one which holds that the individual churches are as minors placed under the charge of a guardian, and maintain that the ownership of the property vests in the respective individual churches, and that the administration of the property rests with the clergy of said churches, its guardianship and control with the bishop, and the eminent domain thereof with the Roman Pontiff, who may designate and reserve a part of same for the general needs of the church and may decree laws for the administration and alienation of ecclesiastical property and providing that the rents and profits of said property be applied to the end indicated by the donors, to the maintenance of worship, of the clergy, and of the poor in general, and of the parish poor in particular. \* \* \*"

The consideration which the canonical law gives the ecclesiastical things has been confirmed in many of the laws of Spain published prior to the civil code, and according to said laws ecclesiastical things are excluded from the commerce and ownership of men.

Beginning with the Forum Judicaum, promulgated during the Visigoth monarchy, we find that Law I of Book V thereof provides that: "Things which may be given to the church, either by princes or others of God's faithful, shall always be held and possessed by God's church." Law XXVIII of the same book says: "A thing once given to God should never be returned to the power of man."

Law I, Title V, Book I, of the *Fuero Real*, promulgated in the reign of Alfonso the Wise, reads: "And we therefore order that all things which may now be given to the churches, or which may hereafter be given by the kings, or by others of God's faithful, such things being rightfully given, shall be held and possessed by and be in the power of the church."

This law was afterwards incorporated in the *Novísima Recopilación* of the laws of Spain, ordered published in 1805 by King Charles IV, and is found in Law I, Title V, Book I, of said work.

The laws known as the "*Partidas*," also published in the reign of Alfonso the Wise, contained analagous precepts on the subject.

Law I, Title VII, of the *Partida* I, recognizes the following as religious places: Monasteries, hermitages, churches, hospitals, and other places specially dedicated to the service of God, and even oratories erected in houses with license from the bishop. It refers to edifices with licenses from the bishop, such as churches, monasteries, and other places dedicated to the service of God as sacred religious places, and to hospitals and other places dedicated to charitable works as simply religious places.

Law II of the same title declares that religious places should be under the control of the respective bishops.

Law III provides that things given to the service of God may not thereafter be returned to the service of man.

In accordance with this last-mentioned precept, Law XII, Title XXVIII, of *Partida* III, declares that no one may acquire ownership of sacred, religious, or holy things, and that those may not be considered to be the property of man, and for this reason says that sacred things are excluded from the traffic of men.

Canonical law concedes the right of patronage to him who grants land for the building of a church, or who pays all the expenses of the construction of a church, or who, after the construction thereof, maintains the same in whole or in part, setting aside a sufficient sum for the ministers of the altar and for the expenses of the church.

The right of patronage consists in the presentation of a clergyman for the service of the church. It is the duty of the patron to care for and defend the church, but without meddling either in its jurisdiction or in any administrative matters, this being by common law the province of the prelates or rector of the church. (Gomez Zamora, *Spanish and Royal Patronage*, Chap. IV.)

The foregoing relative to the patronage of churches is applicable to public oratories, those being given the same consideration as that accorded to churches.

The chapels referred to in the present inquiry, although erected for the benefit of the respective residents of barrios, from the fact that they are open to the public are unquestionably entitled to be considered as public oratories. As such they are sacred ecclesiastical places. Their ownership, according to the commonly accepted opinion of canonical-law writers, vests in the Roman Apostolic Catholic Church of the Philippine Islands, their administration pertaining to the priest or Catholic minister appointed by the bishop, subject to the supervision of said bishop and to the eminent domain of the Roman Pontiff. All this is without prejudice to any right of patronage which may have been acquired. The priests who administer said chapels have the right of possession thereof, and the holding of the keys by a patron or other person is not a possession adverse to that of the administrator, but, on the contrary, is a right exercised in behalf of said administrator or of the Catholic Church.

Very respectfully,

GREGORIO ARANETA, *Solicitor-General*.

EXHIBIT No. 45.

[Third indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
*Manila, P. I., April 1, 1903.*

Respectfully referred to the Hon. J. B. Early, inviting attention to the communications of the chief of police and Captain Monett, which make it clear that the people were not in possession of the church; that the police did not put the padre in possession, but that he was in possession, having the keys to the same at the time the chief of police and Captain Monett reached the church. This brings the case clearly within the rule laid down, that the padre was entitled to protection in his possession.

The title to the church can be easily settled by bringing a suit in the name of the people of the vicinity who claim to own the church, and can not be settled by an executive order.

WM. H. TAFT, *Civil Governor*.

## EXHIBIT No. 46.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
OFFICE OF THE CIVIL GOVERNOR,  
Manila, P. I., December 20, 1902.

Hon. L. R. WILFLEY,  
*Attorney-General, Manila, P. I.*

SIR: I desire your opinion upon the following question:

A parish priest in actual possession and administering a parish church of the Roman Catholic Church leaves the Roman Catholic communion and joins the Independent Filipino Catholic Church, remaining in possession of the parish church and refusing, in obedience to the order of the Catholic bishop of the diocese, to yield possession to a newly appointed priest of the Catholic Church directed to act as parish priest and to take possession of the church.

Is it my duty, on demand of the bishop of the Roman Catholic Church, or is it the duty of the governor, or of the executive officers of the peace in the pueblo, to put the new priest, having authority of the bishop of the Roman Catholic Church, in possession of the parish church, or must the bishop appeal to judicial proceedings to dispossess the apostate priest and to secure possession for his new agent, the new parish priest of the Roman Catholic Church?

Your early opinion upon this point I shall greatly appreciate.

Very respectfully,

WM. H. TAFT, *Civil Governor.*

DEPARTMENT OF JUSTICE OF THE PHILIPPINE ISLANDS,  
OFFICE OF THE ATTORNEY-GENERAL,  
Manila, December 23, 1902.

Hon. WILLIAM H. TAFT,  
*Civil Governor of the Philippines.*

SIR: I have the honor to render my opinion upon the question you ask in your letter of the 20th instant.

## QUESTION.

A parish priest in actual possession and administering a parish church of the Roman Catholic Church leaves the Roman Catholic communion and joins the Independent Filipino Catholic Church, remaining in possession of the parish church and refusing, in obedience to the order of the Catholic bishop of the diocese, to yield possession to the newly appointed priest of the Roman Catholic Church directed to act as parish priest and to take possession of the church.

Is it the duty of the civil governor, or of the provincial governor, or of some executive officer of the peace of the pueblo, on demand of the bishop of the Roman Catholic Church, to put the new priest, having authority from the bishop of the Roman Catholic Church, in possession of the parish church, or must the bishop appeal to judicial proceedings to dispossess the apostate priest and to secure possession for his new agent, the new parish priest of the Roman Catholic Church?

## OPINION.

In the present case there is a controversy between the schismatic priest and the Roman Catholic bishop with respect to the possession and consequent administration of the parish church. The former claims the right to remain in possession of and to administer the parish church in the name of the Independent Filipino Catholic Church, the said church believing itself to have the right to said parish church by the change of belief of the priest and the parishioners; and the latter claiming that the parish church, as the property of the Roman Catholic Church in the Philippine Islands, should continue to have such character, the schismatic priest, therefore, having no right to continue in the possession and occupancy of said church, and claiming the right to appoint a priest of the Roman Catholic faith in substitution of such schismatic priest.

The determination of such a question is not the function of the executive power. Its determination comes within the province of the courts of justice by reason of their functions. To deprive the schismatic priest of the possession of the parochial church and deliver such possession to the new Roman Catholic priest would imply an examination of the question as to which of the contending parties has the right to the possession and administration of such parochial church and a decision that the right belongs to the Roman Catholic bishop, functions purely judicial and not executive.

It matters not that the claim of one of the contending parties is manifestly unjust

and illegal, and that the right of the other party is evident. This circumstance would not be the slightest reason why the controversy should be decided by the executive power, since it is not the difficulty of the determination of a question which causes it to be admitted to the courts, but the opposition of one of the parties to the claims of the other.

Article 46 of the civil code, still in force in these islands, provides that "Every possessor has a right to be respected in his possession, and, should he be disturbed therein, he must be protected or possession must be restored to him by the means established in the laws of procedure." This provision protects the possession, and refers not only to the civil possessor—that is to say, him who is in possession as owner—but also to the natural possessor, or him who is simply the holder of a thing. Further, the possession refers principally to the possession in fact, and against the disturber of such possession the law of civil procedure formerly in force in these islands provided the remedy of injunctions—summary trials, which were held and decided solely upon the fact of possession.

In consulting precedents on this question in American legislation, I find two opinions of the Attorney-General of the United States which bear very closely upon the matter under consideration.

In an opinion rendered October 11, 1838, the following question was dealt with: An American vessel had entered and cleared from a port under blockade, and while returning to New Orleans was captured by a vessel belonging to the French blockading squadron, from which the captain of the former rescued her and brought her into the port of New Orleans, to which he was destined. Subsequently a demand was made of the Executive to deliver up the vessel and cargo, both on account of the said breach of the blockade and the rescue. Independently of other considerations, the Attorney-General, in rendering his opinion, stated that "there is no constitutional right vested in the Executive to deliver up the property of an American citizen, claimed by him as his own, and in his actual possession, and not condemned nor legally adjudged to belong to another." (Opinions of the Attorney-General, Vol. III, p. 377.)

On November 2, 1843, an opinion was rendered regarding the case of a claim presented to the Executive by the owner of an abducted slave, asking that his property be returned to him. The Attorney-General stated as follows: "I am aware of no authority that can be properly exerted by the Government of the United States adequate to the relief that is sought; all that can be done is to instruct the district attorney of the United States for the district in which the accused resides to inquire into the facts, and to institute a prosecution if they will warrant it. In regard to the property in the negro alleged to have been abducted, the Government of the United States can not interfere; its courts are open to the party injured. To them he may safely appeal for the full vindication of his claim to the property and to the damage consequent upon its withdrawal from his service." (Opinions of the Attorneys-General, Vol. IV, p. 269.)

In view of the foregoing considerations, I am of the opinion that it would not be proper for the Executive to intervene in the question at issue. The bishop of the Roman Catholic Church must appeal to the courts in support of his claim.

Respectfully,

GREGORIO ARANETA, *Solicitor-General*.

Approved.

L. R. WILFLEY, *Attorney-General*.

---

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
Manila, P. I., January 2, 1902.

HIS EXCELLENCY GIAMBATISTA GUIDI,  
*Archbishop of Stauropoli and Apostolic Delegate  
to the Philippine Islands.*

YOUR EXCELLENCY: I beg to inclose herewith certain correspondence which I have had with the Attorney-General and with the Secretary of War on the general subject of ownership of churches and the right of possession in the Philippines, together with the duty of the executive in respect to possession of said churches and chapels. I also inclose a copy of a letter which I sent to the governor of Tarlac upon the same general subject. The result of all this is:

First. That the actual possession by a Roman Catholic priest of a church or chapel is recognized as the lawful possession of the bishop or archbishop of the diocese, and that it is the duty of the executive to protect the actual possession of the priest in the face of any claims of right to possession on behalf of the municipality or the people of the municipality or barrio in which the church or chapel is situate.

Second. That where, without dispossessing a priest of the Roman Catholic Church by force or fraud, peaceable and actual possession of a church is held by the municipality under a claim of right, or by persons claiming to represent such municipality under a claim of right, the executive has no function except to preserve the status quo; and that should such possession be a violation of the rights of the church, they must be vindicated in a suit in the civil courts.

Third. That where a priest of the Roman Catholic Church, while in possession of the parish church, leaves the Roman Catholic communion and retains possession of the church under a claim of right for the municipality or the people of the municipality, however great violation this may be of the rights of the church, it can not be remedied through the executive, but the rights of the church must be asserted and vindicated through a suit in the civil courts.

In view of these conclusions, I have not thought it wise to issue a general order, and shall content myself with treating each case as it arises upon the particular circumstances thereof.

I have the honor to be, with great respect, sincerely yours,

WM. H. TAFT, *Civil Governor.*

EXHIBIT No. 47.

MANILA, P. I., *September 7, 1903.*

SIR: Pursuant to your instructions, I visited the town of Hagonoy, province of Bulacan, on Thursday, the 3d instant, for the purpose of investigating the charges of disturbing religious worship made against certain inhabitants of that town by the Rev. Homer C. Stuntz, presiding elder of the Philippine Islands district of the Methodist Episcopal Church. Briefly stated, the facts in the case are as follows:

It appears that the building of the Methodist Chapel at Hagonoy, after many months of active Methodist propaganda, during which considerable feeling was manifested between the opposing church parties, was the occasion for much bitterness and recrimination on the part of the Catholics of the town. The new chapel is situated on the same street as the house of one Domingo Toma la Cruz, the municipal treasurer, and a prominent leader in Catholic Church matters in Hagonoy. Cruz is represented as being particularly annoyed by the proximity of the church of the new sect to his home, and when it was in course of construction is said to have declared that he would never permit the holding of services there.

The church was dedicated for worship on Sunday, the 26th of July, and on that day, as well as on every succeeding Sunday since the dedication ceremonies, a bamboo band, played by young men of the town, was stationed in front of the church during the evening services, making hideous noises with their instruments, without regard to time, and rendering the continuance of the services impossible.

These facts were fully substantiated by the witnesses examined at the suggestion of Mr. Stuntz. The names of these men are as follows: Pedro Aduna, licensed exhorter; Mariano Madino, Marcelo Estrella, Benedicto Viri, Lorenzo Angeles, and Adriano Felipe, all adherents of the Methodist faith.

Toma la Cruz disclaimed all responsibility for the disturbance; declared that the band had never been inside his house, and tried to give the impression that the said band was composed of irresponsible boys, sacristanes, altar boys, and others, and that the disturbance represented the mischief of children rather than the expression of any religious hatred on the part of the full-grown inhabitants of the town.

It was afterwards ascertained from the presidente that Cruz had rented his "entre-suelo" for the purposes of a musical school. The time of the establishment of this school seemed at first suspiciously coincident with the beginning of the work on the new church. No connection, however, could be established between the pupils of Cruz's musical school and the musicians of the bamboo band, and while there is every indication that Cruz aided and abetted the disturbers, none of the Methodists furnished any proof of this fact.

Domingo Tarralba, who was represented in the complaint as the master of the band, denied all connection with it, and said he was in the crowd merely as a spectator.

The presidente of Hagonoy, whose name is José Lopez, is a keenly intelligent, capable, and, I think, trustworthy man. He gave his testimony frankly and freely, and admitted that ill feeling was prevalent since the establishment of the new church. No complaint had been made to him, however, or to the justice of the peace, and since no actual breach of the peace had occurred, he had hoped that it would pass away without any necessity for intervention on the part of the town authorities. Cruz, he said, was undoubtedly one of those who felt most bitterly on the subject of the new church, and he did not hesitate to say that he thought he was capable of

instigating the disturbances. He attributed the whole trouble, however, to the licensed exhorter, Pedro Aduna, who he said was a man of bad repute, a professional demagogue and agitator, he was constantly inciting violence by his intemperate characterizations of the Catholics as "image worshippers," "idolators," etc., and by industriously spreading the report that the Methodist Church was the state church of the United States. Aduna had been presidente of the town during the American military régime, and created intense feeling by closing the Catholic cemetery and ordering all the deceased inhabitants of the town to be interred in the cemetery belonging to the municipality. After being removed from his position for cause, he became an evangelist, and lately succeeded in still further intensifying the feeling against him by attempting to bury a non-Catholic in the Catholic cemetery, in violation of the rules of the Catholic Church, and in spite of the protests of the local padre.

The presidente is of the opinion that the selection of Aduna to be the local mouth-piece of the Methodists in Hagonoy is the worst possible choice that could have been made, and that this fact has contributed more than any other to the disturbed state of public feeling.

The appearance and manners of Aduna are decidedly unprepossessing and corroborate almost in detail the presidente's statements with respect to him.

The presidente further stated that his position was very difficult. There are 21,000 Catholics in the town he avers, and about 100 Methodists. Unless an actual breach of the peace occurs, of sufficient gravity to warrant his interference, he fears that any unusual action he might take for the protection of the Protestants might be misunderstood by the rest of his people, and add to rather than allay the excitement. It was explained to the presidente that if there was only one dissenter in Hagonoy, that his right to worship according to his conscience was as sacred as if his opinions were held by the majority of the inhabitants of the town, and that the government looked to him to see that the rights of the minority, no less than those of the majority, were properly respected; he promised to prevent a recurrence of the disturbance by the band, and, if necessary, to station a policeman in front of the church during the hours of service to see that the Methodists were not subjected to further annoyance.

It is my opinion that a town ordinance declaring the freedom of religious worship and providing penalties and liabilities for infractions of same, would simplify matters considerably. Such an ordinance would obviate the necessity of appealing to the insular government in cases of this character, at least until local remedies had been exhausted, and each conviction had thereunder, would be a good object lesson in the real meaning of religious liberty.

I informed Aduna and the other Methodist workers that when their rights were infringed or their meetings disturbed, it was their duty to file a complaint forthwith with the justice of the peace, and if the result of the trial should prove that justice could not be had in the town, it would then be time for them to appeal their case to a higher court or to make grievances known to the proper authorities.

On being asked his opinion of Lopez, Judge Roxas, who was holding court at Malolos, said that Lopez was the most efficient and trustworthy presidente in Bulacan. Everything considered, his town was a model one, and it was the judge's opinion that he might be depended upon to do full justice to all the interests involved so far as his authority extended.

While in Malolos, in accordance with the verbal instructions of the executive secretary, I made inquiries as to the complaints against Crisostomo, the provincial fiscal of Bulacan.

The gravest and in fact the only charge against Crisostomo seems to be incompetency. When I called at the court of first instance I found that Judge Roxas was practically compelled to take the examination of the witnesses on behalf of the government away from the fiscal, and to put the questions to the witnesses calculated to elicit the information necessary to sustain the complaint. I asked Judge Roxas afterwards about this, and he admitted that it was most distasteful to him, and that he was driven to it merely as an emergency measure. The lawyers were protesting against the practice. By reason of the fiscal's incompetency and the lack of intelligent preparation and presentment half the cases brought by the government would collapse unless he came to the fiscal's aid, thus practically assuming the functions of the prosecuting attorney.

Respectfully submitted.

RICHARD CAMPBELL.

[Third indorsement.]

No. 114, NOZALEDA, MANILA, P. I.  
*September 30, 1903.*

Governor WM. H. TAFT, *Manila, P. I.*

SIR: I return herewith the report of Mr. Richard Campbell on the disturbance of a religious service in Hagonoy, Bulacan, as requested in your letter of transmission.

The inquiry as carried on by Mr. Campbell and reported upon in the communication under reply has been most unsatisfactory, and I ask that the attorney-general be requested to prosecute the offenders. In support of that request permit me to briefly restate the following:

During two years and well into the third we have maintained Protestant services regularly in Hagonoy. During all that time our services have been interrupted in minor ways—stones and eggs thrown at the ministers and at the chapel in which the work was being done. Little by little offenders have become more bold, and the outbreak which constituted the offense for which we now ask prosecution was only the culmination of this spirit of bitter hostility. On July 26 last, I dedicated a new chapel built there by the people and all day a band in the house of Señor Cruz, municipal secretary, located immediately across the street from the new chapel kept up its tooting and drumming. As it was the day of town fiesta we made no complaint, but submitted to the annoyance as though it had been unintentional. We were sure that it was not so, for Señor Cruz is a prominent Catholic in Hagonoy, and had threatened repeatedly that he would never permit the Methodists to use their chapel. After the dedication services were interrupted in each instance. On Sunday August 23, however, a mob of two or three score assembled in the street immediately in front of the chapel about the time for evening service and with bamboo instruments, tin cans, bells, and every noise-producing instrument they could find they kept up an incessant din until long past the hour when service could be held. Our Mr. Goodell sent for the police, and the officer who came shrugged his shoulders and declined to interfere. He then proceeded quietly to secure the names of the parties, and with the help of members of the church and congregation succeeded in getting nearly every name. He brought the paper which he and the officers of the church made out in the midst of the din and yelling of this mob, to me, and I transmitted it with a request for investigation and action to the attorney-general the week following the disturbance, with the results already known. Mr. Campbell's report is open to criticism in several particulars:

1. He admits that the disturbance took place as alleged, but suggested no prosecution for the offense! "These facts were fully substantiated by the witnesses examined at the suggestion of Doctor Stuntz." In his interview with the presidente that official stated that "unless a breach of the peace occurs of sufficient gravity to warrant his interference he fears that any unusual action he might take for the protection of the Protestant people might be misunderstood by the rest of his people, etc." (pp. 3-4). If the offense charged does not constitute "an actual breach of the peace sufficient to warrant interference" on the part of the officials sworn to keep order, and protect all worshippers in their rights of peaceable assemblage for divine worship, I would be unable to suggest what would be regarded as such breach of the peace. He admits the facts as set forth in the charge, and then leaves us to infer that he accepts the view of the presidente that no actual breach of the peace took place. This is unsatisfactory to us as complainants.

2. He accepts, apparently without question, the unsupported denials of parties charged with participation in the mob, while we have more than a score of witnesses, including our Mr. Goodell, who lived in Hagonoy for more than a year, and knows nearly all of the participants by name, who saw them at close range while the dis-

turbance was being made, and are ready to swear that they did do precisely what is complained of. For instance the report says (p. 2): "Toma la Cruz disclaims all responsibility for the disturbance, declared that the band had never been inside of his house, and tried to give the impression that the said band was composed of irresponsible boys, sacristanes, altar boys, etc." That is precisely what we expected Señor Cruz to say. But what of the statements of all our witnesses? Why was Mr. Campbell so confiding? What did he expect Señor Cruz to say? Did he expect that he would plead guilty? On page 2 of the report Mr. Campbell says that Señor Cruz had "rented his entresuelo for the purposes of a musical school. The time of the establishment of this school seemed at first suspiciously coincident with the beginning of the work on the new church. No connection however could be established between the pupils of Cruz's musical school and the musicians of the bamboo band, and while there is every indication that Cruz aided and abetted the disturbers, none of the Methodists furnish any proof of this fact." The "musical school" is believed by all our people in Hagonoy to be pure fake. It was not until services were opened in the chapel that this band gathered there. They jeered at all comers, calling them "Protestant dogs" and other names yet more vile. It was not a band learning to play music. It was a crowd of town hoodlums set on by their leaders to break up the services. The report says none "of the Methodists furnished any proof" that Señor Cruz "aided and abetted the disturbers," and yet says "there is every indication that he did so." What were these indications? From whom did he learn of them if not from the Methodists? The presidente said it was a laudable effort on the part of Señor Cruz to encourage musical studies that led to the use of a room immediately in front of the chapel for the performance on tin cans and bamboo instruments, and to perform only at such times as synchronized with the hours of divine service in the chapel. Señor Cruz denied any intent or effort to disturb the services. Where did Mr. Campbell find his "indications" if not among witnesses cited by us from the Methodists? If he had inquired about with any degree of diligence he could have found Methodists by the dozen who would have identified Señor Cruz with the disturbance of August 23, and with that of July 25, and with others of which no complaint was ever made, nor any notice taken.

3. The report further states that Pedro Aduna, one of our local preachers, is "a professional demagogue and agitator, constantly inciting to violence, etc." (p. 3, top, etc.). When it is known that Señor Aduna is far and away the best educated man in the place, and is being talked of as an opposition candidate for the presidente at the next election, some light may be thrown on the statements of the present incumbent of that office who has a laudable ambition to be reelected. Politics are not calculated to give men favorable opinions of those who oppose their plans and policies. It is not true that Señor Aduna was removed from his position as presidente for cause. He resigned. He was immediately made justice of the peace, and only succeeded in getting the consent of the authorities to give up that position after he had resigned at least three times. And, besides, what has the choice of Señor Aduna, or of any other man as a worker in our church, to do with the specific charge that on Sunday evening, August 23, a public and persistent and successful effort was made by parties known and named to break up divine services held in conformity with the law? It is a matter for surprise that a lawyer, if Mr. Campbell is a lawyer, should have permitted irrelevant matter of such a character to have any kind of weight in determining whether the offenders should or should not have been punished.

4. It is all very well for Mr. Campbell to secure a promise from the presidente that he would provide police protection in future; but that is his duty, and has been his duty from the beginning. And such future protection, while past offenders go unpunished, is certain to be ineffectual. It is all very well for the author of the report to instruct the Methodists how to proceed in future, but what of the disturbance of which we make definite and detailed complaint?

For this and other reasons the report is unsatisfactory, and I respectfully ask that the attorney-general be requested to prosecute the offenders named in my original complaint.

Yours, truly,

HOMER C. STUNTZ,  
*Presiding Elder, Methodist Episcopal Church, Philippine Islands.*

[Fourth indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., October 3, 1903.*

Respectfully referred to the attorney-general, inviting attention to the within note of Doctor Stuntz. Is there any provision in the Spanish law for the prosecution of such an offense as that described in the within?

WM. H. TAFT, *Civil Governor.*

[Fifth indorsement.]

OFFICE OF THE ATTORNEY-GENERAL OF THE PHILIPPINE ISLANDS,  
*Manila, October 12, 1903.*

Respectfully returned to the civil governor inviting attention to the inclosed statement of Mr. Richard Campbell.

L. R. WILFLEY, *Attorney-General.*

[Inclosure to fifth indorsement.]

DEPARTMENT OF JUSTICE OF THE PHILIPPINE ISLANDS,  
 OFFICE OF THE ATTORNEY-GENERAL,  
*Manila, P. I., October 12, 1903.*

SIR: With respect to the present condition of the Spanish law in relation to offenses against religious worship, I have the honor to state that the Spanish Penal Code, in providing penalties and liabilities for offenses against religion, has in contemplation only offenses against the religion of the State. Section 3 of chapter 2 of Book 2 of said code, which treats of "Crimes in connection with religion and worship" makes no provision for the punishment of offenses against any form of religious worship except those directed against the Catholic or state religion.

So clear is it that no other form of religion was contemplated or tolerated, that article 226 of said code provides in terms that "Those who shall publicly perform acts of propaganda, preaching, or other ceremonies which are not those of the religion of the state, shall incur the penalty of prisión correccional in its minimum degree."

With the passing of the Spanish sovereignty, all provisions of law relating to a state religion were swept away, and it is assumed that the provisions of section 3 of chapter 2 of Book 2 of the penal code, are therefore repealed. The only remaining provision of the penal code, which might be held to apply to the case in point, is article 571, which provides that "The following shall be punished with the penalty of arrest of from one to ten days, and a fine of from 15 to 125 pesetas:"

"1. Those who shall disturb any act of a religious character in any manner not foreseen in section 3, chapter 2 of Book 2 of this code."

It will be seen that the section cited supra is based upon the chapter which is hereinbefore held to be repealed, and therefore that the words "any act of a religious character" were meant to apply to the religion of the state. It seems certain, therefore, that to hold that this section applies to the case in point would be to give the law an interpretation never intended or contemplated by the Spanish law-making body.

Whether this view shall obtain, or whether it may be held that the penal code has been so amended by the organic law as to be susceptible of application to the case in point, is open to question. I am of the opinion, however, that the latter is an extremely doubtful interpretation.

It is respectfully maintained that the within report relating to religious disturbances in Hagonoy is a fair and accurate presentment of the facts in the case as the writer found them. The allegations of Doctor Stuntz as to the actual disturbance were substantially sustained by the members of the local Methodist church examined at his suggestion, and also by the presidente of the town. Doctor Stuntz's witnesses failed, however, to sustain his charges against La Cruz and others, and in fact the exhorter, Aduna, and the other Methodist witnesses specifically denied any knowledge of La Cruz's connection with the disturbances. Indeed, the only confirmation of Doctor Stuntz's charges against La Cruz developed during the inquiry was had from the presidente, who stated that La Cruz was a particularly bitter opponent of Methodism, and that, while he was unable to connect him directly with the occurrence complained of, not having been to the vicinity at the time, he was of the opinion that La Cruz was one of the prime movers in causing the trouble.

Considering the fact that La Cruz is municipal treasurer and apparently a man of influence in Hagonoy, and that Doctor Stuntz's witnesses had practically acquitted the former of all responsibility in connection with the disturbances, the statement of the presidente as to Cruz's real connection with the affair, which was made freely and frankly, made a favorable impression on the writer, and he was thereafter inclined to accept the presidente's views as to the general situation.

The witnesses were questioned closely as to the prevalence of ill feeling in the town against Protestants, if their meetings had ever been disturbed previous to the building of the church, and if they had ever been threatened, persecuted, or annoyed because of their religion.

The majority testified that they knew of no ill feeling against them on religious grounds, that their meetings had never been interrupted subsequent to the building

of the church, and that they had never been threatened, persecuted, or annoyed because of their religion. One man, however, declared that stones had been thrown on one or two occasions on the roof of the house in which their meetings were held, and Aduna testified that there was much bitterness against them on the part of the Catholics, and that their meetings had been frequently disturbed. Not one of the witnesses, however, would implicate directly any person in the town with the disturbances.

The chief clerk of this bureau, who accompanied the writer to Hagonoy, and who acted as interpreter, supports the views and conclusions set forth in the report in detail and states that if it is defective in any respect it is in that it understates the responsibility of Aduna in the premises.

The writer was assigned to make the investigation in question, and when he had submitted his report of the facts in the case he felt that he had gone to the limit of his instructions. He did not consider it to be any part of his duty to decide whether or not the alleged participants should be prosecuted. This he believed to be the province of the attorney-general or of the Civil Commission. The question here presents itself, however, if, as Doctor Stuntz has stated, Mr. Goodell witnessed the occurrence and had ocular proof of the violations of the law, it may be pertinent to inquire why it was necessary for Doctor Stuntz to ask for an investigation to reestablish facts already in his possession, and why did not Mr. Goodell then and there file a complaint with the local justice of the peace?

The writer does not feel called upon to reply to Doctor Stuntz's personalities further than to say that he did his duty to the best of his ability and without bias or prejudice.

Respectfully submitted.

RICHARD CAMPBELL.

Hon. L. R. WILFLEY,  
*Attorney-General, Manila, P. I.*

[Sixth indorsement.]

OFFICE OF THE CIVIL GOVERNOR,  
*Manila, P. I., October 14, 1903.*

Respectfully returned to the Attorney-General with instructions to institute proceedings against Señor Cruz and the other disturbers of public worship in Hagonoy if the code justifies it; if not, of course the matter will have to pass unpunished, and we can cure it only by amending the law.

WM. H. TAFT, *Civil Governor.*

[Seventh indorsement.]

OFFICE OF THE ATTORNEY-GENERAL OF THE PHILIPPINE ISLANDS,  
*Manila, October 19, 1903.*

Respectfully returned to the executive secretary for the Philippine Islands, with the statement that the original complaint of Presiding Elder Stuntz relating to the disturbance at Hagonoy, has been forwarded to Señor M. Crisostomo, provincial fiscal of Bulacan, with instructions to prosecute the members of the bamboo band complained of for violation of subsection 1 of article 574 of the Spanish Penal Code, which provides punishment by fine for "those who shall institute or take an active part in 'callithumpian concerts' or other tumultuous meetings, thereby offending any person or disturbing public tranquillity." Prompt prosecution and an early report of its result has been enjoined, but it is doubtful whether satisfactory results can be obtained through the present prosecuting officer. In this connection attention is invited to the concluding paragraph of the within report of Mr. Campbell's of September 7, 1903.

L. R. WILFLEY, *Attorney-General.*

[Eighth indorsement.]

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., October 20, 1903.*

Respectfully returned to the Attorney-General.

I am not at all satisfied with Mr. Crisostomo, provincial fiscal of Bulacan, and I am anxious that he should resign. His resignation might be requested on the ground not that he is lacking in integrity, but that the conduct of his office has not been up to the standard of skill and competence which is required.

WM. H. TAFT, *Civil Governor.*

[Ninth indorsement.]

OFFICE OF THE ATTORNEY-GENERAL OF THE PHILIPPINE ISLANDS,  
*Manila, P. I., October 30, 1903.*

Respectfully returned to the civil governor.

The provincial fiscal of Bulacan has been advised of the contents of the preceding indorsement, as well as of the verbal statement of the civil governor to the solicitor-general with reference to the date of presenting his resignation.

L. R. WILFLEY, *Attorney-General.*

[Tenth indorsement.]

EXECUTIVE BUREAU,  
*Manila, November 3, 1903.*

Respectfully referred to the attorney-general.

Let the prosecution mentioned in the seventh indorsement proceed.

WM. H. TAFT, *Civil Governor.*

## EXHIBIT No. 48.

MANILA, P. I., *July 13, 1903.*

SIR: Pursuant to your instructions, I proceeded to the town of Bacoor, province of Cavite, on Wednesday, July 8, to investigate the arrest and imprisonment of the native Presbyterian congregation of that town by the presidente and municipal authorities.

I found the facts substantially as reported by Governor Trias in his report to the executive secretary.

It appears that upon complaint of a municipal councilor named Gil Ignacio, the presidente and municipal police, on the night of July 4, about 11.30 p. m., arrested the entire Presbyterian congregation, twenty persons in all, including the two preachers, Dalmacio de la Cruz and Pablo Evangelista, who had come from Manila to hold the services. The services were held on a vacant lot in the barrio of Alima, adjoining the house of one Crispina José, who, although she was not present at the meeting, was also placed under arrest and afterwards convicted of breaking the ordinances of the town, for no better reason than because she sat at her window and listened to the singing and exhorting of the Presbyterians.

The charge was the infraction of ordinances of the town relating to illegal assemblage in suspicious places and at unusual hours of the night. The services began, as far as can be ascertained, about 8 o'clock and lasted until 10, and at the end of the services a general discussion seems to have arisen on theological questions, which lasted up until 11.30, when the police arrived.

I examined in all fifteen persons, including the presidente, the complaining witness, Gil Ignacio, and the man Esteban Lazaro, who is mentioned by the Reverend Mr. Rodgers in this complaint as being in his opinion the person directly responsible for the protracted and heated discussion which led to the arrests.

No evidence can be gleaned that Esteban Lazaro was there in any other capacity than as an ordinary listener or worshiper, and I think, therefore, that the suspicion of Mr. Rodgers is without foundation.

All the alleged "infractores" we could find in the town were also examined; also the American school-teacher, a representative of the division of information of the Philippine constabulary located in Bacoor, and the two men who are looked upon as the leaders of the Protestant movement in the town. Their names are Nicolas Gonzales and Narciso San Miguel.

The testimony is appended hereto. Nothing was developed tending to show that the arrests were the direct result of any concerted action on the part of the Roman Catholics. Indeed, there was a marked divergence of opinion among the Protestants as to the state of feeling in the town toward their religion. This, however, I attributed partly to the fact that they appeared intimidated by their recent experience and partly to their illiteracy, for the evangelical movement in Bacoor has a certain Scriptural significance in that its adherents seem to be confined almost entirely to the fishermen class, to whom Spanish is apparently almost as alien as English. The majority of the Protestants, however, especially the two leaders aforementioned, testified that the feeling against them was very strong; that they were subjected to constant annoyance and persecutions; were derided and laughed at in the streets, and that their services were stoned almost every Sunday. All the information that can be gathered from outside sources and from the situation generally sustains these allegations. Religious feeling is running high, and I entertain no doubt whatever that the arrests were the direct result of this feeling, and that

the alleged infraction of town ordinances was merely a pretext to harass the Protestants and to satisfy religious grudges.

If any further proof is needed that the arrests were instigated purely by religious intolerance it is to be found in the fact that the two preachers were sentenced to sixty days' imprisonment and fined 60 pesos, while the others got off with ten days and 10 pesos, evidently on the principle that the teacher of a "dangerous" creed is more guilty than the disciple.

When asked for an explanation of this discrimination, the presidente said that the preachers were guilty of breaking the ordinance with respect to "transeuntes," as they were residents of Manila, besides the infractions of the ordinances prohibiting illegal assemblages, with which the others were charged. This excuse will not hold water, and in fact has no better foundation than the rest of his shuffling explanations.

I am convinced that he sees he has committed a grave mistake, and that this occurrence will probably teach him a lesson in discretion, if not in tolerance. He is not a bad type of Filipino, has some capacity, is fairly intelligent, and I think that, to use the language of Governor Trias, he is "Quixotic" rather than vicious.

Under ordinary circumstances I should recommend the summary removal of the presidente, but in view of the excited state of public feeling in Bacoor and in the province of Cavite I hesitate to advise any action which might add to the difficulties of civil government in that disturbed region.

Mr. Rodgers is not inclined to take a serious view of the matter, and in my judgment a reprimand may prevent any further interference in religious matters on the part of the official in question.

The ordinances for the alleged infraction of which the arrests were made are attached hereto. They would be intolerable in any ordered community, but considering conditions in Cavite Province it can hardly be maintained that they are without justification.

I suggest that the Presbyterians obtain the necessary permission from the municipality to hold the services, and that the meetings be held in some particular place specified in the permit, and that they avoid, if possible, the very appearance of conflict with the ordinances or authorities of the town.

Respectfully submitted.

RICHARD CAMPBELL.

HON. L. R. WILFLEY,  
*Attorney-General of the Philippine Islands, Manila, P. I.*

*Part of Exhibit No. 48.*

PRESBYTERIAN MISSION, *Manila, P. I., July 6, 1903.*

HON. ARTHUR W. FERGUSON, *Executive Secretary.*

DEAR SIR: After our conversation this evening it occurred to me that it might be of some assistance to you and ourselves in presenting this matter to the governor if I should make a statement in writing.

I inclose the same, and beg that you will use it or not, as you see fit.

Thanking you again for your kindness in this matter,

I am, yours, sincerely,

JAMES B. RODGERS.

The attention of the honorable the civil governor of the Philippines is called to the following statement:

The Presbyterian Church has a congregation of Filipinos in the town of Bacoor, province of Cavite. Twice a month lay preachers go from Manila to direct the Sunday services. On July 4 Señor Dalmacio Cruz, accompanied by a friend, went to this town and at the usual hour held a service in the barrio called Banalo in said town. Services have been held in Bacoor for nearly two years with great regularity, and when they were begun notice was given to the municipal authorities of the purpose of the meetings, that there might be no misunderstanding. No serious disturbance has ever taken place, although some small disturbances have occurred from time to time. On the 4th instant the service was closed at 9.50 p. m., and part of the congregation had left the place. The remainder were discussing some questions raised by one Esteban. The discussion was quiet and orderly. At about 10.45 the municipal police arrested the people who were there—the two preachers, nineteen men and two women—and confined them in the tribunal. The presidente of the place then, or in the morning, asked some questions and wrote out the answers and his sentence. The accusation says, I am informed, that they were charged with disturbing the public peace and the sentence that they were condemned for having transgressed a municipal ordinance which prohibits public meeting without due permission (the text of the ordinance really prohibits meetings that are illicit or of a

suspicious character in suspicious places) and condemns the two preachers and the owner of the house where they were arrested to sixty days in prison and 60 pesos fine and the other to ten days and 10 pesos fine.

I immediately saw the executive secretary, Mr. Fergusson, and he telegraphed for information. In his answer, Governor Trias states, evidently quoting the words of the municipal presidente, that these people were indeed arrested and sentenced for holding meetings at advanced hours of the night, and disturbing the peace of the inhabitants in a suspicious barrio of the town of Bacoor.

In answer to this I beg leave to state that the service was closed at 9.45 and that what followed was a quiet conversation on the matters they had been discussing.

That there has been no declaration that the barrio of Banalo was suspicious; that the teniente del barrio was present at the service and offered no objection to the same; that services had been held there for several months without formal protest. It is also noteworthy that the man Esteban, who came in and asked the questions, was not arrested by the police, which leads to the suspicion that he was a stool pigeon sent for the purpose of prolonging the discussion.

We understand also that there is no municipal ordinance in regard to the keeping of hours, unless it is a remnant of the days of military rule. It has not been even hinted at in the past. Secondly, the telegram reads: "Because there existed ordinances in force in the premises (?), and no meetings of any kind can be held without the permission of the municipality." During the first months of our services in Bacoor I myself and the preachers who went there gave formal notice to the municipal authorities of our mission, and the fact was noted. No formal permission was needed. No notice has been given us since of the necessity of such permission, and the presence at the meeting of the municipal counselor is evidence enough that there was nothing illegal about the meeting, even in a technical sense. Thirdly, the telegram reads: "As well as another ordinance relative to the presence of transients, approved by the provincial board on the 26th of June." Only two of the persons were transients, and they were well known in town and could in no sense be considered "sospechosos." I also call attention to the fact that the law is of recent date, and that this was the first time after the passage of it that our preachers had been in Bacoor. The residents of the town declare that no such ordinance has ever been published, and naturally persons coming from Manila were ignorant of the ordinance. I submit that ignorance of the law in this case certainly excuses the infractors.

We have no desire to have vengeance on anyone, but we do protest energetically against such an abuse of power as this and request that such action be taken as will make clear to the public of Bacoor that the principle of religious liberty must be maintained. I say religious liberty because there is no explanation of the acts of the president of the town, except his desire to use the power in his hands for the sake of stamping out the little congregation that is growing up in that town.

Thanking you for your kindly attention to this matter,

I am, sincerely, yours,

JAMES B. RODGERS.

---

THE GOVERNMENT OF THE PHILIPPINE ISLANDS, EXECUTIVE BUREAU,  
*Manila, August 22, 1903.*

SIR: The charges, evidence, and recommendations of the provincial board of Cavite in the case against you having been received and duly considered, the provincial board having found you guilty of using your office to interfere with the free right of religious worship by certain persons peacefully pursuing that right in your municipality, and having recommended your dismissal, I have the honor to inform you, by direction of the civil governor, that the recommendation is approved and you are accordingly hereby removed from the office of municipal president of the municipality of Bacoor, province of Cavite.

Very respectfully,

A. W. FERGUSSON,  
*Executive Secretary.*

Mr. PEDRO MALINIS,

*Bacoor, Cavite, P. I.*

(Through the provincial governor of Cavite, P. I.)

## EXHIBIT J.

---

### REPORT OF HON. LUKE E. WRIGHT, COMMISSIONER, AS TO HEMP.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
DEPARTMENT OF COMMERCE AND POLICE,  
*Manila, December 5, 1903.*

By resolution of the Commission of the 11th of August, 1903, there was referred to me, as a committee, draft of bill already prepared, with notes of discussion thereon at public session looking to the establishment of a system of hemp inspection in the Archipelago, with directions to report a draft of an act covering the subject.

After examining the draft prepared by Secretary Worcester and that suggested by the chambers of commerce as a substitute therefor, and giving weight to the information elicited as the result of the public discussion criticising both bills, I have reached the conclusion that it is not desirable or advisable to enact any legislation providing for a system of hemp inspection.

American and foreign purchasers of hemp imported from these islands have, at various times, complained of the quality of the hemp thus exported and have called attention to the fact that the high grades of hemp which formerly predominated are now but little produced, and that the lower and inferior grades which are produced and exported do not fully and satisfactorily meet the requirements of the trade. They assert, and no doubt truthfully, that in order to produce the higher grade of hemp, which they prefer in their business, it is necessary to use a flat rather than a serrated knife in "pulling" the hemp in the first instance, and suggest some form of legislation which will require the native producer of hemp to use a flat knife. It appears that the reason why the knife with serrated edges is used is because, although an inferior grade of hemp is produced thereby, a larger quantity can be produced within a given time than in cases where the flat-edged knife is used, with less exertion to the operator, and that the difference in value in the markets of the world between the higher and lower grades of hemp is so small that it pays the producer best to produce the lower grade, and he naturally produces the quality of hemp which pays him best.

It does not seem to me that the Commission has any right to prescribe what kind of tools an agriculturist shall use in making his crop or in any way interfere with his natural right to raise or manufacture products of a higher or a lower grade. The purchaser of his products can regulate the quality of the articles produced by paying a proportionately higher rate for the better article so as to make it to his interest to produce it.

What seems to be really wanted is that we shall by legislation require natives raising hemp to produce only the higher grades, although it pays them best to produce the other sort. This, I take it for granted, we can not think of doing.

It would be within the range of legitimate legislation, however, if it were of value, to formulate a system of hemp inspection, but an investigation of the methods now in vogue of assorting the hemp after it comes into the hands of the local buyer discloses the fact that the hemp is assorted and graded in a way well understood by and satisfactory to the trade, so that the purchaser here fully understands what he is buying from the farmer and the foreign purchaser what he in turn is buying from the merchant in the islands.

If the hemp is improperly assorted or fraudulently packed the loss does not fall on the foreign buyer but upon the local merchant, and he in turn must look to the person from whom he bought. Every local buyer has his own inspector. The desirability is not perceived therefore of establishing a system of government inspection. Aside from the expense involved the unadvisability of multiplying useless officials is obvious.

The Commission will, of course, when it comes to enact its penal code, provide by proper law adequate punishment for fraudulent packing of hemp or of any other article of commerce, and this it seems to me is all that is required.

I therefore respectfully recommend that the Commission refrain from legislating on the subject, leaving buyer and seller as at present a free hand in regulating their own affairs.

Very respectfully,

LUKE E. WRIGHT,  
*Secretary of Commerce and Police.*

The Honorable PHILIPPINE COMMISSION.

## EXHIBIT K.

### PETITION OF AGRICULTURAL SOCIETY OF PANAY AND NEGROS FOR ABOLITION OF DUTY ON PHILIPPINE SUGAR.

MANILA, December 18, 1903.

SIR: The undersigned, in the name of the Agricultural Society of Panay and Negros, have the honor to appeal to you soliciting that you be pleased to lend your effective support to the petition formulated by that entity that the customs duty on Philippine sugar entering the ports of the sovereign country be abolished as the only measure that can save agriculture from the ruin to which it is doomed.

At one time agriculture in the Visayan region was the most flourishing in the archipelago, but many disappointments have contributed to its impoverishment to the extent that the planter is now compelled to sell his products at a price lower than the cost of production, as we shall demonstrate.

During normal times in order to produce fifty piculs of superior assorted sugar the following expenditures would be required:

Cost of plowing, cultivating, manufacture and transportation to the port of Iloilo .....	\$150.00
Interest on \$150 at 20 per cent per annum .....	30.00
Total .....	180.00

Superior assorted sugar sells in the Iloilo market to-day at \$4.37½ the picul, making a total for our 50 piculs of \$218.75.

At first sight it would appear that the planter makes a profit of \$38.75 on each 50 piculs, but if the interest on the capital invested is added to the expenses mentioned as well as wear and tear on the machinery, etc., it will be seen that the planters, far from reaping a profit, suffer a not inconsiderable loss.

As a matter of fact, the following should be added to the expenses already mentioned:

Interest at 20 per cent per annum on the capital employed per hectare necessary to produce 50 piculs of sugar, calculated at \$100 .....	\$20.00
Interest at 20 per cent per annum on cost of two carabaos to produce that amount of sugar .....	40.00
Interest on capital invested in machinery, agricultural implements, etc., and buildings, proportionately to the 50 piculs .....	20.00
.....	80.00
Adding the \$180 .....	180.00
Grand total .....	260.00
Value of 50 piculs, at \$4.37½ each .....	218.75
Loss to planter .....	41.25

At first glance the interest allowed for capital appears excessive, but if the present condition of the Iloilo money market is considered, the rate given will be found to be the lowest.

It is true that some merchants in the said market charge from 12 per cent to 13 per cent annually, but at the same time they bind the planter to the following conditions:

- (a) To the payment of a commission of from 2 to 2½ per cent.
- (b) To buy all material necessary for packing the sugar ready for market from them.
- (c) To use the ships of the merchant and money lender for the transportation of his sugar.
- (d) To sell the sugar to the merchant advancing the money.

(e) To pay a fine of 1 peso per picul of sugar that the planter fails to deliver; so that any planter who, for example, has agreed to deliver 4,000 piculs of sugar in consideration of a loan of \$4,000 and through circumstances beyond his control, such as fire in his cane fields, losses through the ravages of locusts, etc., is unable to gather more than 3,000 piculs would be bound to the payment of \$1,000 as a fine for such shortage in delivery, aside from having to comply with all of the other conditions of the contract.

As there is not a place in any town in the archipelago where the polarization of sugar can be determined, it is classified by the buyer often unjustly and to the detriment of the planter, who, being financially unable to raise his crop, can much less assert his rights and make them prevail before the proper authorities.

For all of these reasons the planter nearly always prefers to pay 20 per cent interest rather than to submit to the harsh conditions laid down by the merchant who, though he charges not more than 12 per cent or 13 per cent, is really the one who offers the least advantages, because in the end the planter would pay an interest on the money borrowed of not less than from 40 per cent to 50 per cent.

It is seen, therefore, that agriculture, at least in the Visayan region, is day by day approaching ruin, and it is only the support of the government by abolishing the Dingley tariff on Philippine sugar that can save it.

The planters ask for the abolishment of the said tariff not only in order that the Philippine sugar may find a market in the United States, but also to compel the Japanese market to pay just prices for our sugars.

According to statistics, 1,332,892 piculs of Philippine sugar were consumed last year by Japan and China, but in spite of this consumption native sugar did not bring a good price, for the simple reason that Japanese merchants, knowing that there are no competitive buyers, have been able to purchase our sugar at the lowest possible price.

The day that the Dingley tariff on Philippine sugar would be abolished, Japanese merchants would have to pay at least the same price that it brought in the United States.

Perhaps people will not be wanting who will object to this proposition on the grounds that during the past rule the Philippines had no market of its own for its products, and yet this did not result in the decadence of agriculture. Anticipating this objection, we would say that since American occupation there has been a radical change in the markets of the Archipelago, in that prices of articles brought from foreign countries have increased twofold, and in some instances a hundredfold, while on the other hand native products have remained stationary as regards price.

The rise in price of imported articles, specially of rice, has been accompanied by many other evils that have placed the planter in an embarrassing position. Among the latter we might mention the rinderpest, the locusts, the plague, lack of capital, and brigandage, which is the necessary consequence of every revolution.

To approach the subject in a different light, we would state that if the markets of the sovereign country have been thrown wide open to Hawaiian sugar, we believe that this boon ought to with more reason be granted to Philippine sugar.

As a matter of fact, the methods employed in the Philippines in working the cane are primitive and defective to a degree that the planter is able to obtain less saccharine juice than in other places where more perfect machinery and a more scientific method of cultivation and sugar making are employed.

This consideration would of itself be sufficient to demonstrate that the Philippines need the protection of the Government more than Hawaii; but there are other factors that must not be lost sight of, such as the distance of these islands from America, that means increased expenses for freight, marine insurance, exchange, commissions, etc.

On account of these factors it is more than probable that our sugar, even if the Dingley tariff is abolished, could never compete with that of Hawaii, Cuba, or Porto Rico, and much less with that of America.

It is unnecessary for us to dwell upon the great and favorable effect which the abolition of the Dingley tariff would have with relation to the present political status of this country, for fortunately we address an authority who has had the singular privilege, accorded only to men of peculiarly great genius, to know to perfection the conditions of the archipelago and the aspirations and needs of its inhabitants.

Very respectfully,

J. DE LEON.  
E. DE LA RAMA.

The Honorable the CIVIL GOVERNOR OF THE PHILIPPINES.

EXHIBIT L.

STATEMENT OF COLONEL COLTON, COLLECTOR OF CUSTOMS AT ILOILO, AS TO NECESSITY FOR REMOVAL OF DUTY FROM PHILIPPINE SUGAR.

Sugar was first introduced into the Philippine Islands in 1858. Experiments in cultivation were conducted during the same year in the vicinity of Talisay. The first official record as to the results of the experiments is the exportation through Iloilo Harbor in the year 1859, of 5,427 tons of raw sugar. Exportations gradually increased until 1899. The exportations in 1869 amounted to 7,344 tons; in 1879, to 47,625 tons; in 1889, to 112,007 tons; in 1899, to 154,462 tons. The largest exportation was in 1892, when 165,897 tons were exported. Since 1898, owing to the disturbed conditions, the loss of animals, and the lack of capital, production and exportation have been greatly reduced, dropping during the year 1901 to 34,500 tons. In the early years of sugar production only wooden rolling mills worked by cattle were used. This was a slow process, resulting in the loss of 40 to 50 per cent of the sugar. Few of these mills are still in use, but most of the sugar now produced is by the use of steam mills, extracting from 3½ to 7½ tons of juice per day with a loss of from 20 to 40 per cent. The sugar produced is classified as follows: No. 1, containing 88 per cent saccharine; No. 2, 85½ per cent; No. 3, 81 per cent, and damp, 70 per cent. The proportion of the different grades produced is about as follows: No. 1, one-fourth; No. 2, three-sixteenths; No. 3, and damp, nine-sixteenths. Sugar polarizing as high as 92 per cent is produced by old wooden mills in some localities of Panay. The expense makes a large percentage of loss. Under ordinary circumstances Negros should produce 150,000 tons and Panay 50,000 tons of sugar annually on land now under cultivation. Men of long experience in the business assert, that, with suitable machinery, transportation facilities, and capital, the production could be doubled without extending the area under cultivation. A conservative estimate of the land suitable for sugar production in Panay and Negros, which is not now cultivated, is 90 per cent in the former island and 70 per cent in the latter island. The uncultivated land in Panay is principally in the interior. At present there is no means of transportation. Negros sugar is brought to market by lighter from the estates of the owners from 5 to 14 miles in the interior, depending solely on the condition of the roads, which are generally bad. The actual cost of producing and marketing, at Iloilo, sugar, per ton, under existing conditions, is approximately as follows: Tilling and planting, \$22; cutting, carrying to mill, per ton, milling, bagging, and shipping, \$18; lighterage and delivery, \$6; total, about \$56, Mexican. These figures exclude material items, like interest on investment, taxes, or rents. It is hard to estimate the present selling price of sugar in the Iloilo market, which is based on the price in foreign markets, and is about \$64, Mexican, per ton, which is not above the cost of production in the most favorably located estates, and is considerably less than the cost of production in estates in the interior. Since the American occupation, the quantities in pounds and value of sugar exported through Iloilo for the fiscal years are as follows:

Year.	Number of pounds.	Value.
1899 .....	96,831,930	\$1,873,183
1900 .....	116,258,922	2,103,344
1901 .....	77,089,391	1,471,281
1902 .....	135,687,751	2,471,820
1903 .....	226,056,793	3,649,536
Total.....	651,924,787	11,569,164

At first glance, it seems from the returns of 1903 that sugar planters are subject to congratulations upon the substantial increase both upon price and quantity of their product and apparently improved conditions. As a matter of fact, owing to the increased cost of labor and extraordinary expenditure for animals to replace those killed by rinderpest, they are more deeply in debt at the close of the 1903 season than at any previous time. Had it not been for the low ruling rate of exchange enabling buyers to pay more in Mexican currency on practically the same gold range prices as last year, a large percentage of the planters would have been entirely ruined and compelled to abandon their estates. The planters have been steadily losing ground since 1899, and have only been encouraged to continue the operation of the estates by hope each year that the product would be admitted to the markets of the United States at a much more favorable rate of duty if not free. The statistical records of the custom-house show 71,000,000 pounds of sugar exported last year in vessels clearing for the United States. The vessels, however, actually cleared for the Delaware Breakwater "for orders," and a very small proportion of the sugar was shipped into the United States, the larger portion being carried to Canada or England, and all sugar entering the United States, except one cargo entering free, resulted in a heavy loss to the shippers. The islands of Panay and Negros are thickly populated, and the inhabitants and business interests depend directly or indirectly upon sugar industry for support at this time in exceedingly precarious condition, and unless something is done by Congress to relieve the situation feel sure that it is no exaggeration to say that it must collapse resulting in great distress to the native inhabitants and producing a chaotic condition in business, increase ladronism, and spirit of insurrection. In view of present serious conditions almost certain ruin of the industry in the islands in the absence of speedy relief. The matter would seem worthy of early consideration and more liberal treatment at the hands of the home government. If the whole Philippine production of three or four hundred thousand tons were admitted free into the United States, it would only mean much less beet sugar imported from foreign countries and import duty might be collected thereon and fairly distributed as reward to industry in Philippines. This would stimulate revival of import trade here and create additional revenue for the insular treasury, increasing the importation of American goods into the Philippines. Congress could take no action which would have so salutary an effect among Filipinos or make them more contented and loyal than to give them the benefits of our markets upon proper basis and thereby the prosperity which they were led to expect under American Government.

### STATEMENT OF GOVERNOR WRIGHT AS TO NECESSITY FOR ACTION BY CONGRESS IN REMOVING DUTY ON SUGAR AND TOBACCO.

The following statement is furnished by Reyes and others: Sugar industry prosperous until 1884, when the bounty system was introduced in Europe for the purpose of aiding beet-sugar industry. As this prospered the cane industry declined. Not only in the Philippines, but everywhere, planters in time were compelled to borrow, the estates became heavily encumbered, eaten up by usurious rates of interest, foreclosure resulting in many instances. McKinley-Dingley tariffs operated against Philippines, which, with annexation, Hawaii practically closed United States to Philippine sugars—the Pacific coast absolutely—and it may be safely said that the only cargo sent to the Atlantic coast ports within past five years was of a speculative character, based on probable action Congress in tariff matters. Japan-China war transferred Formosa to Japan with free trade between the two. As a consequence, while Philippine sugars pay duty about \$10, gold, per ton, Japan has been and still is large consumer Philippine sugars; but Formosa, with such advantage, will no doubt shut out that market soon, as aim will be to produce sufficient to meet all requirements of Japan. While the Philippines is country best adapted to sugar production, only free, fair market is China, where have to compete with Java sugar. Industry there is in higher state of development than here. Therefore at some disadvantage. The causes operating against industry past five years are the Dingley tariff, annexation Hawaii, Philippine insurrection, and consequences of high-priced labor, higher cost rice through necessity importation, loss carabaos, loss credit to planters through want faith on part of capitalists in industry under present conditions. Pampanga, Batangas, Laguna, and Panay sugar plants destroyed by insurrection. Negros almost bankrupt. Seventy-five per cent of the estates will probably have to close. Planters completely disheartened at bringing of Formosa under Japan. Only solution is to put the Philippines on the same basis as Hawaii as regards sugar, that is, complete abolition Dingley tariff. United States market formerly best. Must be restored in order to restore confidence and revive industry, otherwise it will die. State aid, some form or other, therefore, necessary to save situation. Comparative statement exports sugar from Manila, Cebu, and Iloilo in 1897, 1898, shows 3,332,010 piculs and 2,859,661, respectively. Dwindled in 1902 to 1,473,160 piculs. Full figures by mail.

Tabacalera Company claims tobacco industry fallen off greatly past five years only. Due partly change sovereignty, principally to abnormal conditions due to war followed by famine and disturbance. During Spanish régime, leaf tobacco had safe market Spain, as government compelled contracting company to purchase certain amount tobacco in Philippines. This stipulation omitted last contract. Philippine tobacco inferior to Habana, and can compete only because cheaper. Brazil and other South American tobacco, although inferior in quality, is cheaper still and can compete all markets. Market Dutch Indies closed to Philippine manufactured tobacco, duties being 2 florins per kilo as against half florin on tobacco rest world. In order for the Philippines tobacco to enter the United States it must be free. Only way to compete with better quality Habana tobacco and cheapness South American. With duty of 50 or even 25 per cent, Dingley tariff will exclude it.

### REPORT OF AN INVESTIGATION MADE BY JAMES ROSS, SUPERVISOR OF FISCALS, CONCERNING ALLEGED SUFFERINGS AND DEATHS AMONG CERTAIN LABORERS SENT FROM MANILA DURING THE MONTH OF JULY, 1903, TO WORK ON THE BENGUET ROAD.

MANILA, P. I., *September 1, 1903.*

SIR: In compliance with your verbal instructions of August 6, 1903, I have made an investigation of the reports concerning the alleged sufferings and deaths from starvation of certain laborers organized in Manila during the month of July, by Mr. Pascual H. Poblete and his assistants, and sent to Dagupan and Twin Peaks for the purpose of working on the Benguet road. During the course of this inquiry I have visited the provinces of Laguna, Tarlac, Pangasinan, and Benguet, and have examined a large number of witnesses, the testimony of whom is herewith presented.

My object has been, as directed by you, to obtain all the information possible and to ascertain the whole truth with reference to the reports that have been so freely circulated by certain individuals through the means of conversations, written communications, and the public press concerning the alleged sufferings of the "Poblete Obreros." Having completed the investigation, as directed by you, I now have the honor to submit the following report of the same.

On the morning of August 7 I proceeded from Manila to Calamba, province of Laguna, and with the assistance of the municipal officials succeeded in finding several men who had been members of the so-called "Poblete Obreros" and took their statements, which are as follows:

*At Calamba, August 7 and 8.*

#### STATEMENT OF MAXIMO TRASONA.

I live in Calamba, and was a member of a company of laborers that went to Benguet in July last. I joined the company in Manila on July 15, upon the solicitation of Andres Egasani, who accompanied me there. No other laborers went to Manila with me. I united with the other workmen in Manila at Poblete's house. As an inducement in the way of salary, etc., for my joining these laborers, Egasani offered me 2 pesos a day and rations. It was understood that when we got to Benguet we were to work on the road there.

I did not have any conversation with Poblete about the work I was to do or the compensation which I would receive. I spoke only with Andres Egasani.

I and my companions left Manila for Benguet on the 7th of July, taking the train for Dagupan and arriving there about 9 p. m. of the same day. There were a great many of us.

Before leaving Manila for Dagupan we were furnished three days' rations, which consisted of rice and meat. Upon arriving in Dagupan we had supper and spent the night in stores in the market place, sleeping on the floors which were made of bamboo. Nothing occurred to us in Dagupan. We left Dagupan the following day at about noon. Before leaving we had breakfast.

We started in the direction of Benguet. The first night we arrived in a town, the name of which I do not remember, and passed the night there. We started out the next morning and arrived at Twin Peaks at about 4 or 5 o'clock in the afternoon. Upon arriving at Twin Peaks Andres Egasani had a conversation with the officer in charge there. After the conversation we had supper and rested. The following

morning Andres again had a talk with the same man, after which he came out of the house, called us together, and said, "Come on, let's go back to Dagupan" ("Vamos Dagupan").

Upon arriving at Twin Peaks we had supper. I was not molested in any way by any person at that place. We left for Dagupan during the afternoon of the day when Andres Egasani told us to return and arrived in Dagupan in about two days. Egasani gave us no reason for his desire to return.

From Dagupan we returned to Manila. Some walked faster than others and arrived in Dagupan earlier than the rest. All of the company to which I belonged left Twin Peaks together, no one remaining there to work. This was the same company with which I left Manila. There were many laborers in it. I do not know of any of my companions having died on the trip. There were only a few laborers in the party which arrived with me in Manila. I do not know where the others were. When we arrived in Manila we went to the court in Intramuros. I do not know why; afterwards we united in Poblete's house. I did not have any conversation with Poblete, neither did any of my companions; we only talked with Andres Egasani. I do not know what took place. After several days I returned by boat to Calamba.

MAXIMO ELASEGUI.

I live in Calamba, and am acquainted with Maximo Trasona. He was with me in a company of laborers which went to Twin Peaks. I left Calamba for Manila with my companions one Sunday in July, I do not remember the exact date; there must have been about 40 of us. Andres Egasani went with us. In Manila we went to Poblete's house where we had a conversation with Andres Egasani. These 40 laborers upon arriving in Manila were joined by others until the total number of laborers was about 200. We were given three days' rations and went to Dagupan by rail. Arriving there we had supper, and slept on the bamboo floors of the tiendas in the market. When we reached Dagupan an American was there who showed us where we were to sleep. We were not given any rice that night because we had some left over from what had already been furnished us; but the next morning we were given our breakfast and rice for the journey to Twin Peaks.

The following day we started for Twin Peaks. The first night we slept at a place called San Jacinto, and left there the following morning, stopping en route at two other places, the names of which I do not remember. We arrived at Twin Peaks on the third day out from Dagupan.

Upon arriving at Twin Peaks, Andres Egasani went up into a house to speak to a man there. He afterwards came out of the house and said "Vamos." We left; reached Dagupan within two days, and from Dagupan walked to Manila. We returned because the "capataz" told us to do so. He did not give us any reason for telling us to go. We left when the capataz told us to go, because he was the one who had taken us there. We did not ask Andres Egasani (the capataz referred to) why, as we were very tired and weak.

I do not know that any of us were badly treated at Twin Peaks. We saw some Americans working there, but I do not know how many; we did not have any conversation with them. We arrived at Twin Peaks between 4 and 5 o'clock in the evening; slept there, and left the next day. It is not true that we wanted to enter the houses there and were not allowed to do so. I heard that some Americans had kicked over the pots in which some of the laborers were cooking their rice, but I did not see this. Upon arriving in Dagupan we did not ask for transportation by rail to Manila, but started off afoot. I can not say how many days we were in walking from Dagupan to Manila, but we were very tired. I did not see any of my companions die. I heard rumors that some people had died, but I can not remember the time or the place, or the name of the person who told me.

We came back in small bands; I came behind the others. Upon arriving in Manila we went to Poblete's house. He did not give us any more food; we bought rice in Manila. Some women and children went with us to Twin Peaks. I know Braulio Menece; he was one of those who returned with me on the boat from Manila to this place.

EMILIO MENDOZA.

I went to Benguet upon the solicitation of Andres Egasani. He promised me 2 pesos per day and rations. In Manila we were each given 6 chupas of rice and some meat. In Dagupan each of us was given 4 more chupas of rice, but no fish or meat. We slept on the floor of a warehouse in Dagupan. It did not rain that night. I did not hear any complaints about the food or shelter there. When we reached Twin Peaks we were furnished rice and some canned meat. The capataz, after talking

with an American there, told us that the American said we would only receive 2 pesetas per day. We would not work for this and the capataz told us to return. The capataz asked us if we would work for this and we told him no. We remained in Dagupan one day. The capataz told us that we were to return on the train, but the conductor would not let us go aboard it.

We were eight days in walking from Dagupan to Manila, scattered along the road, the strong ones in front and the weak ones behind. I was at about the middle of these groups. On the way back we lived on rice which we begged from the people along the route. Upon arriving in Manila, some of my companions told me that several of the laborers had died; but I do not know who they were. None of those who went with me died.

When we went to Poblete's house he gave each of us a chupa of rice.

I am in good health now and feel no bad effects from the trip.

MAURICIO AND TIBURCIO MENDOZA (OF CALAMBA).

We went with our brother, Emilio Mendoza, to work on the road in Benguet. We were promised 2 pesos a day, with rations. In Manila we were given three days' rations for the trip to Dagupan. We returned from Twin Peaks because the capataz said he was not satisfied with the pay we would receive. In Dagupan the capataz told us that we had been refused transportation on the train, so we had to walk back.

Q. Did you hear the American in charge at Twin Peaks say that he would only pay you 2 pesetas a day?—A. No; the capataz told us that the American said so.

Q. Why didn't you speak to the American about the salary before undertaking such a long journey home?—A. We could not speak to the American about it, because we can't speak English.

Q. You don't know, then, that the Filipinos who are working on the road in Benguet receive 25 cents gold per day, with their rations?—A. We asked the capataz what we would receive, and he said 2 pesetas per day, and our food.

In the group with which we returned there were about 20 laborers; and we were in about the middle of the crowd which was going back from Dagupan to Manila. We do not know that anyone died; but when we returned to Manila we were told that some of our companions had died on the road. We do not know their names, neither do we remember the names of those who gave us this information.

BRIGIDA ABRIL.

NOTE.—This woman admits having told a policeman that her husband, Braulio Menece, who went to Benguet, had died there. She states that this story was invented by her as a joke, and that she has seen her husband since he returned, and that he is now in Manila.

From Calamba I proceeded to Cabuyao, Laguna Province, and there found a number of men who had belonged to the Obreros, having been organized by one Publio Batallones, of Cabuyao; their statements are as follows:

*At Cabuyao, August 9, 1903.*

NARCISO GENERALIA.

I was one of a company of workmen who went to Benguet in July last. I was invited to go by Publio Batallones of this town, who promised me \$2 gold, per day, with rations. I went to Manila with about 250 others, residents of this place and of Calamba. Publio Batallones accompanied us. We arrived in Manila on Sunday, and started out for Benguet Friday. During that time we were in Poblete's house. The capataz went up into the house and had a conversation with Poblete; he then told us that if we would do as much work as the Americans we would receive \$2 gold, per day; and if we did not do as much work as the Americans that we would receive less.

NOTE.—Regarding the details of the trip to Benguet, the food furnished, etc., and what took place at Twin Peaks, the statement of this witness is substantially the same as that of the foregoing witnesses.

The trip back was a very hard one. We were seven days on the road from Dagupan to Manila. Several of our companions died on the road. One of the laborers died at Pozorrubio, on the way to Twin Peaks. I do not know his name; he lived at Los Baños. I did not see the body. He was taken sick on the way up. I saw him in a house there at Pozorrubio, and when I returned I heard that he was dead.

Andres Egasani, the capataz, told me this. The man first had fever, and then later he seemed to be taken with a sort of cholera. I heard that others had also died.

Q. You say that you were traveling for seven days from Dagupan to Manila; did all go together or did you travel in small bands?—A. In small bands. I went from Dagupan to Manila on the train.

Q. Then what you know about the seven-day trip is all hearsay?—A. Yes.

Q. So you can not state whether or not anybody died on the road between Dagupan and Manila?—A. I can not.

Q. Did you return from Manila to Calamba on the boat with other workmen who had been with you on this trip?—A. No; I was alone. I paid my own fare.

Q. Did you understand that Batallone's promise of \$2 gold per day and rations was made by authority of Poblete?—A. Yes. When in Manila we were standing below the window of Poblete's house, and he appeared at the window and stated to us that we could earn \$2 gold per day. This was Wednesday before we left for Dagupan. Poblete told us that if we would work well and equal the Americans we could earn the same, which was \$2 gold per day.

Q. Do you believe that you could do as much work in a day as an American?—A. Yes.

Q. Did Poblete say that if you could do half as much work, or one-fourth as much work as an American, you would receive less in proportion?—A. No.

Q. Did Mr. Poblete not tell you that the Government was offering Filipino laborers a fixed salary of 25 cents gold per day and rations?—A. No.

Q. Did you people think that Poblete was authorized by the Government to make this offer?—A. Yes.

Q. What made you think that he had this authority?—A. We thought that he was authorized by the Government to make us this offer through the capataces, Publio Batallones and Andres Egasani.

Q. Did any official of the Government make such a statement to you?—A. No.

Q. In regard to the man who died at Pozorrubio. Were you the only one from Cabuyao who was present with him in the warehouse where he was sick?—A. Yes.

Q. And afterwards, when you returned to Dagupan, you heard that the man had died?—A. Yes.

Q. You only know what Andres Egasani told you about it?—A. Yes, that is all; but when we were coming back the man was not there. Personally, I do not know that he died; Andres Egasani told me about it.

Q. Was Andres Egasani with you at Twin Peaks?—A. Yes.

Q. Did he come back at the same time?—A. Yes.

Q. And arrived in Pozorrubio with you at the same time?—A. Yes.

Q. Then Andres Egasani only knew and told you something he said he had heard about a man having died at Pozorrubio?—A. Yes.

Q. Did anybody in your company go to look for the grave of this alleged dead man or make any inquiries about him?—A. No, not that I know of.

NICOLAS DIAZ.

I went to Benguet to work on the road there in July last. Publio Batallones had come to me and stated that I could make good money in Benguet, and would be given transportation there from Manila to Dagupan by train, and from Dagupan to Benguet we were to walk.

We did not stay at Twin Peaks because Poblete's promise was not kept. This promise was that if we did as much work as the Americans we would receive the same pay, but when we got there they only wanted to give us 2 pesetas and our rations. I did not talk with the officer in charge, but was told this by the capataz.

I was told by the capataz from Calamba (Andres Egasani) that several workmen had died on the road back to Manila; personally I do not know anything about this.

NOTE.—Regarding the details of the journey, this witness makes in substance the same statement as that given by the preceding witness.

Q. When you were at Poblete's house in Manila, before going to Dagupan, did you hear Poblete say anything about the salary to be paid?—A. Poblete told us that we should work well and equal the Americans, because we would then be paid well; that if we would work like the Americans did they would give us \$2 gold per day; that if we did not work as well then we would receive half that amount.

Q. Do you believe you can do as much work as an American?—A. Yes.

Q. On the way back from Dagupan to Manila, did the capataz walk with you?—A. Yes; he came with us. I suppose that Andres Egasani (the Calamba capataz) was in a group which was ahead of us; and Publio, I think, was behind.

MANUEL BARANGALAN, ESTEBAN CANTILLAN, RAYMUNDO FACIOLCO, JUAN PAULO, EDUARDO CABALE, EUSTACIO DEBOMA, ANDRES PAULO, NARCISO DISON, ISAAC BARABGALAN, BENIGNO CANTA, OF CABUYAO (EXAMINED JOINTLY AND SEPARATELY).

We went to Benguet to work on the road. Poblete told us that if we could do as much work as an American, we could receive 4 pesos Mexican, per day. He told us this at his own house; he spoke to us from an upstairs window.

We started for Dagupan on a Friday in July; we don't remember the day of the month. Before starting we were given three days' rations. We arrived in Dagupan at 8 o'clock in the evening of the same day. The following day we left for Benguet, and were given more rice before starting. We arrived at Twin Peaks the third day from Dagupan. Upon arriving at Twin Peaks, the capataz told us that we would only be paid two pesetas. We did not hear the conversation he had with the officer in charge; but this was what the capataz stated to us. We did not speak with anyone else about the matter. We reached Baguio on Monday, and started back the next day, by order of the capataz. Rations consisted of rice, bacon, and fresh beef, given to us at Twin Peaks. The food was good. We do not know of anyone having been molested by an employee or officer of the government in Benguet.

EDUARDO BABALE AND ISAAC BARANGALAN. We saw an American kick over one of the rice pots. This American was a laborer. We did not see any other misconduct toward us. We did not protest to the chief about this.

JUAN PAULO and others. On the way back to Manila we were in a group of about 50 laborers. We do not know that any of the laborers died on the road. Andres Egasani said that some of the workmen had died.

NOTE.—On the return trip from Dagupan to Manila Narciso Dison was with three others, Esteban Cantillon was with three others, Eduardo Cabale was with six others, Eustacio Deboma was with six others. We did not hear of any deaths, except what Andres Egasani told us about a man having died at Pozorrubio.

From Cabuyao I proceeded to Los Baños, Laguna Province, and there took the following statements:

*At Los Baños, August 10 and 11, 1903.*

CRISTOBAL DIMALA.

On the 17th of July I left Manila for Dagupan. I was solicited to go by one Miguel Tolentino, who is now in Lipa. Miguel promised me that I would earn \$2 Mexican per day. He said he made this promise under the authority of Publio Batallones. I went to Manila with 19 other men from this place. We united with other workmen at the house of Poblete. I do not remember now the names of any of those who went from this place with me. We remained in Manila four days before leaving for Benguet. Poblete said that the Americans earned 4 pesos Mexican per day, that if we did the same work as the Americans we would receive the same amount of money, but that if we did only half as much work as the Americans we would receive only half as much money. He did not tell us that if we could do only one-tenth as much work we would receive only one-tenth of the salary. He told us this from the window of his house; we were in the court below the window at the time.

We remained in Manila for four days and then went aboard the train for Dagupan. There were about 250 of us who went at that time. Upon leaving Manila we were given rice and meat for the trip. We left Friday the 17th of July, and arrived at Dagupan that night at about 10 o'clock. An American there showed us a warehouse where we could sleep, and we spent the night in it. This house has a bamboo floor and was a good place to sleep in. We were given no more food that night, as we still had some left. The following day they gave us food for the trip up to the mountains. As soon as we arrived at Twin Peaks we were given three chupas of rice and some bacon. The following day a leg of beef was divided among us. We did not go to work there because we had contracted for a salary of 2 pesos daily. The capataz told us that we would not be paid this, and that if they refused to give us 2 pesos per day, with rations, we should not work. Publio Batallones was the capataz who told us this. At about 11 o'clock of the day after reaching Baguio we started back to Dagupan. We did this because the capataz, Batallones, told us to do so.

While in Baguio I was not mistreated by any American or officer in charge of the work.

Publio Batallones said that if we stayed there and worked they would pay us only 2 pesetas; but that if we would return to Manila, Poblete would see that we got 2 pesos.

We were two days in going from Twin Peaks to Dagupan and a week in returning from Dagupan to Manila. On the way back we were compelled to beg food of the people living along the route, as we had nothing to eat. We returned in small companies or groups. There were seven in the group, of which I was a member. We came behind the greater number of laborers. One man died in Paniqui on the way back from Dagupan to Manila. This pueblo is two days' walk from Dagupan. The name of the man who died is Francisco Malabayabas. He was taken sick and I cared for him. I was present when he died. His death resulted from a diarrhea. Being tired and hungry, he had eaten cocoanut and drank water. He was taken sick at 4 in the morning and died at about noon.

Q. Were you present with him all the time he was sick, until he died?—A. Yes, and after he died; we were quarantined for two days.

Q. Who were present besides yourself?—A. There were two brothers of Francisco named Estanislao and Pedro who were also present. They live in the barrio of Anos of the jurisdiction of Los Baños.

Q. Did these men go from this place with the laborers for the Benguet road?—A. Yes.

Q. But you said you didn't remember the names of any of these except the capataz, who had gone from here with you—how is this?—A. Your question made me remember about it.

Q. Do you not remember any others besides the three brothers you have mentioned and Miguel?—A. I remember one Eduardo, a resident of the barrio of Anos. I do not remember the names of any others.

Q. You say that there were seven in your company returning from Benguet—you, Francisco, and his two brothers, making four—who were the other three?—A. Miguel, Florencio Yer, Pioquinto Benjamin, Servando Castillo.

Q. When Francisco was taken sick, where did the men last mentioned go?—A. They did not wait, but went on ahead.

Q. Why did you alone remain with Francisco and his two brothers?—A. Because we were quarantined. The others escaped.

Q. You were present, were you, all the time during Francisco's sickness?—A. Yes.

Q. What were you doing?—A. I was looking after the sick man and cleaning up the house where he were staying.

Q. Did Francisco's brother go to look for a physician?—A. A "practicante" came to the place and gave him medicines.

Q. After Francisco died what was done with the corpse?—A. We dug a grave and buried him.

Q. Where is the grave?—A. In the Panteon, the burying-ground of Paniqui.

Q. What distance from the house where he died?—A. It was ten minutes' walk.

Q. Did you first go to the church?—A. No.

Q. At what hour did you bury him?—A. At 4.30 p. m.

Q. What day was this?—A. I don't remember. This occurred two days after we left Dagupan.

After being released from quarantine we were four days in traveling from Paniqui to Manila. We had to stop in some of the pueblos and beg food. I had known Francisco Malabayabas and his brothers for about a month and a half before we started to Benguet. Francisco's brothers returned to this place with me from Manila. I last saw them last Saturday at their house in Anos. I can not say whether or not any other laborers besides Francisco died on the road between Manila and Dagupan.

PEDRO MALABAYABAS (BARRIO OF ANOS, JURISDICTION OF LOS BAÑOS).

I had a brother named Francisco. He died in Paniqui, on Saturday, the 25th of July, from the effects of hunger and exhaustion. He had eaten some cocoanuts; was taken sick shortly after midnight and died during the day. His bowels moved twice, and the second time he was taken with colic or cramps, with which he had been troubled since his childhood. The name of the owner of the house in which Francisco died was either Hernando or Fernando. He was not a friend or an acquaintance of ours, but he had permitted us to come in and stop there. The sick man was attended by a physician; I don't remember his name. Francisco was buried soon after he died in a place called "Tramo." From the time he was taken sick until he died no one was present with the sick man except myself, my brother Estanislao, the owner of the house, and the doctor. I am sure no one else was present during this time.

We left Dagupan on Thursday. I could not say how many people there were with me going from Dagupan to Paniqui. Sometimes we would meet and unite with other groups and sometimes we would be separated from them. As we were kept in quar-

antime we were left behind the others, and did not see them again on the way to Manila.

We were released from quarantine at about 3 o'clock of the day after the burial of my brother.

My brother Estanislao has gone to Calamba. I have a sister named Juliana. She lives in Anos.

I know Cristobal Dimala. I do not know where he is now.

The physician in Paniqui can give you a certificate as to the death of my brother. I was present when my brother was buried. My brother Estanislao and the physician were also present at the burial, but no one else.

I do not know and have not heard of any other laborer except my brother who died on the road from Dagupan to Manila.

My brother Francisco was 19 years old.

Cristobal Dimala was with me on the road from Dagupan to Paniqui. He did not go into the house with me; I do not know where he went. I am sure that he did not go into the house with me, or stay there during the illness of my brother.

JULIANA MALABAYABAS (BARRIO OF ANOS, LOS BAÑOS).

I have three brothers, named Pedro, Estanislao, and Francisco. Francisco is dead. I learned of his death from Pedro. Pedro said that Francisco died from exhaustion. I last saw Francisco on a Sunday of last month; I don't remember the date. He was here then, as he lived in this house. He went away to work in Benguet. I believe that what Pedro said about Francisco's death is true.

JULIAN NUÑEZ (TENIENTE, BARRIO OF ANOS).

I know the Malabayabas family. I have not seen Francisco Malabayabas for a month. I do not know where he has gone. I have seen the other brothers since that time, but not Francisco. I have not talked with any of the family during that time. I have heard nothing said about Francisco since I last saw him.

*At Manila, August 16, 1903.*

ANDRES EGASANI.

I live in Calamba. I was the capataz of a party of laborers that went to Benguet in the month of July last. I solicited laborers in Calamba, Los Baños, and neighboring pueblos. About 250 laborers came from these pueblos, one-half of whom were recruited by me.

Poblete told me that if my laborers could work as well as the Americans they would earn as much, and I repeated this to the laborers.

We went from Manila to Twin Peaks, leaving Manila on Friday, the 17th. We left Dagupan on Saturday morning, the day after our departure from Manila; we slept at Mangaldan; Sunday morning we left Mangaldan and arrived that evening at Pozorrubio, where we slept; we left there Monday morning, arriving in Twin Peaks at about 5 o'clock in the afternoon; we left Twin Peaks Tuesday afternoon at 2 o'clock; we spent that night in Pozorrubio; from there we went to Mangaldan, remaining there until the next morning. We arrived in Dagupan Thursday, and from there returned to Manila. From Dagupan I walked as far as Gerona—three days' journey—and from that place took the train for Manila.

Lucio Gutierrez died between Pozorrubio and Twin Peaks. I do not know from what town Lucio Gutierrez came. He presented himself to me as a laborer in Calamba. I last saw him in Pozorrubio.

Q. You heard that he was dead?—A. Yes.

Q. But you didn't see him?—A. No.

Q. So you can't swear whether or not he is dead or alive?—A. No, but a policeman gave us the information.

Q. What is the name of the policeman?—A. I don't know.

Q. Filipino or American?—A. Filipino.

Q. Where and when did he tell you this?—A. At Twin Peaks, the day we arrived there, when we were hunting houses to live in. This was a municipal policeman. I do not know what pueblo he belonged to, but he was watching in Twin Peaks.

Q. What did he tell you?—A. He said that one of us, Lucio Gutierrez, had died between Pozorrubio and Twin Peaks.

Q. Did you see the man's grave on your return?—A. No.

Q. Did you look for it?—A. They told us that his grave was some distance away.

Q. Where did they tell you that he was buried?—A. They told me the place, but I have forgotten.

Q. You say that the last time you saw Lucio was at Pozorrubio; at what place in Pozorrubio?—A. He left Pozorrubio with us for Twin Peaks, and when we arrived there, I, having been at the head of the column, inquired if all the men were there. I found that Lucio was not present. The following day the policeman that I have already mentioned told me that he was dead. I saw him last when we were preparing to leave Pozorrubio. I counted all the men to find if they were all present and found they were, including Lucio. That was the last time I saw him.

Q. How was he then, was he sick or not?—A. He told me that he was not feeling very well; that he was hungry, having nothing but rice to eat.

Q. What did you say to him?—A. I told him to never mind; that we would soon be at Twin Peaks, and it would be all right.

Q. Then you went to the head of the column and saw him no more?—A. Yes.

Q. State exactly, as near as you can remember, what the policeman said to you in regard to the death and place of burial of Lucio?—A. He told me that they found the body in a little store by the side of the road about five hours' march from Pozorrubio toward Benguet.

Q. When did he say they found the body?—A. He did not say.

Q. What day and what time of the day did you have the conversation with this policeman at Twin Peaks?—A. About half-past 2 in the afternoon on Tuesday, the day that we left Twin Peaks for Dagupan.

Q. How did the policeman know that the name of the dead man he found was Lucio Gutierrez?—A. The policeman said that there was a man at Pozorrubio told him it was Lucio Gutierrez.

Q. What was the name of the policeman?—A. I do not know; he did not tell me.

Q. What did he say in regard to the disposition that was made of the body?—A. The policeman said he told the people there to bury the body.

Q. Then the policeman was not present at the burial?—A. I do not know.

Q. Upon your return from Twin Peaks, did you make any inquiries of the people at the "sitio" concerning the death of Gutierrez, and the place where he was buried?—A. No.

Q. Why did you not?—A. Because it was raining and there were no people there and the house where Gutierrez had died was burned.

Q. How do you know that was the house where he died?—A. The policeman told me.

Q. Was the policeman with you on your return journey?—A. No.

Q. Were there any other houses there in that "sitio"?—A. There were other houses, but they were at some distance from the road.

NOTE.—This witness's description of the place where the man Gutierrez is alleged to have died, corresponds to that of the barrio of Asan, of the pueblo of Alava, between Pozorrubio and Twin Peaks.

Q. Did the capataz who had charge of the rear of the column make any report to you in regard to Gutierrez having dropped out on the march?—A. No.

Q. Did anybody else say anything to you about Lucio having dropped out?—A. Yes; some of the men told me that, arriving at the "sitio," Lucio said he was tired and not feeling well, and that he would stop there and that, if he felt better, he would continue later on.

Q. Do you remember the names of these men, or any of them, that gave you this information?—A. No, I do not.

Q. Where were you when they gave you this information?—A. That was after we arrived at Twin Peaks.

Q. Did you not stop at all when you arrived at this "sitio" on your return trip?—A. No; but before we arrived there we passed through the barrio of Caoringan, and some of the people there told me that a man had died farther on, and had been buried.

Q. Did they say that they had buried him?—A. No, they did not.

Q. Did you make any inquiries from them as to the place of his burial?—A. I did, and they told me that it was far away.

Q. Was that all they said?—A. Yes, sir.

Q. You say you do not know where the home of Gutierrez was?—A. No, sir; I do not know where his home was.

Q. Do you know whether he had any family or relatives?—A. I have heard that he had a family.

Q. Did you hear where the family lived?—A. No, I did not.

Q. What you state is all you know about the death of Gutierrez?—A. Yes; I have stated what I heard in regard to it.

Q. Of your own personal knowledge, then, you are not able to state whether Gutierrez is dead or not?—A. No, I am not; only what I have heard.

Q. Then Gutierrez may be alive to-day for all you know?—A. Yes; he may be. I am stating only what I have heard in regard to it.

Q. Why did you not take sufficient interest in this matter to go to the place where Gutierrez was said to have been buried and verify the reports concerning his death and burial?—A. I did not do that, because I was tired; it was raining, and I was wet and cold.

Q. Have you any knowledge or information concerning any other deaths having occurred among the laborers from the time they left Manila until their return?—A. No, sir; I have not. I left them on the return trip at Gerona and took the train to Manila, being sick and feeling unable to walk farther.

Q. But you were with them continuously from the time they left Manila until you reached Gerona on the return trip?—A. Yes, sir.

Q. Had there been any other deaths you would have undoubtedly heard of it, would you not?—A. Yes, sir; I believe I would.

Q. Can you give me the name of any person who can give any further information concerning the death of Lucio Gutierrez, or concerning his place of residence or his family?—A. I do not know of any now, but I believe that I can ascertain the names of some people who know where Gutierrez lived and who are acquainted with his family, and if so I will write to you and send you their names and addresses.

NOTE.—I have never seen or heard from Mr. Egasani since the date of his examination.

BY CAPT. ROBERT H. NOBLE, U. S. Army:

Q. What kind of a trip did you have from Manila to Calamba?—A. The boat ran on a bar in the Pasig River and we stayed there all night and did not get off until the next morning.

Q. Did you have enough to eat on the boat?—A. Yes, sir; we had plenty to eat, but we found difficulty in cooking it because the cook on the boat did not allow us sufficient time to do the cooking.

Q. Were any of your people sick on this trip or were they in good health all the time?—A. Some of them were sick; they were hungry.

Q. Nothing more than that?—A. No.

Q. The night before you sailed, were there any sick in your party?—A. Yes, sir; two.

Q. Did they remain in Manila, or did they return to Calamba with you?—A. They returned to Calamba.

Q. Were there others sick in the house of Mr. Poblete that did not return to Calamba with you?—A. Yes, sir.

Q. How many, do you know?—A. I saw three in all; two of whom returned to Calamba with me.

Q. Do you remember on the night of July 30, having a conversation with me in the house of Mr. Poblete regarding those who had died on the Benguet trip?—A. Yes, sir.

Q. Do you remember what you told me on that occasion?—A. Yes, sir.

Q. You told me some had died, did you not?—A. Yes, sir.

Q. How many did you tell me had died?—A. I told you there had been seven deaths.

Q. I asked you of what those persons had died, did I not?—A. Yes, sir.

Q. What answer did you give me?—A. I told you they had died of hunger.

Q. I asked you, did I not, how you knew they had died of hunger?—A. Yes, sir.

Q. What answer did you give?—A. I told you they had died of hunger because they had nothing to eat and had been asking alms along the road to Manila.

Q. It is my recollection that you told me that you knew that these people had died of hunger, because they had pains in the stomach.—A. Yes, sir.

Q. Did I tell you that it was impossible to determine that a person died of hunger simply because he had pains in his stomach, because one can have a pain in the stomach from many causes. Is it not true that is what I told you?—A. Yes, sir.

Q. I do not remember of your having said anything about their having asked alms on the road. (No answer.)

Q. You spoke of seven men having died. Do you know the names of those men?—A. There were two, Francisco Malabayabas and Lucio Gutierrez, and the other five; I do not know their names.

Q. Then why did you tell me seven?—A. Because I had heard it from different people.

Q. Who were the people that told you that?—A. I do not remember. I have forgotten the names. I was sick from the trip.

Q. You did not pay any special attention to these accounts of people having died?—A. No, I did not; I was sick.

Q. Did these people who told you of the deaths of these men state where they had died?—A. They told me the names of the towns, but I have forgotten.

By Mr. Ross:

Q. Did you not state to me just a few moments ago, after having told me what you had heard concerning the death of Lucio Gutierrez, that you had no knowledge or information of any other deaths having occurred?—A. I told you that I had not seen any others.

Q. Is it not true that in answer to my question whether you had any knowledge or information concerning the deaths of persons other than Lucio Gutierrez, you answered "No," that you had not?—A. I answered "No," because I understood you to mean whether I had seen any other persons who were dead.

Q. You did not see Lucio Gutierrez's body, did you; your information concerning his death was hearsay, was it not?—A. Yes.

PUBLICO BATALLONES.

Q. What is your name and residence?—A. Publico Batallones, residence at Cabuyao, Laguna Province.

Q. Were you captain of a party of laborers that went from Cabuyao and vicinity to Benguet in the month of July?—A. I was.

Q. How many men were in your party?—A. One hundred and twenty-five.

Q. Your party was combined with one headed by Andrew Egasani?—A. Yes, sir.

Q. You united your parties here in Manila, did you not, just prior to your departure for Benguet?—A. Yes.

Q. How many men were there in all in the party that went to Benguet, including your company and that of Egasani, and all others?—A. There were 250 (about) in all.

Q. What day did you leave here for Dagupan?—A. It was on Friday.

Q. Was that the 17th of July?—A. I remember it was Friday, in the afternoon; I can not remember the date.

Q. When did you arrive in Dagupan?—A. It was about 8 or 9 o'clock that same day.

Q. Did you stay in Dagupan that night?—A. Yes, sir.

Q. Where did you go from there?—A. From Dagupan we went to Twin Peaks.

Q. How many days were you on the road from Dagupan to Twin Peaks?—A. Three days.

Q. Did all the men that left Dagupan arrive at Twin Peaks?—A. Yes; all but three, who remained at a sitio on the road. One was sick and the other two remained to take care of him.

Q. Where is this sitio?—A. Between Pozorrubio and Twin Peaks.

Q. Who were those men that remained at the sitio?—A. I do not remember their names. I was told by one of the corporals that these men remained behind. I did not see them leave the column myself.

Q. Is that all you know concerning these three men?—A. That is all.

Q. How long did you remain at Twin Peaks?—A. We remained there over night and until about 2 o'clock the following afternoon, when we left, returning to Dagupan. There were no houses at Twin Peaks. We left on that account.

Q. You did not return again to Twin Peaks after you left there?—A. No, sir.

Q. Where did you go?—A. We went to Pozorrubio that evening; passed the night there; that is, some of us. Some of the laborers remained behind in Balangabang, and the following day we continued on to Dagupan.

Q. Having arrived in Dagupan, what did you do?—A. Arriving at Dagupan we found that Mr. Vicente Poblete and Major Kennen had gone to Twin Peaks. We applied there to the man in charge—an American—for food, which he refused to give us, stating that he had orders to furnish rations only to laborers en route from Manila to Twin Peaks and not to those returning from Twin Peaks. I then asked Andres Egasani to go out on the road from Dagupan to Manila and endeavor to induce the laborers who had left Dagupan for Manila to return, but they did not return. On the contrary, all the others started for Manila. I remained until all the others had left.

Q. Did you take the train or did you walk?—A. I walked to Tarlac with three companions, where we remained two days, meeting there men from other companies that had been to Twin Peaks and others en route from Manila to Dagupan who wished to return to Manila; in all about 30. I requested of the station-master at Tarlac permission for these men to enter some freight cars and ride to Manila, which he granted, and we came to Manila in that way.

Q. Do you remember the date you arrived in Manila?—A. I do not remember the date. It was on Tuesday in the week following our departure from Manila for Benguet.

Q. Do you know of any of these laborers having died during the trip from Manila to Twin Peaks or during the trip from Twin Peaks to Manila?—A. On the return from Twin Peaks to Dagupan, at the sitio near Pozorrubio, I heard that the man we had left there on the way up had died, and when we arrived at Paniqui, in Tarlac Province, I heard that Francisco Malabayabas had died there. I heard this from Francisco's brothers.

Q. Do you know the name of the man that was said to have died at Balangabang?—A. Andres Egasani told me that the man's name was Lucio Gutierrez.

Q. When and where did Andres Egasani tell you of the death of Lucio Gutierrez?—A. At the sitio where he died.

Q. That was the first you had heard of Lucio's death?—A. Yes; that was the first.

Q. All you know about the death of Lucio Gutierrez, then, is what you were told by Andres Egasani?—A. The people at the sitio also told me that Lucio Gutierrez had died there of dysentery.

Q. How did the people know that it was Lucio Gutierrez who had died there?—A. The people said that they heard his name from the policeman there.

Q. As a matter of fact, did they not tell you that a man had died there of dysentery, not naming him?—A. The people did not state the name of the men that died. Some of the people asked Andres Egasani and he told them it was Lucio Gutierrez.

Q. Then, the people of Balangabang simply knew that a man had died there?—A. Yes, sir.

Q. Did Andres or you make any effort to find the place of burial of the man that had died there, and which Andres said was Lucio Gutierrez?—A. No.

Q. Why did you not?—A. Because the policeman said he was buried in another town, out a considerable distance from the road.

Q. Was the policeman there in Balangabang with you?—A. Yes, sir; there was an American there also who inquired whom the man was of our company that had died there and Andres told him it was Lucio Gutierrez.

Q. In regard to this policeman, Andres Egasani states that the policeman told him of Gutierrez's death at Twin Peaks, and that the policeman remained there and did not accompany you on the return trip; what have you to say as to that?—A. The policeman was at the sitio.

Q. Then neither the people of the sitio, the policeman, nor the American you have referred to gave you any information as to the name of the man that was missing, but Andres Egasani told them his name?—A. Yes, sir.

Q. Did anybody tell you where the man was buried?—A. The policeman told us that he was buried in a small town up there.

Q. Did he tell you the name of the town?—A. No; he did not.

Q. Did you ask the name of the town?—A. No; I did not.

Q. Did you ask how far it was to the place of his burial?—A. No.

Q. Why did you and Andres not investigate the reports you heard concerning the death and burial of this man?—A. Having heard that he was dead and buried, and in view of the circumstances that we had to continue the march, we did not consider it necessary to make any further inquiries.

Q. Did you ever know Lucio Gutierrez?—A. No.

Q. So far as you know Lucio Gutierrez may be alive to-day?—A. Yes, sir; all I know about it is what Andres Egasani told me.

Q. In regard to Francisco Malabayabas, you say that you heard in Paniqui that he died there?—A. Yes; I heard it from his two brothers, Pedro and the other, I do not remember his name.

Q. When was this conversation that you had with the two brothers of Francisco?—A. I do not remember the date.

Q. What did they tell you in regard to Francisco's death?—A. They told that, having been hungry and eaten all sorts of things along the road, he was taken with dysentery and died.

Q. Did they not tell you that just before he was taken ill he had eaten a cocoanut and drank a lot of water?—A. They told me nothing more than that he had eaten a great many things on the road.

Q. Did you know this Francisco during his lifetime?—A. No, sir; I did not.

Q. In addition to the supposed deaths of Lucio Gutierrez and Francisco Malabayabas, have you any knowledge or information concerning the deaths of other laborers during the trip from Manila to Twin Peaks and return from Twin Peaks to Manila?—A. I only know of these two, but I heard of many others.

Q. How did you hear of the others?—A. From conversations and talk with people that I met in the road.

Q. Did you receive any definite information about these deaths, or was it simply rumors?—A. Nothing definite, except that one of the corporals, Jose Espina, told me here in Manila that he knew of four persons having died.

Q. What did he say? Did he tell you the names of these people or where they had died?—A. No.

Q. Did he tell you from what towns the men came from that had died?—A. No.

Q. Where was this corporal, José Espina, during the trip to Twin Peaks and return? Was he with you all the time?—A. We were together on the trip to Twin Peaks and as far as Tarlac on the return trip.

Q. After having arrived at Manila from Dagupan you took the steamer from here to Calamba, did you not?—A. I remained here until the following day.

Q. And on the following day you returned to Calamba by steamer, did you not?—A. Yes.

Q. Were you accompanied by others of these laborers?—A. Yes.

Q. How many?—A. Twenty-four, including the women.

Q. In this trip from Manila to Calamba, were there any of your companions sick?—A. No.

Q. Were there any sick the night before you left Manila for Calamba in your party?—A. I saw in Señor Poblete's house three or four persons who were sick. They were of the company of Andres Egasani.

Mr. Ross. Mr. Vicente Poblete, son of Pascual H. Poblete, told me that he would endeavor to find José Espina and bring him to my office on Monday, the 17th of August. He has never appeared.

*At Manila, August 17, 1903.*

DR. H. E. STAFFORD.

I went to Poblete's house on the 7th day of July, at about half-past 8 or 9 o'clock in the morning. Upon inquiring above for Mr. Poblete, I was told that he could not be seen; but after insisting and waiting for perhaps ten minutes, Mr. Poblete appeared. I told him that I had been sent by the governor to see the sick people from Twin Peaks who were in his house. He appeared not to understand me, and a man who spoke English was called in to act as an interpreter. Mr. Poblete walked over to one corner of the room, where there was a screen, and spoke through the screen to someone behind it. He then returned and told me that all but one of the sick people had gone to Batangas. I asked to see the one who had remained, and was taken behind the screen aforesaid, where I found a Filipino lying upon a mat. I asked Mr. Poblete to inquire of the man whether or not he was willing to go to the civil hospital, and received an affirmative reply. I then went out in the street, turned in an ambulance call, and upon the arrival of the ambulance returned to the house for the sick man, whom I found back in the kitchen, standing up and eating rice. I took him to the hospital and upon examination found that there was apparently nothing the matter with him except a hydrocele, which seemed to have been in existence for some time. While the man did not appear to be extremely well nourished at the time of his admission to the hospital, still I did not consider him an ill man, neither did the house surgeon, Doctor Williams, who examined this case carefully. The man said that he had had this hydrocele for several months, but that it did not interfere with his working. He was operated upon for the hydrocele and discharged from the hospital cured.

MARIANO VIJANDRE.

I am the Mariano Vijandre who signed a letter addressed to the civil governor, dated July 24, 1903, making certain statements concerning my experiences as a member of a party of laborers who started to Benguet in July last. Poblete wrote this letter and requested me and others to sign it.

Poblete authorized me to go into the provinces to look for laborers to go to Benguet. I went to the province of Bulacan and got together 106 laborers for that expedition. I don't remember the date when we left Manila for Dagupan. We united in Dagupan; there were 450 of us—four companies under the command of myself, Cabrera, Arrienda, and another man whose name I don't remember. Every 106 men had a capataz. This party did not go to Benguet. We remained in Dagupan one day and not being satisfied with the food given us there we returned, with the exception of Arrienda, who with some of his men went to Pozorrubio. After remaining in Dagupan for one day we began returning to Manila in small groups. I was one of the last to leave. All of my company went with me when we left Dagupan, but on the way back to Manila the party became dispersed into small groups. I think it was about the 21st of July when we left Dagupan for Manila. I stated in the letter referred to above that four of my companions had died from exhaustion on the way back. I was told this by one of my "cabos." I have forgotten his name.

- Q. Did only one person tell you this?—A. Many persons.
- Q. How many?—A. More than eight persons told me this.
- Q. Give me the names of these persons.—A. I have forgotten their names.
- Q. Can you remember the name of any one of them?—A. I can not.
- Q. Where did these people tell you this?—A. In Manila.
- Q. Did your informants give you the names of the men who were said to have died?—A. No, they did not know the names; the cabos have lists of their names.
- Q. But of the company which went with you from Dagupan, can you say of your personal knowledge that any died?—A. I didn't see any, but we left a sick man in Tarlac on the point of dying from hunger.
- Q. What is the name of this man?—A. I have forgotten the name of the man. The cabos have the lists.
- Q. But do you know the man?—A. I would know the name if I saw the list.
- Q. This man whom you say you left sick in Tarlac, did he travel with you from Dagupan to Tarlac?—A. No.
- Q. Were you present when he was left there sick?—A. No.
- Q. Then how do you know that he was left there sick?—A. When we passed through Tarlac we saw several sick men there, left by a party who had traveled through that place the day before.
- Q. How did you know that the man was sick from hunger?—A. Because he told me so.
- Q. How did you know, if these men were traveling through a day ahead of your party, that they had had nothing to eat?—A. The sick man himself told me.
- Q. Didn't you know his name?—A. No.
- Q. Why didn't you make a note of the sick man's name?—A. I forgot it; it seemed to me that I didn't need his name.
- Q. Do you know where this man is now?—A. No.
- Q. Have you seen him since?—A. No.
- Q. Who was with you that day when you saw the sick man?—A. Cabrera.
- Q. Only this one man, then, was left sick in Tarlac?—A. Yes.
- Q. The news you received about the four men having died there was received by you in Manila?—A. Yes.
- Q. How many days after you arrived in Manila had passed before you received this information?—A. Two days after we arrived, when a group of laborers arrived and said that these men had died.
- Q. Can you give me the name of any other persons who told you of the death of these men?—A. A cabo named Juson. He lives in Manila. I don't know where he is now.
- Q. This is the only one who told you of the men having died?—A. Yes.
- Q. You didn't hear from anyone else about this sick man?—A. The cabo was the only one who told me.
- Q. What did Juson say?—A. He said that one man had died in San Carlos, Pangasinan. He told me the name of the man, but I have forgotten it. I made a memorandum of the name.
- Q. Is Juson the only one who told you about this?—A. Many people told me about it.
- Q. But you have just said that Juson was the only one who told you about this.—A. Juson was the only one who saw the man.
- Q. The others who told you about the man had only heard of this, then, and had not seen the man?—A. The others saw him.
- Q. But you have just said that Juson was the only man who saw him.—A. There were others.
- Q. What did the others tell you?—A. They said that men had died in the road.
- Q. How many?—A. Certainly more than eight.
- Q. In your letter to the governor you say four.—A. We said four because we were certain that there were as many as four, but had only heard that there were more.
- Q. Can you state anything positive as to the names, or whether or not the men died?—A. No; only what I have heard.
- Q. As you were the capataz of a company, why didn't you, when it was reported that some of your men had died, take sufficient interest in the matter to ascertain the names of the dead men, in order to notify their families?—A. They didn't say the men were from my company.
- Q. To whose companies did your informants say the men belonged?—A. They didn't tell me anything about that.
- Q. Then the information you received from Juson was not very definite, was it?—A. He didn't tell me the names of the men or of the companies from which they

came; on the return to Manila the men were all mixed up; the cabos had lost their lists, and did not know what companies the men belonged to.

Q. If the lists are lost, how can the cabos state that the dead men belonged to any company; might not the dead men reported by the cabo have been entirely outside of the organization?—A. Yes; they might.

Q. That is all you know, then; you have not seen any of the dead men?—A. That is all I know.

Q. Did you walk all the way from Dagupan to Manila, or did you go part of the way by train?—A. I walked to Tarlac and took the train there.

Q. How many of your companions went aboard the train with you?—A. Four.

Q. Where did you see Juson last when returning from Dagupan to Manila?—A. At San Carlos.

Q. How many days before you arrived in Tarlac did you see Juson in San Carlos?—A. I saw him there the day before I arrived in Tarlac.

Q. Juson was there with a number of your men, was he?—A. Yes; I can't tell how many, but there were a number of them.

Q. Why did you, a capataz having charge of your men, leave them in San Carlos and go ahead; why didn't you stay with them and help look after them?—A. The people didn't want me to stay with them, and didn't want to obey me; they went ahead to beg food.

Q. Did you as a capataz consider it your duty to remain with your company?—A. I did not stay with them because they did not want me, and didn't want to obey me.

Q. Then you were not able to maintain your authority over these men?—A. No.

Q. You didn't try very hard?—A. The laborers didn't like to obey me.

GERARDO CABRERA.

Q. What do you know about the deaths that were alleged to have occurred among the laborers on the road between Dagupan and Manila.—A. I do not know anything except what I have heard from the cabo named Aurelio Juson, who lives at No. 68 Calle Balderrama, Tondo.

Q. Where did Juson give you this information; here in Manila?—A. Yes.

Q. How many days after your return here from Dagupan?—A. I received the information on the second day.

Q. What was this information?—A. That men had died on the road. He said that Bernabe Dayao, a member of the third company, had died.

Q. This third company was not your company?—A. No; the capataz of the third company is Mariano Vijandre.

Q. How many men did Juson tell you had died?—A. Only one.

Q. Did he say any others had died?—A. He said that only one had died.

Q. Did he say that four, five, six, or eight had died?—A. No; only one.

Q. Was Juson a cabo of the third company?—A. Yes.

Q. Where did he see this dead man?—A. In the pueblo of San Carlos.

Q. What was your company?—A. The first.

Q. When did you leave Dagupan?—A. On the 21st day of July last.

Q. Did you walk all the way back to Manila?—A. No; I took the train at Tarlac.

Q. Where were the men of your company when you were walking from Dagupan toward Manila?—A. They were separated into groups, because the men found the walking tiresome and were scattered along the road.

Q. Did you hear of any men of your company having died?—A. No.

Q. You didn't go to Twin Peaks?—A. No.

Q. Who wrote this letter that you sent to the governor?—A. Poblete wrote it.

Q. Did he request you and Mr. Vijandre to sign it?—A. Yes.

Q. It is stated in this letter which you signed that "we have walked from Dagupan to this capital with the laborers at our orders." Now, you didn't walk from Dagupan to Manila, did you?—A. We walked only as far as Tarlac. The statement in the letter is incorrect.

Q. Neither did you go with the laborers?—A. There were many of the laborers in Tarlac at the time who did not have the money to pay their fare on the train; only five of us took the train there, and the rest remained behind.

Q. So you took the train and left your men in Tarlac?—A. Yes.

AURELIO JUSON (68 CALLE VALDERRAMA, MANILA).

I was a "cabo" on one of the companies of laborers who went to Benguet in July last. I don't remember the name of the capatas of the company to which I belonged.

I was in Dagupan with the laborers, and went as far as Pozorrubio with 20 other

workmen. I did not go farther because there was no more food. One of these laborers died at San Carlos on the way back to Manila. I left here by rail for Dagupan on the 20th of July and arrived in Dagupan the same day. There were more than 400 of us on this train. We stayed in Dagupan two days, and then, with 20 companions, I walked to Pozorrubio. The rest of the 400 did not wish to go on from Dagupan, because they had no more food. I and my 20 companions got food from the American in charge there, but the others did not go because they said they did not have enough rations.

We arrived in Pozorrubio during the evening of the same day, and passed the night there. Being tired, we did not care to go farther, and returned to Dagupan the next day, and from there to Manila on foot. Some of us walked all the way back, and some took the train for Manila at San Carlos. After I and my 20 companions returned to Dagupan from Pozorrubio we separated, and but 8 of these men walked with me as far as San Carlos. We were one day in walking from Dagupan to San Carlos. I was the only one of those men who took the train; the others were left behind in San Carlos.

I don't remember the names of the men who left Dagupan with me. I was in Pozorrubio for about one day. I remember now that Mariano Vijandre was the capataz of my company. I did not see Mariano after returning until last Sunday. We then had a talk about what had passed in Dagupan and on the way to Benguet. Since that time I have seen him frequently. We had a talk about bringing back my trunk from Dagupan. I did not speak to him about anything else. I also told Mariano that one man had died in San Carlos. The dead man was named Bernabe Dayao. I knew about him because a capataz told me that this man was dead. I don't know the name of the capataz. The capataz told me this in Tarlac. He told me this because I was a cabo. I know Bernabe personally. He came from Nueva Ecija. I knew Bernabe was a member of one of the companies which went to Benguet. He simply told me that the man was dead; that was all he told me, and all I know about it is what he told me.

Continuing the investigation, I left Manila again on the 18th of August, stopping at Tarlac, province of Tarlac, where the following testimony was taken:

*Tarlac, August 19, 1903.*

STATEMENT BY S. C. PHIPPS, PROVINCIAL SUPERVISOR.

It was either on the 2d day of August or the last Sunday in July, about the middle of the afternoon, when about 50 workmen came into Paniqui. They were carrying a few clothes and some rice. They waited there until the 6.30 train went out, when they all boarded her and came down to Tarlac. They came on the trains, the trainmen not being able to put them off. I did not see a man in the crowd sick, but after they came here to Tarlac the cholera broke out. None were sick when I saw them, but I have heard that some were sick and were cared for in the convent here. The "jefe" among the workmen complained about not getting what they expected up there at Twin Peaks. I spoke with the "jefe," and he said they were returning because they were dissatisfied with their wages and did not have a place to sleep. That was about the only complaint he made; he said nothing about suffering from hunger.

ANDRES CATANJAL, PRESIDENT OF THE PROVINCIAL BOARD OF HEALTH, TARLAC PROVINCE.

I am president of the board of health for the province of Tarlac. I have official information as to the death of certain persons who were passing through this city and province during the month of July. I do not know whether or not they were members of the so-called "Poblete Obreros." I simply know they were transient persons, not residents of this capital. About the 23d or 24th of July there arrived in Tarlac a party of men coming from the direction of Dagupan. It was reported to me by the municipal doctor that one of these men was sick with cholera, whereupon I ordered him to take the sick man to the convent, together with his companions, and place them all in quarantine there. I went to the convent and found this man Romaldo Santiago sick. I examined his case and found him to be suffering from cholera. The man was given treatment and furnished medicines and food, but died on the 27th day of July. On the following day two more of his companions were taken sick with cholera, one of whom was Melicio Gabriel, who died on the 30th day of July. The day following their death they were immediately buried in the cholera cemetery, in quicklime, as is customary in cases of cholera dead. Between the time that the two men above mentioned were attacked with cholera and their

death two more of their companions were also attacked. I do not remember their names, but can state that they recovered after being sick only two or three days. There had been no cholera in Tarlac for about a month prior to the arrival of the persons above mentioned. Immediately following the arrival of these two men and their sickness there occurred about six or seven other cases of cholera, all residents of Tarlac, of which two persons died. I obtained the following information in regard to the two strangers who died here: Romaldo Santiago, single, 30 years of age; by occupation, laborer; resident of Angot, Bulacan Province. Melicio Gabriel, single; age, 35; occupation, laborer; resident of San Rafael, Bulacan Province. These men made no statement to me that they were members of any company of Obreros, nor gave me any other information concerning themselves than the above. I know of no one having died from hunger or starvation, and I also state that if anyone says that persons died from starvation that he states that which is untrue. I was informed that in the latter part of July there were a great many persons passing through here on their way from Dagupan to Manila who received food and shelter from the inhabitants of this town. I know nothing about these persons, only what I have been told. All I know is with reference to the men who were quarantined and cared for in the convent. I can state positively that the two men above mentioned did not die of starvation, but of cholera. I know this from my own observation of the cases, having visited them daily during their sickness. From reports received from the various municipalities of the province, I am able to state that the following deaths from cholera occurred during the last days of July: Francisco Malabayabas, of Los Baños, Laguna Province, single, 19 years of age, laborer, who died of cholera at the barrio of Estacion de Paniqui on the 25th day of July last, and was buried in the cholera cemetery of said town the same day; Isidro Laidea, native of Lipa, Batangas Province, 18 years of age, died of cholera at the town of Bambam on the 24th day of July; Hipolito Nuñez, native of Angot, Bulacan Province, 28 years of age, died of cholera at Bambam on the 27th day of July; Catalino Quilala, 36 years of age, native of Malinao, Albay province, died of cholera at Bambam on the 27th day of July. I have no information or knowledge from which to state whether or not any of the above-mentioned individuals were or were not members of the "Poblete" or other organization of "Obreros." In the report of the death of these persons the president of the municipal board of health of Bambam does not state whether or not the bodies were buried in the cholera cemetery, but instructions from my office are to bury the cholera dead in a special cemetery in quicklime. I have no reason to believe that such instructions were not carried out in these cases.

I have here a note just received from the president of the municipal board of health, pueblo of Tarlac, in regard to the deaths of Blas Gamboa and Manuel Legano (letter attached marked Exhibit "A"). My statement gives all the information I have concerning deaths of nonresidents of this province during the months of July and August, 1903.

DR. JOSE ESPINOSA, PRESIDENT MUNICIPAL BOARD OF HEALTH, TARLAC.

Q. You wrote this note (Exhibit A), Doctor, in reply to a request of the president of the provincial board of health for information concerning the deaths in this town of Blas Gamboa and Manuel Legano?—A. Yes, sir.

Q. You state in this note that these men died of starvation?—A. The answer therein is wrong. When I replied to the inquiry of Doctor Catanjal this morning I was in my house and wrote without consulting my books. I was in a hurry and did not examine the records.

Q. Then this statement is a mistake?—A. Yes, sir.

Q. Please turn to your book and state what your records show in regard to these men, Blas Gamboa and Manuel Legano.—A. Blas Gamboa died from "fiebre paludico" (malaria) on the 22nd day of July, 1903, age 33, married; the record does not show his residence.

Q. Do you know where his residence was from any other information?—A. No, sir.

Q. In regard to Manuel Legano?—A. My record shows that he died in this city on July 23, 1903, of same disease as Gamboa, 30 years of age, married. The record does not show his residence and I do not know the same.

Q. How long were these men sick before they died?—A. They told me about one week, with fever.

Q. How long were they sick in Tarlac under your observation? Did you attend them during their sickness?—A. No, sir. I secured the data concerning them when I gave the certificate of death.

Q. To whom did you give the certificates?—A. I do not know; perhaps to some relatives of the dead.

- Q. Some person that came to you?—A. It must have been some of their relatives.
- Q. On what did you base your opinion that they died of the fever?—A. From information given me by their families.
- Q. Did they both die in the same house?—A. I do not remember.
- Q. You do not know if these men were residents of Tarlac or some other place?—A. I am not certain, but I believe they were not of Tarlac.
- Q. Did the people who called upon you for the certificates of death say anything with reference to the residence of these men?—A. No, sir.
- Q. Do you know where the bodies of the dead men were buried?—A. In the Catholic cemetery of this town.
- Q. When?—A. I believe that it was on the day following their death.
- Q. You have stated in answer to my question as to how long these men had been sick, "They told me about one week." You mean by that that the people who called upon you for the certificates of death told you that?—A. Yes, sir.
- Q. Did the people who came to you for the death certificates state to you that these men were members of the Poblete Obreros?—A. No, sir.
- Q. Did you see the bodies after death?—A. Yes, sir; I saw them in the church.
- Q. From having seen the bodies of the deceased and from all other information you have in regard to these cases, do you believe what these people told you, namely, that these men had died of "fiebre paludice"?—A. Yes, sir.
- Q. Have you any knowledge or reliable information that anyone died of starvation in Tarlac during the months of July or August?—A. I have not.

G. N. BAKAN, SCHOOL-TEACHER OF TARLAC.

On Saturday, about August 2, I went to the station for the purpose of taking a train for Manila. At the station I met an American, whose name I can not recall, who had just come down from Twin Peaks, and he told me of the difficulties they had had with the workmen there that he had seen, and which called my attention to the conditions. On the way to Manila I saw a large number, between one and three hundred of these men, and as my attention had been called to it, I was particularly observing them. I saw several trains, apparently freight trains, composed of box cars and flat cars, loaded with timber, and in these cars and on that timber were large numbers of these men. Many of them had handkerchiefs, or something of that kind, in which was rice and other kind of provisions, including betel nut and cigarettes. All of them were in very good humor, and evidently having a good time and pleasant trip, and I saw none of them on the trip that I thought was in any way in want of food, or even of cigarettes or "vino." They were also very arrogant, and at some stations they would fill up the passageway so that it was very difficult to get through, and they made no effort to open up a passageway for anyone. When I returned to Tarlac on Sunday, the following morning, I saw a repetition of the same thing, and on both trips I saw a large number of them who were taking food with them. I also saw several that from appearance had drunk a large amount of "vino" or other intoxicant. I saw some drinking beer and ginger ale at the canteens going down. They were at different stations along the line, the largest number being at San Fernando de Pampanga. I was at Tarlac during all the time that this "obrero" movement was going on and have known from information of the presence of large numbers of these people in the town, and I have no knowledge or information, nor have I heard anything at all that would indicate that any of them were suffering for food or any of the necessities of life. I was told by reliable parties that the men had enough food. Large contributions had been made and given to them during their stay here. The convent was open to all who wanted to occupy it.

WILLIAM M. JONES, PROVINCIAL TREASURER, TARLAC PROVINCE.

I translated the following telegram to the provincial governor (Governor Ramos), immediately after its receipt:

"MANILA, August 1, 1903.

"GOVERNOR RAMOS, *Tarlac, P. I.*:

"I am informed that in your province there are a number of laborers from Tagalog provinces, 1,000 or more, who left Manila for Twin Peaks in order to work on the Benguet roads and that they are likely to give some trouble. You must direct the presidentes of each town to try to induce them to repair to the nearest railroad station where, if they apply to the railroad authorities, they will secure free passage to Manila upon identifying themselves as part of the Benguet labor forces. You are authorized to expend not exceeding 300 Philippine pesos for the purchase of rice to give to these persons the necessary food between their present places and Manila. Confer with

the senior inspector of constabulary and say that I desire him to render all assistance in this matter. The people whom I refer to are suffering from their own foolishness and in the interests of your province and out of charity to them I am anxious to relieve their suffering as much as possible.

“TAFT, Civil Governor.”

Q. Has anyone ever made application for transportation or food under this order?—A. No, sir; not to my knowledge.

Q. I understand that Governor Ramos is sick and unable to be seen?—A. He has been sick for the last two days and has a doctor in attendance with him, and for that reason he is not at present in his office.

Q. Had anyone made application to the governor for assistance would you have known about it?—A. Yes, as he would have had to come to me for the money.

Q. Will you state, if you can, what, in your opinion, is the reason why no applications were made to the provincial government for food or transportation.—A. My understanding and from what I can learn is that they had plenty of food with them and that those who were in need were given food by the people in the town. I state here what has been told me.

Q. Is that a matter of common knowledge and report in the town.—A. Everybody talked about it. It seems to be generally understood.

DR. MARCIANO BARRERA, SECRETARY, PROVINCE OF TARLAC.

I was advised of the telegram that came from Governor Taft on August 1 to the provincial governor, authorizing him to spend \$300, Philippine money, for food, and to furnish transportation to returning laborers from Benguet. That telegram was immediately translated into Spanish and transmitted to all the presidentes along the railway in this province, each of which presidentes was duly authorized by the governor to spend a certain sum for food and were given instructions as to requesting transportation from the railway company. Up to this time I have received no reports from the various presidentes as to what they did under this order, and I do not know whether there have been any applicants for assistance or not. To my knowledge there have been no such applications in Tarlac.

*At Paniqui, Tarlac province, August 20, 1903.*

JUAN COLINDRINO, MUNICIPAL PRESIDENTE OF PANIQUI.

During the last days of July there arrived in Paniqui and presented themselves at the municipal building about 40 men who said they had come from Benguet and had been walking all that day in the road from Bayambang to this place. They were tired and hungry and I gave them food. It was very early when the first of this party arrived, I should say about 5 o'clock in the morning. Later on others came and they remained all that day and overnight, departing on the following day in the direction of Manila. They were given plenty to eat in this city. When they left we gave each one of them a little rice and a small amount of money, 10 cents to each man, and some cigarettes. They were well cared for during their stay here and did not suffer for the necessities of life. I understand that there were many others that passed through this town by way of the railroad who did not present themselves at the presidencia, but that the citizens of the town supplied them with food and cigarettes and some small sums of money. I heard that there was a man named Francisco Malabayabas belonging to one of these parties of “obreros” who died here of cholera. I have no personal knowledge of this only what I heard the president of the municipal board of health say, and he will be able to give you all the information concerning his sickness and death. According to my information, Francisco Malabayabas was the only “obrero” who died in Paniqui.

DR. ELIAS N. RECTO, PRESIDENT OF THE MUNICIPAL BOARD OF HEALTH OF PANIQUI.

I am president of the municipal board of health of Paniqui. My records show that on the 25th day of July, 1903, a man named Francisco Malabayabas died in this town, and that he is described as follows: “Nineteen years of age; native of Los Baños, Rizal province; occupation, laborer; single; died in consequence of cholera in this town.”

Q. How long was he sick before he died; do you know?—A. About six or eight hours.

Q. Did you see Francisco's brother here?—A. Yes, sir.

Q. Do you know in whose house they were?—A. I did not personally see Francisco. The information contained in my record is based on a report of Tomas Fran-

cisco, a sanitary inspector. He visited the house where Francisco Malabayabas was sick and reported to me. The body of the deceased was buried on the day following his death in the cholera cemetery. To my knowledge none of the "obrerros" died here of hunger nor from any other cause except the above-mentioned Francisco Malabayabas, who died of cholera, as above stated. From the investigation I made of the case I am convinced that he did not contract the cholera here but was infected at some other place farther north, in Pangasinan province, because he was sick when he arrived or very soon after his arrival. The towns of Moncada, San Carlos, Bayambang, and other towns between here and Dagupan are known to be infected with cholera.

TOMAS FRANCISCO, SANITARY INSPECTOR AT PANIQUI.

Q. On what day did you see the sick man, Francisco Malabayabas?—A. On the 25th day of July.

Q. At what hour of the day?—A. About 11 o'clock in the morning of the 25th day of July, I found at the railway station a man, who, upon examination, I found to be suffering from cholera. His symptoms were vomiting, diarrhea, cramps, and blue finger nails. I had him taken first to the cockpit, and afterwards to a house near the cockpit owned by a man named Delmacio, whose surname I do not know. I was accompanied by another inspector who attended the sick man and gave him medicine. I left the other inspector to attend the sick man, who was also accompanied by two other men, one of whom said his name was Malabayabas, and a brother of the sick man; the name of the other companion I do not know. I returned to the house where he was on the following morning about 8 o'clock to see this Francisco and found him dead. Whereupon I caused the body to be buried in the cholera cemetery.

Q. Pedro Malabayabas, brother of the deceased, states that Francisco did not die of cholera.—A. I am positively certain that it was cholera. I saw him and observed his case carefully, and he had all the symptoms of cholera which I have above described. I placed the brother of Francisco and the other companion in quarantine for two days, allowing them to depart on the third day, after which I disinfected the house. Francisco's brother wanted me to certify that the deceased did not die of cholera, but of hunger, which I refused to do, being certain that it was a case of cholera. I believe that the object of his making this request of me was to avoid being put in quarantine.

*At Dagupan, August 21, 1903.*

J. F. W. RICKARDS, CAPTAIN, PHILIPPINE CONSTABULARY, SENIOR INSPECTOR, PROVINCE OF PANGASINAN.

Q. You wrote this letter, did you, Captain [showing witness letter dated August 15, 1903, which is hereto attached, marked "Exhibit B"]?—A. Yes.

Q. I will ask you to state how and in what manner you secured the information stated in this communication?—A. At Urdaneta. The information came from the presidente of the town and was verified by Telegraph Inspector Hill. In San Carlos the advice is in writing from the presidente in an official letter, in Bautista the advice came by telegram from the presidente of the town, and the one at Alava was reported by the presidente and verified by Inspector De Witt.

Q. In those instances where the reports of the presidentes were not verified by one of your officers, are you satisfied, from your own acquaintance with the presidentes and their manner of conducting business, that the information given by them is correct?—A. Yes; I have no doubt it is correct. I heard incidentally from the inspector that some of the men who died were said to be Poblete workmen, but he was not sure. Most of the refugees returning from Twin Peaks passed through Bautista, and a large number came from that place.

Q. In the course of the investigation you made in regard to the Poblete workmen, have you received any information of any of these men having died of starvation?—A. No; none whatever. I have reason to know from reports of the inspectors that the workmen were well treated by the municipal authorities and people in the towns through which they passed; that they invariably got food and, in many cases, money from private individuals.

Q. When it was stated to you by the presidentes and others who have reported to you in regard to the deaths of these men that they were members of the Poblete obreros, I suppose you do not know where they obtained such information?—A. There is no proof whatever, except the word of the people themselves, in saying they were Poblete workmen. Groups of people wandered in the towns and the presi-

dentes took their names. They stated they were people who had been directed to work on the Benguet road.

Q. Had there been any deaths of starvation amongst those returning laborers they would probably have come to your knowledge?—A. Undoubtedly. It would certainly have come to my knowledge through the constabulary inspectors in the provinces.

Q. There was cholera in the province at the time?—A. There was; yes.

Q. With reference, Captain, to the reports which you have received regarding the death of certain men at the towns of Bautista, San Carlos, and Urdaneta, I find that very complete details are given, except the former residence of the deceased; have you any data concerning this?—A. No. The question was particularly asked as to the provinces and towns from which those persons who died belonged, but neither the presidentes nor the constabulary officers were furnished this information.

Q. It would seem, therefore, that the presidentes, in securing the statements from these men before their death, had neglected to inquire of them their places of residence?—A. Yes; the trouble was these people had died before we got this order, and it was impossible to get anything except what they gave of their own accord, without any reference to this order. There was no one in the towns who knew them to get the information from.

Q. Did these presidentes state to you that they had positive information that these men were Poblete obreros, or just guessed that because they passed through their towns?—A. They stated that the people who applied for food said they were workmen returning from Benguet.

NOTE.—In the letter of Captain Rickards, Exhibit B, three deaths are reported at the pueblo of Urdaneta, province of Pangasinan, of persons supposed to have been connected with the obreros. In this connection I desire to call attention to the map herewith submitted, marked "Exhibit C," showing the route from Twin Peaks to Dagupan. From this map it will be seen that the road from Twin Peaks to Dagupan, after passing through the pueblo of Alava, touches first the pueblo of Pozorrubio, from thence running to Manaoag, a distance of 9 kilometers, and from Manaoag, via San Jacinto and Mangaldan, to Dagupan. From Manaoag there is a branch road to Urdaneta, 13 kilometers in length, not considered passable at this time of the year; a very bad road. A person en route from Twin Peaks to Dagupan would have no occasion to pass through Urdaneta. On the contrary, if he went to Urdaneta he would simply be going 13 kilometers in a direction opposite to his destination. The anxiety shown by the members of the Poblete obrero companies to get to Dagupan, would, I believe, have prevented them from taking a side trip to Urdaneta; and I am, therefore, of the opinion that the persons reported as dead in Urdaneta have no connection with any of the Poblete companies.

*At Pozorrubio, August 22, 1903.*

AGUSTIN PATAYAN, PRESIDENT OF THE MUNICIPAL BOARD OF HEALTH.

Q. You were here in Pozorrubio during the month of July when the laborers were passing through?—A. Yes, sir.

Q. Did any of them die there?—A. No, sir.

Q. Do you know of any man by the name of Lucio Gutierrez having died in this town, or in any one of its barrios, during the month of July?—A. No, sir; I have never heard of it.

Q. Had he died in your town would you have known about it?—A. Yes, sir.

JACINTO PERALTA, MUNICIPAL PRESIDENT OF POZORRUBIO.

A large number of men passed through here during the latter part of July and the early days of August, but I did not see any one who was sick nor any that were suffering from hunger or suffering from anything except the ordinary fatigue of the journey. There were a few men in this town, going to and coming from Twin Peaks, who asked for a little rice, and it was always given them. Some men that passed here going from Dagupan to Twin Peaks stated that rice had been given them for two days' journey, but that they had been on the road three days.

Q. How many days does it take to go from Dagupan to Twin Peaks?—A. The distance can be walked in one day, two days being considerably more than enough to accomplish the journey with ease.

*At Twin Peaks, August 24, 1903.*

N. M. HOLMES, CHIEF ENGINEER, BENGUET ROAD.

They (the workmen) arrived here on the afternoon of July 20—the 250. I had a note from Mr. Schutt, of Dagupan, saying that he had rationed them for two days. I believe his note was dated either the 17th or 18th, as I recall it now. The workmen on reaching here said they had eaten up their rice, and that they had not had anything to eat for twenty-four hours, but according to Mr. Schutt's note they must have been rationed fully up to the date they arrived here, but they told me they had not had anything to eat the last day, so I sent them over to the commissary and had rations issued to them. The amount of rations issued was 500 pounds rice, 10 pounds salt, and 81 pounds bacon. This was the night they came in, and was supposed to ration them until the next morning. They seemed perfectly satisfied at that time. They were supposed to go up to Camp No. 3. We had no houses here for them but had up there and they had gotten in very late that afternoon, too late to go on any farther, so I told them to make themselves comfortable around here, and I did all I could for them. I showed them the different places where they could sleep that night if they wanted to, and told them to get in places where they would have shelter of any kind, and they immediately started out and began cooking their rations and were apparently very contented. The next morning they came up, two capataces (bosses), a young man who spoke a little English doing most of the talking, and when the other men started to work I had them lined up at that time preparatory to sending them to Camp No. 3. They were just about lined up when the capataces came to me and demanded some rations. I said I had just rationed them yesterday for twenty-four hours and when they got to their camp more rations would be furnished them. They refused to go until they had more rations, so I delivered over to them another 500 pounds of rice and 10 pounds of salt. After giving them the rice and salt we told them we would give them a ration of beef as soon as it was killed. I then thought their troubles were all satisfied and I had them lined up once more, and they were about ready to start, when this youngster came up again and said that the women of the party had not been rationed. I said I had no authority to issue any rations to women, and he said they insisted on the women having rations, and in order to preserve peace and get them started I said I would give them (the women) rations. I believe they had seven women, so I made out another ration return and had the women rationed. I then started the workmen off to their camp, when this youngster came back again and asked how much pay they were to get a day, and I said, "You will receive 25 cents gold or 50 cents Philippine money and rations a day;" and as soon as I said that he flew into a state of excitement and said he had been promised \$4 a day when his work became as good as an American's, but under any circumstances he was to get \$2 a day and rations for each of his men. I told him that such wages was entirely out of the question; that we were not paying any such wages as that to Filipinos, and the only authority I had was to pay 25 cents gold a day and a ration. He refused to listen to this, and said the price he mentioned was the one he was promised. As Major Kennon was expected back that afternoon, I said, after using all the persuasion I could with him to get him started to Camp No. 3, for we had no houses here for them, "Now, you go up to Camp No. 3 and get your men housed there, and this afternoon, when the Major comes, bring the question to him. I have no authority to regulate or make changes in your wages, nor give any other than 25 cents gold and rations a day." He refused to listen to that, and finally said that if Major Kennon was coming up that afternoon they would wait for him. He refused to go up to Camp No. 3 or even put his men under shelter until he had settled that business, as he brought his men back and they came and stood in front of this house. The whole time they were here until they left they were under my eye and I saw them the whole time. Later on that day—it was some time after dinner—we killed this beef and issued to these men the 181 pounds, and the very instant they got the beef they simply took it and walked deliberately out of camp. That was the last I saw of them. They never waited for Major Kennon to come. On leaving the camp, they started directly down the road. This was practically everything that occurred while they were here. After they got away, I heard they had made a complaint that some American had mistreated them and kicked over their cooking utensils. This did not come under my observation, and I do not believe it. Any American that is inclined to be rough with natives certainly would not have picked out this place to do it, because I have always had very strict orders in that regard and have discharged a number of Americans who have imposed on the natives, and I am quite sure that no man would go in front of this house and kick over the cooking pots.

Q. Did it rain the afternoon the men were here?—A. I think it did shower a little.

Q. Do you know of them having asked for shelter in some of these houses and been driven out?—A. No; that is certainly false, for I gave them a chance to sleep in any place where they could get shelter. Some slept in the doctor's house, others in the houses along the row, others were in the house now occupied by Major Kennon, which was in an unfinished condition at the time.

Q. Was it particularly cold at that time?—A. Not particularly; the same as it is this afternoon; even better weather than this. It was pretty warm and nice that night, as I remember; we had a little rain, never heavy, and the next day was bright and clear.

Q. When these capataces came to see you, did they undertake to make any conditions as to their pay as foremen?—A. They demanded double the pay of a laborer, and in case a laborer would get \$2 they were to get \$4. I told them that they would get double the laborers' pay, but that the laborers' pay would be 25 cents gold a day, and they would get double that. They simply came back with one complaint after another. Three or four times I had them just started, and each time they came back—once about their rations, once about rations for the women, and then about the rate of wages. I do not know if they came up here to work or what for. They were orderly and behaved themselves while they were around here. They did not have any trouble, and if there was any of the kind they are said to have complained about—their cooking pots being kicked over—they would have come to see me about it, as they came up with every little piece of trouble they had, where to sleep, what to do about cooking utensils, and every little thing, in fact.

Q. Did they complain about having suffered from cold during the night or having been out in the rain?—A. No; I do not remember any complaint as to that. Their complaint was about rations; they wanted more rations, and the amount I gave them the night before they could not possibly have eaten.

Q. Were there any other parties of so-called Poblote workmen here other than the 250?—A. A small party that had already gone to Camp No. 3. There were some 40 or 50 in that outfit.

Q. Before the arrival of the 250?—A. Yes.

Q. Were they Poblote men also?—A. They were supposed to be, I think.

Q. After the 250 did any more Poblote men come in?—A. No; I do not think so; unless they came up saying they were Poblote men.

Q. How many of these Bicol people have you here?—A. We have 113.

Q. Do they work well?—A. The Bicol men have done very well; are contented, work well, and we have no trouble with them. They do better work than any Filipinos I have ever seen since I have been engaged on this work; they work very quietly and orderly. They have some carpenters with them. We think they are good workmen, superior to the others, and we told the capataces that any of their men who got out a good piece of work that was up to the standard of the American, they would get the same money, because work is what we are after, regardless of the man's color, race, or nationality. If a workman can do the standard of work according to our standard of wages, he can draw the same price. As for this crowd of Poblote, from the time they came in until they left they did absolutely nothing but draw rations all the time they were in here. They were in front of my house during their entire stay and were directly under my observation, and if anything had happened to them about which they could complain I surely would have seen it.

Q. How do you find the work of the Filipino laborer compared with the American?—A. Well, take it on some work—drilling, for example—the Filipino is entirely unable to handle the sledgehammer, but they do work on the hand drill, and in that drill about 2 feet a day to an American's 6 or 8.

JAMES L. SCOTT, CHIEF CLERK TO MAJOR KENNON.

I was present during some of the conversations which took place between Mr. Holmes, chief engineer, and the capataces of the Poblote laborers. They arrived in Twin Peaks about 12 o'clock noon on July 20, were rationed, native rations, and immediately after eating them sent one of their number to Mr. Holmes to ascertain what wages were being paid. Mr. Holmes informed them they were to receive 25 cents gold a day, board and quarters. They told Mr. Holmes that they had been promised as much money as an American was receiving if they performed as much work as an American. Mr. Holmes told them they would have to demonstrate their ability to perform that amount of work before they could be promised that pay. The capataz then told Mr. Holmes that he did not want as much money as an Ameri-

can, but would be satisfied with 2 pesos per day. Mr. Holmes informed him that he could not pay any such wages as that and advised him to remain until the return of Major Kennon, which would be the next day. They remained about the camp, apparently satisfied, until about 6 o'clock in the afternoon, when, as I understand, they made a demand for fresh beef. Mr. Holmes informed them that as soon as beef was killed they would be issued their rations of fresh beef. The next morning the beef was killed, and they were given about 200 pounds in a lump. Without any explanation whatever they immediately bundled up their rice that had been issued to them and their meat and set out on the march for Dagupan. While in the camp they were treated well and with all respect, and were not molested by anyone to my knowledge. They complained that they did not find things as Mr. Poblete had promised them, and it was their intention to return to their homes.

Q. While these people were here were they under your observation most of the time, in a place where you could see what was going on?—A. Yes, sir.

Q. If any American laborers had abused or molested them would you probably have seen it?—A. Yes, sir; I would have seen it.

Q. Where were these workmen quartered on the night they were at Twin Peaks?—A. They were quartered around the station. Some were sleeping at the house of the doctor over there. They slept anywhere they could find shelter, houses not being very plentiful here at that time. Some of them slept here in the unoccupied house of Major Kennon, and others on the verandas.

Q. Do you remember the condition of the weather that night and the next morning; whether it was unusually cold, or whether there was a heavy rain?—As nearly as I can remember, we had no rain on that night or the next morning. If it did rain, it was very light.

Q. Did any of these men complain that they had suffered from the cold or had been exposed to the rain?—A. Not that I ever heard of.

Q. Is it not a fact that all of the talking was done by their capataces?—A. Yes, sir.

Q. Do you know of any of the men having been driven out of houses where they were seeking shelter?—A. No, sir.

Q. Have any other parties of Poblete workmen come here since that 250?—A. No, sir.

NOTE.—I arrived at Twin Peaks on the afternoon of August 23 and left on the morning of the 25th. On Monday, the 24th, I walked up from Twin Peaks to Camp No. 3, a distance of about 4 miles, and saw the work going on. There was a large force of men at work, of many different nationalities, including a number of Filipinos. I talked with many of the Filipino laborers along the route and at the camp in Twin Peaks, especially with those from Albay, as I have a slight knowledge of the Bicol language. They all said that they were satisfied with their employment, that the wages paid them were sufficient, that they were treated kindly by the officials and bosses, the food good, and they had no complaint to make.

*Barrio of Asan (Pueblo of Alava), August 25, 1903.*

VICTOR RODRIGUEZ, MUNICIPAL PRESIDENTE OF ALAVA.

According to the records of the municipality of Alava, a stranger died in this barrio on the 13th day of July of cholera. I have no knowledge or information concerning the matter other than that shown by the municipal records based upon a report to the teniente of this barrio. I present herewith a certified copy of the record. (Hereto attached, marked "Exhibit D.") This is the only case of death of a stranger that I know of within the jurisdiction of my town during the month of July and the present month of August. Had there been other deaths I am sure I would have received information concerning them from the tenientes of the barrios. During the first days of August, I can not remember the exact date, I received an order from the provincial governor directing that in case any obreros passing through my town, going to or from Dagupan, were sick, hungry, or in need, I should administer to their wants, paying expenses of the same from the municipal funds, as I understood it, to be reimbursed later by the government. According to this order I issued instructions to the tenientes of barrios along the road. There has never been an application for assistance from any obreros.

TEODORICO GENELASO, TENIENTE OF THE BARRIO OF ASAN.

Q. When did you see for the first time Rufino Gutierrez?—A. When I saw him dead.

Q. You did not see him before he was dead?—A. No.

Q. How do you know he died of cholera if you did not see him when he was sick?—A. He had all the signs of cholera, blue nails, and in his clothing, and I saw where he had vomited in the house.

Q. Did any men around here see the body before he died?—A. No; they only saw him when they carried the body.

Q. Was the body in a house alone; were there no other people in it?—A. There was no one in the house.

Q. Do you remember the date about when this happened?—A. It was in the month of July; I can not remember the date.

Q. Did you see any companies of obreros passing through here en route to Dagupan about that time, shortly after the death of this man?—A. Yes; there were many men.

Q. Did you speak to any of them?—A. No.

LAURO VILLAMIL, SERGEANT OF POLICE OF ALAVA.

Some time after the death of this man Gutierrez, a great many obreros passed through here going to Dagupan, and I talked to many of them about what were the conditions up there, who they were, and where they were going, etc., and incidentally, in these conversations, I mentioned to some of them that a man by the name of Gutierrez, from Nueva Cáceres, had died in this barrio, and been buried here.

*At Lingayen, Province of Pangasinan, August 26, 1903.*

STATEMENT BY GOVERNOR FAVILA.

This is a true copy of my order to the presidentes of the different pueblos in this province, written after my receiving the telegram from Governor Taft to render all assistance to needy "obreros" returning from the Benguet roads, as regards food and transportation. Up to date, so far as I know, no application for assistance has been made by any obreros in any of the pueblos.

Copy of Governor Favila's order is hereto attached, marked "Exhibit E."

I returned to Manila from Dagupan on August 28, and being desirous of finding some record or lists from which the names of persons who died in Tarlac and Pangasinan province could be checked, called upon Mr. Pascual H. Poblete, the following conversation ensuing:

*Conversation between Mr. Ross, supervisor of fiscals, and Mr. Pascual H. Poblete, at Manila, August 29, 1903.*

"Mr. Ross. Mr. Poblete, I came to see you to ascertain if you can furnish me with lists showing the names of the men who composed the various parties of "obreros" that you sent from Manila to Dagupan and Twin Peaks. I have the list of the first 250, that is the Egasani and Battallones parties, but have no others in my possession and have been unable to obtain them.

"Mr. POBLETE. I am very sorry, but I am unable to furnish you any lists of these men. I never kept any names. I was not expecting to make any money out of it and simply desired to assist the laborers and the government. You understand that with each 105 men there was a capataz, and these capataces were supposed to have lists of their men. I do not know whether they all reserved their lists or not, nor can I give you the names of any of these capataces who might be able to assist you.

"Mr. Ross. Then you are unable to furnish me any data with reference to any of these men?

"Mr. POBLETE. No, sir; I am sorry to say that I can not for the reasons that I have stated."

The letter hereto attached, marked "Exhibit F," was written by the president of the provincial board of health of Pangasinan Province at my request, the information contained in said letter having been taken from his official records. The statement of this official shows that cholera existed in all the towns along the railway through which the Poblete obreros passed on their return trip from Dagupan to Manila. The purpose of this testimony is to show the source of infection of the men that died of cholera at Paniqui and Tarlac, Tarlac Province, it having been stated by the officials of those towns that little or no cholera existed there prior to the arrival of the "obreros" from Dagupan.

The letter hereto attached, marked "Exhibit G," was received by me at Dagupan from the president of the municipal board of health at Moncada, Tarlac Province,

and relates to the death of one Antonio de Robles, of the town of Aliaga, Province of Nueva Ecija, who died of cholera on the 1st day of August, 1903.

Attached hereto, marked "Exhibit H," is a letter from the provincial governor of Tarlac Province to the executive secretary, giving information concerning the death of certain individuals in Tarlac Province. The information given by the provincial governor is based on reports of municipal presidentes and coincides with that obtained by me during my investigations, except that no reference is made to the death of Francisco Malabayabas at Paniqui on July 25, and that he states that Blas Gamboa and Manuel Degano died of starvation, whereas the official records of the municipal board of health of Tarlac show that these two men died of malarial fever. (See testimony of Doctor Espinosa, president of the municipal board of health, Tarlac (p. —.) I believe that the information obtained by the municipal doctor, and made a matter of public record by him is more reliable than that given by the provincial governor on the information of the municipal president, especially when considered with the rest of the testimony, which clearly shows that the needs of these obreros were liberally contributed to by the people of the towns through which they passed, and that there was scarcely a possibility of any of them dying from hunger.

The letter dated August 7, 1903, from the secretary and acting governor of the province of Pampanga, addressed to the honorable civil governor, states that none of the Poblete obreros died in that province. This letter is among the files of the executive bureau in this matter, marked "28866, A35, August 20, 1903."

Attention is invited to copy of a letter hereto attached, marked "Exhibit I," from Major Kennon to Mr. C. L. Schutt, containing instructions as to treatment to be accorded Filipino laborers. In this connection see testimony of Mr. N. M. Holmes and Mr. J. L. Scott (pp. —), showing that these instructions were complied with; also statements of the men themselves.

A written statement made by Alfonso Acosta, a translation of which is hereto attached, marked "Exhibit J," throws some light on the question of whether or not any of Mr. Poblete's men died of starvation, and also the rumors that were circulated in regard to such alleged deaths.

#### COMMENT.

During the course of this investigation a large number of witnesses were examined. Every person who was known to have any knowledge or information concerning the facts, or to whom reference was made as having any knowledge or information, was searched out and his testimony taken. The result is quite a voluminous record, of which I will endeavor to give the substance.

It appears from the testimony above set forth and from the records in this matter that early in the month of July, 1903, Maj. L. W. V. Kennon, in charge of the Benguet road works, had a conversation with Mr. Pascual H. Poblete, of the city of Manila with reference to securing laborers to work on the Benguet road, Mr. Poblete having publicly stated that it was within his power to secure a practically unlimited number of laborers; that Major Kennon told Mr. Poblete that he was in need of laborers on the Benguet road and would be very glad, if through his agency, he could secure them. The subject of wages was discussed and Major Kennon informed Mr. Poblete that the rate of wages fixed for Filipino laborers was 25 cents gold, or 50 cents Philippine currency, per day, with rations and quarters, adding that the rate might be increased if they showed ability to perform the same amount of work as laborers of other nationalities and races. It was distinctly stated, however, by Major Kennon (and as he speaks the Spanish language fluently I cannot believe that Mr. Poblete could have misunderstood his remark) that all Filipino laborers must begin at the 25 cents, gold, a day rate, the question of increase to be determined later in case they demonstrated their ability to perform more work.

It appears that Mr. Poblete very soon after his talk with Major Kennon undertook the organization of a body of laborers to send to Benguet. For this purpose he secured the services of several intelligent young Filipinos from Laguna and other provinces to assist him, with the understanding that they were to be employed in the capacity of foremen or capataces.

These capataces went out into the Provinces and organized companies of laborers to go to Benguet, offering them, according to the statements of a number of men who joined these organizations, \$4 per day, Mexican, provided they equaled the work of Americans, and \$2 a day if they only did half as much work. I interviewed a number of these men and they all claim that that was as far as the capataces went in their statements concerning wages. They further stated that upon their arrival in Manila, having reported at the house of Mr. Poblete, he addressed them from the balcony, offering them these terms.

On the 17th day of July, 1903, 250 of the men assembled at Mr. Poblete's house and proceeded, under the leadership of Andres Egasani, Publio Battallones, and others, to Dagupan, by the railway, having, according to their own statements, been supplied with three days' rations. They arrived at Dagupan about 8 or 9 o'clock on the night of the 17th, ate their supper from the rations on hand and were quartered for the night in stores and "camarines" in the market place. The following day having been issued rations for a two days' journey, they left for Twin Peaks, arriving there July 20. The distance from Dagupan to Twin Peaks is about 35 miles over a very good road. It is possible to walk the distance in a day, but it can be made with the greatest ease in two days. Why it required these men three days to make the trip is not explained. They arrived at Twin Peaks about 4 o'clock in the afternoon of the 20th day of July, and were received by Mr. Holmes, chief engineer, Major Kennon being absent at the time. They were immediately issued rations, consisting of 500 pounds rice, 10 pounds salt, and 81 pounds bacon, and were told that they would not be expected to remain there, but that the work was farther up the road at Camp No. 3, 4 miles beyond Twin Peaks, where they were to proceed on the following day. They were quartered for the night in the new houses at Twin Peaks, and on the verandas of houses occupied by officials of the road, and made as comfortable as possible—apparently satisfied. Early the following morning, however, when about ready to start for Camp No. 3, they demanded more rations, which Mr. Holmes gave them, notwithstanding the fact that they had already been rationed for twenty-four hours, more than sufficient for the trip to Camp No. 3 (a distance of 4 miles from Twin Peaks). This demand having been complied with was speedily followed by others for rations for the women of the party and for fresh beef, all of which were complied with by Mr. Holmes, even to rationing the women and children of the party; but upon the last issue of fresh beef being made, they immediately packed up their rations and left the camp in the direction of Dagupan, notwithstanding the promise made by the capataz to Mr. Holmes to await the return of Major Kennon, when the difference as to wages promised by Mr. Poblete to the capataces and those actually paid by the Government might be discussed and explained. During their stay at Twin Peaks they were treated with kindness and consideration, were issued rations far beyond their necessities, were constantly under the eyes of Mr. Holmes and Mr. Scott, where it would have been impossible for anyone to have mistreated them without being observed by one or both of these gentlemen. Mr. Holmes and Mr. Scott both state very positively that the men were not abused in any way, but on the contrary they seemed contented and satisfied, except the capataces, who were constantly running to Mr. Holmes with demands. The testimony of Messrs. Holmes and Scott is corroborated by the men I interviewed at Calamba, Cabuyao, and Los Baños, Laguna Province, who stated that they were furnished sufficient food and were not illtreated in any way whatever. The only instance of anything of that nature being, as stated by Eduardo Babate and Isaac Barangalan, that they saw one rice pot kicked over by an American; but if there were any abuses of a serious nature committed by any American or others against these Filipinos, as has been stated by certain individuals, it is indeed strange that they did not come to the knowledge of either Mr. Holmes or Mr. Scott, or were not observed by some of the men present at Twin Peaks on that occasion whose statements have been taken.

Having left Twin Peaks, the 250 proceeded down the road to Dagupan, breaking up into companies and parties on the way, and after remaining a short time in Dagupan, straggling out over the road toward Manila. During this time it appears that there had been other so-called "obrero" companies organized in Manila by Mr. Poblete and started for Dagupan, the total number footing up to about 1,400 men, only about 1,000 of whom, however, reached Dagupan, the others having deserted, or disappeared in some way, en route, and of the 1,000 arriving at Dagupan the only ones that ever reached Twin Peaks or made any effort to do so were the 250 whose movements have been described, except a party of 30 or 40 under a man by the name of Lacosta, that went to Twin Peaks, accepted the terms offered them, went to work and are still working. All of the others returned from Dagupan to Manila without making any effort whatever to reach Twin Peaks, with the exception of a small party that went as far as Pozorrubio and turned back. It is undoubtedly true that a great many of the laborers en route from Manila and other points to Twin Peaks were influenced to abandon the undertaking by statements of members of the 250 whom they met on the road or at Dagupan. The disorganization of these "obrero" companies and the general exodus from Dagupan which followed, resulted in scattering over the country along the line of the railway between Dagupan and Manila several hundred men, most of whom perhaps were not supplied with the means of maintaining themselves on the journey. Notwithstanding this the testimony shows

that there was no suffering from hunger, the people along the route over which they traveled supplying them liberally not only with necessary food, but even with "vino," beetle-nut, cigarettes, and money. Several persons of unquestioned veracity and of high standing in their respective communities gave their testimony on this point and they all state most positively that no one of these men died of starvation, or even suffered from lack of sufficient food, but on the contrary, that they fared remarkably well, the people of the towns through which they passed receiving them into their homes with the hospitality characteristic of the Filipino people and contributing liberally to their assistance. With reference to the deaths which it has been stated occurred among these laborers, I made, with the assistance of provincial and municipal authorities of Tarlac and Pangasinan provinces, and constabulary officers, a very careful investigation and have found that the following-named persons died during the time of the obrero movement:

#### TARLAC PROVINCE.

*Tarlac.*—Romaldo Santiago; died July 27, from cholera; 30 years of age; occupation, laborer; residence, Angot, Bulacan province. Melicio Gabriel; died July 30, from cholera; 35 years of age; occupation, laborer; residence, San Rafael, Bulacan province. Blas Gamboa; died July 22, from malarial fever; 33 years of age; residence, unknown. Manuel Legano; died July 23, from malarial fever; 30 years of age; residence, unknown.

*Paniqui.*—Francisco Malabayabas; died July 25, from cholera; 19 years of age; occupation, laborer; residence, Los Baños, Laguna province.

*Bambam.*—Isidoro Leidea; died July 24, from cholera; 18 years of age; residence, Lipa, Batangas province. Hipolito Nuñez; died July 27, from cholera; 28 years of age; residence, Angot, Bulacan province. Catalino Quilala; died July 27, from cholera; 36 years of age; residence, Maliano, Albay province.

*Moncada.*—Antonio de Robles; died August 1, from cholera; residence, Aliaga, Nueva Ecija province.

#### PANGASINAN PROVINCE.

*Bautista.*—Martin Miranda; died July 20, from cholera. Francisco Espiritu; died July 31, from cholera. Sinforosa Roque (wife of Nicolas Solas); died July 31, from cholera.

*San Carlos.*—Simplino Tua; died July 23, from diarrhea.

*Urdaneta.*—Laborer, surname unknown, called "Marielo;" died July 24, cause not stated. Apefano Boan; died July 16, from cholera. Clara Manoalo (wife of a laborer); died July 23, bathing when in heated condition.

*Alava.*—Rufino Gutierrez; died, barrio Asan, on August 10, as stated by Inspector De Witt, Philippine Islands; 23 years of age. Municipal records show July 13 as date of death, from cholera.

Only one of the above-named individuals, Francisco Malabayabas, has been identified as a Poblete "obrero," he having died of cholera at Paniqui, Tarlac province, on the 25th day of July, 1903; the others who died were said to be strangers in the towns where they were found and were traveling along the road at the same time that the obreros were, and upon this the assumption is based and the statement made by some officials in reporting on these matters that they were members of these organizations.

**NOTE.**—A careful examination and comparison of the names of the men reported dead with the only list in our possession (that of the 250 laborers that left Manila for Twin Peaks on the 17th day of July), shows Francisco Malabayabas as the only member of that organization that died. It is shown by the record of the testimony in this case that Mr. Poblete, when asked to produce lists of the other parties and companies of laborers that left Manila was unable to do so, and we are left without any definite information on this point.

Before going north I was unable to obtain the names of any persons supposed to have died, except those of Francisco Malabayabas and Lucio Gutierrez. The statements concerning the death of Malabayabas were verified at Paniqui, except that the testimony of his brother, Pedro, that Francisco died of starvation, was found to be untrue. With reference to Lucio Gutierrez, I made a very careful and searching inquiry, it having been stated by Andres Egasani and Publico Batallones, that on the march from Dagupan to Twin Peaks, Gutierrez being in an exhausted condition, had dropped out of the column at some barrio of Pozorrubio, two of the company remaining to take care of him, and that upon their return, two days later, they found that Gutierrez had died. The manner of these witnesses when testifying concerning this matter aroused my suspicions, which were confirmed by the result, and the case of

Gutierrez affords a very good illustration of the reckless and ill-advised manner in which these statements concerning deaths have been made. The president of the municipal board of health and the presidente of Pozorrubio state positively that no deaths occurred among the Poblete "obreros" within the jurisdiction of their town. Arriving at the barrio of Asan of the town of Alava I interviewed the presidente and teniente of the barrio and secured an official certificate (Exhibit D) from the municipal secretary regarding the death of a man by the name of Rufino Gutierrez, of Nueva Cáceres, which certificate shows that the man died of cholera at Asan, on the 13th day of July, three days before the Poblete men left Manila. As shown by the list of the 250 laborers that went to Twin Peaks there was a man among the number by the name of Lucio Gutierrez, whose place of residence I have been unable to ascertain, but who is said to have joined at Calamba. Even if it is true, as stated by Egasan and Batallones that this man left the company at some place in the vicinity of Pozorrubio, there is no ground for the belief that he died there, the truth probably being that he lost interest in the undertaking and returned to Dagupan with the two men who were said to have remained with him, and that the others, hearing that a man of the same name had died in the barrio of Asan, jumped to the conclusion that the dead man was Lucio Gutierrez and so reported it.

NOTE.—The statement of Alfonso Acosta (Exhibit J), the testimony of Brigida Abril and Pedro Malabayabas, afford further illustrations of the loose and reckless manner in which these stories of suffering and deaths were circulated. Another instance of the same character is found in the testimony of Doctor Espinosa, president of the municipal board of health of Tarlac province asking for data concerning the death of two individuals, named Blas Gamboa and Manuer Legano, promptly replied with a note (Exhibit A), stating that they had died of starvation, but when called upon by me for a personal statement and requested to produce his official records the doctor discovered that he was mistaken, and stated that he had written the note (Exhibit A) hurriedly, and that as a matter of fact both men had died of fever, as shown by his records and confirmed by personal investigation, and that to his knowledge no one had died of starvation in Tarlac. Doctor Espinosa was until recently the treasurer of "La Unión Obrera Democrática."

The final result of this inquiry, after searching out every bit of information obtainable, and running down all sorts of rumors and reports, shows that one man (Francisco Malabayabas), identified as a member of one of the Poblete companies, died of cholera on a trip from Dagupan to Manila, it having been reported by his brother and some of his friends that he died of "starvation." That sixteen others, strangers in the towns in which they were found, died of cholera and fevers during the time the Poblete "obreros" were traveling through Tarlac and Pangasinan provinces.

As shown by the map of the route from Twin Peaks to Dagupan hereto attached (marked Exhibit C), it is extremely improbable that the three people who died in Urdaneta were connected with the Poblete organizations. As to whether the other thirteen were or were not connected with these organizations, there is no proof; but assuming that they were members of the Poblete companies, I can not see how the government or any of its agents can be held responsible, even in the remotest degree, for their death, or that anything more than their own folly and that of their leaders led them to their unfortunate end. It is not surprising that of more than 1,000 men, scattered along the highways, and straggling through the country as these people were, with cholera existing in nearly all the towns through which they passed, that some of them should have fallen victims to the disease. The only wonder is that more did not die.

The stories of suffering and death from starvation among these people are shown by this testimony to be entirely untrue. On the contrary, the testimony shows that they were liberally supplied by the people of the country through which they traveled with necessities, and even luxuries, having been so well provided for in fact that the order of the civil governor to the provincial governors of Pangasinan and Tarlac provinces to expend a certain sum for the relief of needy persons belonging to these obrero companies, and to provide them with transportation to Manila was not taken advantage of. An interesting piece of information elicited during the course of this inquiry is that the letter to the civil governor, signed by Mariano Vijandre, Gerardo Cabrera, and another (on file among the papers in this matter, marked "29684 A1, July 27, 1903"), in which a tale of hardship and suffering, not sustained by the testimony, is told, and in which Mr. Pascual H. Poblete is referred to as a man "whose disinterested affection for his fellow-countrymen is proverbial, as has been proven by the facts on more than one occasion," was written by Mr. Poblete himself and signed by these men, Vijandre and Cabrera, at Mr. Poblete's request.

It is very evident from the testimony that the persons responsible for the sensational stories circulated in Manila at the time of the return of the so-called "obreros"

from the north had no reliable information on the subject, but that they seized upon a lot of vague and indefinite rumors, and with the aid of their imaginations worked them up into the statements, letters, and newspaper articles which they endeavored to pass off upon the government and the public as the truth.

Very respectfully,

JAMES ROSS,  
*Supervisor of Fiscals.*

The CIVIL GOVERNOR,  
(Through the office of the honorable the attorney-general, Manila, P. I.)

---

EXHIBIT A.

Señor CATANJAL: Los individuos Blas Gamboa y Manuel Legano eran transeuntes; el 1° era vecino de Cabiao, Nueva Ecija de 33 años de edad y casado.

El 2° era vecino de S. Leonardo, Nueva Ecija, de 30 años de edad y casado.

Fallecieron de hambre según se averiguó; el 1° falleció el día 23 de julio pasado y el 2° el 24 del mismo mes.

Suyo

J. ESPINOSA.

CONSTABULARY OF PANGASINAN,  
OFFICE OF THE SENIOR INSPECTOR,  
*Dagupan, P. I., August 15, 1903.*

ASSISTANT ADJUTANT, PHILIPPINES CONSTABULARY,  
*Manila, P. I.*

SIR: In compliance with letter to the chief of the Philippines constabulary, dated August 10, 1903, and signed by William H. Taft, civil governor, of which an official copy was furnished this office for investigation and detailed report, I have the honor to forward herewith the following reports of death of Poblete workmen from presidentes of the different municipalities.

Bautista, Pangasinan: Martin Miranda died of cholera July 30; buried in Civil Cemetery, Bautista. Francisco Espiritu died of cholera July 31; buried in Civil Cemetery, Bautista. Señora Sinforsosa Roque (wife of Nicolas Solas, laborer) died of cholera July 31; was buried in Civil Cemetery, Bautista.

San Carlos, Pangasinan: Simplino Tua died of diarrhea July 23; was buried in Municipal Cemetery of San Carlos, Pangasinan.

Urdaneta, Pangasinan: Reported by presidente, one laborer died of cholera, whose surname was unprocurable, only he was called "Marielo;" died July 24 at Urdaneta and was buried in Municipal Cemetery. Apefano Boan died at Urdaneta of cholera July 16; was buried in Municipal Cemetery. Clara Manoalo, the wife of a laborer, died at Urdaneta July 23; cause, bathing when in a heated condition; was buried in Municipal Cemetery at Urdaneta.

There has also been reported one Poblete laborer died at Alava, but to date no reply has been received from courier that was dispatched from Twin Peaks August 13; immediately upon his arrival, name will be wired, if reported death is substantiated. The above is a complete list of deaths of Poblete workmen that have occurred in the province of Pangasinan while en route and returning from Twin Peaks. Inspector De Witt reports no deaths in Alava (August 15).

Very respectfully,

J. F. W. RICKARDS,  
*Captain and Inspector,*  
*Senior Inspector, Constabulary, Province of Pangasinan.*

(An official copy respectfully furnished to supervisor of fiscals, Manila, for his information.)

NOTE: August 17, 1903.

Telegram from De Witt states that one of the Poblete workmen, named Rufino Gutierrez, age 23 years, died in barrio of Asan of Alava on August 10, of cholera; was buried in Municipal Cemetery of Alava.

[Telegrama circular.]

LINGAYEN, 3 Agosto 1903.

Presidente Municipal ————:

Sírvase informar inmediatamente á esta oficina si en ese municipio han fallecido algunos obreros de Poblete procedentes de Benguet. En su caso manifieste sus nombres, donde y cuando murieron y fueron enterrados y la causa de su muerte.

Caso de hallarse en esa jurisdicción algunos de dichos trabajadores, présteles auxilios necesarios para su alimentación, quedando autorizado el Tesorero Municipal para dar á los trabajadores arroz y vianda que no excedan de 20 céntimos mex. diario á cada trabajador debidamente identificado, y notifique á todos los trabajadores que vuelvan á Manila presentándose á los jefes de las estaciones del ferro-carril quienes les derán libre pasage, facilitándoles los auxilios á los enfermos para llegar á la estación más inmediata.

Sírvase transcribir este despacho á los Presidentes de ————.

FAVILA, *Gobernador.*

Verdadera copia.

## EXHIBIT F.

PROVINCIAL GOVERNMENT OF PANGASINAN,  
OFFICE OF THE BOARD OF HEALTH,  
*Lingayen, Pangasinan, 25 Agto. de 1893.*

Certifico: Que á petición verbal del Tesorero Provincial, los pueblos que á continuación se expresan han denunciado el cólera desde las fechas siguientes: Dagupan, desde el 1° de julio; Binalonan, desde el 6 de julio; Malasiqui, desde el 9 de julio; Bautista, desde el 12 de julio; Calasiao, desde el 12 de julio; Bayambang, desde el 16 de julio; Urdanete, desde el 16 de julio; Pozurrubio, desde el 22 de julio; Alava, desde el 15 de este mes; San Carlos, desde el 17 de este mes.

Todos los expresados pueblos continúan con la enfermedad en la fecha de la presente.

V. JESUS,  
*Pres. Prov. de la Junta de Sanidad, Pangasinan.*

## EXHIBIT G.

JUNTA MUNICIPAL DE SANIDAD DE MONCADA, TARLAC, I. F.,  
OFICINA DEL PRESIDENTE,  
*21 de agosto de 1903.*

En 31 de julio del mes próximo pasado se me presentó el vecino de este pueblo Don Silvino López, solicitando que se ingrese al hospital de coléricos establecido provisionalmente en este pueblo la persona de un obrero que se dice, era procedente

de Benguet, y que acaba de llegar en esta día; enterado de ello, con el solicitante nos apersonamos al presidente municipal y hemos podido conseguir sin pérdida de momentos todo auxilio, para el traslado inmediato del enfermo, desde la vía ferrea, hacia el hospital citado. Hechas las averiguaciones, resulta que se llama Antonio de Robles, natural y vecino de Aliaga, Nueva Ecija y que estaba atacado de cólera morbo asiático en estado tan grave. Se le administró los medicamentos y alimentos nesesarios y apesar de ello, murió el día siguiente 1º de agosto, habiéndose sido enterrado en el cementerio municipal de este pueblo en el mismo día.

(Signature illegible.)

*Presidente Municipal de Sanidad de Moncada, Tarlac, I. F.*

#### EXHIBIT H.

[Translation,]

OFFICE OF THE PROVINCIAL GOVERNOR,  
*Tarlac, P. I., August 11, 1903.*

The EXECUTIVE SECRETARY, *Manila, P. I.*

SIR: Pursuant to the directions of the honorable the civil governor contained in his telegram of the 1st and 3d of the present month, relative to the workmen for the Benguet road, I have the honor to annex the replies of several municipal presidents of this province in regard to this particular, inviting your attention especially to the reports made by the presidents of the pueblos traversed by the railroad in this province, of which the following is an abstract:

Beginning with the 21st of July last, several groups of the aforesaid workmen have passed through Moncada, one of whom, a citizen of Santa Cruz, Laguna, by the name of Servando Ortega, remained with Mr. Silvino Lopez, a resident of Moncada. On the 31st of the same month one Antonio de Robles, from Aliaga, Nueva Ecija, arrived suffering from cholera, and died of this disease in the hospital established in that pueblo.

*Gerona.*—Numerous workmen also arrived in Gerona imploring public charity, although fortunately no death occurred among them in that pueblo.

*Tarlac.*—Numerous workmen passed through Tarlac imploring public charity, the following having been attacked by cholera and taken to the convent of the church here: Tomas Marcellano, 29 years of age, single, a native of Daraga, Albay, and resident of San Miguel, Manila; Damaso Valencia, 23 years old, native of Baliuag, Bulacan, and resident of San Miguel, Manila; Ignacio Bantog, 24 years old, single, native of Angot, Bulacan, and resident of San Nicolas, Manila. These men recovered from their illness. In the same convent the following-named men died of cholera: On July 27, Romualdo Santiago, single, a native of Angat, Bulacan, and on the 30th of the same month, Melecio Gabriel, single, of San Rafael, in the same province. They were buried in the cemetery for cholera dead of this municipality. The following-named workmen have died in the barrio of San Nicolas, Tarlac, from starvation, as it is reported: Blas Gamboa, 33 years of age, a native of and resident of Cabiao, Nueva Ecija, married to Lucia Cudia on July 23 last; Manuel Legano, 30 years of age, of San Leonardo, Nueva Ecija, married to Maria Austria on the 24th of the same month. They were buried free of charge in the Catholic cemetery of this pueblo.

*Murcia.*—Many of them passed through Murcia, and some of them had the fever, in consequence of the hunger which they suffered, as it is reported. None of them died, however.

*Capas.*—Many of them passed through Capas, most of them with wives and children, hungry and begging food from house to house. Those who arrived half naked were given clothes. Fortunately no death occurred here.

*Bamban.*—Many of them were there, their number being estimated at 200. Three of them died of cholera and were buried at isolated spots in the said pueblo. Their names were: Isidoro Laidea, native of Lipa, Batangas; Hipolito Nufiez, of Angat, Bulacan, and Catalino Quilala, of Albay; they died on the 24th, 27th, and 31st of July last.

It is reported that none of the workmen have come through the pueblos which are not on the railroad.

I have the honor to inform you of this for your knowledge.

Very respectfully,

ALFONSO RAMOS,  
*Provincial Governor, Tarlac, P. I.*

## EXHIBIT I.

MANILA, *July 9, 1903.*Mr. C. L. SCHUTT, *Manila, P. I.*

SIR: You are hereby appointed employee of the Benguet road, at a salary of \$75 per month and rations from July 10, 1903.

You will proceed as soon as practicable to Dagupan and there take charge of the receiving and forwarding of laborers destined for the Benguet road.

Under the terms of the agreement made, all the Filipino laborers for the road will march to Twin Peaks, but will be furnished sufficient rice for the journey, which should not be more than two days. This you will buy at the lowest rates obtainable for first-class rice, at the rate of 3 chupas of rice per day for each laborer. The Government can not pay for the rations of wives or families. Every assistance will be given natives in getting them started. They should remain in Dagupan as short a time as possible. If possible they should be started on the road to Twin Peaks the same day they arrive in Dagupan.

You will engage native boats to unload native laborers arriving by steamer. Natives will invariably be accorded courteous and considerate treatment.

In case of Chinese laborers no assistance except information shall be given without a special authority in each case, as their contract provides that they pay for their own maintenance. So also with American laborers. They pay their own expenses.

Please see the agent of Benguet road now at Dagupan and assist him in any way you can. He will continue in charge of the shipment of supplies, but I wish you to ascertain what transportation in and around Dagupan is available for him. Consult the agent in this matter. Use your best judgment in forwarding the interest of the Government in the matter intrusted to you.

Respectfully,

L. W. V. KENNON, *Major, in charge.*

## EXHIBIT J.

[Translation.]

The undersigned, Alfonso Acosta, reached Tarlac on the 9th instant on official business, and while on the railway station I noticed that a foreman and two members of Poblete's gang were getting on the train. I approached said foreman to ask him what had happened, and he replied to me that he was taking his two men over to Manila, as they had no money to pay their fare; and he went for money, so as to send them off, and upon reaching the railway station he was told they had free passage; and I asked him, "Is it true that Poblete's men have died of starvation on the way?" Said foreman replied to me: "No, sir; it is true that two have died, but it has been through drunkenness and cholera."

On the afternoon of the 5th I landed from the train and took toward my home. From a long way I saw my children all dressed in mourning, and from downstairs I asked them why were they weeping. At this my wife also came out, embracing me and saying, "Alfonso, Alfonso, we were told that you died of starvation, with ten other hombres more;" and once being there, and they were convinced I was not dead, I told them to take their mourning clothes off.

ALFONSO ACOSTA.

**REPORT OF R. H. NOBLE, CAPTAIN, U. S. INFANTRY, AID-DE-CAMP TO CIVIL GOVERNOR, CONCERNING THE DISPOSITION MADE BY HIM OF THE POBLETE LABORERS WHO RETURNED FROM BENGUET ROAD.**

THE GOVERNMENT OF THE PHILIPPINE ISLANDS, EXECUTIVE BUREAU,  
*Manila, July 31, 1903.*

Hon. WILLIAM H. TAFT,

*Civil Governor of the Philippine Islands, Manila.*

SIR: I have the honor to report as follows concerning the disposition made by me, in accordance with your instructions of yesterday, of the returned laborers from the Dagupan-Benguet Road which Pascual H. Poblete claimed were at his house, No. 18 Calle Gunao, desiring to return to their homes in the provinces.

Transportation to Calamba and Santa Cruz was arranged for with Yangco & Co. at the rate of 35 and 45 cents Mexican, respectively, a slight reduction on the regular

fare; and 8 sacks of rice were placed at the office of the steamers for distribution to the workmen upon their departure this morning for their homes.

As Mr. Poblete had arranged with you to furnish correct lists of the 250 men desiring to return to their homes, I went to his house last night at the hour agreed upon. He stated that the lists were not yet ready. Seeing probably about seventy-five or eighty men standing about, I asked if these were the men who had returned from Dagupan, and he said, "Yes." Being asked where the remainder of the 250 men were, he stated that they had not as yet come in from looking for work about the city, which was the reason why the list of 250 had not yet been made out. I told him that it was absolutely essential to have the lists as agreed upon, and a correct list should be made, even if it took all night; and that up till midnight he could send the lists to me at Malacañan. He also stated to me that 19 men were so sick in his house as to be unable to travel, and that he was incurring great expense in paying for their physician and for medicines for them. I told him that I would speak to you concerning this matter and see if a medical officer of the civil government could not attend to their cases.

At midnight one of Poblete's men, who is in charge of the party from Calamba, came to Malacañan and presented me with a list of exactly 250 men, whom he stated were the workmen from the provinces of Laguna and Batangas desiring to return to their homes this morning. Upon glancing at these lists I perceived that they were arranged in twenties, which was not the arrangement agreed upon between Mr. Poblete and myself when I called at his house, he having agreed to make parties of thirty-five, to whom should be given 1 picul of rice, or sufficient for two days' rations of rice for that number of men returning to their homes; and as the arrangement of twenties was precisely the one made in sending these men to Dagupan, and there being just 250 men, neither more nor less, I asked the man if he was sure that this was the list that Mr. Poblete had given him to be given to Governor Taft in accordance with the agreement of yesterday morning. He said that it was; but upon further cross-examination, and my intimation that if he made misstatements to me I would call the police officer, he stated that it was a fact that this list which he had presented to me was not the list of the men who were returning to their homes, but was a copy of a list which had been made out, on the 16th day of July, of those men who went north to Dagupan. I told him he should inform Mr. Poblete for me that deceit of this kind would not go with me; that a correct list would be furnished, and that I would be present at the steamers and call the list of names of the men who were to go.

This morning, at a quarter past 6, I called at Mr. Poblete's house and inquired for him or for some member of his family, when I was informed that they were not yet awakened. I told the servant that it would be necessary for Mr. Poblete, or his representative, to go down to the wharf, as I had previously arranged the night before, in order to assist in the return to their homes of these men whom he had asked the Government to provide transportation for. In a few moments his son came down and stated that it was a misunderstanding. I told him that as we were doing his father's work we expected that he would manifest sufficient interest to be present and lend assistance at the wharf.

Arriving at the wharf, there were found to be present 22 men and 4 women from Santa Cruz, 10 men who were marked to go to Los Baños, and 14 marked to go to Calamba; 50 in all. Mr. Sulueta, interpreter for the firm of Waite & Early, was there to assist me, and Mr. Amidon, agent for Yangco & Co., also assisted me, inquiring individually of each one whether he was a bona fide returned Poblete laborer en route to his home, and, being assured that they were, they were divided into two parties. Subsequently 3 more men came and joined the party for Calamba, making 53 in all. Four of the number were from Lipa and 2 from San José, province of Batangas; all the rest were from the province of Laguna.

One sack of rice was given to each of these detachments to be distributed among them on the steamer en route. Each man would thus receive by equitable distribution between 5 and 6 "chupas" (or about 5 pounds) of rice, which the men stated to me would be sufficient for their necessities, as none of them lived at more than two days' distance from Manila, and the greater part would arrive home this afternoon.

About the time these arrangements were completed, and a few minutes only before the departure of the steamers, Mr. Poblete's son Vicente arrived on the scene.

With reference to the sick, Doctor Stafford, to whom I delivered your instructions, informed me this morning that when he went to Mr. Poblete's house, early this morning, he had some difficulty in getting in, and finally found 1 sick man behind a screen. He was not very sick, but as the doctor preferred to treat him in the hospital, he had him sent there. Upon asking Mr. Poblete where the other 18 sick

men were, he stated that they had gone to Batangas. I invite attention to the fact that but 6 men of those who went on the steamer stated that they were from Batangas, and none of them claimed to be sick, and none appeared sick.

As Mr. Sulueta speaks Tagalog fluently, he kindly informed the members of these detachments of the arrangements that were made for the division of the rice, and charged them to see that the men to whom it was delivered made the proper distribution. Mr. Sulueta also inquired diligently among the men as to the cause of their returning to Manila. They stated that Mr. Poblete had promised them that none of them would receive less than 50 cents, and to some of them he had promised \$1 gold; also that the provision for housing them at Twin Peaks was as yet inadequate.

Having seen it reported in the newspapers that a large number of these men had died en route, I asked the one in charge from Calamba how many there were who had died, and he stated to me that there were 7. I did not have time to verify this statement with the remainder of his party; but as he was the same man that had attempted to deceive me with the list the night before, and, as only 50 workmen, instead of 250, presented themselves, it would seem that a discount of about 80 per cent might be taken as reasonable.

Very respectfully,

R. H. NOBLE,  
*Captain, United States Infantry,*  
*Aid-de-Camp to the Civil Governor of the Philippine Islands.*

### REPORT OF CAPT. A. R. COUDEN, COMMANDANT, U. S. NAVAL STATION, CAVITE, ON FILIPINO LABOR EMPLOYED AT THE NAVY-YARD.

UNITED STATES ASIATIC FLEET,  
PHILIPPINE SQUADRON, FLAGSHIP RAINBOW,  
*Cavite, P. I., November 13, 1903.*

SIR: I inclose herewith a copy of a communication from the civil governor of the Philippines, with the request that you submit the report therein mentioned for transmission at your earliest convenience.

Respectfully,

YATES STIRLING,  
*Rear-Admiral, U. S. Navy,*  
*Commander of the Philippine Squadron, United States Asiatic Fleet.*

The COMMANDANT,  
*U. S. Naval Station, Cavite, P. I.*

---

OFFICE OF THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS,  
*Manila, November 12, 1903.*

ADMIRAL: I am informed that Captain Couden, U. S. Navy, as the commandant of the navy-yard at Cavite, has had a large experience in dealing with Filipino labor, and as in my annual report I feel obliged to make some reference to the subject it would give me great pleasure if I could have the views of Captain Couden in this matter. I have spoken to him informally in regard to it, but I take this more formal method of securing the report.

With the hope that my request may be granted, believe me,

Sincerely, yours,

WM. H. TAFT,  
*Civil Governor.*

Rear-Admiral YATES STIRLING, U. S. Navy,  
*Commanding Philippine Squadron, Cavite, P. I.*

---

U. S. NAVAL STATION, *Cavite, P. I., December 12, 1903.*

SIR: Referring to your letter of November 13, 1903, transmitting a letter from the Hon. W. H. Taft, civil governor of the Philippine Islands.

2. There are large numbers of Filipinos employed at this station in all capacities, from common laborers, writers, copyists, minor clerks, to mechanics, including boat builders, machinists, boiler makers, leather workers, sailmakers, flag makers, ship fitters, riveters, blacksmiths, and all the various trades and callings of a naval repair yard.

3. As to common labor, when a gang of men is employed on one sort of labor continuously they become after a time very satisfactory; for instance, we have a gang handling coal, and no better men for the work could be asked. It is possible to observe this labor and to readily determine its character, and the cheerfulness and activity displayed is surprising and commendable. These men are employed by the day and not by the ton handled.

4. Common labor where it is of a changing character, for instance, piling lumber one day, loading cascos another, digging trenches, cleaning up a piece of ground, seems unsatisfactory; they are not quick to work in unison and with efficiency. Desultory work, such as keeping the roads and walks cleared of all rubbish, leaves,

etc., is always open to view, and as in all parts of the world such labor is lazily and inefficiently performed by the least capable and least ambitious. On the whole, I believe the common labor here at Cavite is fair and that it is improving from month to month.

5. *Clerks, writers, and copyists.*—There is a tendency more marked here than in the United States to seek employment in these grades, but the tendency has very noticeably diminished within the last year, as it has been vigorously discouraged. They make excellent copyists and typewriters, neat and rapid, but are much handicapped as to usefulness by their lack of English and the consequent necessity of making an original smooth copy. The younger boys are rapidly picking up English, and this will much increase their value in these occupations.

6. We build here many ship's boats and do it at a constantly decreasing cost; in this department we have an excellent American foreman, who has now a competent and faithful set of employees. They are very industrious; an idle man is never seen; they do good work and exhibit a desire to do the best possible.

7. Boiler makers are doing good work, and they show a marked improvement in the last year; ship fitters and riveters are good and improving.

8. The older sailmakers who learned their trade under other systems are faithful workers, but can not work from a plan or sketch on a reduced scale, while the younger men who are now learning the trade exhibit great interest and quickness in picking up our methods, and will, our chief sailmaker believes, make most excellent workmen, capable of planning and executing work as foremen. The flag makers, all Filipinos, make the neatest and handsomest work I have ever seen and are entirely satisfactory. This work has all been learned at this yard.

9. Machinists are employed in large numbers and have improved very noticeably; some of the younger men who have received all their training here are very quick to learn and are found the most satisfactory when new machines from the United States are introduced. Men who are really little more than boys are running such machines very satisfactorily.

10. *Apprentices.*—Within the last six months we have commenced entering apprentices in the various trades. The number of these was fixed by the Navy Department in accordance with the practice at home. The system promises such excellent results that a large increase in the number allowed has been asked for and will probably be granted. A very few years under this method will make this a school for the education of mechanics, not only for our own needs but for the general good of the islands. There will grow such a demand for efficient handicraftsmen in the mechanical arts in the various ports of these islands that a succession of apprentices, becoming journeymen, will commence their journeyings and spread the gospel of steady industry and its rewards.

11. *Molders.*—Molding is the only trade in which we have no Filipino men employed. It appears that no foundry was ever established here (Cavite) in which Filipinos were employed; all of our molders are Chinamen, receiving abnormal wages. We have, however, commenced the apprentice system in this branch and hope to make progress in their training, though the circumstances are very adverse.

12. *Leather workers.*—The making of magazine buckets and similar articles of heavy leather for use in connection with the handling of ammunition is successfully carried on, the men receiving their instructions here recently.

13. There is a marked improvement in the carpenter's gangs observable within the last year.

14. While comparisons between Filipino labor and that of Chinamen and others is futile because of the many variable quantities that have different values according to one's point of view, there is no doubt in my own mind that Filipino labor will prove more satisfactory at this station than any foreign labor, and that in the trades it will be satisfactory; that its employment will be of great value to all the people of the province, and indirectly to other parts of the islands, in educating them to see the advantages of stability and quiet and the opportunities for permanent betterment of their own and their children's lives. An improvement in the physical condition of the workmen, and more especially of the younger generation, is visible within the last year, due to the gradual improvement in food because of the greater capacity to purchase, and greater demands of the system because of greater industry.

15. Inclosed herewith are recent reports from the various heads of departments of the station on this subject.

Very respectfully,

A. R. COUDEN,  
Captain, U. S. Navy, Commandant.

The COMMANDER IN CHIEF,  
U. S. Asiatic Fleet.

U. S. NAVAL STATION,  
Cavite, P. I., December 7, 1903.

SIR: Referring to the commandant's No. 2483, dated November 16, 1903, for a report in detail of the progress made by Filipino labor, skilled and unskilled, during the past year, I have the honor to submit the following:

#### SKILLED LABOR.

(a) *Machinists*.—Machinists have progressed to a very considerable extent in the ordinary routine work of their trade; they are, however, noticeably handicapped by their inability to read a drawing or blue print, and in this respect they do not seem to make any marked improvement.

(b) *Electrical machinists*.—Electrical machinists have progressed very little in their line of work. They are able to run wires and make ordinary connections, and have also learned to make repairs on small motors and to rewind armatures, but if the connection is in any way intricate, as in a cross-connected armature, they do not seem to be able to grasp the method. However, there is very little of this class of work and no great advancement in proficiency could be looked for. One of the worst faults they have is that if on completion of a job the work shows there is an error somewhere, they are totally unable to retrace their work and find wherein is the fault.

(c) *Carpenters*.—Carpenters have shown the greatest improvement in the class of work that is done in this department, which, however, is not of a high order. They have done some very clever work in the way of desks, file cases, etc., but the bulk of their work has consisted in the making of chart boards, tool handles, and rigging appliances, which they have done well and satisfactorily.

(d) *Riggers*.—There is very little fault to find with the manner in which the employees of this subdepartment carry out their work. Most of them are old and experienced hands and as there is very little, if any, technical knowledge required in their line, they are apparently steadily improving.

(e) *Sailmakers*.—The quality of work that is being turned out by the sailmakers is, on the whole, very good, but as the ability to read a print or follow a plan is essentially a quality of an expert sailmaker, and one which none of these men possesses, constant supervision on the part of the foreman is imperative. The chief sailmaker tells me he accounts for this by the fact that most of his men are old hands and learned their trade under the Spanish rule, a method much more crude than the one in present use.

(f) *Flag makers*.—These women have learned to work from a sketch or plan and have attained such a degree of proficiency that very little, if any, supervision on the part of the foreman is necessary. Neatness and dispatch characterize their work and its quality is good. Their progress has been really marked.

(g) *Clerks*.—The clerks are as a rule improving. With hardly an exception every man is proficient in the individual task assigned him, one in particular having acquired remarkable speed on the typewriter. All of them are, however, at a great disadvantage in not being able to construe English to any extent, and but one or two appear to go to any pains to overcome this.

#### UNSKILLED LABOR.

This class adapt themselves very readily as a rule to the work given them, and are, the younger men particularly, apparently anxious to learn. In this respect it is thought worthy of mention what the chief sailmaker tells me of the apprentices in his department. They are naturally apt, and as they have nothing to unlearn (as have most of the older hands), what they are once taught they readily grasp, and he is, he says, sanguine of their developing in time into really first-class workmen.

In summarizing the progress made by all subdepartments, both skilled and unskilled, it would appear that the underlying principle which will tend to ultimately retard Filipino labor from becoming really A1 workmen is their low degree of intelligence and consequent lack of a knowledge of the fundamental theories of their respective trades until they acquire which there is always the possibility that, if left to their own devices, some new phase of their work will present itself and which they will be unable to solve unaided.

Very respectfully,

J. F. PARKER,  
Commander, U. S. Navy, Equipment Officer.

The COMMANDANT,  
U. S. Naval Station, Cavite, P. I.

U. S. NAVAL STATION,  
Cavite, P. I., December 3, 1903.

SIR: Referring to the commandant's letter dated November 16, 1903, which requests a full and complete report on the progress of Filipino labor during the last year, I have the honor to report as follows:

2. As the efficiency of the Filipino mechanic is so closely interwoven with the efficiency of the department of which I have charge, I dwelt somewhat on the subject in question in my annual report dated July 6, 1903.

3. Being head of the department, my recommendations were based necessarily on grounds to promote the efficiency of the department, the simultaneous improvement of the Filipino being alluded to more as incidental.

4. I quote below verbatim from my annual report and will comment later in this communication, giving my views at the present time, and showing where I have modified my views, if I have done so.

5. *Administration of department.*—"1. The principal difficulty in the administration of this department is the want of the proper supervision in the individual shops. This is a loss to the Government financially. In addition to the business side, there seems another phase worthy of consideration in connection with this.

"2. The Government has been spending stupendous sums of money for the education of the Filipino, and is continually striving to improve his condition. That the average Filipino likes to work is a much-mooted question. The experience here has established that where there is intelligence and some little school learning the native at once shrinks from mechanical trades, each desiring to be an "escribiente" (writer).

"3. Recently the advisability of enlisting Filipinos in the service has been considered. For this reason, as well as the other above outlined, there would seem no better method to improve the condition of the Filipino and further the interests of the service, the Government, and country at the same time, than by a development of the natives as far as possible in mechanical trades at this navy-yard. Under the present system in this department the Government suffers, and there is no chance of developing any new material. I allude to the fact that there has been only one white American mechanic in the shops where 488 men are employed.

"4. His supervision was of necessity most general and the Government was continually losing money because of this condition. This one white foreman has been so occupied with his general superintendence and necessary office work that the development of any individuals because of contact with him is out of the question."

6. *Skilled labor.*—"1. For the Government's present interests financially and for the Government's future interests financially and otherwise, I recommend strongly that each shop of this department have at its head a good American mechanic. He would at once more than save his salary to the Government.

"2. I believe that the consequent possible development and education of the Filipinos in the mechanic trades should have fully as much weight as the immediate financial advantage to the Government. If the education of these people is determined upon, should it be restricted to school learning, which in many cases where there is not enough strength of character, produces men who do not care to do manual labor? The discipline to which they are subject in a navy-yard is also, I think, not a small factor in their education.

"3. I am primarily speaking for the efficiency of the shops of which I have charge, and secondarily for the development of the natives into good, conscientious workmen, making good subjects.

"4. Outside of the immediate interests of this department, and in a general way the interest of these islands, which must have labor if the islands are to be developed, and some skilled labor at that, the immediate interests of the service demand just such a school as properly organized shops at the navy-yard would give for the education of these people in mechanical trades, if they are ever intended to enter the service.

"5. The dearth of skilled labor is bound to be felt more and more, and the Government, especially with its fixed rules for wages, is bound to feel the effects of it. With the development of the islands, skilled labor will be in demand, and this department has already lost some of its best men because outside civil establishments paid these men better wages than are authorized at this navy-yard. In stating this I do not desire to give the impression that navy-yard help is not so well paid as in outside firms, but rather that an outside firm, when an able man is much desired, will obtain him at any cost, being not tied down by a fixed schedule of pay. We should, therefore, aim to develop as many able men as possible so as not to feel the loss of a few.

"6. The question of skilled labor is especially worthy of consideration, yes, even urgent, because of the exclusion of Chinese. Some of the most able workmen in

this yard have been Chinamen, but, as is evident from the law, there can be no further supply when these are exhausted.

"7. That white labor should be used here in any capacity other than that of supervision, is out of the question. Something should be done, therefore, to effect the development of the Filipino skilled laborer. As stated above, I consider the appointment of a good American mechanic for each shop the best method. The need of skilled labor is especially felt in the machine shops because of the continual demand for this class of work.

"8. If their development is expected to be evolved out of themselves, I do not think the goal will ever be reached.

"9. When American help is employed it should be borne in mind that the climate is a severe test, especially when a display of energy is expected, and on that account only young men should be appointed for this duty."

7. *Working hours.*—"1. Whether it is to the advantage of the work and efficiency of the department that there should be two schedules of time, one for Americans and the other for Filipinos, is questionable; in my mind it is not. If the natives are to be taught American methods, and especially are to be taught to work with the energy approaching that characteristic of the average American workman, the hours for the natives are too long.

"2. As the hours are fixed for the Americans they are considered amply long, especially in consideration of the climate. The idea that the natives are not subject to the climatic influences is, I think, a mistake, because from my observation I conclude that they do decidedly feel the effects of this extreme heat, and a large proportion are in poor health, the average Filipino being in physical strength and endurance far below the average American.

"3. If the hours for the natives were the same as those for American help, with the proper number of American employees, they would continually be under supervision, and would be receiving a thorough training, and would finally be deprived of the grievance arising from this discrimination in time schedule against them.

"4. If there has not been any protest it will surely come, and I consider it to the advantage of the department that this discrimination should be eradicated before an open protest is made."

8. *Attendance of employees.*—"1. The question of irregular attendance is one that has received much attention, but no satisfactory remedy has been found.

"2. There are three general causes for the large percentage of the absences:

"First. The disposition of the average native to take things easy.

"Second. The great amount of sickness among them.

"Third. The frequent occurrence of holidays other than our national, which they will observe notwithstanding the urgency of any work on hand. These are the conditions which, if it is possible to change any of them, can be changed only most gradually."

9. Generally speaking, I can state that I have not changed my views from those expressed in my report as quoted above, excepting, perhaps, that with the longer experience I have had, I am willing to modify them in the direction of putting a greater value on the possible development of the Filipino.

10. We are a people of an entirely different race which makes it possible that in many cases of unfavorable judgment of them we may be as much at fault as they, as each views conditions from an entirely different standpoint, and a position which one believes as correct as the other.

11. These people, too, had been in subjugation for many years, while we have enjoyed all the advantages which freedom and generations of training and development have given us.

12. This department has already had an illustration of what advantage will accrue to the Government, as well as the Filipino, if the Government will only make an effort to instruct the best qualified of those anxious to learn.

13. I have reference to the fact that recently I have had two Americans in the shops of this department instead of only one. Although this has been a most meager increase, nevertheless, I see a decided improvement in the boys anxious to learn, because of the little individual attention they have had recently and which it was not at all possible to give them formerly.

14. With the older men it is difficult to introduce new methods, but that is a condition which I think holds true for all races and conditions of life, it always being a difficult matter to "teach an old dog new tricks."

15. Considering the primitiveness of the former methods under which these people have worked, and the not much more than primitive means which have been placed in the hands of this department, some of them have shown marked ability.

16. There are two conditions insurmountable for sometime to come which will subject these people to unfavorable criticism.

The first is that our languages differ, and this makes the transmission of ideas and instruction, and the understanding of same difficult, and at times impossible.

The second is, that be it because of their frugality in living and character of their food, or of the climate, or all of these, they are not equal physically to ourselves.

17. There are few of us whose mental and physical alertness and endurance are as great at the end of a tour of duty here as they were at the beginning of the duty. This is especially so when we have been held to continuous work without any relaxation.

18. With all these conditions against them we exact more of them in some ways than we do of ourselves, for we require of them more working hours each day than are required of any American employee.

19. Much has been said about their mendacity and general unreliability. Such characteristics are generally the result of bringing up, association, and conditions under which they have been living. If some of them have not a high regard for truth or for other people's property, such infractions are likely to occur anywhere, when such a large body of men is employed as here.

20. In view of such existence as these people have had for many generations past, it seems only natural that they should not have the characteristics which we expect to find in a people who during the same period of time have had all the advantages which come with independence and close association with all that is most progressive.

21. In view of what was said in my annual report as to the general disposition to secure employment as "escribientes," I now desire to modify this to this extent.

22. There have been applications by boys, who have had good schooling and spoke some English, for appointments as apprentices. These could, however, not be made, as there were no vacancies, the number allowed being very limited.

23. When speaking in the report of the dearth of skilled labor, the demand outside for such labor was anticipated. This has been borne out by actual experience.

24. This department has only been able to retain such of the best Filipino mechanics as have ties here, these preferring to hold their position here in preference to one in Manila with better pay.

25. The ordinary laborers have had little chance in the past for development, as it has been impossible on account of the few Americans available for supervision to give them much attention.

The greatest difficulty with them is that few of them speak even Spanish, which makes them difficult to handle.

26. Where in my report I speak of the reasons for many absences from work, I give as one reason: "The disposition of the average native to take things easy."

27. At that time I was not familiar with the fact that so many employees live at great distances in outlying towns, and are frequently absent on account of rains and bad roads, which, in a measure, may ameliorate this shortcoming.

28. If the progress desired in the development of the Filipino has fallen short of expectations, the experience in this department inclines me to ascribe it primarily to the lack of proper material in the way of tools and plant necessary to inaugurate modern methods, as well as to the altogether inadequate number of skilled Americans capable of teaching the natives new methods.

29. The proper American equipment, both in material and personnel, has been so wanting, that it at once bars criticism of the Filipinos for not having made greater progress.

Very respectfully,

GUSTAVE KAEMMERLING,

*Lieut. Commander, U. S. Navy, Head of Department Steam Engineering.*

The COMMANDANT.

U. S. NAVAL STATION,  
Cavite, P. I., November 18, 1903.

SIR: In answer to your letter dated November 16, 1903:

1. I have the honor to make the following report on the progress of Filipino labor during the year:

2. The skilled labor of this department is better than it was a year previous and we are now doing better work than was done a year ago.

3. We have manufactured sights for several vessels for a reasonable price and which have proved satisfactory in every detail. Also spare parts and accessories for rapid-fire and automatic guns. We have also manufactured revolver holsters and revolver cartridge boxes, canteens, and leather ammunition-passing boxes for the U. S. S. *Kentucky*. This kind of work was never done in this department until this year and it turned out very satisfactory.

4. Attention is called to the differences in prices of great-gun targets (prize firing), that were made last year and those that were made this year. The cost of labor for making 4 great-gun targets (prize firing) last year amounted to \$753.70 gold. This year we made 8 similar targets—cost of labor, \$346.89 gold. This does not include price of material. The reasons for the great difference of prices are: That we installed a bolt-threading machine and sewing machine, the latter for making the screens. Also the men were more familiar with their work and went about it more intelligently.

5. A model of 4-inch rapid-fire gun, one-fifth scale, was made in this department and sent to the St. Louis Exposition. The workmanship was very neat.

6. The carpenters are much better than they were a year ago, doing their work quicker and go about it more workmanlike.

7. The skilled laborers at the magazine are mostly men who have been promoted from common laborers, for being careful and intelligent in the performance of their duties. They have been engaged in such work as putting up 6-inch and 4.7-inch ammunition and breaking down, blending, and putting up minor caliber ammunition and handling and overhauling ammunition of all calibers, repairing and painting ammunition boxes and chests and re-forming cartridge cases.

8. The unskilled laborers in this department are good workmen and are improving; they are engaged in general magazine work, making shipments, loading and unloading cascos and lighters, and care and preservation of ordnance.

9. In my opinion the Filipino labor is much more satisfactory than it was a year ago and is improving.

Very respectfully,

The COMMANDANT.

J. T. SWIFT,  
*Gunner, U. S. Navy, Acting Inspector of Ordnance.*

U. S. NAVAL STATION,  
*Cavite, P. I., November 28, 1903.*

SIR: 1. In compliance with instructions contained in your letter dated November 16, 1903, directing report on the progress made by Filipino mechanics and laborers during the past year, I have to report as follows:

2. It must be stated that, as a rule, the Filipino workman is indolent and indifferent to his own advancement beyond a very limited degree. This must largely be accounted for by the environment of the Filipino race for many generations past; the enervating effect of the climate, together with the few wants of the native, and the ease with which the necessities of life are obtained, cause him, as a rule, to be easily contented and careless as to improvement.

3. In the case of the older men little progress can be detected even where there has been constant supervision of American foremen, the older men reverting to their former methods when immediate supervision is removed.

4. The case of the younger men is somewhat more encouraging and a fair amount of improvement is to be noted, as they are quicker to see the advantages of improved methods of work, and it is believed that they are also more anxious for their own improvement.

5. I am strongly of the opinion that, if the Filipino is to be depended on for skilled labor in Government work at this yard, it will be necessary to maintain a well-organized force of competent American foremen for many years to come. The younger men will slowly but surely improve as they come in contact with improved methods and are compelled to use them daily. In this connection it is believed that the apprentice system, if largely extended so as to take in a much greater percentage of apprentices than now employed, will result in marked improvement in the force of mechanics.

6. The same remarks apply to unskilled as to skilled labor, as many of the younger men employed as helpers gradually learn the trades and make fairly good mechanics.

Very respectfully,

The COMMANDANT.

W. P. ROBERT,  
*Assistant Naval Constructor, U. S. Navy, Head of Department.*

## EXHIBIT P.

### PROPOSED RAILWAY LINES IN THE ISLAND OF LUZON.

[Report of J. T. Norton, C. E., published by the Bureau of Insular Affairs, War Department, July, 1903, as Doc. No. 206.]

WASHINGTON, D. C., June 30, 1903.

HON. W. H. TAFT,  
*Civil Governor Philippine Archipelago.*

DEAR SIR: In accordance with your verbal instructions, have made a reconnoissance of the proposed railway lines in northern Luzon, and have the honor to submit the following report and estimate of cost:

#### MANILA TO APPARI.

*Manila terminal.*—Will be governed almost entirely by the cost of right of way and whether passage can be had through government lands. Access should be had to the new harbor south of the mouth of Pasig River, or to the same river, on south side, below the Bridge of Spain. If neither of these projects is possible, then to the Pasig River above the Bridge of Spain. Terminal switching yards, shops, storehouses, etc., should be located as near Manila as an advantageous site can be had at a reasonable cost.

*Route.*—As shown on accompanying map is recommended, passing through or near the following points: Caloocan, Meycauayan, Bocave, Baliuag, San Ildefonso, San Miguel de Mayumo, San Isidro, Cabanatuan, Bongabon, Pantabangan, Carranglan, Caraballo Pass, Aritao, Bayombong, Bagábag, Ilagan, Tumanini, Tuguegarao, Nagsiping, Lal-lo, and Appari. This follows the valley of the river Pampanga on the left bank to its head, thence over the Caraballo Pass, and down the Magat and Cagayan River valleys, on the left bank of both. It is unfortunate that all the principal towns of the Cagayan Valley are on the right bank. In spite of this, however, the left bank is recommended for the location of the line, as crossing the Cagayan would require a large sum for bridge. There seems little prospect for branches from main line to east and a very good one for branches to west. If main line were on right bank of river, such branches would have to cross the Cagayan. The majority of buildings in all the towns in this valley are of bamboo and grass construction, which are neither costly nor durable. There are alternative locations at three different points, all shown on map by dotted lines. The first crosses the Pampanga at Cabanatuan, going via Talavera, San José, and Puncan, to join the other line at Carranglan. The second is a detour to the east between Pantabangan and Carranglan to avoid 3 miles of canyon work. The third leaves the line recommended at Bagábag, going via Diadi, Estella, Carig, Echagüe, Canayan, and Reina Mercedes, to a junction with the other line between last-named place and Ilagan. These changes of line are simply possibilities that should be brought to the notice of locating engineers. A horse-back reconnoissance over them will doubtless decide at once whether it is worth while to make actual surveys or not. Line recommended, as shown on map in red, is in canyon 9 miles between Bongabon and Pantabangan. Between Pantabangan and Carranglan there will also be about 3 miles of canyon work. Between Bagábag and Oscarez there is 20 miles of canyon work.

*Grade.*—A maximum of one-half of 1 per cent compensated can be used on entire line except on the mountain work between Carranglan and Aritao in getting over the Caraballo Pass. This has an elevation of 3,750 feet above sea level, and a grade of  $3\frac{1}{2}$  per cent compensated will be needed. The mountain slopes are very steep and liable to slide, especially on the south side; thus it is important to lighten the work as much as possible. Development will begin on south side at an elevation of about 1,150, and end on north side at about 1,550 feet above sea level.

*Curvature.*—Need not exceed 4 degrees, or 1,433 feet radius, except on canyon work and development on both sides of Caraballo, where 16 degrees, or 359.3 feet radius, will be necessary.

*Transportation.*—From Manila to Cabanatuan there is a fair road, much of it metaled. It lacks many bridges, however, and some of the existing ones need repairs. From Cabanatuan to 3 miles north of Bongabon the road is little better than a trail, but could be made into a good wagon road at slight cost excepting bridges. From last point to Pantabangan the trail is very rough, and a wagon road would be costly. From Pantabangan to foot of Caraballo wagon road could be made at reasonable cost. There are four large rivers to ford between Manila and Carranglan—the Angát, Rio Gapán, Santor, and Rio Pantabangan. In the rainy season some sort of ferry would have to be arranged at these points. From Aparri river transportation is available in the rainy season to Reina Mercedes, and in the dry season for lightly loaded boats as far as Ilagad, with three or four portages, and possible trouble with sand bars at many other points. This refers only to small “barangays” carrying a few tons. Steamers drawing 12 feet can ascend as far as Lal-lo. Wagon road on left or west bank of Magát River can be easily made from Reina Mercedes to foot of Bennett Canyon, 4 miles south of Oscarez. From here to Bagábag, 20 miles, a wagon road would be very costly. From Bagábag to Bayombong there is a good wagon road, except that bridges need repairing. From Bayombong to foot of Caraballo there is a good trail, which could be made into a wagon road, at reasonable cost, but crosses Magát River, which can not be forded for days at a time in the rainy season.

*Tunnel.*—Report of April 2 last estimated length of tunnel necessary at Caraballo Pass at 1,000 to 2,000 feet. Upon closer examination have changed this to 4,000 feet, and estimate will be made for latter length. Native timber can be used for timbering, if same is necessary.

*Traffic.*—Is almost an unknown quantity. The whole country is in bad condition from war and pestilence among men and beasts. From Manila to Bongabon is a fine agricultural country, and thickly settled as far as Cabanatuan. This portion should pay within a year or two. From Bongabon through to Cagayan Valley much of the country is mountainous, and the valleys, while apparently good land, are not thickly settled. Traffic here will be a question of development and settlement of the country by reason of the building of the railway, and will take time. In regard to the Cagayan Valley, the tobacco grown there all goes to Manila, and there is no reason why it should not go by railway, if there were one, as navigation on the Cagayan River, except from Alcalá to Aparri, is difficult all through the dry season by reason of shoal water, and in the rainy season because of swift current. Taken as a whole, the line would hardly pay operating expenses for the first two years, and no interest on capital invested until four or five years. Eventually, if the country develops as it should, there will be a heavy traffic, both passenger and freight. A few miles south of Aritao and near the proposed line is a vast deposit of fine granite. It is in the shape of large boulders, covers several hundred acres of ground, and can be easily and cheaply quarried when means of transport are to be had. In the Manila Harbor sea wall there are blocks of granite of no better quality that were imported from Hongkong.

*Estimate: Manila to Aparri.*

## DAGUPAN TO LAOAG.

*Route.*—Starting from Dagupan, line should pass through or near Mangaldan, San Fabian, Santo Tomas, Aringay, San Fernando, Bagnotan, and Balaoang. Between the last-named and Tagudin the river Anitaragan comes down from the mountains, and on reaching the flat country divides into a number of shallow channels, which, during each rainy season, are constantly filling up and changing. Line should swing to the east and cross the stream mentioned where it comes out of the mountains and has a stable channel. Line will pass near Tagudin and thence through or near Santa Cruz, Santa Lucia, Candon, Santiago, San Esteban, Narvacan, and Vigan. Just south of Vigan line will cross the Abra River, which also has a changing channel. Crossing should be made where river emerges from mountains, for reason mentioned before, thence swinging back to near Vigan. From last point line should pass through or near Santo Domingo, Magsingal, Cabugao, Badoc, Batac, San Nicolas, and

Laoag, the terminus. At Currimao, between Badoc and Batac, hills will force line down almost to sea. Line as recommended is shown on map by broken lines. An alternative location is shown by dotted lines opposite Balaoang. This alternative location is longer, but may prove cheaper if the line via Balaoang turns out to be heavy work, as the coast would be light grading.

*Grades.*—A maximum of one-half of 1 per cent, compensated, can be used over whole line, with possible exception of the two places where line approaches foot of mountains to obtain better stream crossings, where it may be necessary to use 1 per cent, compensated.

*Curvature.*—Need not exceed 4 degrees, or 1,433 feet radius.

*Transportation.*—There is an excellent road from Dagupan to Laoag, except for a few miles near the seashore, where it is rather sandy. Bridges are mostly in good condition, but are lacking at the large streams, which must be forded. The one that will give the most trouble is the Abra, near Vigan. The road is metaled with gravel or broken stone the greater part of the distance. Material and supplies can come by sea to San Esteban, Pandan, and Currimao, except during the southwest monsoon, and to San Fernando and Salomague all the year. Line will be near the sea at all the places mentioned except Pandan and Salomague, where the distance will be about 4 and 2 miles, respectively.

*Traffic.*—Line will be through a rich agricultural and well-populated country except a few spots here and there where mountains come down almost to the sea. As a rule, the flat coast country is from 5 to 20 miles broad. The line will be expensive on account of the amount of bridging needed, but if the country has no new misfortunes or return of the old ones, it should pay a fair interest on the investment after the first year at least.

*Estimate, Dagupan to Laoag.*

## MANILA TO BATANGAS.

*Route.*—From Manila the line should pass through or near Pineda, Muntinlupa, Binang, Santa Rosa, and Calamba, skirting the west shore of Laguna de Bay between Muntinlupa and Calamba. Leaving the lake shore at Calamba, line should cross Rio San Juan and then follow up the right bank through or near Santo Tomas, Tanauan, Lipa, and San José to Batangas, crossing the San Juan River the second time at Tanauan. Line as recommended is shown on map by broken lines. An alternative location, shown by dotted line on map, leaves line at Calamba and follows left bank of San Juan River, passing to the west of Santo Tomas and Tanauan to a junction a few miles south of Tanauan, thus avoiding two crossings of the San Juan River.

*Grade.*—Maximum will be  $1\frac{1}{2}$  per cent, compensated.

*Curvature.*—Maximum will be  $6^{\circ}$  or 955.4 feet radius.

*Transportation.*—From Manila to Muntinlupa there is at present only a trail, but a wagon road could easily be built. From Muntinlupa to Batangas there is a splendid metaled road, which in no place is more than 2 miles from the proposed railway location. Material and supplies can also come in by sea at Batangas.

*Traffic.*—The section of country tributary to proposed line has suffered heavily from war, pestilence, etc., but is well settled, and should soon be in a prosperous condition. The flat lands along Laguna de Bay are rich, and both rice and sugar cane produce well. Sugar mills are nearly all in ruins, and lands formerly devoted to sugar are covered with weeds and brush. Some land here is under irrigation, and will produce a dry-season crop of rice. From Calamba to Batangas the soil is a brown loam with some sand, and is 4 or 5 feet thick. Between Calamba and Santo Tomas is a good sugar country, but at present mills are in ruins and fields uncultivated. Between Santo Tomas and Batangas much coffee was formerly grown, between \$2,000,000 and \$3,000,000 worth in silver being sent out from the town of Lipa alone each year. An insect is said to have destroyed the trees several years ago. Planters are now talking of replanting. Some sugar is grown in the Lipa district. Taken as a business proposition this line is considered as having the best prospects of the three proposed, and should be a paying property from the day it is put in operation. There is little to fear from water transportation via river and lake in competition between Manila and Calamba, as the shores of the lake are so shallow that cargoes have to be lightered a mile in small boats.

*Estimate: Manila to Batangas.*

## NORTH COAST LINE.

Reconnaissance was made via this route from Aparri to Laoag. Line from Aparri west could be built very cheaply as far as Claveria, probably not more than \$12,000. per mile. A line beyond Claveria, however, would be almost impracticable on account of the huge cost of the first 20 miles. The mountains rise from the sea for almost the entire distance, and many points are so narrow and precipitous that tunnels would be needed. This line is considered entirely out of the question, as its cost for grading alone would be \$150,000 per mile, or more. If at any time in the future a line is desired across the island from east to west, the most feasible route would be up the Rio Chico de Cagayan to its head, thence across to the headwaters of the Abra River, and so down to Vigan on the west coast.

## SAN NICOLAS PASS.

It was hoped this pass would prove to be enough easier than the Caraballo to warrant diverting the Manila-Aparri line thereto, but the reverse is the case, as it would require a longer tunnel than the Caraballo. The approaching southern valley is narrow and badly cut up with ravines. Did not go to the summit of the pass, but far enough up to make sure of the foregoing facts. Estimated height of pass, 4,000 feet above sea level.

## FOLLOWING APPLIES TO ALL LINES.

*Labor.*—This is by far the most important question in connection with the construction of railways. The average native laborer of Luzon does not take kindly to any sort of work except planting, and harvesting rice and fishing. An increase in rate of wages does not stimulate him to earn more money, but to put in less time. He is averse to hard manual labor, and to working regular hours under direction of a foreman. The labor supply has been reduced by war and pestilence, and what exists is composed of men that are undersized, and weak as compared with the laborer of other countries. There is no possibility of building the proposed lines of railway or any of them within a reasonable length of time except by the importation of Chinese or other foreign labor. A measure that would aid to some extent would be the passage of a law requiring all able-bodied men residing within a given distance of proposed lines to work a certain number of days per month or year on their con-

struction, receiving a fair wage for so doing. Some of the government railways of Central America were largely built by laborers of this class, and there was a constantly increasing number of them who remained voluntarily on the works after having served their allotted time. Estimates have been based upon the completion of the three lines within three years after commencement of actual construction, which will undoubtedly require foreign labor. Without such labor the prices given will not apply, as dragging the construction over five or ten years of time would so largely increase the administrative expense and interest charges.

*Masonry.*—Estimates have been made for masonry culverts and bridge foundations laid with cement mortar. Where stone is not to be had within reasonable distance, concrete can usually be made of river gravel. In some places, where neither can be obtained within reasonable distance, it might pay to burn brick.

*Bridges.*—Timber trestles should be used wherever circumstances will permit and steel bridges only where absolutely necessary. Trestles should be of creosoted timber throughout, piles impregnated with 14 and other timber with 10 pounds to the cubic foot. Estimate has been made on this basis. Native timber is not to be had near any of the lines except at the Caraballo Pass, on the Manila-Aparri line. Creosoted timber from American Pacific coast ports will probably be found cheaper than native hard woods, and native soft woods are out of the question, except for temporary false work, where they might be used to advantage when procurable.

*Track and roadbed.*—Estimate has been made for standard gauge of 4 feet 8½ inches, 60-pound steel rail with 2-foot angle-bar joints, and roadbed of 16 feet on fills and 20 feet on cutting.

*Ties.*—Track ties should be 8 feet 6 inches long and 7 by 9 inches in section. Bridge ties should be 10 feet long and 8 by 8 inches in section. Both should be creosoted with 10 pounds to the cubic foot to withstand climate and insects. Ties from American Pacific coast ports are recommended. Estimate has been made on foregoing basis. Native hard-wood ties might be better, but would cost more, even if the labor to cut and get them out in time were to be had, which is hardly possible. There is a possibility that it might be better to import Australian hardwood ties, but can not give price on them.

In computing cost of construction material it is assumed that all will enter free of customs charges.

All prices in this report and estimate refer to United States currency.

Mr. C. D. Drew, assistant chief engineer, has been a valuable assistant throughout, not only in collecting data in the field, but in preparing report and estimates. If any credit is due for the manner in which work has been done he is entitled to a full share in same.

Respectfully submitted.

J. T. NORTON,  
*Chief Civil Engineer.*

## EXHIBIT Q.

---

### ANNUAL REPORT OF THE EXPOSITION BOARD.

President Roosevelt, Secretary of War Root, and Governor William H. Taft, while in the United States, decided, after a conference in the spring of 1902, that the Philippine insular government should devote at least the sum of \$250,000 to the preparation of a thoroughly creditable exhibit for the world's fair in St. Louis. Before Governor Taft returned to the Philippine Islands, he, anxious to secure a decided success, endeavored to increase the mentioned amount by soliciting assistance from the Louisiana Purchase Exposition Company, which was just as much interested as the insular government in making the Philippine exhibit the feature of the world's fair. He succeeded in having promised to him an allotment of \$100,000. The Philippine Commission soon after passed the following resolution:

"The question of the amount to be appropriated by the Philippine government for exposition purposes at the world's fair in St. Louis in 1904 having been raised by the president and the matter having been discussed at some length by the Commission, it was agreed that at least \$250,000 in money of the United States should be appropriated, and the president was directed to cable this fact to the United States, together with the request for a competent man to come to the islands to prepare such an exhibit, with a promise on the part of the Commission of a further appropriation should the conditions upon investigation seem to demand an increase."

At about that time Hon. John Barrett, commissioner-general to Asia and Australia for the St. Louis world's fair, came to these islands to interest Filipinos and Americans in a comprehensive participation of the Philippine Archipelago. In one of his speeches he illustrated characteristically the responsibility of a world's fair expert called to assist the insular government in making a creditable showing, by saying:

"There is soon coming out from America in the person of Doctor Niederlein, connected with the Philadelphia Museums, a competent expert, who will take general charge of the Philippine participation, who was selected only after careful consideration of the available men, and I believe he will meet your expectations. With him will be associated one or more representative Filipinos; but to make sure that the exhibits from the Archipelago represent all interests, I would urge upon you business men to select from your number a committee to cooperate with the government commission. Let these men be those who will be unselfish and work for the general good of the business community and not for their individual interests. A great deal will depend upon that characteristic."

In a similar way Professor Lyon expressed himself in the following sentences:

"The Commission has engaged the services of Mr. Niederlein, an expert in world expositions, who will shortly arrive in Manila to assist in perfecting arrangements in connection with this very important undertaking. We say assist, advisedly, for the reason that should he possess an experience of a thousand years of expositions he could do nothing creditable without the intelligent and earnest cooperation of the citizens of these islands."

Mr. Niederlein, chief of the scientific department of the Philadelphia Museums, former commissioner of the Argentine Government for the Paris, Chicago, and Atlanta expositions, vice-president of the French colonial exhibition at the Pan-American Exposition at Buffalo, etc., who shortly before had reestablished the French Colonial Museum in Paris, now called "Musée Commercial de l'Office Colonial du Ministère des Colonies" in the Palais Royal, was called by cable on August 29 as special commissioner for the Philippine exhibits at the world's fair in St. Louis. He presented on his arrival in Manila a plan of work to the Philippine Civil Commission, a copy of which is hereto attached, proposing in the same at the same time the establishment of a museum and the holding of a preliminary exposition, besides the founding of a Philippine academy or institute of science, art, commerce, and industry, which would unite prominent professional men, government officials, offi-

cers, teachers, priests, economists, and men of science and art, as well as men prominent in business and trade, agriculture and mining, to cooperate in making a full exploration of the Philippine Islands, and in that way collaborate for a brilliant Philippine display of the resources and economic and social conditions of this Archipelago.

He also had prepared the necessary instructions and information for collecting successfully and preparing and shipping properly the expected exhibits. Governor Taft issued on November 8 a circular letter to all the bureaus and the chiefs of bureaus of the insular government; to all provincial governors and other provincial officers, and to all municipal officers of municipalities in the Philippine Islands, requesting them to assist Mr. Niederlein in every possible way as commissioner of the insular government, having chief charge of the exhibits in the Philippine Islands.

The enactment, number 514, creating "a commission to secure, organize, and make an exhibit of Philippine products, manufacture, art, ethnology, and education at the Louisiana Purchase Exposition," was made November 11, 1902, which set aside \$250,000 United States currency for that purpose. Two days later Gustavo Niederlein and Pedro A. Paterno were appointed members of the exposition board, with Mr. Leon M. Guerrero as secretary. The first session of the exposition board was held November 17, when the first employees, Mr. George P. Linden, Mr. A. E. Escamilla, and Miss Emma R. Ross, were appointed as curator, interpreter, and assistant secretary and stenographer, respectively. The first resolutions referred to the publishing of instructions, information, and classification, and their translation into Spanish, Tagalog, Visayan, Ilocano, Vicol, Pampanga, and Pangasinan dialects. It might here be stated that up to date 51,500 of such pamphlets were printed and gradually distributed all over the islands. The exposition board then, also, started a number of circular letters, which now in all number over 116,000 copies, of which about 13,000 copies were in English, 98,500 in Spanish, and 5,000 in Tagalog. In one of the first meetings it was decided to issue posters also in English, Spanish, Tagalog, Visayan, Vicol, Ilocano, Pampanga, and Pangasinan, in all, 20,000, setting forth the purposes of the exposition and the desires and instructions of the exposition board. Afterwards these were equally distributed among the numerous committees gradually appointed throughout the Archipelago, and of which a list is here attached. These posters were made in imitation of world's fair posters, having the pictures of President McKinley and President Roosevelt, Jefferson, and Napoleon, Rizal, and Governor Taft. The same design was applied to 3,000 diplomas of grateful recognition, on which were the following words:

"The Philippine exposition board for the St. Louis Universal Exhibition of 1904, has the honor to award this diploma of grateful recognition to ——— for the receipt of his valuable contribution to the Louisiana Purchase Exposition of 1904, the preliminary exposition to be held in Manila in 1903, the permanent museum of Philippine products in the capital of these islands, and to tender its thanks to him for the aid thus rendered in promoting the object of the Philippine government for the welfare and progress of these islands.

"Manila, ———, ———."

The work of the exposition board began in the Santa Potenciana building, but after about two weeks in those offices the board removed to the ayuntamiento, and at about that time, also, the chairman of the board, Dr. William P. Wilson, director of the Philadelphia Commercial Museum, and the disbursing officer, Mr. Carson Taylor, were appointed. In the ayuntamiento the basis of success was laid. The members of the board here came into closer contact, first, with the members of the Civil Commission and heads of bureaus interested in the exposition work; and, second, with all the provincial governors, who had been purposely called to Manila to be instructed for the census work under the direction of Gen. J. P. Sanger.

When the board began its real work it found itself nearly deprived of the liberty of action necessary for a rapid success in a limited time. In order not to disorganize the established government organizations, the board had to comply with the rules with respect to the insular purchasing agent, as well as with the rules of the auditor. But, besides, much to the detriment of a decided success, the provincial and municipal boards were not empowered to vote money for collections of exhibits in their territories, so the most effective way of obtaining exhibits was closed. Nor was the amount of \$100,000 appropriated, which the provincial governors had unanimously requested from the Philippine Civil Commission, in order to overcome the immense difficulties against successful work in their provinces, produced by rinderpest, surra, cholera, and locusts, ladronism, and the consequences of former revolutions.

The exposition board states with pleasure that, with all these adverse circumstances which obliged it to depend for a long time upon voluntary contributions, it had success; and, that it owes much of its results to the exceptionally disinterested col-

laboration of many of the provincial governors and municipal committees. The Filipino people have given by this exposition work a good proof of their high-spirited patriotic pride which has induced them, in the midst of extreme misery, to make a supreme sacrifice in order that the resources and conditions of their country might appear in a dignified manner before the civilized world.

While in the ayuntamiento the propaganda work started and all necessary preparations for success were made, the positive work began when the board moved at the beginning of the new year from the ayuntamiento to its present premises, Calle General Solano, No. 384, San Miguel, which the government first intended to purchase, but finally rented. Here the permanent museum of the exposition board commenced and the previously mentioned pamphlets and circular letters were largely distributed.

In order to give an idea of the board's correspondence and general propaganda work, we might mention that outside of the enumerated pamphlets and circulars, 50,000 letter heads and 15,000 second sheets, 111,600 envelopes, over 102,000 cards, and 18,000 printed labels were used. The employees of the exposition board worked hard and are entitled to high praise for the faithful work done throughout the year without interruption. The principal propaganda had to be done, and was done, during the first three months, the necessary and abundant transportation and representation charges running at Doctor Niederlien's expense.

Besides the mentioned circular letters and pamphlets sent to persons and organizations and to every respectable concern in the directory, a number of committees were called into life, some dying soon after, while others developed. Soon the system of contracts and of sending out of special collectors had to be adopted. With special permission of the civil governor, the first contracts and agreements were made with government departments, particularly with bureaus of the department of the interior, and large credits were opened to the same for important collections to be handed over to the exposition board in a given time. Of these we might mention those with Capt. George P. Ahern, chief of the forestry bureau; Doctor Lamson-Scribner, chief of the bureau of agriculture; Father Algué, director of the weather bureau; and the chief of the bureau of non-Christian tribes, who among other things promised for the exposition an album of all the types of the existing tribes. Also collectors, such as Mr. Albert P. Wright, Mr. John S. Gillies, and Mr. Valentine Wilson, were engaged to go into the provinces to obtain proper exhibits, while, at the same time, instructing the people and the committees how to aid intelligently the exposition board in its earnest endeavors toward a rich, worthy, and complete exhibit of the resources and conditions of the Philippine Islands.

The insular government had made the collecting of exhibits as easy as possible by exempting exhibitors from taxes on exhibits and by even allowing free postage for packages up to 4 pounds; by granting free telegraph privileges and free transportation on United States Army transports and coast-guard vessels. The efforts of the board to induce the foreign shipping firms and the Manila-Dagupan Railway to give free transportation to exposition material were crowned with the most gratifying results.

The expectations for the Philippine Academy of Sciences were, however, not fulfilled; scarcely half a dozen of the invited professional men, among them Bishop Brent and Doctor Ottofy, helped to collaborate or offered their services. Similar failures attended the first committee of art and of Philippine literature under the presidency of Professor Zulueta, as well as, with few exceptions, the women's committees and the press committees. *El Mercantil* criticised the failure of a Philippine press committee in a rather unfair and drastic way, stating that—

"There is not yet a true press in the Philippine Islands because there are no journalists in a true and intimate professional sense, for lack of moral force, recognition of mutual duty, spirit of solidarity, and courage of sacrifice."

In the same category fell at first our endeavors with the American, Manila, Spanish, and Chinese chambers of commerce. At the beginning even the most hearty support given by the American, Filipino, and Spanish press was of no practicable result. Editorials like this, "In order to achieve results everyone who can aid and render and furnish services must give with no stinting hand, of his time and labor, and do what in him lies, encouraging the board and facilitating its work. Only in this way can the Philippine exhibit at the world's fair be truly representative and most thoroughly and widely successful," were of no avail.

As stated above, the best results were obtained in the provinces, due principally to the governors who had assembled in Manila and were first made acquainted with the exposition work at the official reception in the ayuntamiento, December 15, through the speech of Mr. Niederlein, hereto attached, and afterwards, on December 19, in the office of the exposition board, where special instructions and a mass of litera-

ture were given to them. The exposition board directed circular letters to nearly every educated man in Manila and the provinces, including prominent government employees in the different bureaus, teachers, postmasters, telegraph operators, constabulary officers, and officers of the Army.

The exposition board at the beginning of December had already sent to Colonel Edwards, Chief of the Bureau of Insular Affairs at Washington, a request to obtain from the Secretary of War a permit for the commanding general to order all military men of the islands to cooperate with the exposition board. The intended war exhibit should demonstrate in every detail the historical events and the achievements of the American Army in both military and administrative capacities.

After the provincial committees had been formed nearly 50,000 circulars, together with other printed matter, were distributed to them, as well as to the justices of the peace and to other municipal officers.

The board, however, soon found out that its best reliance for the success of a Philippine Islands exhibit would be unlimited funds, to be used at the last moment in obedience to the law when no more gratuitous contributions could be expected.

On December 4 the board asked President Francis, of the Louisiana Purchase Exposition Company, to transfer to the Philippine exposition board all the royalties for privileges to be let in the form of concessions on the site of the Philippine exhibit in St. Louis, which meant an estimated increase of our funds of about \$1,000,000.

In order to save much trouble and annoyance, and to be sure of having the ground properly prepared and its exposition palaces adequately built up, it even suggested to have invested by the exposition company the sum of \$100,000 allotted by the same to the exposition board on account of the efforts of Governor Taft, Colonel Edwards, and Doctor Wilson in the erection of the buildings and in the preparation of the grounds, superintended by the latter as chairman of the exposition board.

The exposition board, with very good reasons, further relied upon the beneficial results of a public museum, and with the hope of making such a museum more attractive, useful, and suggestive, it invited, by means of the Philadelphia Commercial Museum, the American manufacturers to participate in the establishment of such a museum by sending to the board agricultural implements and other goods suitable for these islands, which it was expected would be transported free of charge by the United States Army transports. It also believed in preliminary provincial expositions in the capital of each province and suggested the same to the provincial governors.

After all moral influence had been obtained by receiving or soliciting aid, not only from all mentioned organizations and individuals, but also of Emilio Aguinaldo, of the archbishop, and of the apostolic delegate, Archbishop Guidi, and after the personal interests of all the manufacturers had been set forth in demonstrating to them the benefits that could be derived from town or city expositions, and inviting them to exhibit their cigars, cigarettes, artistic furniture, gold and silver ware, products of art, or of domestic industries, etc., in the permanent museum, the board then proposed to give the provincial governors pecuniary aid, asking them for the amount required to collect creditable exhibits in their provinces for the museum and the world's fair. This method, on a business basis, the exposition board had largely to follow in order to secure success. All other systems and ways for obtaining the necessary collections were tried, one after another and then together, and are still in operation, yet in this country and under the existing conditions not with the usual results.

Nothing was left undone. All kinds of tactics were employed to secure the sympathy and support of as many collaborators as could possibly be obtained. Even the enumerators of the census were induced to enter our staff of collaborators, and Governor Taft himself urged all government authorities throughout the islands by a telegram and a circular letter to contribute effectively to the coveted success. A paper, in the true spirit of our endeavors, wrote the following in an editorial:

"The Philippines must not neglect its opportunities at the St. Louis Exposition. A good appropriation has been made for our exhibit. A capable board is in charge, and the work progresses favorably, but what is most needed is the holding up of the hands of the committee by the business men of these islands."

The exposition board, in order to be able to devote all its energies to the soliciting or collecting of exhibits, in accordance with a preliminary arrangement made between Mr. M. E. Beall, Colonel Edwards, and Mr. Niederlein, asked the Bureau of Insular Affairs in Washington to prepare the necessary preface to its catalogue in the form of a precise description, or handbook, of the Philippine Islands. It was requested that this preface be made principally from the exhaustive data on hand sent to it by all the departments of the insular bureaus and by the military authorities of the

Philippine Islands, for fear that new data would not be available in time, a supposition which proved only too true.

Notwithstanding innumerable failures in its many earnest endeavors for immediate success, the exposition board when it presented its first report to Governor Taft on January 12 was able to make a satisfactory showing of its activity and energy. On January 15, when all the municipal presidentes had gathered together in the capital of each province, the exposition board asked the different governors by telegraph for lists of exhibits reasonably to be expected, announcing at the same time that the preliminary exposition or the permanent museum of the exposition board would be opened on Washington's Birthday, February 22. At about that time the exposition board also started in granting concessions in the Philippine grounds at the world's fair, and advertised its willingness to grant more privileges.

Not contented with the promises made by the provincial governors and committees, by merchants, manufacturers, and producers of all sorts, many of whom had been visited by members and employees of the board, nor with promises made by the heads of bureaus and by political parties whose leaders had been approached by the board in special public appeals, the exposition board sent out, as before mentioned, a number of collectors and men willing to gather exhibits in their spare time throughout the islands in order to assure success. It even advanced money to such private parties as school teachers, scientific collectors, and college principals, so as to aid the board in increasing its collections. It also subsidized exploring expeditions like that of Doctor Freer to Paragua, with Doctor Sherman, Messrs. Applegate, McCaskey, and Merrill as companions, in order to secure large quantities of gutta-percha, almaciga, wood products of all sorts, and photographs.

During all this time printed matter and circulars were freely distributed and the exposition board received many visits from exposition committees. The board also started a bureau of information with the purpose of showing the identity of its intimate interests with the desires and expectations of the business men in their future commercial relations with the United States and the world at large. More circulars and more letters, together with 5,000 special cards asking for loan collections, were issued, and the newspaper propaganda was made more intensive. The members and employees of the board visited, under the guidance of Mr. Pedro A. Paterno, a large number of prominent people and families in order to secure superior exhibits.

The premises of the board were beautified, electric lights installed, show cases and glassware acquired, and two orchid houses erected by Mr. Manuel de Iriarte, and, finally, 2,000 invitations issued in the name of the civil governor, the Philippine Commission, and the exposition board to the opening ceremonies of the museum. The exposition board was able to open the museum on the day of the official celebration of Washington's Birthday, its rooms well filled with thousands of selected exhibits obtained from over 100 exhibitors, among whom were many of the families of the Archipelago, to whom Mr. Niederlein in his opening speech expressed the board's deepest gratitude.

The opening ceremonies of the museum were attended by Governor Taft and the members of the Commission, Major-General Davis, apostolic delegate and archbishop of Staupopolis Guidi, the consular body, the chiefs of departments of the civil government, the military authorities, and over 2,000 other invited guests.

A committee of 25 most prominent Filipinos took charge of the reception of the invited guests. Doctor Niederlein supplied the decorations and refreshments, while the San Miguel Brewery, the Germinal and Helios cigar factories, La Perla confectionery, and Baxter & Co.'s perfumery offered their products with the greatest liberality. This first step of the exposition board toward the final result was considered a great success, and the favorable comments enthusiastically given have greatly influenced the Filipinos at large to make future contributions.

After the opening of its museum, numerous though relatively small collections arrived from Tarlac, Zambales, Sorsogon, Abra, and other provinces, or were sent by the collectors, whose numbers had been increased. A number of exceptional collections had to be purchased. An insurance policy against loss by fire had been taken out early in February.

Mr. Niederlein, a few days after the opening, made a trip to the southern islands, viz, Paragua, Jolo, Basilan, and Mindanao, visiting in the latter island Zamboanga, Malabang, Palang-Palang, and Cotabato, augmenting collections and arranging a concession for a great Moro village in the Philippine grounds in St. Louis. After his return, the mentioned important contract was made with Father Algué for the reproduction of a first-class meteorological observatory at St. Louis and also for a series of important relief maps, which, together with a large relief map 110 feet in length by 70 feet in width, will show, besides the geographical and topographical conditions, also the distribution of the resources of the archipelago and the general economic conditions of the country.

About the same time Captain Macomb, in charge of the military bureau of information of the general staff of the commanding general, was put in charge of the intended military exhibit, but the board's expectations were only in small part fulfilled, as no orders were given to assist the exposition board.

By a cablegram dated March 7 the exposition board was notified that by a new agreement with the Louisiana Purchase Exposition Company a further amount of \$100,000 was secured for our exposition work in St. Louis, under the condition, however, that this sum would be refunded by the insular government in case the exposition company, aided by the War Department, should fail to get itself reimbursed by Congress after the close of the exposition.

The system of exposition work adopted was energetically continued; more committees were appointed, more collectors were sent out, more letters were circulated, more telegrams for specific exhibits were issued at short intervals to the provincial governors, and better arrangements were made with government bureaus for complete series of valuable economic exhibits, yet not always with the expected success.

The board's next great step of its work was a great preliminary exposition in Manila, and it ordered therefor 500 show cases, 12,000 glass jars, and other material to hold the collections expected for that occasion.

The educational work of the islands has been taken particularly into consideration since the incumbency of Doctor Atkinson and Commissioner Moses, and a new appeal was made by a speech of Mr. Niederlein when the division superintendents of schools, under the direction of Doctor Bryan, assembled in Manila during the last week in March.

At this time a long and hot discussion in the Filipino, Spanish, and English press about the feasibility of sending non-Christian tribes to the world's fair brought the exposition board more prominently before the public.

At the end of March the exposition board counted over 4,900 exhibits, of which 384 belonged to the educational department, 282 to the department of art, 1,298 to the liberal arts, 492 to the department of manufactures, 602 to the department of agriculture, 279 to the department of forestry, 472 to the department of mining, 231 to the department of fish and game, 972 to the department of ethnology, etc.

In the month of April the museum was opened on Sundays and holidays, because of the great number of people interested in the collections on hand. During that month all the details for the architectural contest for buildings to be erected in the Philippine grounds in St. Louis were outlined and awards fixed. In April also, in order to properly receive and display the incoming collections, the adjoining building, known by the name of "La Giralda," was rented. Soon afterwards the agricultural, horticultural and forestry, mining, and industrial products were installed therein, filling the building at once. The government laboratories were now extensively used for assays and other investigations. The offer of the agricultural bureau to loan its fiber expert for the purpose of collecting an exhaustive fiber exhibit was gratefully accepted.

With the books loaned and partly given by Mr. Pedro A. Paterno and books brought by Mr. Niederlein for consultation a library was formed and opened for the use of the public. After the arrival of an expert anthropologist, Dr. Daniel Folkmar, long-intended plaster casts were made of characteristic types representing the races of the islands. This collection has gradually become of high scientific value in connection with measurements and photographs made for a comparative study of races and their mixtures.

A series of articles published in the newspapers held the interest of the people and press in the exposition alive. On April 15 our collections had increased to 6,000 exhibits. Up to this date only \$18,000 had been expended. During the month of April Col. H. O. S. Heistand, adjutant-general, division of the Philippines, directed all military commanders to have officers and men lend assistance to the exposition board. In the same month the jury of awards for the architectural contest was appointed, and a pedagogical expert, Mr. A. R. Hager, put in charge of the educational exhibit.

At the end of the month Doctor Wilson, our chairman, arrived in company of the vice-governor, General Wright. The board had previously voted to each provincial governor 500 pesos, and in May, when an executive order recalled the Mexican currency to the treasury, each governor was authorized to spend without further delay the rest of the amount in exhibits of exceptional merit. As a consequence of this, large amounts of new exhibits arrived, and on the 20th of May, when Doctor Wilson left for the United States, over 10,000 exhibits were in our hands.

Doctor Wilson came to these islands to have a glance at the exposition work and its progress, to have an interview with the members of the exposition board, and to receive his instructions for his work in St. Louis. Soon after his arrival he went to

Benguet, where Governor Taft and the Commission had assembled. He suggested to the Commission that the permanent museum and the preliminary exposition be abolished and that some other changes be made in the exposition law with respect to the representation of the board in St. Louis. The Philippine Commission acted accordingly on May 25. He also pressed the Philippine Civil Commission for more funds.

In the meantime, the architectural contest was held under the presidency of Mr. Edgar K. Bourne, chief of the bureau of architecture, and the following prizes were awarded:

First prize of 1,000 pesos to A. E. Anderson and Guy H. Mahurin; second prize of 750 pesos to R. de la Rosa; third prize of 500 pesos to Guillermo Gardiner, and fourth prize of 250 pesos to Isabelo Tampinco.

On the return of Doctor Wilson from Benguet the board took up with him in detail the discussion of the site, kind, size, and cost of buildings, arrangement of grounds at the exposition, and authorized him to make contracts for their proper and rapid execution. The latest date on which the buildings are to be ready was fixed at January 31. Doctor Wilson was also authorized to let concessions for a number of restaurants, cafés, fruit, candy, and soft-drink stalls, etc., on the Philippine grounds. At the same time the privileges applied for in the islands by a number of men were thoroughly discussed and disposed of. Doctor Wilson was authorized to appoint the necessary staff for the supervision of his work in St. Louis, and to take along with him Mr. J. L. Irwin, formerly private secretary to Commissioner Worcester, as clerk. Mr. E. Lacayo was appointed to take a number of Filipino builders to St. Louis to erect typical Filipino houses on the exposition grounds. Doctor Wilson also received full authority to collect the promised sum of \$100,000 from the Louisiana Purchase Exposition Company, depositing it and using it in accordance with the rules of the Bureau of Insular Affairs in Washington, or, if necessary, according to the rules laid down by the exposition company. Among other matters, also, the convenience of substantial exhibits of art were discussed and agreed upon.

Furthermore, a rapid shipment of the exhibits on hand was recommended, and the sending of non-Christian tribes to the fair with the necessary houses, utensils, implements, etc., was considered necessary in order to make the Philippine display complete and particularly interesting. Preliminary steps were also taken to have the Civil Commission agree to send the constabulary band in an increased number over to the exposition, with, if possible, two companies of constabulary, composed of men selected from the foremost native tribes of the islands. A similar move took place in Washington at or about that time, Colonel Edwards, chief of the Bureau of Insular Affairs, arranging for the transfer to the world's fair of four companies of Philippine scouts equally composed of men from all the principal tribes. During that time the propaganda work went on as usual, a series of articles were written for the press, more requests by urgent telegrams and letters were sent to the provinces, and our collectors were urged to increase their collections as rapidly as possible.

The propositions made by the board of health for a most elaborate exhibit were properly considered and the necessary amount of money voted. Another excellent proposition made by the government laboratories found the same support, and also Doctor Barrows' elaborate plans for a great ethnographic exhibit were approved. The packing of our material on hand began vigorously under the direction of Mr. G. P. Linden, whose extraordinary activity is worthy of the highest praise. At the end of May the exhibits had increased to 12,000.

In the month of June our first shipment of about 570 tons went on the *Kilpatrick* to New York for St. Louis. During the same month the most successful prize winner in the architectural contest, Mr. Anderson, was engaged as architect for the exposition board to prepare the plans of the grounds and buildings. After the approval of the same by Governor Taft and the Civil Commission, Mr. Anderson left on June 25 for the United States. In June \$1,000 was voted for a custom-house display. The exposition board also agreed to aid the constabulary band by the purchase of stringed instruments in order to enable them to attract a greater attention in the Philippine exhibition. During that month and the next large purchases of building material for buildings of Filipino style were made and prepared for shipment on the U. S. army transport *Dix*. On the same steamer were shipped a large number of tree ferns and palms prepared by Professor Lyon for exhibition, alive, at the exposition. Furthermore, 30 builders were engaged to leave on the U. S. army transport *Sherman*. At the end of June the collections had increased to over 15,000 exhibits, many of which had arrived from Samar, Romblon, Masbate, Pampanga, and other provinces.

In July a new committee of art was appointed. The governors of the provinces were also asked for a precise description of their respective territories to be used in St. Louis for a well-organized propaganda. The chiefs of bureaus were again requested

to prepare and remit before the end of August the desired exhibit, and to give besides a concise account of the work accomplished by their various departments.

The bureau of coastguard and transportation asked and received \$1,250 for the preparation of its exhibit. Letters were again directed to the American chamber of commerce asking for a brilliant participation at the world's fair as a body. This time our appeal found consideration, the chamber's president, Mr. Heacock, taking immediate action in the matter. A spontaneous offer of assistance was also made to the exposition board by the Philippine chamber of commerce through its president, Mr. Francisco Reyes. In July also Maj. Frank de L. Carrington took charge of the four companies of scouts which will form a part of the official guard of the Philippine exposition in St. Louis.

With the approval of Governor Taft a contract was executed with the celebrated artist Isabelo Tampinco for a Rizal monument to be erected in the Philippine section of the world's fair in St. Louis, according him \$3,500 gold for the same. Another contract was made with the well-known painter Resurreccion Hidalgo, in Paris, for a great painting representing the Philippines being led by the United States to progress and liberty, allotting him 25,000 francs for this work. Our collectors, Mr. Gillies, Doctor Miller, Mr. Valentine Wilson, Messrs. J. Luna, Charles L. Hall, Gerbrich, Radtke, d'Erf Browne, Juan de Juan, and others, were furnished with more means for increasing rapidly their collections. One of them, Mr. Juan de Juan, brought from Cagayan a petrified head, apparently of an *elephas indicus*, demonstrating that the elephant has at some time been a part of the mammiferous fauna of Luzon. More funds were also voted to a large number of the governors with which to purchase more valuable exhibits.

Former Lieutenant-Governor Hunt was engaged as manager of the Igorrote exhibit, and immediately sent with the necessary funds into the field. A collector in Jolo was authorized to spend 4,000 pesos in the purchase of pearl shells and other marine products, in order to represent fully the most important industry of the southern islands. Doctor Barrows and Doctor Sherman also received considerable sums to procure large collections for the fair on their trip through the southern islands. It was also provisionally agreed with Brigadier-General Allen, chief of constabulary, that two buildings of nipa would be erected in the Philippine grounds for the constabulary men and a small house for the officers accompanying the same. It was furthermore agreed to have a Filipino history written by a prominent Filipino, Señor F. Calderon, from the standpoint of Filipinos, in contrast to other historical works which were written from the Spaniards' standpoint, being unjust in giving no credit to Filipinos in the past. To encourage the proposed work of the American chamber of commerce, Mr. Niederlein delivered a speech in that chamber outlining the scope of the work for the members and their committees in order to engender more successful endeavors to represent fully the conditions and particularities of the commercial life in the Philippines.

In the month of July, with the approval of Governor Taft, May 1 was decided on as Philippine day at the world's fair. It was also declared the opening day of the Philippine exposition, and the committee of ceremonies in St. Louis was requested to issue the necessary invitations to the President and Cabinet, Members of Congress, diplomats, governors of States, military and naval authorities, for the opening ceremonies. In July also arrived the descriptive work on the Philippines, prepared, as stated before, in the Bureau of Insular Affairs, by Mr. M. E. Beall, as a preface to the catalogue of exhibits of the exposition board.

The freight rates also came again under discussion, and after considerable cabling the rate of \$24 a ton from Seattle, San Francisco, or New York to St. Louis was reduced to \$12 per ton from Manila to St. Louis. The first concession contract also was ratified, Messrs. Deputy and Moody depositing \$500 in the insular treasury and \$10,000 United States currency in the United States as bond for the faithful fulfillment of their concession referring to the sale of photographs, erection of a cinematograph, a stereopticon, etc., on the Philippine grounds. The exposition board also resolved to send to St. Louis at once for classification, by a competent man of the Geological Survey in Washington, the mineral collections, the mining bureau having officially declared its incapacity to do the work for want of experts.

As stated already the exposition board loaded the U. S. army transport *Dix* with 3,940 tons of exhibits and building material, besides requesting its quartermaster to take over from Japan the rest of 500 show cases ordered some time ago for the preliminary exposition. The *Dix* also took along the first 10 builders. During the month of July also the usual newspaper propaganda was carried on, and telegrams, circulars, and letters issued in order to assure more exhibits. At the end of the month the collections had increased to 24,000 exhibits.

In August the carefully revised description of the Philippine Islands went to

the printer. More appeals were made to the public, to the manufacturers and producers, and the provincial governors and committees were specially urged to pay particular attention to the exposition work after the census work was completed. A number of contracts were made for artistic furniture, paintings, and other works of art.

In August the Philippine Commission, by act No. 824, increased the insular appropriation for the exposition board to \$500,000 gold, and by another enactment, No. 827, it ordered a number of exhibits to be shipped back after the closing of the World's fair for a permanent Philippine museum in Manila. The board engaged new collectors to replace others who had resigned. With the increase of work a raise of salary was agreed upon for Mr. D. J. Ryan, stenographer, Mr. H. F. Kendall, property clerk, and a number of the most faithful Philippine employees. The exposition board also considered it necessary to appoint Mr. Fenner, member of the American chamber of commerce, to take charge of its department of commercial information and the foreign imports, about 3,000 samples of which had gradually been gathered with full information about the same.

The number of the exhibits at the end of the month had reached 30,000, of which 29,000 were catalogued. At the beginning of that month the board issued an alphabetical list of exhibitors, comprising at that time about 1,500 names. This number was increased to 2,000 at the end of the month.

As the second part of the Official Catalogue, the catalogue proper had now to be prepared for the printer. Mr. G. d'Erf Browne was put in charge of this department, with Mr. Applegate and Mr. Arnold as his assistants. During August the incoming mineral exhibits had increased considerably, and Mr. Thanish, from the government laboratories, a competent mineralogist, was put in charge of them. A chemist, Mr. Walker, of the same bureau, was intrusted with the analysis of dyestuffs and tan barks, while Doctor Sherman continued the chemical analyses of all kinds of minor forest products; Mr. Fox continued his labors as assayer of ores, Mr. Merrill with the preparation of the herbarium of useful plants, Mr. Charles S. Banks with the preparation of a great exhibit of insects of these islands, and Mr. L. M. Guerrero, the learned secretary of the exposition board, with the classification and description of the economic plants accumulated in our buildings from all parts of the islands.

Considerable activity was displayed in urging haste upon the different members of committees throughout the islands, in view of the approaching date of the final shipment, which was set November 15. The packing of exhibits went vigorously on, and on August 8 about 550 tons were shipped on the *S. S. Pleiades*. In order to save the valuable exhibits from the influences of the rainy season, all products of art were cased and made ready for shipment on the *Coptic* in the following month. In August the exposition board also sent 30 Filipino builders in charge of our curator and taxidermist, Mr. Barbaza, on the *Sherman* to the United States. On a former transport, *Logan*, the exposition board shipped to the United States a considerable number of specimens of the fishes of the islands, collected by Messrs. Pierson, Barbaza, Hall, and others, in order that they might be identified by the U. S. Fish Commission in Washington.

The month of September has in large part been spent in determining those kinds of exhibits of which the board is still lacking, and earnest endeavors through letters and telegrams to committees and collectors have been made to make the Philippine exhibit complete and respectable. In the middle of September about 270 tons of the most select exhibits were shipped on the *Coptic*. At the beginning of the month the German consul, Doctor Grunewald, the British consul-general, Hon. W. J. Kenny, the French consul, Hon. G. de Berard, and the Spanish consul-general, Mr. N. Rivero, offered their gracious assistance to the board for collective exhibits of their countrymen, which the exposition board gratefully accepted.

During the month of September Father Algué turned over to the board 7 relief maps, the same being of most excellent workmanship. The bureau of non-Christian tribes (now called the ethnological survey of the Philippines) sent in a number of collections from the Moro and Jolo group, in compliance with a former contract. Further exhibits were also received from the forestry bureau, the bureau of agriculture, and Chief Bonner of the fire department.

Vice-Governor Luke E. Wright, secretary of finance and justice and in charge of the department of the interior, and Commissioner-General J. F. Smith, secretary of public instruction and in charge of the department of finance and justice, directed circular letters to the respective heads of bureaus, requesting that they hasten the remittance of exhibits, and requesting at the same time complete lists of the same.

In September the provincial governor, provincial committees, and the division superintendents of schools reported great activity throughout the Archipelago.

Former Lieutenant-Governor Hunt, now the manager of the Igorrote exhibit, sent a large collection from Lepanto-Bontoc, which it required over 200 Igorrote cargadores to transport.

Doctor Jenks, chief of the ethnological survey of the Philippine Islands, sorted the ethnological exhibits by tribes for a great and instructive ethnological display. The board has planned to take to the United States, not only a large number of Igorrotes, Tinguianes, and Moros, but also Negritos and several tribes of the so-called Indonesians who live in the eastern part of Mindanao, who, together with the type-casts mentioned above, will furnish the student of comparative anthropology with invaluable material for study.

By the end of September 43,162 exhibits had been gathered, as follows:

	Number of exhibits.	Number of ex- hibitors.
Department of—		
Manufactures .....	10,954	2,430
Agriculture.....	7,954	2,091
Forestry .....	7,674	1,064
Fish and game .....	5,749	558
Horticulture.....	8,580	120
Anthropology .....	2,504	214
Liberal arts.....	2,102	207
Education .....	1,016	66
Mines and metallurgy.....	729	508
Fine arts .....	498	139
Transportation .....	252	130
Military supplies .....	180	1
Machinery .....	14	10
Social economy .....	5	1
Physical culture.....	1	1
Total .....	43,162	7,537

The exposition board issued also the attached alphabetical list of exhibitors with the corresponding number of entry cards of exhibits for the catalogue. The total number of entry cards at the beginning of September was 29,537, and the total number of distinct individual exhibitors 2,398. The following table shows the distribution of both by provinces or islands:

	Number of entry cards.	Number of ex- hibitors.		Number of entry cards.	Number of ex- hibitors.
Manila .....	5,601	192	Masbate.....	323	33
Abra.....	813	94	Mindanao.....	1,203	50
Albay .....	7	2	Mindoro .....	778	23
Ambos Camarines .....	286	36	Misamis.....	156	15
Antique .....	450	24	Negros Occidental .....	618	134
Cataan .....	76	7	Negros Oriental .....	458	57
Batangas .....	347	25	Nueva Ecija .....	477	15
Benguet.....	129	21	Nueva Vizcaya .....	105	7
Bulacan .....	667	88	Pampanga .....	963	120
Bohol .....	410	119	Pangasinan.....	1,316	45
Cagayan.....	827	94	Paragua .....	218	27
Capiz.....	394	33	Rizal.....	272	26
Cavite.....	251	35	Romblon.....	241	22
Cebu .....	175	11	Samar.....	2,879	251
Iloilo .....	711	114	Sorsogon.....	844	69
Ilocos Norte .....	1,434	139	Surigao .....	158	16
Ilocos Sur .....	1,283	96	Tarlac .....	1,720	124
Isabela .....	363	28	Tayabas.....	919	109
Lepanto-Bontoc .....	837	36	Union.....	293	13
Leyte.....	59	8	Zambales .....	1,199	50

The provinces which have distinguished themselves with a large number of exhibits are, in the order of the total amount, Samar, Tarlac, Ilocos Norte, Pangasinan, Ilocos Sur, Mindanao, Zambales, Pampanga, Tayabas, Sorsogon, Cagayan, Abra, Mindoro, Iloilo, Bulacan, Negros Occidental, and Nueva Ecija.

The attached list of exhibits and exhibitors, by departments, groups, and classes, reveals in detail the work the exposition board has accomplished up to September.

With the exception of the department of electricity, all departments mentioned in the official classification of the World's Fair are represented in the Philippine collection.

The Philippine exhibit also is represented in 103 groups out of 144 and in 308 classes out of 807. In order to show a few items, we give the following classes:

Department of education:

Class 2, 489 exhibits referring to elementary grades.

Class 7, 143 exhibits referring to university work.

Department of fine arts:

Class 27, 190 exhibits referring to paintings.

Class 30, 122 exhibits referring to sculpture.

Class 33, 145 exhibits referring to carvings.

Department of liberal arts:

Class 55, 700 exhibits referring to photographic views.

Class 57, 197 exhibits referring to books.

Department of manufactures:

Class 200, 1,786 exhibits referring to basket ware.

Class 253, 341 exhibits referring to matting.

Class 309, 140 exhibits referring to looms, weaving.

Class 342, 522 exhibits referring to fabric, Manila hemp.

Class 343, 191 exhibits referring to fabric, jussi, pina.

Class 344, 190 exhibits referring to cordage.

Class 368, 281 exhibits referring to embroidery.

Class 383, 934 exhibits referring to hats, caps.

Class 389, 517 exhibits referring to canes, whips.

Department of agriculture:

Class 488, 452 exhibits referring to implements.

Class 491, 116 exhibits referring to implements, harvest.

Class 492, 144 exhibits referring to miscellaneous implements.

Class 496, 392 exhibits referring to tobacco.

Class 512, 954 exhibits referring to rice, cereals.

Class 513, 481 exhibits referring to legumes.

Class 514, 173 exhibits referring to tubers.

Class 517, 114 exhibits referring to coffee, cocoa.

Class 518, 351 exhibits referring to oil-producing plants.

Class 555, 128 exhibits referring to sugar.

Class 573, 739 exhibits referring to textile plants.

Department of horticulture:

Class 635, 137 exhibits referring to tropical fruit.

Class 646, 3,245 exhibits referring to orchids, ornamental plants.

Department of forestry:

Class 653, 279 exhibits referring to seeds.

Class 659, 528 exhibits referring to logs.

Class 660, 4,064 exhibits referring to wood samples.

Class 661, 434 exhibits referring to textile barks.

Class 662, 805 exhibits referring to wooden ware, baskets.

Class 665, 980 exhibits referring to wild fruits.

Class 666, 955 exhibits referring to barks, dyes, tannins, gutta-percha, gums, resins.

Department of mines, Class 700, 181 exhibits referring to metallic ores.

Department of fish and game:

Class 720, 170 exhibits referring to arms.

Class 722, 170 exhibits referring to hunting equipment.

Class 725, 276 exhibits referring to hides, skins.

Class 729, 849 exhibits referring to nets, baskets, etc.

Class 730, 147 exhibits referring to anglers' apparatus.

Class 732, 3,253 exhibits referring to shells, corals, etc.

Class 734, 616 exhibits referring to fishes.

Department of anthropology, class 743, 2,402 exhibits referring to ethnological objects.

The packing of exhibits continued with vigor. A shipment of 26 large and long logs for the Philippine forestry building left September 26 for the United States. Another shipment of over 300 or more tons of delicate exhibits will leave early in October.

Among the shipments there will be also a collection of over 3,000 samples of imported foreign goods intended to show at the Louisiana Purchase Exposition to the world at large the taste, needs, and even purchasing power of the 7,000,000 Philippine people, and to obtain offers for the merchants established in the Philippines for goods of equal or better qualities on equal or better terms and for the same or lower prices.

They were obtained by a special agent of the exposition board in the custom-house with the consent and aid of the customs' agents of the importing houses and supplied with the necessary data, which later were completed by experts provided, at our request, by the most important English, Swiss, and German importers.

The foreign consuls, instigated by the British chamber of commerce in Manila, protested against the shipment of those samples to the world's fair, requesting the government to have the same returned to the custom-house, believing to stop with that the natural process of international competition and to prevent especially American competition in the Philippine Islands. The exposition board is of the opinion not only that 7,000,000 Filipino customers have a perfect right to be in every way considered in a complete display of the Philippine Islands at the world's fair, but that also the people of the United States have a right to know the needs and taste of the Filipinos.

The board has shipped up to date 669 cases, 427 crates, 10 bales, 500 show cases, 50 bales bamboo mats, 43 bundles of bamboo, 32,000 long bamboo, 18,550 6-foot bamboo, 164 logs, and 105 palma brava for the forestry building; 382,095 nipa roofing, 145 bales of cabonegro, 47 bales of anahao roofing, a number of boats, and other objects, such as photographs, plans, etc.

The disbursing officer, Mr. Carson Taylor, whose accuracy and activity are worthy of praise, gives the following account of money expended up to September 25:

	U. S. Currency.
Salaries and wages.....	\$37, 770. 62
Exhibits and contingent expense.....	37, 363. 79
Office supplies, glass jars, showcases, traveling expenses, freight.....	13, 662. 33
Advertisements in newspapers .....	631. 76
<b>Total.....</b>	<b>88, 828. 50</b>

Everything seems to indicate that the exposition now under way will not only answer the purpose, but will be the unqualified success that is wished, and the Philippine Exposition Board is confident that its earnest endeavors will ultimately be crowned with results whose farreaching influence will bring to the Philippine Islands that intense and universal interest that they so much need and deserve. It remains for the statesmen of the United States to build in the Philippines the basis of America's higher mission in the countries of the Orient.

Manila, October 2, 1903.

GUSTAVO NEDERLEIN,  
Member of the Exposition Board.  
LEON M. GUERRERO,  
Secretary of the Exposition Board.  
PEDRO A. PATERNO,  
Member of the Exposition Board.

*Memorandum on the proposed work of the Philippine Commission for the Louisiana Purchase Exposition of St. Louis, Mo., in 1904.*

[Presented in October, 1902, to the honorable Civil Commission.]

A very effective way of obtaining exhibits is often the official way. In our case Governor Taft will be asked to issue a decree which will authorize the exposition commission to apply directly to the different government organizations for aid, requesting at the same time the several branches of government to assist in every possible way the exposition commission for the collection of exhibits and data. In this decree also mention might be made of a preliminary exposition to be held in August, September, or October, 1903, in Manila.

The Philippine Commissioners will be also asked to make a decree giving to the exposition commission free use of the mails and of the military cable and telegraph lines and of the United States army transports, declaring it preferred service.

In this decree it will be further said that products and posted information will pay no postage when sent to the exposition commission with the remark: "For the St. Louis Exposition." Similar privileges if possible will be procured for railroad transportation and from the cable company.

The Philippine civil government will be furthermore requested to issue a decree relieving not only exhibitors from paying taxes or duty on exhibits for the St. Louis

Exposition, such as, for instance, wood, but also the exposition commission from paying duty on glassware and other manufactured articles to be imported for the preparation, etc., of the exhibits.

Governor Taft will also be asked to give special instructions to the different chiefs of the departments and bureaus from which specific exhibits and information will be demanded to make them to the best advantage with the employees of the departments or bureaus, and at the expense of their corresponding offices.

In this way also the contributions for an exact description of the Philippine Islands, its conditions and resources, will be requested, with a time limit for remitting the same to the exposition commission in Manila.

Governor Taft will finally be asked to extend a general invitation to the public, ecclesiastical and other organizations, scientific institutions, etc., to aid the exposition commission in making separately creditable exhibits.

It will also be very essential to interest from the start the military authorities in the exposition of St. Louis. First of all there should be made a special military exposition of the Philippine war with appropriate charts, maps, photographs, trophies, etc.

Then a general order of the military authorities should be requested for every one of the 300 or more military posts or stations in the various provinces or islands, to aid the exposition commission in every possible way, detaching special officers and men in each post for this service.

In order to bring the instructions and requests into the proper channels an officer on the staff of the commanding general might be attached to the Commission. Also special arrangements might be made with respect to necessary expenses incurred.

The exposition commission needs at once from the military authorities the use of their maps, showing not only the military posts and districts covered by each, but also in form of blue prints, certain geographic information regarding every part of the Philippine Islands, including roads, navigable rivers, producing centers, mines, distribution of tribes, etc.

The exposition commission further hopes that the officers available will be instructed to send to the Commission not only products of all kinds, including ethnological and anthropological material but also full information about the same, so that the geological conditions, the flora and fauna and distribution of races and tribes can be better determined and an exact economic map of the Philippines on a large scale constructed.

The exposition commission hopes also for special aid from the military medical department in reports on tropical diseases and in anthropological work respecting the different native tribes. Science would greatly appreciate accurate studies and observations and even cadavers of natives should be sent in sealed coffins to the United States, say in care of the Philadelphia Museums. With respect to the native tribes which shall be exhibited or represented at the St. Louis Exposition, masks will have to be taken of individuals of many tribes and it seems advisable to send representatives of the many tribes, from time to time, in the United States army transports to Manila, in order that their masks may be taken by noted artists.

It is confidently expected that the commanding general will not fail to give urgent orders that every possible facility and aid be given to the exposition work. Every officer and soldier, we trust, will be proud to contribute to show to the people of the United States and to the world at large the immense natural resources, great fertility of soil, and enormous economical chances, which the Philippine Islands offer to the American capitalist, agriculturist, miner, engineer, merchant, etc.

Returning to the civil government, there will be special aid requested from the bureau of public instruction with respect to school exhibits of all grades as stated in Department A of the St. Louis exposition classification. In accordance with this plan the superintendent of city schools will receive a similar request. Special aid is also expected from the 1,000 American teachers distributed all over the Philippine Islands.

From the bureau of coast and geodetic survey general and special maps and charts, maps of ports and lights, etc., will be solicited.

The bureau of mining, we hope, will take charge of the expected exhibits of the classes 702 and 703 and will give adequate orders to competent engineers and employees.

The bureau of forestry will probably not fail to aid the exposition commission most efficiently in the important forestry exhibits and works embraced in class 656.

The bureau of government laboratories will be requested to instruct their employees in aiding the commission in certain analyses, charts, lists, and other information.

In expecting that the bureau of agriculture will take charge of the exhibits demanded in the classes 485, 486, 487, 500, 505, 506, 507, 508, 509, 510, 511, 582, 583, 584, 585, 586, 596, 602, 609, 626, 628, 647, 648, and 685, proper orders will have to be given in time to competent employees and organizations.

The bureau of public lands is expected to furnish an extract of the register of land with statistics of the distribution of cultivated lands in comparison with pasturage, forest land, swamps, mountains, and water, demonstrated in form of maps and charts. From this bureau also a history of fluctuations of prices of land, rents, labor, live stock, crops, animal products, etc., might be expected.

From the bureau of non-Christian tribes a large ethnographical map and corresponding description on the existing tribes will be asked, together with collections of everything included in classes 739, 740, 741, 742, and 743.

A highly interesting contribution will be expected from the weather bureau, covering classes 63 and 64, including rain charts and all kinds of meteorological information.

We expect further, considerable aid from the board of health of the Philippine Islands, covering classes 773, 783, 784, 785, 786, 787, 788, 791, 792, 793, 794, 795, and 796. The commission also naturally hopes to get from this body a work on Philippine or tropical diseases.

The customs and immigration authorities can be of extreme usefulness, not only in furnishing statistical information, but in collecting products with the desired data, also the use of their buildings as a place for packing, receiving, and forwarding exhibits, as well as other facilities which these bureaus can give to the exhibitors and to the exposition commission.

The aid of the department of justice will consist in a general report and in inducing the justices of the peace to join their efforts with ours for a complete exhibit of the Philippine resources.

Very efficient aid can be rendered by the Philippine Constabulary in ordering the constabulary bodies distributed all over the islands to collect products, and to help the exposition commission in obtaining by contract representatives of various tribes for the St. Louis Exposition.

Even the bureau of prisons can aid us with exhibits of penitentiary products and information respecting the management of the institutions.

From the bureau of post-offices we shall request outside of free postage and free telegraph, a history of the postal and telegraphical development in the Philippine Islands; further, a post-office map, a postage stamp collection and certain help in propaganda and collecting work.

The bureau of architecture and construction could easily take charge of the classes 158 to 161 of group 128 and of the classes 34 to 36 in group 136 of the St. Louis Exposition classification. It could also make the plans and estimates of the Philippine exposition buildings in St. Louis in accordance with the desire of the exposition commission.

The office of superintendent of buildings and illuminations could make us an interesting exhibit of Manila.

Interesting displays can also be made by the department of engineering and public works in Manila, with all kinds of plans, descriptions, and statistics; further, by the department of engineering and public construction showing plans of the water works, sewerage, etc., besides by the office of superintendent of streets, parks, bridges, docks, etc.

The captain of the port of Manila will be asked to obtain for us plans for the new harbor improvements, as well as to call the attention of the boatmen of different provinces and islands to the exposition and to the desire of the exposition commission to acquire all kinds of interesting products and articles for the St. Louis exposition.

Similar instructions we would like to have given to the superintendents of public markets and custom-house officials, as well as railroad officials, godown agents, etc.

The bureau of cold storage and ice plant will be asked to give us the privilege to store certain products up to the time of shipping, as, for instance, abacá stems, ananas leaves, certain vegetables, fruits, etc., to be sent in a fresh state to the United States.

There are still other ways of obtaining exhibits, namely, in the way of public propaganda, which often brings success.

For every exposition, as a preliminary step, committees are formed, the first being usually the committee on publicity, composed of editors of newspapers and other publications, heads of chambers of commerce and similar organizations, literary men, artists, high government officials, officers, etc. These committees will be under certain control of the exposition commission, which alone can take full responsibility in this matter.

A special method will facilitate accumulation of facts in the commission for the daily press. Notice will be given about the progress of the exposition work as to exhibits received, sent, or promised, purchases made, orders given, the work accomplished by the various committees all over the country, as well as the progress of the exposition preparations in St. Louis and in other countries which will be represented

in the world's fair. Special care will be taken to keep the people constantly interested in the exposition work.

Besides this committee on publicity we expect to have a committee on exports and a committee on imports, composed of the leading firms of the islands, capable and willing to make an impressive show of Philippine exports and foreign imports, which will greatly stimulate future trade.

Another important committee, we expect, will be the committee on education and acquisition of a complete library of books on the Philippines in all languages as well as literature published there. The committee to be composed of leading educationists, the principal directors of schools, presidents of leading scientific or literary societies, booksellers, librarians, high government officials, officers, priests, etc.

There will have to be further formed an art committee, composed of artists, teachers of the *Escuela Superior de Pintura, Escultura y Grabado*, and leading connoisseurs of art.

A committee of ethnology and anthropology and archæology will be best composed of the heads of the bureau of non-Christian tribes, the directors of museums, prominent priests and missionaries, military officers, and other prominent men.

A committee of great importance will be that of woman's work in art, science, and industries, such as weaving, basket and matting making, etc., as well as samples of books, paintings, and sculptures, and reports of their charity and hospital work, etc. This committee might be composed of the most prominent women of the islands, headed by the wives of Philippine commissioners and of highest military officers.

There must also be a committee for the collection of photographs, showing the Philippine Islands in every way from all points of view, composed of photographers, amateur photographers, artists, military officers, members of the government, etc.

Another and perhaps the most important committee will be the committee on general propaganda. The most advisable formation of this body seems to be the creation of a scientific society or a Philippine academy, with a permanent publication on the geographic, natural, and economic conditions of the Philippine Islands. It can be composed of the most prominent men in every branch of knowledge, men of science and art, commerce, industry, officers, priests, engineers, statesmen, etc.

The publication of the scientific society or Philippine Academy might be sustained by the Philippine exposition commission during the time of the exposition work in the Philippines and in St. Louis, and be up to that time under certain control of that commission, for the purpose of publishing in it the most important facts on the geographic and economic conditions, resources, ethnology, etc., of the Philippine Islands.

It is understood that the governor and Philippine Commissioners, the commanding general and heads of departments, as well as the exposition commissioners, are *ex officio* members of each committee. The sessions of committees shall be held in the offices of the exposition commission. These committees will be of an advisory character, yet without the power to dispose of the funds of the exposition commission.

This propaganda work will be assisted by circulars and circular telegrams or cablegrams and further by a series of posters which will be prominently brought before the public in post and telegraph offices, public buildings and public offices, mercantile offices, show windows, banks, custom-houses, markets, steamers, railroad stations, hotels, restaurants, cafés, street cars, bill boards, etc. These posters will be made in different dialects in order to be understood all over the country.

A method certain of success for obtaining necessary collections for exhibiting at the St. Louis exposition is to proceed on a business basis, devoting from the start money to the purchase of photographic views, certain agricultural, forest, and minor forest products, drugs, medicinal plants, ethnographical articles, certain products of industry, certain fishing and hunting products and apparatus, certain books, charts, and maps, certain means of transportation, etc., which can be sold at St. Louis. This will have to be done largely to show imported articles. For this purpose it seems to be advisable to enter as soon as possible into an arrangement with the custom-houses to make collections under our supervision; further to employ, for instance, fishermen, in order to make a complete fish collection under the supervision of the expert in the Manila Museum, or to buy, if possible, already made and classified collections of hides, skins, reptiles, insects, etc., or to order certain collections, as, for instance, drugs and minor forest products, medicinal plants, etc., from pharmacists and so-called *curanderos*.

Different woods can be obtained in that way from Chinese wood dealers and from the lumber guilds, certain industrial goods produced by wood carvers, bamboo-ware makers, cloth manufacturers, etc., sugar from the sugar refinery in Malabon, tobacco from cigarette and cigar factories, etc. It might also be wise to advertise our desire for purchasing certain goods, as, for instance, ethnographical articles.

Again, it will be convenient to frequent the markets and ports, as well as certain curio shops. Another method would be to solicit loan collections, or to engage young Philippine students to make specified collections in the various provinces and islands. Special invitations will also have to be sent out. The manufacturers in the various islands, for instance, will have to be invited to prepare collective exhibits for the St. Louis exposition, such as gold and silversmiths, chocolate, alcohol, liquor, cigar and cigarette manufacturers, makers of confectionery, furniture, harness, and hats, tin-smiths, engravers, sculptors, lithographers, photographers, gardeners, etc.

Circulars will have to advertise also the multiple desires of the exposition commission, and lists of products and localities of production will contribute to the success. Such lists, of which I have prepared a number, might also be first completed by civil and military authorities.

For certain products I think even home manufacturers could be asked to contribute, with money to purchase the same.

There exists still another method of securing exhibits, namely, collecting expeditions. They will have the purpose not only of collecting exhibits of all kinds, as well as information, but also of installing committees and subcommittees and in giving them proper instructions on the spot, in order to obtain the results of a more or less complete exploration, especially in all physical features, ethnographical and economical conditions of the Philippine Islands. It seems to me advisable to make first such a trip on the railroad from Manila to Dagupan, then a trip along the Pasig River and along the shores of the Laguna de Bay, to be followed by a trip around Luzon and up the great river of Cagayan as far as navigable; besides, a trip to the Visayan Islands and to the island of Mindanao, ascending in the latter the rivers Grande de Mindanao and Agusan as far as navigable; and finally, to the Sulu Islands and Paragua. Success can be assured by advising the authorities of the various places in time to prepare everything for a profitable work of the commission.

With respect to the methods of exhibiting from which to a very large extent the final success depends, a few ideas might be expressed.

It seems to be advisable that the St. Louis Exposition Company shall invest the promised contribution for the Philippine exhibit in special buildings and installations for which plans and details will be given by the Philippine exposition commission.

It is of great importance that modest exhibits are well housed and exhibited to the best possible advantage in superior installations; also artificial bamboos, palms, and ferns will have to be made in order to give to the Philippine exhibits the proper tropical appearance.

For the show cases special precious woods from the Philippine Islands will be furnished to the exposition company in usual marketable timber; also samples for duplication and all materials demonstrating Philippine types of architecture and life of native tribes might be sent without delay.

The St. Louis Exposition Company should also take charge of the cost of installation of the Philippine exhibits in the different general exhibition buildings, in which they shall be shown, arranged by groups and classes in comparison with exhibits of similar kind from other countries.

In the Philippine exposition proper there should be a special building for agriculture, including tobacco, sugar, etc., and another for forestry products, minor forestry products, and abacá and other fibers; further, a large building for industrial and ethnographical exhibits which shall have under the veranda a full exhibit of foreign goods, imported to the Philippine Islands, arranged in show windows, by classes of goods, showing prices and all sorts of information, as well as the manner of packing, labeling, etc.

The next group of buildings should be a large Philippine market place, with buildings illustrating the different styles of architecture, including a Catholic church and a Mohammedan mosque, and in which shall be shown the different Philippine industries in process, as well as many native marketable goods.

The market place shall be used every day for certain hours as a public market, in which the several tribes shall sell and buy.

In the background, in a high natural forest, the majority of the different tribes shall be exhibited in their peculiar villages in their daily lives, with their implements, house and kitchen utensils, arms, trophies, etc.

Some tribes will only be represented by figures with masks, made by noted artists.

At the lake front the fishing, including pearl fishing, will be shown, together with all kinds of fishing apparatus; also water transportation, all kinds of boats, rafts, etc.; further, ferries and bridges in native style, surrounded by bamboo groves, palm forests and fishermen's villages, or villages of native tribes having their homes on lake and river shores, and sometimes away from the shore on huts above water.

In another part of the lake front there should be a rice field in terraces as well as plantations of other interesting plants of the Philippines, showing in every detail

agriculture and country life. There might be further made an artificial abacá plantation. Fresh abacá stems, as well as fresh piña leaves, might be sent to the exposition, to be continually worked by the natives before the visitors.

In a creek also the primitive gold washing might be demonstrated.

Efforts even might be made to illustrate the interesting copper roasting of the Igorrotes.

The market building group, as stated before, is proposed to house all sorts of native manufacturers. Some will make cloth out of hemp alone, called "sinamay," used for shirts for men and waists and skirts for women. Another will make the tinampipi cloth, a third the piña or pineapple cloth, and a fourth jusi, a mixture of silk and cotton or pineapple fiber.

There shall be further exhibited the manufacturing of mats and hats, besides the manufacturing of cordage, essential oils, cigars and cigarettes, pottery, woodcarving, gold and silver smith work, etc.

Another part of the Philippine exposition should set forth the different means of transportation, presenting also the manner of packing and loading.

A great feature of the Philippine exposition should be everyday's processions through the exposition in groups of tribes, showing the costumes and religious ceremonies, and illustrating Philippine agriculture, fishing, hunting, etc.

A native theater might interpret Philippine music, and give characteristic songs and dances and all kinds of entertainments.

A Philippine music band would undoubtedly be a success in St. Louis, and should be engaged by the St. Louis Exposition directors.

In the Philippine exposition special concessions will be granted for the manufacturing and sale of cigars, cigarettes, silver and gold ware, and jewelry, Philippine confectionery and chocolate, Philippine albums and photographs, Philippine basket and leather ware, and articles made by the Moros. Other concessions will be given for a restaurant, a café, a theater, a music hall, also for transportation on boats and other vehicles, such as water-buffalo carts, sleds, etc.

For Philippine exposition guards, the Philippine Scouts, or the Philippine Constabulary, might contribute to a body composed of Filipinos from all over the islands.

In connection with this exposition there is a highly important matter to be considered, namely, that of a preliminary exposition in Manila.

It seems desirable to hold a preliminary exposition in Manila in August and September or later in 1903, in order to create a greater interest among the Filipinos for the St. Louis Exposition. Such a preliminary exposition would also bring us more products and more exhibitors and ultimately greater benefits for the development of the Philippine Islands.

No rewards will be given, yet a diploma of honor should be bestowed to those who in the opinion of the jury have shown superiority in their exhibits or will otherwise merit a grateful recognition. The expense incurred by this preliminary exposition will have to be borne in part by the treasuries of Manila, of the provinces, and of the communities or pueblos; being only partly defrayed from admission fees and concessions, sale of catalogues, etc., which latter will not be large enough to cover all expenses.

This exposition will principally consist of Philippine industrial products, agriculture and forest products, including coffee, cocoa, and tobacco, abacá, piña and other fiber plants, woods, oilseeds, starches, sugar, cereals, legumes and vegetables, medicinal plants, tanning products, dyes, gums and resins, rubber, gutta-percha, fruits, fishing and hunting products, ethnographical objects, a collection of Philippine books, a complete school exhibit, an exhibit of paintings, photographs, sculptures, etc., as well as all kinds of publications showing work accomplished by the American administration of the Philippine Islands since 1898.

As indicated above, each province shall be invited to make an exhibit at its cost, the general government giving free transportation in the United States army transports.

In order to facilitate the work, each community or pueblo shall receive at once an official order to prepare at its cost a creditable exhibit with the request to communicate direct with the exposition commission in Manila. The commission will give the proper instructions, will prepare the installations, and finely label and exhibit the products.

With this preliminary exhibition it might be desirable to hold an Oriental exposition with exhibits which might be at our disposal after the termination of the Hanoi exposition in the spring of 1903.

Such an exposition will undoubtedly contribute to closer commercial relations with the Orient and might be a preliminary step toward the preparation of reciprocity treaties with our neighbors in Asia.

Such an exposition will also prove to be extremely useful to the new created museum of commerce, industry, ethnology, etc., in Manila.

A special inducement for getting collections over from Hanoi might be the free transport on a United States army transport from Hanoi or Haiphong to Manila. The Philippine civil government would probably not fail to allow those exhibits to come in duty free to Manila.

In connection with this exposition, also a permanent American warehouse for the Orient could be started, exhibiting American goods at the expense of the American manufacturers, manufacturers' associations, exporters, etc.

With respect to the Hanoi exposition I would like to make the following remarks:

Hanoi is now the capital of Indo-China composed of the French possessions Tonkin, Annam, Laos, Cochin China, and Cambodge.

Indo-China seems to have become a great field for Philippine exports, especially for tobacco, cigars, cigarette, sugar, hemp, woods, fishes, cordage, cocoa, oilseeds, chocolate, dyestuffs, alcohol, hides, etc., and it is undoubtedly advisable to look for future closer commercial relations with the French possessions in the Orient, as it also is capable of furnishing us in exchange rice, silk, tea, all kinds of Chinese products, etc.

On that account and for many other reasons it would be politic to take part in the Hanoi exposition in making a creditable exhibit of the Philippine resources and marketable products.

Special arrangements could be probably made with the governor-general of Indo-China with respect to buildings and the proper care of products, especially if based upon a reciprocal service later on in Manila.

Otherwise a few pavilions could be constructed for tobacco, cigars, and cigarettes, hemp and textile plants, sugar, coffee, cacao, and other agricultural products, woods, dyestuffs, oilseeds, gums, resins, etc., charts, publications of all kinds, photographs, as well as for a number of industrial products.

There would be little expense for transportation, as a United States army transport would probably take charge of the exhibits, except in Hanoi itself.

The necessary vessels, glassware, show cases, etc., can be bought cheaply in Japan and tables, etc., made in Hanoi. The total expense should not reach the sum of \$7,500 gold.

Most of the glassware, show cases, and products would serve again for the preliminary exposition in Manila and for the exposition in St. Louis, if not for the Manila museum.

Being myself personally acquainted with the director-general of the exposition and other authorities, I hope to obtain special concessions, especially as I have served to the ministry of colonies of France in Paris in reestablishing and reorganizing the ancient colonial museum of the French Government.

Returning to the work of the St. Louis Exposition, I propose to keep the following books:

The journal for exhibits, in which will be mentioned number, department, group, and class, exhibitor, locality or origin, object and description, original number and remarks, and final disposition.

The catalogue book, with the number of journal, original number, exhibitor, locality, article, description, price, remarks, and final disposition.

The cash blotter, with date and amount.

The cash ledger, with date, name, residence, nature of account, number of voucher, of bill and amount, divided in different parts, as, for instance, for office expense, warehouse expense, etc.

Purchase book, with date, name of seller, article, number of bill, and amount.

Receipt book, in duplicate, with consecutive numbers.

Labor book, with date, kind of service, number of voucher, or amount.

Stock account book, with two columns—on the received side, with date, article, and quantity bought; on the expense side, with date, article, and quantity.

The store and warehouse book, in two columns—on the received side, with date, nature of product, and quantity; on the shipping side, with date, nature of product, quantity, and destination.

Transportation record, with date, name, kind of transportation, and freight paid.

Postage record, with date of mailing, number of letters, circulars, packages, etc.

Telegram and cable record, with date, address, purpose, number of voucher, and cost.

The receipt book, for the exhibitors in a diploma form, with date and character of goods received for the St. Louis Exposition and large stamp of the exposition commission.

The labels, with department, group, class, number, exhibitor, locality, article, description, having on the reverse side the original number and remarks.

The shipping manifest, with date, number and marks, weight and measures, class of goods, name of ship, destination, value at which insured.

The news clipping book.

The card file case for the description of the Philippine Islands.

The card file brief of correspondence, with date, number of letters, department, group, class, and date of answer and brief.

The diary of work accomplished, with date, correspondence received, correspondence answered, circulars mailed, exhibits received, exhibits promised, contracts made, exhibits bought, supplies bought, extract of account, and remarks.

This system of work can be easily modified and completed as soon as the full responsibilities of the commission and the disposition of the funds shall have been clearly established by decree, when proper instructions, etc., will be promptly given.

It is highly desirable that a full, free hand be given to the exposition commission, under control solely of Governor Taft and his associates, in order to be able to accomplish rapidly and successfully the work.

GUSTAVO NIEDERLEIN,  
*Special Philippine Commissioner for the St. Louis Exposition.*

MANILA, October 18, 1902.

## EXHIBIT R.

---

### **THIRD ANNUAL REPORT OF THE PHILIPPINE CIVIL-SERVICE BOARD TO THE CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS AND THE UNITED STATES PHILIPPINE COMMISSION FOR THE YEAR ENDED SEPTEMBER 30, 1903.**

MANILA, P. I., *October 1, 1903.*

GENTLEMEN: In accordance with the provisions of section 7 of the civil-service act, the board has the honor to submit its third annual report, covering the period from October 1, 1902, to September 30, 1903.

#### EXAMINATIONS AND APPOINTMENTS.

The first table in the appendix, giving the results of all educational examinations held during the year covered by this report, shows a remarkable increase in the number of persons examined, the total being 5,216, only 533 less than the total number previously examined since the organization of the board. This large increase is due principally to the great number of Filipinos entering examinations, 3,526 being examined in Spanish, 102 more than during the preceding two years and 1,205 more than during the year ended September 30, 1902. The number of persons examined in English is 1,690, or 82 more than during the preceding year, many of those examined in English being Filipinos.

The number of persons obtaining eligible grades in examinations is noticeable. In Spanish 1,875 passed, compared with 1,531 during the preceding two years and 1,051 during the year ended September 30, 1902; in English 1,061 passed, 68 more than during the preceding year and 334 less than the preceding two years.

The total number of competitors taking educational examinations since the organization of the board is 10,965, of whom 5,862 passed; 4,015 of these were examined in English, 2,456 passing, and 6,950 in Spanish, 3,406 passing. Noneducational examinations are not included in the above summary.

As a result of examinations for original appointment held in the Philippine Islands, 837 English-speaking eligibles were appointed, 111 more than during the preceding year, and 885 Spanish-speaking eligibles, an increase of 217. Including those appointments made by promotion, reduction, transfer, or reinstatement, and as a result of examinations held in the United States, 3,841 appointments have been attested by the board during the year, as compared with 2,481 appointments during the preceding twelve months.

It is gratifying to note that the ratio of the number of Filipinos appointed to the number of Americans is gradually increasing. It has been difficult to induce many heads of bureaus to employ Filipinos freely, as persons selected from Spanish registers naturally require more instruction in American office methods than those selected from English registers. However, the success of the forestry bureau, the board of health, the weather bureau, and other bureaus, in employing Filipinos principally, and the difficulty in securing a satisfactory class of appointees from the United States, have aided in inducing many bureau chiefs to appoint Filipinos on trial. Some officials who were firmly of the opinion that Filipinos could not be used successfully in their bureaus are now strong advocates of their employment. Many of them appointed to minor positions a year or two ago have since been promoted to important clerkships and their original positions filled by other Filipinos selected from the registers of the board. There is thus a steady increase in the proportion of Filipinos employed in the classified service. The increased educational advantages now offered Filipinos will undoubtedly fit them for the performance of many of the duties required of Americans.

The amount of work involved in preparing the questions and rating the papers of the 5,216 persons examined during the year is greater than the figures indicate, as it was necessary to hold all of the principal examinations at least once a month and many of them, such as patrolman, prison guard, hospital attendant, and apprentice, twice a month in order to secure a sufficient number of eligibles to meet the needs of the service. This involved the preparation of an unusually large number of series of questions; moreover, nearly all examinations were given in both the English and the Spanish languages, necessitating an immense amount of translating. During the year 93 distinct kinds of examinations were held. This number does not include noneducational examinations.

#### AMENDMENTS TO THE CIVIL-SERVICE ACT.

On January 9, 1903, the commission passed Act 589, amending Act 5, the civil-service act. Many important changes were made by this amendment, the principal of which are as follows:

(a) The civil-service act is made applicable to all appointments of civilians in the bureaus and offices of the government of the Philippine Islands, subject to the limitations of the acts organizing such bureaus and offices, and with the provision that persons appointed by the civil governor, by and with the advice and consent of the Philippine Commission, and persons employed merely as laborers, shall not be included in the classified service unless otherwise specifically provided by law. Originally it was necessary to classify each new bureau created by an amendment to the civil-service act, and this classification was usually made some time after the creation of the bureau, the original force of officers and employees being selected without regard to the civil-service act and rules. Unclassified positions are now clearly defined.

(b) It is provided that the board shall determine whether promotion examinations shall be competitive or noncompetitive.

(c) Examinations are required to be held in all the provinces.

(d) The age limits for entrance into the classified service are required to be fixed by rule.

(e) Section 13, relating to frauds, is made more comprehensive.

(f) Punishment in the matter of political contributions is limited to the receiving officer or employee.

(g) On and after September 1, 1903, all appointments of teachers in Manila and of teachers of English in the Philippine Islands are required to be made in accordance with the provisions of the civil-service act and rules.

#### REVISION OF THE CIVIL-SERVICE RULES.

Immediately after the enactment of Act 589, the civil-service rules were revised by the board and certified to the civil governor, who approved them January 13, 1903.

Some of the changes introduced in the revision are as follows:

(a) It is declared to be the purpose of the appointing power to fill vacancies in the unclassified service by promotion whenever competent persons may be found in the service.

(b) The general age limits for entrance to civil-service examinations are fixed at 18 and 40 years, but provision is made that these limits may be extended for any examination whenever, in the discretion of the board, the needs of the service require it.

(c) It is provided that a person who originally entered the classified service without examination may not be reinstated after separation therefrom until he has passed the examination required for original entrance to the position to which reinstatement is proposed.

(d) All heads of bureaus and offices are required to keep a continuous and comparative efficiency record of their employees, open to the board's inspection, and to render efficiency reports to the board quarterly.

(e) Pending the adoption of competitive promotion regulations for any bureau, office, or branch of the service, no person is allowed to be promoted from one class to another until he shall have passed noncompetitively the examination prescribed for original appointment to the position to which promotion is proposed, and the increase in salary shall not take effect prior to the date of passing the examination.

(f) All appointments to classified positions, whether original, by promotion, reduction, transfer, or reinstatement, must be made upon a form prescribed by the board and forwarded to it for attestation and transmission to the civil governor or proper secretary of department for approval. This regulation acts as a check upon illegal appointments to classified positions.

(g) It is provided that no unclassified employee shall perform the duties of a classified position, and no classified employee shall, without the consent of the board, perform the duties of a position not contemplated by his entrance examination.

(h) Heads of bureaus or offices are required to report monthly to the board all absences of their employees from any cause whatever.

(i) The board is allowed, in its discretion, to restore to the register of eligibles for the remainder of the period of eligibility the name of an appointee who has been separated from the service during his term of probation without delinquency or misconduct.

#### THE MERIT SYSTEM APPLIED IN MAKING PROMOTIONS.

On the day following the approval of the revised rules by the civil governor the general regulations governing promotions by competitive examination and the regulations governing promotions in the uniformed police force of the city of Manila were prescribed by the board.

Since the submission of the last annual report a systematic method of keeping an efficiency record of employees has been devised, and a report of such record is required to be transmitted quarterly to the civil-service board. The data thus obtained, together with the service record kept by the board for each employee in the service, furnishes a basis upon which promotions may be made according to merit. The keeping of these records greatly stimulates employees to do the very best work of which they are capable.

In the appendix may be found the promotion regulations mentioned above, and an outline of the several forms used in keeping the efficiency record of employees.

#### AMENDMENT TO ACT 25 GOVERNING APPOINTMENTS AND REMOVALS.

The large increase in the number of original appointments, promotions, reductions, and removals requiring the approval of the civil governor under Act 25, as amended by Acts 301 and 329, led to a further amendment of this act on January 9, 1903 (Act 588), providing that appointments to and removals from positions in bureaus or offices under the executive control of the secretaries of departments shall be subject to the approval of the secretary of department exercising executive control over the bureau or office in which the appointment or removal is made, leaving appointments and removals in the other bureaus and offices in the Philippine civil service subject to the approval of the civil governor. By this amendment the civil governor is relieved of the burden of approving a large number of appointments and of reviewing the proceedings in a large number of cases of removals and reductions.

#### CONDITIONS OF THE APPOINTMENT OF PERSONS IN THE UNITED STATES TO THE PHILIPPINE SERVICE.

Prior to June 1, 1903, a person in the United States appointed to this service under the provisions of Act 80, as amended by Act 338, was furnished free ocean transportation to Manila, and immediately upon arrival in the Philippines was reimbursed for the amount expended by him for subsistence en route from place of embarkation, and paid half salary for the period consumed in making the ocean voyage to the Philippines. After the expiration of six months of satisfactory service the appointee was reimbursed for the expenses incurred by him in traveling from his residence in the United States to the place from which he embarked for Manila.

It was not an uncommon practice for persons appointed to this service under the provisions of Acts 80 and 224, to leave the service before the completion of the two years' service required of them. Some deserted immediately on arrival, after collecting the amount paid for half salary and subsistence on transport, and others left after having also received from the Government the payment for all expenses in connection with transportation and subsistence from place of residence in the United States to San Francisco, made at the expiration of six months' service.

With a view to discourage appointees from leaving before the expiration of the two years which they are required to serve under the conditions of their appointment, Act 643 was enacted, amending Acts 80 and 338 and repealing Act 224. By the provisions of Act 643 a person appointed in the United States to the Philippine civil service is required to sign a contract that he will remain in the service for at least two years. He may pay his own traveling expenses from place of residence to Manila, provided, that if any part of his traveling expenses is borne by the government of the Philippine Islands 10 per cent of his monthly salary shall be retained until the amount retained is equal to the amount borne by the government; it is further provided that the necessary traveling expenses from his residence in the

United States to Manila, paid by him, either originally or through deduction from his salary, shall be refunded at the expiration of two years' satisfactory service, and that the half salary allowed en route from place of embarkation to Manila shall be paid at the expiration of the same period of satisfactory service.

It is believed that this amendment will tend to prevent the violation of the agreement of two years' service under which appointments are made, and thereby aid in promoting stability in the service. However, should an appointee leave before the expiration of his contract, the Government will lose only a small amount, as half salary while en route to the islands will not have been paid to him and the part of his salary retained will be forfeited to the Government.

For reasons similar to those for which Act 643 was enacted, executive order 67 was promulgated by the civil governor on August 5, 1903, prohibiting disbursing officers from paying any salary to or upon the order of any employee appointed in the United States to a position in the Philippine civil service under the provisions of Acts 224 or 643 while such employee is enjoying accrued leave of absence which may have been granted to him prior to his having completed two years of service, until five days after return to duty.

Until recently it was customary to provide free transportation on United States Army transports to all appointees coming to the Philippine Islands, and to most employees returning therefrom, either permanently or on leave. As it became impossible to secure such transportation, Act 697 was enacted on March 23, 1903, providing for the transportation on commercial liners of employees and their families.

Executive order 75 provides a method of qualifying for reentrance into the service for persons who have left it in violation of law or contract. Any person desiring to qualify for reentrance to the Philippine civil service under the provisions of this order must first take the matter up with the civil service board.

#### SICK LEAVE.

In its last annual report the board stated that it was convinced that the sick-leave privilege was being abused, and that it had recommended the adoption of an executive order governing the granting of leaves of absence.

On November 11, 1902, section 3 of Act 80, allowing leave of absence on account of illness, was amended by Act 515 so as to provide that after the return to duty of an applicant for sick leave he shall establish by evidence to be prescribed in regulations adopted by order of the civil governor the fact that he was ill and unable to be on duty on account of illness, and that his claim is meritorious. The amendment also provides that each application for sick or accrued leave must first be submitted to the civil service board for its recommendation, and then be forwarded for final action to the civil governor or the secretary of the department in which the applicant is employed. Prior to this amendment both sick and accrued leave were granted by the head of the bureau or office in which the applicant was employed, and the law made no provision for a review of the decision by the civil governor or proper secretary of department. On December 1, 1902, executive order 112 was promulgated by the civil governor. A few months' experience clearly demonstrated that the conviction of the board was fully justified. As it was found difficult to induce physicians to submit fully the evidence contemplated by the provisions of executive order 112, a modification of the order was recommended. This recommendation met with the approval of the civil governor, and on March 1, 1903, executive order 4 was issued as a substitute for executive order 112. A full record of the name, nature, etiology, history, and description of the disease or disability from which the applicant for sick leave suffered is now obtained in each case. The results of the amendment to section 3 of Act 80 and executive orders 112 and 4 have amply justified their adoption. From December 1, 1902, the date on which executive order 112 was promulgated, to September 1, 1903, sick leave to the value of \$7,358.82, which otherwise would have been approved, was disallowed.

#### ACCRUED LEAVE.

Act 80 in its application to judges of the supreme court and courts of first instance was amended by Act 867, enacted September 5, 1903, by providing for two months' vacation every year (May and June) and three months' additional vacation every third year, all leave being on full salary. It is further provided, however, that during each vacation period 1 judge of the supreme court and 7 judges of the courts of first instance shall remain in the islands. The vacation of two months annually is not cumulative.

Act 448, amendatory of section 2 of Act 80, provides that in case an officer or

employee shall die while in the service having to his credit earned leave of absence the salary that would have accrued to the deceased by reason of such leave of absence and during the period thereof shall be paid to his estate.

#### HOURS OF LABOR AND OVERTIME WORK.

By the enactment of Act 724, amendatory of section 1 of Act 80, provision is made that during the heated term, from the 1st of April to the 15th of June in each year, the heads of departments, bureaus, or offices in the Philippine civil service shall have discretion to reduce to five hours the number of hours of labor required each day.

On March 9, 1903, the board was directed by the executive bureau to make an investigation into the observance by the various bureaus and offices in Manila of the provisions of Acts 80 and 338, relating to daily hours of labor and overtime work. It was found that no uniformity exists, either in the number of hours of daily labor required or the hours during which offices are open for the transaction of public business. The average number of required hours of daily labor in the several bureaus and offices for the period from January 1 to May 31, 1903, was found to vary from five and one-fourth hours to six and three-fifths hours, and there was a greater variation in the overtime, the offices with the shortest required hours generally having the smallest amount of overtime. At present some offices have only one session for the day, from 7 or 8 a. m. to 1, 2, or 3 p. m., but the majority have two sessions daily, from 8 a. m. to 12 m., and from 2 or 3 to 5 p. m. The board has recommended to the special committee of the Philippine Commission on the matter of leaves of absence, which is considering the advisability of revising Act 80, that the hours of all bureaus and offices in Manila be made uniform wherever practicable.

#### EXTENSIONS OF THE CLASSIFIED CIVIL SERVICE.

Act 589 provided that on and after September 1, 1903, all appointments to the position of teacher in the city of Manila and to the position of teacher of English in the Philippine Islands shall be made from registers of eligibles obtained as a result of competitive civil-service examinations.

Large numbers of special emergency positions were provided for the board of health at the time of the cholera epidemic, and numerous emergency positions have also been provided at various times for the bureau of the insular purchasing agent and the office of the city assessor and collector of Manila. All of these emergency positions have now been abolished by the Philippine Commission, and the necessary permanent increase of force in the offices mentioned has been provided. Every effort was made to have the emergency employees classified without examination or on noncompetitive examination, and, failing in this, to have waived the age limits barring many of them from competitive examinations, but these efforts were unsuccessful, and the permanent positions authorized have been filled by certification according to the civil-service rules from appropriate registers of the board. This is in marked contrast to the practice in the United States, where temporary employees appointed for an emergency are usually retained after the emergency for which they were appointed has passed and incorporated into the classified civil service without examination.

With the requirement that teachers shall be appointed as a result of examination, the provision of regular instead of unclassified emergency positions, and the application of the civil-service law and rules to all of the provincial governments, nearly the entire Philippine civil service is classified. It is believed that it will be advantageous to the service to reduce the number of official positions excepted by section 20 of Act 5. The board recommends that during the coming year as many as possible of these positions be transferred to section 21. This will add to the attractiveness of the classified service by increasing the opportunities therein for promotion to responsible positions.

#### UNITED STATES CIVIL-SERVICE POSITIONS IN THE PHILIPPINE ISLANDS.

On April 9, 1903, the War Department requested the civil governor to direct the civil-service board to hold examinations and make certifications to the commanding general of the Division of the Philippines for filling vacancies in civilian positions under the War Department above the grade of mere laborer. Since that date appointments have been made by certification from the registers of the board. Owing to the dearth of stenographers and typewriters it has been necessary to authorize many emergency appointments to these positions. The commanding general of the Division

of the Philippines and this board recommended that skilled workmen be excepted from examination for the present, as on account of their scarcity in the Philippines it is impossible to apply the United States civil-service rule requiring United States citizenship and satisfactory and prescribed periods of apprenticeship for eligibility to appointment to such positions. Under date of August 14, 1903, the United States Civil Service Commission advised the Secretary of War that it would "frame its recommendation to the President so as not to include skilled workmen within the classified competitive service."

The classification of civilian clerical positions in the Philippine Islands under the War Department has added considerably to the duties devolving upon the board, but it is believed that this classification will be of great benefit to the Federal civil service and indirectly to this service.

#### TRANSFERS TO THE UNITED STATES CIVIL SERVICE.

The advisability of an amendment to the United States civil-service rules allowing transfers from this service to the Federal service was suggested by this board as early as December 24, 1901, on which date a communication bearing upon this subject was addressed to the United States Civil Service Commission. It was stated therein that one of the objects of such an amendment would be to secure greater stability in the Philippine civil service by inducing appointees to remain in the islands one or two years longer than they otherwise would, in order to attain eligibility for transfer to the United States. On March 20, 1903, the President approved an amendment to the United States civil-service rules allowing the transfer to the Federal civil service of an officer or employee who has served in a competitive position in the Philippine civil service for a period of three years or more. For the purpose of securing the fullest benefit to this service from the transfer privilege the civil governor provided in an amendment to Rule VIII of the Philippine civil-service rules, dated May 24, 1903, that the three years' service required shall not include leave allowed for the purpose of visiting the United States prior to transfer. This requirement is modified by providing that if an employee does visit the United States during his first three years' service, only one additional year of service shall be required. These provisions secure to the Philippine civil service the benefits contemplated by the general rule of the President.

#### TRANSFERS WITHIN THE PHILIPPINE CIVIL SERVICE.

Owing to the abuse of the transfer privilege, executive order 50 was promulgated by the civil governor July 7, 1903, providing that no chief of a bureau or office shall, directly or indirectly, invite, solicit, or even discuss with an employee of another bureau or office his transfer to the bureau or office of such chief until the consent in writing of the head of the bureau or office in which the person whose transfer is desired is employed or of the civil governor is first obtained.

#### APPOINTMENTS IN THE UNITED STATES.

During the year ended September 30, 1903, 179 persons were appointed to the Philippine classified civil service as a result of examinations held in the United States or by transfer from the Federal civil service.

In requesting the appointment of eligibles in the United States, the board has continued its practice of anticipating the needs of the Philippine civil service as much as possible in order to avoid the embarrassment that would result by not sending for eligibles until vacancies have actually occurred to which they could be assigned upon arrival. The special code prepared by the board for use in cabling for eligibles was revised in February and made more comprehensive.

#### PROVINCIAL CIVIL SERVICE.

From its organization the board has been allowed a liberal appropriation for traveling expenses, but its limited office force has not permitted sending out examiners into the provinces during the period covered by this report. In more than one instance the detection of collusion in provincial examinations has been followed by the indictment and conviction of members of provincial examining committees for misappropriation of funds or other violation of law.

Satisfactory registers of eligibles have been obtained in most of the provinces. The statistics in the appendix show an increase of 454 over the previous year in the number of persons entering provincial examinations, and of 321 in the number passing them.

During the year the board appointed as an additional member of the examining committee in each province a teacher of English, located at the capital. Teachers as members of examining committees are able to render valuable assistance not only in conducting examinations but also in encouraging Filipinos to enter them.

#### OBSERVANCE OF THE CIVIL-SERVICE ACT AND RULES.

The board notes with pleasure the continued growth in the willing observance by the heads of bureaus and offices of the provisions of the civil-service act and rules. Only by the full support of all concerned can the merit system be faithfully carried out, and the board is glad to state that whatever tendency there was among heads of bureaus and offices to evade the application of the civil-service act and rules, especially in the matter of promotion examinations, has now almost entirely passed away, and throughout the service it has the cooperation of practically all of the officers of the Government in its effort to maintain an efficient and honest civil service. In this connection the board desires to state that while it has been taxed to its utmost limit in the performance of the duties devolving upon it, its labors have been lightened by the uniform encouragement given by the Philippine Commission and the civil governor through practical and effective legislation and executive orders adopted from time to time for the betterment of the service. The legislation and executive action affecting the civil service reviewed in this report show the amount of attention devoted to them during the year to this feature of their administration.

#### PROSECUTIONS FOR FALSIFICATION OF APPLICATIONS.

Several cases of falsification of civil-service applications have been discovered during the year. The American applicants whose prosecution has been requested have usually given assumed names, knowing that they would be barred from the service if their true names were given, or have concealed former convictions of crime for the same reason. The Filipino offenders have usually forged the signatures of prominent persons to the vouchers on their applications. All cases of falsification of a nature serious enough for prosecution and in which the board was in possession of positive evidence of guilt have been referred to the prosecuting attorney of Manila. Thus far six have been tried, all being convicted, the sentences ranging from six months' to six years' imprisonment, in addition to fines in some cases. Sentence was suspended in one case on account of the youth of the offender.

#### REMOVALS OF OFFICIALS FOR CAUSE.

Of the entire number of persons occupying official positions since the establishment of civil government in the islands, the records of the board show that 39 have been removed for cause. Of this number only 5 entered the service through examination and certification by the civil-service board; the remainder entered without examination and certification by the board, some prior to the passage of the civil-service act, others by detail from the military service as provided by law, and others by appointment to unclassified positions.

#### DISTINCTIVE DUTIES OF THE BOARD.

Act 25 as amended, executive order 84, and civil service rule X; executive order 21 and civil service rule XI, and Act 80 and executive order 4, confer certain powers and duties upon the Philippine civil-service board which are not conferred upon the United States Civil Service Commission.

All appointments to classified positions are required to be made on a form prescribed by the board, and the board's attestation is required in each case before the civil governor or secretary of department will approve the appointment, and before the disbursing officer will pay any salary. The papers in all cases of reduction, removal, and enforced resignation are required to be submitted to the board for recommendation before transmission to the civil governor or secretary of department for final action. The board is required to keep a record of all unclassified as well as classified employees in the Philippine civil service, showing, among other things, date of appointment, original position and salary, place of employment, all changes in status and grade, and all accrued and sick leave granted. From its service records the board is required to compile annually, for publication on January 1, a roster of the officers and employees under the Philippine government. Applications from employees, classified and unclassified, for accrued and sick leave for more than two days, must be made on forms prescribed by the board and forwarded to it for verification of service record and previous leave granted and for recommendation before

final action is taken by the civil governor or secretary of department. This method tends to secure uniformity in the granting of leaves for the entire service and to prevent the granting of excessive accrued leave or of sick leave without proper evidence of illness.

It is seen that in many respects the board is required to perform the duties of an appointment and record bureau for the entire service in addition to those pertaining to the examining feature of its work.

#### INCREASED WORK OF THE BOARD.

The increase in the number of persons examined and the kinds of examinations held, the necessity for frequent examinations to obtain sufficient eligibles for certain classes of positions, the classification of civilian positions in the Philippines under the War Department, and the additional duties imposed upon the board by executive orders, have greatly increased the work of the board. An addition to its office force was allowed by the Commission in the appropriation bill covering the first half of the fiscal year beginning July 1, 1903. A liberal appropriation was also made for the purchase of office furniture and equipment, and the board is now able to seat in its examination rooms at one time, 200 competitors. This is very convenient as well as economical as heretofore it has been necessary to secure additional quarters for all large examinations.

#### CORRESPONDENCE.

During the year covered by this report the board has prepared 12,200 typewritten communications in the form of letters or indorsements, and, in addition, a mass of information has been sent out through circular letters and forms requiring considerable work in preparation. Many of the board's communications were prepared only after personal interviews and conferences with heads of bureaus or offices.

#### PUBLICATIONS.

The manual of information relative to the Philippine civil service was revised and enlarged during the year, 10,000 copies being published in English and the same number in Spanish. In addition to full information relative to applications, examinations, certifications, appointments, etc., it also contains the text of the revised civil-service rules, together with the principal acts of the Commission (exclusive of the civil-service act) and executive orders of the civil governor relating to the Philippine civil service, the object being to make the manual comprehensive in its information to applicants for examination with a view to appointment under the Philippine government. For the benefit of applicants in the United States information is given relative to climate, cost of living, etc., in the Philippine Islands.

Three thousand copies of the second annual report of the board, covering the year ended September 30, 1902, were also published. The appendix to the report contains the civil-service act as amended, all other acts and all executive orders relating to the Philippine civil service, the revised civil service-rules, the promotion regulations adopted by the board, and a brief description of the forms prescribed by the board for the use of officers, employees, and applicants. It also contains a review, The Philippine Civil Service and Merit System, and a table showing the distribution of Americans and Filipinos among the various bureaus and offices of the Government, and the compensation paid.

The Official Register of Officers and Employees in the Philippine Civil Service was revised to January 1, 1903, and published in accordance with the provisions of Executive Order 21, series of 1901.

Two thousand five hundred copies of the manual, 1,100 copies of the second annual report, and 100 copies of the official register were forwarded to Washington for distribution; in addition, a copy of the manual and of the second annual report was sent to each of the leading educational institutions and libraries in the United States.

#### PERSONNEL OF THE BOARD.

Under the provisions of section 1 of Act 5, the chairman of the board was, on January 2, 1903, designated by the civil governor as chief examiner also. On April 13, 1903, he was granted leave of absence for the purpose of visiting the United States; upon his departure Examiners Bolivar L. Falconer and John E. Enright were designated by the civil governor as acting chairman, and acting secretary, respectively, and on July 1, the acting chairman was appointed a member of the board. On August 31 Señor Don Felipe Buencamino resigned his position as member of the

board to reenter the practice of law, having been a member since July 1, 1901. Señor Buencamino was of great service in convincing the Filipinos of the impartiality and fairness of the operation of the civil-service law and inducing large numbers of them to enter examinations. On September 1 Dr. José E. Alemany, member of the advisory board of the city of Manila, was appointed to succeed Señor Buencamino.

Very respectfully,

WM. S. WASHBURN,  
B. L. FALCONER,  
J. E. ALEMANY,  
*Members of the Board.*

The CIVIL GOVERNOR OF THE PHILIPPINE ISLANDS.  
The UNITED STATES PHILIPPINE COMMISSION.

APPENDIX.

*Statement of expenses of the Philippine civil-service board.*

	Sept. 20, 1900, to June 30, 1901.	July 1, 1901, to June 30, 1902.	July 1, 1902, to June 30, 1903.
Salaries.....	\$9,481.54	\$25,886.65	\$28,008.64
Transportation.....	960.50	287.86	45.22
Contingent expenses.....	<sup>a</sup> 211.91	<sup>b</sup> 4,608.75	<sup>c</sup> 1,791.51
Total .....	10,603.95	30,783.26	29,845.37

<sup>a</sup> Not including contingent expenses paid from the general insular contingent fund.

<sup>b</sup> Including printing.

<sup>c</sup> Not including printing, which is now done by the bureau of public printing.

[ACT No. 5.]

AN ACT for the establishment and maintenance of an efficient and honest civil service in the Philippine Islands.

*By authority of the President of the United States, be it enacted by the United States Philippine Commission, that:*

SECTION 1. The Commission shall appoint three persons to be members of a board to be called the Philippine Civil Service Board. The Commission shall designate one of such persons as chairman, and another as secretary, and may in its discretion designate from among the members of the board a chief examiner.

SEC. 2. No person shall be eligible for appointment as a member of the board unless he shall be a native of the Philippine Islands owing and acknowledging allegiance to the United States, or a citizen of the United States.

SEC. 3. Each member of the board shall during his incumbency reside in Manila, and shall receive an annual salary of three thousand five hundred dollars and his necessary traveling expenses while in the discharge of his official duties. In case the Commission shall designate a member of the board to act as chief examiner he shall receive in addition to his salary as a member of the board a further annual compensation of five hundred dollars.

SEC. 4. The board shall prepare rules adapted to carry out the purpose of this act, which is hereby declared to be the establishment and maintenance of an efficient and honest civil service in all the executive branches of the government of the Philippine Islands, central, departmental, and provincial, and of the city of Manila, by appointments and promotions according to merit and by competitive examinations where the same are practicable, and it shall be the duty of all officers in the Philippine civil service, in the departments and offices to which any such rules may relate, to aid, in all proper ways, in carrying said rules, and any modifications thereof, into effect.

SEC. 5. This act shall apply, except as hereinafter expressly provided, to all appointments of civilians in the bureaus and offices of the Government of the Philippine Islands, subject, however, to the provisions and limitations of the acts organizing such bureaus: *Provided*, That persons appointed by the civil governor, by and with the advice and consent of the Philippine Commission, and persons employed merely as laborers, shall not be included in the classified service unless otherwise specifically provided by law.

SEC. 6. The rules to be prepared and certified by the board shall provide:

- (a) For the classification of all offices and employments included in section 5.
- (b) For the appointment to those offices requiring technical, professional, or scientific knowledge, by competitive or noncompetitive examinations, as the board shall determine.
- (c) For the selection of members of the police force and of the fire department in the city of Manila, and of guards at prisons and penitentiaries by competitive or noncompetitive examination, or otherwise, as the board, after consultation with the military governor and his approval, shall determine.
- (d) For the selection of skilled workmen by such examinations, competitive or noncompetitive, as may be practicable, and which need not, if the board shall so limit them, relate to more than the capacity of the applicants to labor, their habits of industry and sobriety, and their honesty.
- (e) For competitive or noncompetitive promotion examinations, as the board shall determine. In the competition the board may provide, in its discretion for the allowance of credit to the previous experience and efficiency of the applicant in the civil service of the islands, to be estimated by the officer or officers under whose direction the service has been rendered, under such limitations as the board may prescribe: *Provided*, That such credit shall not be allowed to any applicant who shall not obtain a minimum average per centum to be fixed by the board.
- (f) For a period of probation before the appointment or employment is made permanent.
- (g) For the preparation and holding in Manila and in the provinces of open competitive examinations of a practical character for testing the fitness of applicants for appointment to the classified service, and for the preparation and the holding of examinations in the United States under the auspices of the United States Civil Service Commission.
- (h) For selection, according to average percentage, from among those certified by the board as rated highest in such competition.
- (i) For transfers under limitations to be fixed by the rules from one branch of the classified service to another, or from the Federal classified civil service of the United States to the classified service of the Philippine Islands.
- (j) For reinstatements in the service under limitations to be fixed by the rules.
- (k) For the examination in the Spanish language of all applicants who are citizens of the United States and in the English language of all applicants who are natives of the Philippine Islands, whenever, in the opinion of the board, knowledge of both languages is essential to an efficient discharge of the duties of the positions sought.
- (l) For the holding of noncompetitive examinations when applicants fail to compete after due notice has been given of an open competitive examination to fill an existing vacancy.
- (m) For a thorough physical examination by a competent physician of every applicant for examination in the United States, and in the discretion of the board in the Philippine Islands, and for rejection of every such applicant found to be physically disqualified for efficient service in the Philippine Islands.
- (n) For fixing age limits of applicants for entrance into the classified service.
- (o) For eliciting from all applicants for examination full information as to their citizenship, nativity, age, education, physical qualifications, and such other information as may reasonably be required affecting their fitness for the service which they seek to enter.
- (p) For the employment of clerks and other employees for temporary service where it is impracticable to make appointments as provided in this act, for terms not exceeding ninety days, but no person shall be employed under this exception for more than ninety days in a year.
- (q) The enumeration herein of the subjects to be covered by the rules of the board shall not be regarded as exclusive, but the board shall have power to prepare and submit to the civil governor for his approval any rules not in violation of the limitations of the act, which will more efficiently secure the enforcement of the act.

SEC. 7. The board shall keep minutes of its own proceedings, and on or before the first day of January of each year shall make an annual report to the civil governor and to the commission showing its proceedings, the rules which it has adopted, the practical effect thereof, and suggestions for carrying out more effectually the purpose of this act.

SEC. 8. The board shall supervise the preparation and rating and have control of all examinations in the Philippine Islands under this act. The board may designate a suitable number of persons in the Philippine civil service to conduct its examinations and to serve as members of examining committees, and when examiners with special, technical, or professional qualifications are required for the preparation or

rating of examination papers it may designate competent persons in the service for such special duty, after consultation with the proper officer, or officers, under whom they are serving. The duties required of such persons as members of examining committees, or as special examiners, shall be considered as part of their official duties and shall be performed without extra compensation. When persons can not be found in the Philippine service with the necessary qualifications for special examining work that may be required, the board is authorized to employ at a reasonable compensation persons not in public employment for such work, which compensation shall be paid out of the general funds appropriated for the purposes of the board, on its order.

SEC. 9. The board may make investigations and report upon all matters relating to the enforcement of this act and the rules adopted hereunder, and in making such investigations the board and its duly authorized examiners are empowered to administer oaths, to summon witnesses, and to require the production of official books and records which may be relevant to such investigation.

SEC. 10. The board shall have a permanent office in the city of Manila. When examinations are to be held by the board, either in Manila or in the provinces, officers having the custody of public buildings shall allow their reasonable use for the purpose of holding such examinations.

SEC. 11. The head of each office to which this act applies shall notify the board in writing without delay of all appointments, permanent, temporary, or probational, made in the classified service in his office, of all rejections after the period of probation, and of all transfers, promotions, reductions, resignations, or vacancies from any cause in said service and of the date thereof; and a record of the same shall be kept by the board.

SEC. 12. When the board shall find that any person is holding a position in the civil service in violation of the provisions of this act or the rules of the board, it shall certify information of the fact to the disbursing and auditing officers through whom the payment of the salary or wages of such position is by law required to be made, and if thereafter the disbursing or auditing officer shall pay, or permit to be paid, to the person such salary or wages, the payment shall be illegal, the disbursing officer shall not receive credit for the same, and the auditing officer who authorizes the payment shall be liable on his official bond for the loss resulting to the proper government.

SEC. 13. Any person in the Philippine civil service who shall willfully or corruptly, by himself or in coöperation with one or more persons, defeat, deceive, or obstruct any person in the matter of his right of examination by said board; or who shall willfully, corruptly, and falsely rate, grade, estimate, or report upon the examination or standing of any person examined hereunder; or aid in so doing; or who shall willfully and corruptly make any false representations relative thereto or concerning the person examined; or who shall willfully and corruptly furnish any special or secret information for the purpose of improving or injuring the prospects or chances of any person so examined, or to be examined, of being employed, appointed, or promoted, shall for each such offense be punished by a fine not exceeding one thousand dollars, or by imprisonment for a period not exceeding one year, or by both such fine and imprisonment.

SEC. 14. Any person who shall willfully and corruptly become the beneficiary of an act in violation of the last preceding section shall be punished as provided in that section.

SEC. 15. No inquiry shall be made, and no consideration whatever shall be given to any information, relative to the political or religious opinions or affiliations of persons examined, or to be examined, for entrance into the service, or of officers or employees in the matter of promotion: *Provided, however,* That disloyalty to the United States of America as the supreme authority in these islands shall be a complete disqualification for holding office in the Philippine civil service: *And provided further,* That no person shall be eligible for examination or appointment under the provisions of this act, who shall be, on or after the first day of May, nineteen hundred and one, in arms against the authority of the United States in the Philippine Islands, or who shall thereafter give aid or comfort to the enemies of the United States so in arms; this provision shall not apply to those persons who are in arms against the authority and sovereignty of the United States in the Philippine Islands, or their aiders or abettors, prior to July fourth, nineteen hundred and two, who came within the provisions of the proclamation of amnesty of the President of the United States issued upon said date, and who have complied with the terms of said proclamation.

SEC. 16. Every applicant for admission to the Philippine civil service shall, before being admitted to examination in the islands, take and subscribe the following oath before a justice of the peace in and for the province in which he is, or before a member of the civil-service board, the members of which are authorized to administer the same:

## "OATH OF APPLICANT.

"I, \_\_\_\_\_, having applied for admission to the civil service of the Philippine Islands, do solemnly swear (or affirm) that I recognize and accept the supreme authority of the United States of America in these islands and will maintain true faith and allegiance thereto; that I will obey the laws, legal orders, and decrees promulgated by its duly constituted authorities; that I impose upon myself this obligation voluntarily, without mental reservation or purpose of evasion. So help me God. (The last four words to be stricken out in case of affirmation.)

"(Signature) \_\_\_\_\_.

"Subscribed and sworn to (or affirmed) before me this \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_, 19\_\_\_\_."

The oath of the applicant shall be filed with the secretary of the board.

SEC. 17. No officer or employee in the Philippine civil service shall, directly or indirectly, give or hand over to any other officer or employee in said service any money or other valuable thing to be applied to the promotion of any political object whatever, and a violation of this section by the receiving officer or employee shall subject the violator to a penalty of not exceeding five hundred dollars or to imprisonment not exceeding six months, or both, and upon conviction he shall be removed from office.

SEC. 18. No person in the Philippine civil service shall be under obligation to contribute to a political fund or to render a political service, or be removed or otherwise prejudiced for refusing to do so. Any person soliciting political contributions from public officers or employees shall be subject to the same penalties as those provided in the preceding section.

SEC. 19. In the appointment of officers and employees under the provisions of this act the appointing officer in his selection from the list of eligibles to be furnished him by the board shall, where other qualifications are equal, prefer:

First. Natives of the Philippine Islands.

Second. All honorably discharged soldiers, sailors, and marines of the United States.

SEC. 20. The requirements of this act for entrance into the civil service, or for promotion by examination, shall not apply to the selection of the following officers and employees:

## ALL DEPARTMENTS AND OFFICES.

1. One private secretary to each member of the Philippine Commission, except the president.

2. Persons appointed by the civil governor, by and with the advice and consent of the Philippine Commission, unless otherwise specifically provided by law.

3. Any person in the military or naval service of the United States who may be detailed for the performance of civil duties.

4. Persons employed merely as laborers.

## EXECUTIVE OFFICE.

5. One private secretary to the civil governor.

## DEPARTMENT OF THE INTERIOR.

6. The members of the board of health for the Philippine Islands.

7. The presidents of provincial boards of health.

8. The director of the agricultural college and experiment station.

9. The director, the three assistants, and the secretary of the weather bureau.

10. The chief of the ethnological survey for the Philippine Islands.

11. The superintendent and directors of government laboratories.

12. The attending physician and surgeon of the Philippine Civil Hospital.

## DEPARTMENT OF COMMERCE AND POLICE.

13. Postmasters compensated on a percentage basis as provided by law.

14. Postmasters receiving not more than three hundred dollars per annum compensation for their personal salaries, who may lawfully perform the duties of postmaster in connection with the official duties with which they are charged if they be government employees, or if not government employees, in connection with their private business, such duties requiring only a portion of their time.

15. The consulting engineer to the commission.

16. The officer in charge of the improvement of the port of Manila.
17. Detectives.
18. Any position in the department of commerce and police the duties of which are of a quasi-military or quasi-naval character, and for the performance of which duties a person is commissioned or enlisted for a term of years.

## DEPARTMENT OF FINANCE AND JUSTICE.

19. Judges and justices of the peace.
20. The attorney-general and his assistant lawyers.
21. The solicitor-general.
22. The assistant attorney-general.
23. The supervisor and deputy supervisor of provincial fiscals.
24. Provincial fiscals.
25. The auditor for the Philippine Islands.
26. The deputy auditor for the Philippine Islands.
27. The treasurer of the Philippine Islands.
28. The cashier of the treasurer of the Philippine Islands.
29. The superintendent of the insular cold-storage and ice plant.
30. Secret agents.
31. Customs inspectors in the provinces whose rates of compensation do not exceed one hundred and eighty dollars per annum, who may lawfully perform the duties of customs inspectors in connection with the official duties with which they are charged, if they be government employees, or if not government employees, in connection with their private business, such duties requiring only a portion of their time.

## THE CITY OF MANILA.

32. The members of the municipal board.
  33. The city engineer.
  34. The city attorney and his assistant attorney.
  35. The prosecuting attorney and his assistant attorneys.
  36. The sheriff and his deputies.
- SEC. 21. The requirements of this act for entrance into the civil service, or for promotion by examination, shall not apply to the selection of the following officers:

## THE EXECUTIVE OFFICE.

1. The executive secretary.
2. The members of the civil-service board.
3. The insular purchasing agent.

## THE PHILIPPINE COMMISSION.

4. The secretary of the Philippine Commission.

## DEPARTMENT OF THE INTERIOR.

5. The chief of the forestry bureau.
6. The chief of the mining bureau.
7. The chief of the bureau of agriculture.
8. The chief of the bureau of public lands.

## DEPARTMENT OF COMMERCE AND POLICE.

9. The chief of coast guard and transportation.
10. The captain of the port of Manila.
11. The director of posts.
12. The assistant director of posts.
13. The postmaster at Manila.
14. The chief of Philippines Constabulary.

## DEPARTMENT OF FINANCE AND JUSTICE.

15. The collector of customs for the Philippine Islands.
16. The deputy collector of customs for the Philippine Islands.
17. The surveyor of customs for the Philippine Islands.
18. The cashier of the collector of customs for the Philippine Islands.

19. The collector of customs at Iloilo.
20. The collector of customs at Cebu.
21. The collector of internal revenue for the islands.

## DEPARTMENT OF PUBLIC INSTRUCTION.

22. The general superintendent of education.
23. The chief of the bureau of public printing.
24. The chief statistician.
25. The chief of the bureau of archives.
26. The chief of the bureau of architecture.

## CITY OF MANILA.

27. The chief of the fire department.
28. The city assessor and collector.
29. The chief of police.
30. The chief or head of any bureau hereafter organized, unless otherwise expressly provided by law.

But vacancies occurring in all the foregoing positions shall be filled from a class to be composed of the first, second, and third assistants in all the foregoing offices or bureaus: *Provided*, That competent persons may be found in the service who are available and possess the qualifications required, the intention of this provision being that the appointing power may, by virtue hereof, transfer from one office to another a person deemed competent to fill the vacancy. In case there are not two or more assistants, designated as such by law, in the office in which a vacancy occurs, the civil-service board may, in its discretion, include in such eligible list one or more of the subordinates in such office ranking next to the head thereof.

SEC. 22. The persons now employed in the civil service of the Philippine Islands whose positions may be classified by the operation of this act and the rules herein provided for shall, unless dismissed by proper authority, continue in the service and discharge the duties assigned them: *Provided*, That the board may, in its discretion, require by rule that all such employees shall pass examinations practically adapted to show their fitness to fill the positions now held by them and that in case of failure to pass such examinations to the satisfaction of the board they shall be dismissed from the service.

SEC. 23. This act shall not apply to the selection of school teachers of the department of public instruction until September first, nineteen hundred and three, on and after which date all appointments in the city of Manila to the position of teacher and in the Philippine Islands to the position of teacher of English shall be made in accordance with the provisions of the civil-service act and rules.

SEC. 24. The rules to be prepared and certified by the board shall not take effect until approved by the civil governor, when they shall be promulgated by his executive order.

SEC. 25. After the passage of this act no civilian shall be employed in the offices specified in section five of this act except in accordance with its terms: *Provided*, That between the time of its passage and the date when the board herein created shall officially inform the military governor and the commission that it is ready to certify a list of persons eligible to appointment under the provisions of this act for any vacancy occurring, appointments for temporary service may be made to fill vacancies or newly created offices to continue until such certification is made and such vacancies can be regularly filled, under the requirements of this act and the rules of the board adopted in accordance herewith. Persons so temporarily appointed may compete in the examinations held for regular entrance to the classified service.

SEC. 26. In this act whenever a sum of money is mentioned it shall be understood to refer to the money of the United States.

SEC. 27. Upon the passage of this act and the appointment and organization of the board, it shall be the duty of the head of each office to which this act applies upon application by the board to certify to the board a complete list of all the officers and employees engaged therein, together with a full statement of the duties performed by them and the compensation received by them.

SEC. 28. No applicants shall be admitted to the competitive examinations to be held under this act who are not either:

- (a) Citizens of the United States, or
- (b) Natives of the Philippine Islands, or
- (c) Persons who have, under and by virtue of the treaty of Paris, acquired the political rights of natives of the islands, or

(d) Persons who have taken the oath of allegiance to the United States and served as members of the Army or Navy of the United States, and been honorably discharged therefrom.

SEC. 29. This act shall take effect on its passage, and shall be referred to as the "civil-service act."

Enacted, September 19, 1900.

---

[No. 25.]

AN ACT providing for the appointment and removal of subordinate officers and employees in certain departments and bureaus of the government of the Philippine Islands.

*By authority of the President of the United States, be it enacted by the United States Philippine Commission, that:*

SECTION 1. All appointments to and removals from subordinate positions in the Philippine civil service in offices or bureaus under the executive control of the secretaries of departments shall be made by the heads of offices or bureaus subject to the approval of the secretary of the department who exercises executive control over the office or bureau in which the appointment or removal is made; appointments to and removals from subordinate positions in all other offices or bureaus in the civil service of the insular government shall be made subject to the approval of the civil governor: *Provided*, That heads of offices and bureaus may employ and discharge unskilled laborers whose employment is authorized by law without the approval of the secretaries of departments or of the civil governor. In case there is no head or acting head of any such office or bureau, or other office or bureau established by law, at the time when appointments to or removals from subordinate positions therein become necessary, such appointments and removals may be made by the secretary of the department under which the office or bureau is established, who shall have direct charge and supervision of such office or bureau, and who, or a person assigned by him for the purpose, shall have authority to make estimates for appropriation, requisitions on the treasurer for money appropriated, and to approve all vouchers for payment.

SEC. 2. [Section two of act numbered twenty-five is repealed by act numbered five hundred and eighty-eight.]

SEC. 3. Nothing herein shall be construed to take any of the appointments to be made to positions described in section one out of the provisions of the civil-service act, or to prevent the Commission from revoking action taken under section one, or making appointments to such positions, or from making removals therefrom of its own motion under the general powers conferred upon it by the instructions of the President of the United States.

SEC. 4. This act shall take effect on its passage.

Enacted October 17, 1900.

---

[No. 80.]

AN ACT regulating the hours of labor, leaves of absence, and transportation of appointees under the Philippine civil service.

*By authority of the President of the United States, be it enacted by the United States Philippine Commission, that:*

SECTION 1. It shall be the duty of the heads of departments, bureaus, or offices in the Philippine civil service to require of all employees, of whatever grade or class, not less than six hours of labor each day, not including time for lunch and exclusive of Sundays, and of Saturdays after the hours of half past twelve postmeridian, and of days declared public holidays by law or executive order, but the head of any department, bureau, or office may, in the interest of the public service, extend the daily hours of labor herein specified for any or all of the employees in his office, and in case of such extension it shall be without additional compensation: *Provided, however*, That during the heated term from the first day of April to the fifteenth day of June in each year the heads of departments, bureaus, or offices in the Philippine civil service shall have discretion to reduce the required number of hours of labor each day, not including Saturdays, Sundays, and holidays, to five hours. This provision shall not oblige the head of a department, bureau, or office in the Philippine civil service to reduce the hours of labor to five hours, but it shall be within his discretion to reduce the number of hours if consistent with the needs of the public service; nor shall this provision be regarded as conferring a right upon officers or employees. This reduction of the required hours of labor shall not apply to the officers or

employees of any department, bureau, or office to whom an overtime wage is allowed and paid. The head of any department, bureau, or office, the work of which is of such a nature as to require the constant presence of one or more employees, may detail the necessary number of employees to perform labor on Sundays, Saturday afternoons, or public holidays, but shall exempt employees so detailed from labor on other days so that the total labor which is required of each employee so detailed during each quarter shall not be in excess of that required of other employees in such department, bureau, or office not so detailed. In cases of special emergency the head of any department, bureau, or office may also detail the necessary number of employees to perform labor on Sundays, Saturday afternoons, or public holidays under the restrictions above provided.

SEC. 2. The head of any department or office may grant leave of absence with pay during a calendar year to each employee, exclusive of Sundays and days declared public holidays by law or executive order, in accordance with the following schedule: An employee receiving an annual salary of less than six hundred dollars shall be granted fifteen days' leave; an employee receiving an annual salary of six hundred dollars or more, but less than one thousand dollars, shall be granted twenty days' leave; an employee receiving an annual salary of one thousand dollars or more, but less than eighteen hundred dollars, shall be granted thirty days' leave; an employee receiving an annual salary of eighteen hundred dollars or more shall be granted thirty-five days' leave. If an employee elects in any one year to postpone any or all of the leave to which he is entitled under this section, such leave shall accumulate, and in case he is granted leave for the purpose of visiting the United States he shall be allowed, with half pay, in addition to his leave, the actual and necessary time occupied by him in going to and returning from San Francisco: *Provided*, That such leave to visit the United States under these conditions shall not be granted to any employee more than once in three years, or to any employee who has not accumulated to his credit leave allowed for two full years. The provisions of this section shall be retroactive in effect so as to entitle employees of the civil service in the Philippine Islands, whether serving as such by regular appointment or by detail from the Army or Navy of the United States, previous to this act, to any accumulated leave to which they would have been entitled had this act been in effect at the date of their employment or detail.

The provisions of this section shall also be applicable to all heads of bureaus and provincial officers not embraced therein in computing their leaves of absence. Leaves of absence of provincial officers and of heads of bureaus reporting directly to the civil governor shall be granted by him and of heads of other bureaus by the secretary of the department embracing the bureau in accordance with the provisions of act numbered two hundred and twenty-two. In case the head of a bureau, provincial officer, or employee of any bureau shall die while in the service, having to his credit earned leave of absence, the salary that would have accrued to the deceased by reason of such earned leave of absence, and during the period thereof, shall be paid to the treasurer of the Philippine Archipelago, and be by him administered in the manner provided in act numbered two hundred and ninety, entitled "An act providing an inexpensive method of administration upon the estates of civil employees of the Philippine government who are citizens of the United States, and who die in the service of the insular government, leaving small estates upon which no regular administration is deemed advisable." But, in addition to the purposes for which such estate may be applied by the treasurer, as provided by section one of the last-named act, the treasurer is also authorized to pay the expenses of the transportation of the remains of the deceased to the United States, if such transportation is desired by the surviving relatives, so far as the funds in his hands will enable him to pay such expenses: *Provided, nevertheless*, That if there should be a regular administration upon the estate of the deceased, then the sum due to the deceased, by reason of earned leave of absence standing to his credit, after the payment of unpaid funeral expenses and transportation of the remains, if desired, to the United States, if any, shall be turned over to the regular executor or administrator of the estate of the deceased:

*And provided further*, That in case the deceased head of a bureau, provincial officer, or employee of any bureau was a native or citizen of the Philippine Islands, the amount due him for salary for the period of accrued leave shall be paid, not to the treasurer of the Philippine Islands, but to the legal representative of the deceased according to law.

SEC. 3. Where an employee in the civil service is himself ill, or in cases where any member of the immediate family of an employee is afflicted with a contagious disease, making the presence of such employee in the department or office in which he is employed unsafe for the health of his fellow-employees, he may be absent from

duty not exceeding sixty days in any calendar year with pay: *Provided*, That he shall notify the head of the bureau immediately of the cause of his absence: *And provided*, That after his return he shall establish by evidence, to be prescribed in regulations adopted by order of the civil governor, the fact that he was ill and unable to be on duty on account of illness, and that his claim is meritorious, or that a member of his family had the contagious disease above described during the period of his absence for which he claims compensation. If the period of absence because of illness of the employee himself or in his family shall exceed sixty days, he shall receive no compensation for the time so in excess of sixty days, and if the absence thus caused shall exceed six months, he shall be immediately separated from the service. The question of granting leaves of absence, both in section two and section three of act numbered eighty, shall be first submitted to the civil-service board for its recommendation, and then forwarded to the head of the executive department in which the applicant is employed for his final decision, except in respect to those bureaus not under any executive department, in which cases the recommendations of the civil-service board shall be forwarded to the civil governor for his final decision.

SEC. 4. The appointment of all persons residing in the United States to the Philippine civil service, whether by transfer from the United States civil service or otherwise, shall be subject to the following conditions:

(1) A person residing in the United States who is appointed to the Philippine civil service may pay his traveling expenses from the place of his residence in the United States to Manila: *Provided*, That if any part of his traveling expenses is borne by the government of the Philippine Islands, ten per cent of his monthly salary shall be retained until the amount retained is equal to the amount borne by the government: *And provided further*, That if he shall come by the route and steamer directed, his actual and necessary traveling expenses shall be refunded to him at the expiration of two years' satisfactory service in the Philippines.

(2) He shall be allowed half salary from the date of embarkation and full salary from the date of his arrival in the islands: *Provided*, That he proceed directly to the islands; otherwise, he shall be allowed half salary for such time only as is ordinarily required to perform the journey by the route directed: *And provided further*, That such half salary shall not be paid until after the expiration of two years of satisfactory service in the Philippines.

(3) A person residing in the United States accepting an appointment to a position in the civil service of the government of the Philippine Islands, under the conditions named in this act, shall, before receiving such appointment, execute a contract and deliver it to the Chief of the Bureau of Insular Affairs, War Department, wherein the appointee shall stipulate that he will remain in the service of the government of the Philippine Islands for at least two years, unless released by the civil governor or proper head of an executive department. A breach of the conditions provided in the contract or a removal for cause shall require the proper officer to withhold payment of all salary and traveling expenses due to the person employed and violating the conditions of the contract, and shall debar such person from ever entering again the public service of the Philippine government in any of its branches. No return transportation shall be furnished to such employee. In such case, an action shall lie on the petition of the attorney-general for the recovery of the amount expended by the government in bringing the employee to the Philippine Islands.

(4) A person who has been employed continuously in the Philippine civil service for three years or more after the passage of the civil-service act shall, if he so requests, upon his retirement from the service, be furnished with transportation from Manila to San Francisco, and shall be allowed half salary for thirty days in addition to full salary for the period which he may be granted as leave of absence under the provisions of this act.

SEC. 5. This shall act shall take effect on its passage.

Enacted, January 26, 1901.

[No. 148.]

AN ACT regulating expenditure of money under appropriations, forbidding the allowances to officers or clerks for extra compensation, except in case of clerks or employees acting as night teachers in the public schools, and regulating the payment of traveling expenses.

*By authority of the President of the United States, be it enacted by the United States Philippine Commission, that:*

SECTION 1. All sums appropriated for the various branches of expenditure in the public service shall be applied solely to the objects for which they are respectively

made, and for no others, and no moneys appropriated for contingent, incidental, or miscellaneous purposes shall be expended or paid for official or clerical compensation.

SEC. 2. No allowance or compensation shall be made to any officer or clerk by reason of the discharge of duties which belong to any other officer or clerk in the same or any other department, and no allowance or compensation shall be made for any extra service whatever which any officer or clerk may be required to perform unless expressly authorized by law.

SEC. 3. No officer in any branch of the public service, or any other person whose salary, pay, or emoluments are fixed by law or regulations, shall receive any additional pay, extra allowance, or compensation in any form whatever for the disbursement of public money, or for any other service or duty whatever, unless the same is authorized by law, and the appropriation therefor explicitly states that it is for such additional pay, extra allowance, or compensation: *Provided, however,* That the employment of clerks and employees in the various civil departments as evening or night teachers in the public schools is hereby authorized, such salaries being hereby made a proper charge against the appropriations available for the payment of salaries of teachers.

SEC. 4. Hereafter actual and necessary traveling expenses only shall be allowed to any person holding employment or appointment under the government of the Philippine Archipelago, and all allowances in excess of the amount actually paid, except as herein provided, are declared illegal, and no credit shall be allowed to any of the disbursing officers of the government of the Philippine Archipelago for payments or allowances in violation of this provision: *Provided,* That nothing herein contained shall be construed to prohibit the payment of a per diem in lieu of actual expenses.

SEC. 5. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 6. This act shall take effect on its passage.

Enacted, June 21, 1901.

---

[No. 392.]

AN ACT authorizing the employment of persons at salaries lower than those for which appropriation is made, and designating persons authorized to administer oaths for the civil service board.

*By authority of the President of the United States, be it enacted by the United States Philippine Commission, that:*

SECTION 1. The head of any department or bureau may, with the approval of the Philippine civil service board, appoint employees at salaries lower than those authorized and appropriated for: *Provided,* That the aggregate number of employees so authorized and appropriated for shall not be increased.

SEC. 2. The members of the civil service board, or any examiner duly authorized by it, may administer such oaths as may be necessary in the transaction of the official business of the board.

SEC. 3. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 4. The provisions of this act shall be effective as of April first, nineteen hundred and two.

Enacted, April 18, 1902.

---

[No. 697.]

AN ACT to furnish transportation to the United States to officers and employees of the insular government when it is impracticable to secure the same on United States army transports.

*By authority of the United States, be it enacted by the Philippine Commission, that:*

SECTION 1. In every case wherein it is impracticable to secure for an officer or employee of the insular government transportation from Manila to San Francisco on a United States army transport, and such officer or employee is entitled by law or under his contract, after two or more years of satisfactory service, to return transportation, exclusive of subsistence, from Manila to San Francisco, the executive secretary is hereby authorized to issue an official request for such transportation

upon any transportation company with which the insular government may have a contract, upon the payment to the disbursing officer of the executive bureau of a sum which such officer or employee would have been required to pay for subsistence if he had made the journey upon a United States army transport, allowing thirty days for the trip. The sum so received by the disbursing officer of the executive bureau shall be deposited in the insular treasury to the credit of the appropriation, "Insular salary and expense fund." The account of the transportation company shall be paid by settlement warrant upon certification of the amount by the auditor, and said payment is hereby made a proper charge against the appropriation designated "Insular salary and expense fund."

SEC. 2. In every case where an officer or employee is by law entitled to full traveling expenses, which include transportation and subsistence from Manila to San Francisco or to his home or place of appointment in the United States, the executive secretary is hereby authorized to issue an official request for such transportation, as in the first section provided, upon any transportation company with which the insular government may have a contract, and the cost thereof shall be a proper charge against the "Insular salary and expense fund," and settlement shall be made as provided in the preceding section.

SEC. 3. Every transportation company upon which requests are issued shall submit to the auditor bills for transportation furnished under this act, accompanying the same with the official requests upon which the said transportation was furnished, the same to be duly receipted, showing that the transportation was actually furnished.

SEC. 4. The executive secretary shall certify the name of the officer or employee to whom such transportation was furnished, the bureau or office to which he belonged, the amount received from him and deposited in the insular treasury to the credit of the "Insular salary and expense fund," and shall also cite the law or authority under which the said transportation was furnished, with a true copy of the contract providing for such return transportation, if any.

SEC. 5. No transportation shall be furnished at the cost of the insular government when an officer or employee is going to or coming from the United States on leave of absence, except in cases specially provided by law or resolution of the Commission: *Provided, however,* That any officer or employee of the Philippine government, insular, provincial or municipal, going to or coming from the United States on leave of absence or for any other lawful reason, may secure the benefit of the contract of the insular government made with the commercial lines for transportation between Manila and any town or city in the United States, either for himself or for any member of his family, including his fiancée, by applying in case he is going from Manila to the United States to the executive secretary for a proper order of transportation and by depositing upon the order of the executive secretary the proper amount due for the same with the disbursing officer of the executive bureau, who shall deposit such sum in the insular treasury to the credit of the appropriation, "Insular salary and expense fund," and in case the officer or employee or any member of his family is going from the United States to Manila by applying to the chief of the Bureau of Insular Affairs in Washington and by depositing upon the order of the chief of the Bureau of Insular Affairs with the disbursing agent of the Philippine government in Washington the proper amount due for the transportation applied for; and said disbursing agent shall deposit the same with the depository of the insular government in the city of New York to the credit of the appropriation, "Insular salary and expense fund," and the disbursing agent of the Philippine government in Washington shall be and he is hereby authorized to draw upon funds thus deposited in payment of the corresponding claims of the commercial lines for the transportation thus furnished.

SEC. 6. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 7. This act shall take effect on its passage.

Enacted, March 23, 1903.

---

#### CIVIL-SERVICE RULES.

In the exercise of power vested in him by "an act for the establishment and maintenance of an efficient and honest civil service in the Philippine Islands," enacted September 19, 1900, as amended January 9, 1903, the civil governor hereby approves and promulgates the following rules, prepared and certified by the Philippine civil-service board, and revokes all others.

## RULE I.—GENERAL PROVISIONS AND DEFINITIONS OF TERMS.

1. The board shall have authority to prescribe such regulations in pursuance of and in execution of these rules and of the civil-service act as may not be inconsistent therewith, and may prescribe blank forms for all applications, examinations, certifications, reports, records, and returns received under these rules and the regulations made in pursuance thereof.

2. The several terms hereinafter mentioned, wherever used in these rules, shall be construed as follows:

(a) The term "board" refers to the Philippine civil-service board.

(b) The term "civil-service act" refers to "an act for the establishment and maintenance of an efficient and honest civil service in the Philippine Islands," enacted September 19, 1900.

(c) The term "grade" refers to a number of positions or employees arranged in a group upon the basis of the duties performed, without regard to the salaries received.

(d) The term "class" refers to a number of positions or employees arranged in a group upon the basis of the salaries received, without regard to the duties performed.

(e) The term "classified service" refers to that portion of the Philippine civil service which is subject to the provisions of the civil-service act and these rules.

(f) The term "unclassified service" refers to that portion of the Philippine civil-service positions in which may be filled without reference to the provisions of the civil-service act and these rules.

(g) Whenever a sum of money is mentioned it shall be understood to refer to the money of the United States.

(h) Whenever the term "officers" is used, it shall be understood to refer to civil officers employed in, or military officers detailed to, the Philippine civil service.

3. A person occupying a position classified by the operation of the civil-service act and these rules, whose appointment was made in conformity with law, shall be entitled to all the rights and benefits possessed by persons of the same class or grade appointed upon examination under the provisions of said act and these rules, except that the board may, in its discretion, require by rule that all such employees shall pass examinations practically adapted to show their fitness to fill the positions now held by them, and that in case of failure to pass such examinations to the satisfaction of the board they shall be dismissed from the service.

## RULE II.—EXTENT OF THE CIVIL SERVICE OF THE PHILIPPINE ISLANDS.

1. The civil service of the Philippine Islands shall include all appointive offices and positions of trust or employment which are now or may hereafter be occupied by civilians in the central, departmental, and provincial branches of the Philippine government, and also in the municipal service of Manila.

2. The following-named employees or positions are not classified and vacancies therein may be filled without reference to the provisions of the civil-service act:

## ALL DEPARTMENTS AND OFFICES.

1. One private secretary to each member of the Philippine Commission, except the president.

2. Persons appointed by the civil governor, by and with the advice and consent of the Philippine Commission, unless otherwise specifically provided by law.

3. Any person in the military or naval service of the United States who may be detailed for the performance of civil duties.

4. All persons employed merely as laborers [and all employees whose rate of compensation is \$120 or less per annum].

## EXECUTIVE OFFICE.

5. One private secretary to the civil governor.

## DEPARTMENT OF THE INTERIOR.

6. The members of the board of health for the Philippine Islands.

7. The presidents of provincial boards of health.

8. The director of the agricultural college and experiment station.

9. The director, the three assistants, and the secretary of the weather bureau.

10. The chief of the ethnological survey for the Philippine Islands.

11. The superintendent and directors of government laboratories.

12. The attending physician and surgeon of the Philippine civil hospital.

## DEPARTMENT OF COMMERCE AND POLICE.

13. Postmasters compensated on a percentage basis as provided by law.
14. Postmasters receiving not more than \$300 per annum compensation for their personal salaries, who may lawfully perform the duties of postmaster in connection with the official duties with which they are charged, if they be government employees, or if not government employees, in connection with their private business, such duties requiring only a portion of their time.
15. The consulting engineer to the Commission.
16. The officer in charge of the improvement of the port of Manila.
17. Detectives.
18. Any position in the department of commerce and police the duties of which are of a quasi-military or quasi-naval character, and for the performance of which duties a person is commissioned or enlisted for a term of years.

## DEPARTMENT OF FINANCE AND JUSTICE.

19. Judges and justices of the peace.
20. The attorney-general and his assistant lawyers.
21. The solicitor-general.
22. The assistant attorney-general.
23. The supervisor of provincial fiscals.
24. Provincial fiscals.
25. The auditor of the Philippine Islands.
26. The deputy auditor of the Philippine Islands.
27. The treasurer of the Philippine Islands.
28. The cashier of the treasurer of the Philippine Islands.
29. The superintendent of the insular cold storage and ice plant.
30. Secret agents.
31. Customs inspectors in the provinces whose rates of compensation do not exceed \$180 per annum, who may lawfully perform the duties of customs inspectors in connection with the official duties with which they are charged, if they be government employees, or if not government employees, in connection with their private business, such duties requiring only a portion of their time.

## CITY OF MANILA.

32. The members of the municipal board.
33. The city engineer.
34. The city attorney and his assistant attorney.
35. The prosecuting attorney and his assistant attorneys.
36. The sheriff and his deputies.

It is the purpose of the appointing power to observe the principle of promotion in filling vacancies in the unclassified service: *Provided*, That competent persons may be found in the service who are available and possess the qualifications required.

3. The following-named employees or positions shall be excepted from the requirement of examination, and vacancies therein shall be filled by promotion from a class to be composed of the first, second, and third assistants in all the bureaus or offices of the Philippine government, provided that competent persons may be found in the service who are available and possess the qualifications required, the intention of this provision being that the appointing power may, by virtue hereof, transfer from one office to another a person deemed competent to fill the vacancy. In case there are not two or more assistants, designated as such by law, in the office in which a vacancy occurs, the board may, in its discretion, include in such eligible list one or more of the subordinates in such office ranking next to the head thereof:

## THE EXECUTIVE OFFICE.

1. The executive secretary.
2. The members of the civil-service board.
3. The insular purchasing agent.

## DEPARTMENT OF THE INTERIOR.

4. The chief of the forestry bureau.
5. The chief of the mining bureau.
6. The chief of the bureau of agriculture.
7. The chief of the bureau of public lands.

## DEPARTMENT OF COMMERCE AND POLICE.

8. The chief of coast guard and transportation.
9. The director of posts.
10. The assistant director of posts.
11. The postmaster at Manila.
12. The chief of Philippines Constabulary.

## DEPARTMENT OF FINANCE AND JUSTICE.

13. The collector of customs for the Philippine Islands.
14. The deputy collector of customs for the Philippine Islands.
15. The surveyor of customs for the Philippine Islands.
16. The cashier of the collector of customs for the Philippine Islands.
17. The collector of customs at Iloilo.
18. The collector of customs at Cebu.
19. The collector of internal revenue for the islands.

## DEPARTMENT OF PUBLIC INSTRUCTION.

20. The general superintendent of education.
21. The chief of the bureau of public printing.
22. The chief statistician.
23. The chief of the bureau of archives.
24. The chief of the bureau of architecture.

## CITY OF MANILA.

25. The chief of the fire department.
26. The city assessor and collector.
27. The chief of police.

## ALL DEPARTMENTS.

28. The chief or head of any bureau hereafter organized, unless otherwise expressly provided by law.

## RULE III.—APPLICATIONS FOR EXAMINATIONS.

1. No applicant shall be admitted to competitive examination who has not taken the oath of allegiance to the United States and who is not a citizen of the United States, a native of the Philippine Islands, an honorably discharged soldier, sailor, or marine of the United States, or a person who has under and by virtue of the Treaty of Paris acquired the political rights of natives of the islands.

2. Every applicant for examination must furnish information as to his citizenship, nativity, age, education, and physical capacity, and such other information tending to show his qualifications or disqualifications for the service, as may be required by the board.

3. No applicant shall be admitted to examination or be appointed in the United States for this service until he has been thoroughly examined by a competent physician and found to be physically qualified for efficient service in the Philippine Islands. A physical and medical examination may, in the discretion of the board, be required of applicants for examination in the Philippine Islands.

4. No applicant shall be admitted to examination in the Philippine Islands until he has furnished evidence satisfactory to the board of his loyalty to the supreme authority of the United States of America in these islands.

5. No application for examination shall be accepted from any person serving or enlisted in the Army, the Navy, or the Marine Corps of the United States unless the written consent of the proper military, naval, or marine authority under whom such person is serving or enlisted is filed with his application.

6. No application for examination for entrance into the classified service shall be accepted from any applicant who is under eighteen or over forty years of age: *Provided*, That in the interest of good administration, the board, with the concurrence of the head of the proper department, office, or branch of the service, may by regulation determine the age limitations within the maximum and minimum limits herein specified, and confine competition for such positions to persons who meet the requirements as to age: *And provided, further*, That whenever in the discretion of the board the needs of the service require it, the age limitations named herein may be extended.

7. The board may, in its discretion, refuse to examine an applicant, or to certify or attest an appointment of an eligible, who is physically unfitted for the performance of the duties of the position to which he seeks appointment, or who has been guilty of a crime or of infamous or notoriously disgraceful or immoral conduct, including drunkenness and dishonesty, or who has been dismissed from the service for delinquency or misconduct within one year next preceding the date of his application, or who has intentionally made a false statement in any material fact, or practiced or attempted to practice any deception or fraud in securing his examination, registration, or appointment. Any of the foregoing disqualifications shall be good cause for the removal of the person from the service after his appointment.

8. No application shall be accepted for examination for a position which belongs to one of the recognized mechanical trades unless it shall be shown that the applicant has served as apprentice or as journeyman, or as apprentice and journeyman, at said trade for such periods as the board may prescribe.

#### RULE IV.—EXAMINATIONS.

1. Examinations of a suitable and practical character, absolutely impartial and involving such subjects and tests as the board may determine, shall be held to ascertain the relative capacity and fitness of applicants for the positions to which they seek to be appointed.

2. Whenever the board shall find, after consultation with the head of the proper department or office, that a knowledge of both the Spanish and the English languages is essential to an efficient discharge of the duties of a position to be filled, the board shall test English-speaking applicants as to their knowledge of the Spanish language, and Spanish-speaking applicants as to their knowledge of the English language.

3. No person shall be appointed to, or employed in, any classified position unless he shall have passed the examination provided therefor, or unless he is specially exempt from such examination by the provisions of the civil-service act and these rules.

4. No noncompetitive examination shall be held except under the following conditions:

(a) When applicants fail to compete after due notice has been given of an open competitive examination to fill an existing vacancy.

(b) To test fitness for promotion.

(c) To test fitness for reinstatement or transfer to a position in the service.

(d) To test fitness for positions requiring professional, technical, or scientific qualifications when, in the judgment of the board, it is not practicable to hold a competitive examination for such positions.

(e) To test fitness for positions of skilled workmen, mechanics, or artisans.

5. Examinations in the Philippine Islands shall be held at Manila and in the provinces upon such dates as the board may deem best for the interest of the service and the convenience of applicants, and examinations in the United States will be held under the auspices of the United States Civil Service Commission at the request of this board. Previous notice of such examinations, with such general information relative thereto as the board shall prescribe, shall be mailed to each person who has made application in due form.

6. The board shall appoint such examining committees or special examiners as it may deem necessary from officers and employees in the Philippine civil service. The members of examining committees and special examiners shall perform such duties as the board may direct in connection with examinations, appointments, and promotions in any part of the service which has been or may hereafter be classified; and in the performance of such duties they shall be under the direct and sole control and authority of the board. The duties performed by members of examining committees and special examiners shall be considered part of the duties of the office in which they are serving, and time shall be allowed for the performance of such duties during the office hours of said office.

7. All officers of the Philippine civil service shall facilitate the examinations of the board, and officers having the custody of public buildings at places where such examinations are to be held shall for this purpose permit and arrange for the use of suitable rooms under their charge and for furnishing and lighting the same when required.

#### RULE V.—RATING OF PAPERS AND ELIGIBILITY.

1. Examination papers shall be rated according to their excellence on a scale of 100, and the subjects therein shall be given such relative weights as the board shall prescribe. After a competitor's papers shall have been rated he shall be duly notified of the result thereof.

2. Every competitor who attains a rating of 70 or over shall be eligible to appointment, subject to the provisions of these rules, to the position for which he was examined; and the names of eligibles shall be entered in the order of their ratings, without regard to the date of examination, on the proper register of eligibles.

3. The period of eligibility shall be one year from the date on which the name of the eligible is entered on the register, but this period may be extended, if, in the discretion of the board, the needs of the service warrant it: *Provided*, That in case a person whose name is on any register shall be mustered into the military or naval service of the United States at a time when the United States may be engaged in war or in suppressing an insurrection, the period of eligibility of such person shall, under such conditions as the board may prescribe, be considered as suspended during the time he may be serving in the Army or Navy of the United States: *And provided, further*, That when the needs of the service require it, the eligibility of any person resulting from examinations held in the Philippine Islands shall be revoked during the absence of such person from the Philippine Islands.

#### RULE VI.—CERTIFICATIONS.

A vacancy in a classified position, if not filled by appointment, by promotion, reduction, transfer, or reinstatement, or through noncompetitive examination, shall be filled under the following provisions:

1. The nominating or appointing officer shall make requisition, upon a form prescribed by the board, for the names of eligibles for the position vacant, specifying the duties of the position, and the board shall certify to said officer from the proper register the three names at the head thereof which have not been three times certified to the office or branch of the service in which the vacancy exists: *Provided*, That certification for temporary employment shall not be counted as one of the three certifications to which an eligible is entitled: *And provided, further*, That whenever the request for certification, or any law, rule, or regulation, shall call for persons of one sex, those of that sex shall be certified; otherwise, sex shall be disregarded in certification.

2. The nominating or appointing officer shall select one of the three names certified, and, if at the time of selection there are more vacancies than one, he may select more than one name, unless otherwise directed by the board: *Provided*, That if an appointing officer shall object to an eligible certified, stating that because of disloyalty, physical defect, mental unsoundness or moral or other disqualification as provided in Rule III, paragraph 7, particularly specified, such eligible would be unsuitable for the position to be filled, and if said officer shall support such objections with evidence satisfactory to the board, certification may be made of the eligible on the register whose rating is next below those already certified in place of the one to whom objection is made and sustained.

3. In making selections from certifications of eligibles by the board, appointing officers shall, when other qualifications are equal, prefer, first, natives of the Philippine Islands, and second, all honorably discharged soldiers, sailors, and marines of the United States.

4. The board, whenever practicable, shall forward to the head of the bureau or office in connection with each certification the applications and examination papers of the persons certified, and said officer may summon personally before him the persons certified and make such verbal inquiries of them as he may think proper. The papers forwarded by the board to the head of the bureau or office for his information shall be returned to the board with the notice of selection.

5. When a person is selected for appointment, the appointing officer shall notify the board, and the board shall notify the appointee. Upon his reporting for duty, he shall receive from the appointing officer a certificate of appointment for a probationary period of six months, at the end of which period, if his conduct and capacity are satisfactory to the appointing officer, his retention in the service shall be equivalent to his absolute appointment; but if his conduct and capacity be not satisfactory, he may at any time during, or at the expiration of, his probationary period be notified by the appointing officer that he will not receive absolute appointment, because of such unsatisfactory conduct or want of capacity, and such notification shall discharge him from the service. The name of a probationer who has been separated from the service without delinquency or misconduct may be restored to the register of eligibles, in the discretion of the board, for the remainder of his period of eligibility.

6. An eligible may waive certification or decline appointment without losing his position on the register upon furnishing reasons satisfactory to the board, but without such action his name shall be dropped from the register upon his declination of an appointment. No eligible shall have the right to decline an appointment from the same register more than twice.

7. Certification for original appointment shall, whenever practicable, be made to the lowest class in a grade, but a vacancy in a position in any class requiring the exercise of special, technical, or professional knowledge may be filled by original appointment.

8. When two or more eligibles have the same rating, precedence in certification shall be determined by the order in which their applications were filed.

9. Whenever a vacancy exists and an emergency shall arise requiring that such vacancy shall be filled before the board can make a certification of eligibles, the vacancy may, subject to the approval of the board, previously obtained wherever possible, be filled by temporary employment without examination for such part of ninety days as will enable the board to make a certification of eligibles: *Provided*, That a vacancy shall not be filled by temporary employment pending a certification of eligibles by the board unless the public interest requires that it shall be filled to meet an emergency, and such temporary employment, if allowed, shall expire by limitation as soon as an eligible shall be provided, and the necessary details of an appointment thereto have been executed in accordance with these rules. No person shall serve longer than ninety days in any one year under such temporary employment, said year limitation commencing from the date of such temporary employment.

#### RULE VII.—REINSTATEMENTS.

Any person who has, through no delinquency or misconduct, been separated from a position classified under the civil service act and these rules, may, upon requisition of the proper officer and the certificate of the board, be reinstated without examination in a vacant position of the same class in the department, office, or branch of the service from which he was separated, under the following conditions:

1. No person shall be reinstated who has served less than six months in the Philippine civil service.

2. A person who has been regularly and formally appointed to a classified position and has served less than two years, but who has received absolute appointment, may be reinstated within one year; a person who has served two years, but less than three years, may be reinstated within two years; a person who has served three years, but less than four years, may be reinstated within three years; a person who has served four years, but less than five years, may be reinstated within four years; and a person who has served five or more years may be reinstated within five years from the date of his separation from the service: *Provided*, That for original entrance to the position proposed to be filled by reinstatement there is not required by these rules, in the opinion of the board, an examination essentially higher than, or different from, the examination for original entrance to the position previously held by the person whose reinstatement is proposed: *And provided further*, That if the person originally entered the classified service through examination under these rules, reinstatement may be made without examination; otherwise the person may not be reinstated until he has passed the examination required for original entrance to the position to which his reinstatement is proposed: *And provided further*, That subject to the other conditions of these rules, any person whose separation from the service was caused by his enlistment in or acceptance of a position in the active military or naval service of the United States, and who was honorably discharged therefrom, may be reinstated without regard to the length of time he has been separated from the service.

#### RULE VIII.—TRANSFERS.

1. A person in any bureau or office, or branch of the service, may be transferred within the same bureau, office, or branch of the service, upon any test of fitness, not disapproved by the board, which may be determined upon by the appointing officer, subject to the limitations of the proviso of paragraph 2 of this rule.

2. A person who has received absolute appointment may, upon the certificate of the board, be transferred from a position in one office or branch of the service to a position in another office or branch of the service: *Provided*, That such transfer shall not be made without examination to a position if for original entrance to such position there is required by these rules an examination essentially higher than, or different from, the examination required for original entrance to the position from which transfer is proposed.

3. No transfer shall be made of a person from any position in the unclassified service to a position in the classified service: *Provided*, That a person who has, by promotion or transfer from the classified service, entered the unclassified service, and has served continuously therein from the date of said promotion or transfer, may be retransferred

to the classified position from which he was transferred or to any position to which transfer could be made therefrom.

4. Any person who has been transferred from one classified position to another classified position may be retransferred to the position in which he was formerly employed, or to any position to which transfer could be made therefrom, without regard to the limitations of these rules.

5. A person in the classified service of the Federal Government of the United States may be transferred to any position in the Philippine classified service, subject to the conditions of these rules with respect to age limitations and examinations, and when an examination is required previous to such transfer the board may accept such tests of fitness as may be made upon its request by the United States Civil Service Commission.

6. A person employed in any grade shall not, because of such employment, be barred from open competitive examination provided for original entrance to any other grade.

7. An officer or employee occupying a competitive position in the Philippine classified civil service who has served three years or more therein, may be transferred to the Federal classified civil service, subject to the provisions of the United States Civil Service Rules and to the following requirements:

(a) Three years' continuous service subsequent to the passage of the civil-service act, without visiting the United States.

(b) Four years' continuous service, subsequent to the passage of the civil-service act, visiting the United States only once during this period.

RULE IX.—PROMOTIONS.

1. No vacancy in any position shall be filled by original appointment or by transfer whenever there is in the office or branch of the service where the vacancy exists any person in a position in a lower class or grade who is qualified and willing to be promoted to the existing vacancy.

2. In providing regulations and competitive examinations for promotion the board shall give due weight to the previous experience and efficiency of officers and employees and shall introduce such tests of fitness as it may deem proper after consultation with the heads of the different offices or branches of the service in which promotion examinations may be held, with a view to determine the relative efficiency of officers and employees, and their general intelligence as well as their knowledge of the business of the branch of the service in which they seek to be promoted.

3. In each department, office, or branch of the service the board may, when deemed advisable, appoint a promotion examining committee of not less than three persons, after consulting the head of the department, office, or branch of the service in which such committee is to be appointed. The members of the committee shall perform such duties with respect to promotions and promotion examinations as the board may direct, in the performance of which duties they shall be under the sole control and authority of the board.

4. There shall be kept in each office, on a form prescribed for that purpose, a continuous and comparative record from which the relative efficiency of employees may be determined. Among the elements of efficiency to be considered are quantity of work or the amount performed, quality of work or the degree of its excellence, physical condition, habits, character, conduct, aptitude and adaptiveness, punctuality, and attendance. This record shall be at all times open to the inspection of the board. A report shall be made to the board quarterly, on the first days of January, April, July, and October, giving the comparative term and efficiency rating applicable to each person according to the following scheme:

Perfect .....	100
Very superior.....	95
Excellent.....	90
Very good .....	85
Good .....	80
Fairly good.....	75
Fair or ordinary.....	70
Poor .....	50 to 65
Very poor .....	below 50

5. No recommendation of any person for promotion, whether verbal or in writing, shall be received or considered, unless it be made by the officer or officers under whose supervision he is employed, and the presentation of any other recommendation shall be considered an unwarrantable interference with the public service, and

shall be sufficient cause for debarring such person from promotion, and a repetition of the offense shall be sufficient cause for removing him from the service.

6. Until the promotion regulations herein authorized have been promulgated by the board for any department, office, or branch of the service, and the board has notified such department, office, or branch of the service that it is prepared to conduct the promotion examinations authorized under the civil-service act and these rules, promotions therein may be made upon any tests of fitness not disapproved by the board which may be determined upon by the appointing officers: *Provided*, That pending the adoption of such regulations, in case of proposed promotion from one class to another class of an employee who has not entered the service through the examination prescribed for the class to which promotion is proposed, such employee shall be required to obtain an eligible grade in such prescribed examination taken noncompetitively, and the appointment by promotion thus made shall not become effective prior to the date of taking the examination in which an eligible grade is obtained.

**RULE X.—RELATING TO APPOINTMENT AND EMPLOYMENT.**

1. All appointments not temporary or emergency, whether original, by promotion, reduction, transfer, or reinstatement, must be made in accordance with the provisions of Act No. 25 on Form No. 33 prescribed by the board and forwarded through the board for its attestation to the civil governor, or proper head of executive department, for approval: *Provided*, That appointments to subordinate positions in the municipal service of Manila and in the provincial service shall be forwarded to the board for attestation, but shall not require the approval of the civil governor: *And provided further*, That appointments made by the civil governor, by and with the advice and consent of the Philippine Commission, and appointments made to positions enumerated in paragraphs 2 and 3 of Rule II, shall not be required to be made on the form referred to herein and shall not require the attestation of the board.

2. No person appointed to any unclassified position shall be assigned to or employed in a position the duties of which are clerical, nor shall he be assigned to or employed in any other position in the classified service.

3. No person appointed to a position in the classified service shall, without the approval of the civil-service board, be assigned to or employed in a position of a grade or character not contemplated by the examination from the results of which appointment was made.

**RULE XI.—OFFICIAL ROSTER OF EMPLOYEES.**

The board shall keep an official roster of all officers and employees in the civil service of the Philippine Islands, and for the purpose of this roster each head of a bureau or office shall furnish to the board the following information in such form and manner as it may prescribe:

1. A statement of all the positions and employments under his control and authority, setting forth, among other things, the names, designations, compensations, duties, dates of appointment or employment of all persons serving in such positions.

2. A statement, to be made on the first day of each month, of all changes, and the dates thereof, in the service under his control and authority, setting forth, among other things, the following: The name of every person appointed, reinstated, promoted, reduced, transferred, or separated from the service, the position to which an appointment or reinstatement is made, the position from which and the position to which a promotion or transfer is made, the position from which a separation is made, whether by removal, resignation, or death, the compensation of every position from which or to which a change is made, and all absences from any cause whatever.

**RULE XII.—PROHIBITIONS AND PENALTIES.**

1. The willful violation by any person in the Philippine civil service of any of the provisions of the civil-service act or of these rules shall be considered good cause for the removal of such person from the service.

2. No person in the Philippine civil service shall use his official authority or official influence to coerce the political action of any other person or body.

3. No officer or employee in the Philippine civil service shall discharge, or promote, or degrade, or in any manner change the official grade or compensation of any other officer or employee, or promise or threaten so to do, for giving or withholding, or neglecting to make, any contribution of money or other valuable thing for any political purpose whatever.

4. No inquiry shall be made and no consideration whatever shall be given to any information relative to the political or religious opinions or affiliations of persons

examined, or to be examined, or of officers or employees in the matter of promotion, and no discrimination shall be exercised, threatened, or promised against, or in favor of, any person employed, examined, or to be examined, because of his political or religious opinions or affiliations.

5. In making removals or reductions, or in imposing punishment for delinquency or misconduct, penalties like in character shall be imposed for like offenses, and action thereon shall be taken irrespective of the political or religious opinions or affiliations of the offenders.

6. No recommendation of an applicant, competitor, or eligible involving any disclosure of his political or religious opinions or affiliations shall be received, filed, or considered by the board, by any examining committee or special examiner, or by any nominating or appointing officer.

7. No officer or employee shall undertake any private agency or engage in any private occupation in any manner connected with the exercise of his official duties.

8. No officer or employee, shall engage in trade or be connected with any commercial undertaking without leave from the head of the department or office in which he may be serving. As a general rule, this prohibition will be absolute in the case of officers and employees whose remuneration is fixed on the assumption that their entire time is at the disposal of the government.

#### RULE XIII.—SALARY CLASSIFICATION.

The officers and employees in the Philippine civil service, for the purpose of these rules, shall be arranged in the following classes, and, unless otherwise provided by law, it shall be understood that the minimum amount specified for each class indicates the annual salary of each employee in that class:

*Class 1.*—All persons receiving an annual salary of \$3,000 or more, or a compensation at the rate of \$3,000 or more per annum.

*Class 2.*—All persons receiving an annual salary of \$2,750 or more, or a compensation at the rate of \$2,750 or more, but less than \$3,000 per annum.

*Class 3.*—All persons receiving an annual salary of \$2,500 or more, or a compensation at the rate of \$2,500 or more, but less than \$2,750 per annum.

*Class 4.*—All persons receiving an annual salary of \$2,250 or more, or a compensation at the rate of \$2,250 or more, but less than \$2,500 per annum.

*Class 5.*—All persons receiving an annual salary of \$2,000 or more, or a compensation at the rate of \$2,000 or more, but less than \$2,250 per annum.

*Class 6.*—All persons receiving an annual salary of \$1,800 or more, or a compensation at the rate of \$1,800 or more, but less than \$2,000 per annum.

*Class 7.*—All persons receiving an annual salary of \$1,600 or more, or a compensation at the rate of \$1,600 or more, but less than \$1,800 per annum.

*Class 8.*—All persons receiving an annual salary of \$1,400 or more, or a compensation at the rate of \$1,400 or more, but less than \$1,600 per annum.

*Class 9.*—All persons receiving an annual salary of \$1,200 or more, or a compensation at the rate of \$1,200 or more, but less than \$1,400 per annum.

*Class 10.*—All persons receiving an annual salary of \$1,000 or more, or a compensation at the rate of \$1,000 or more, but less than \$1,200 per annum.

*Class A.*—All persons receiving an annual salary of \$900 or more, or a compensation at the rate of \$900 or more, but less than \$1,000 per annum.

*Class B.*—All persons receiving an annual salary of \$840 or more, or a compensation at the rate of \$840 or more, but less than \$900 per annum.

*Class C.*—All persons receiving an annual salary of \$720 or more, or a compensation at the rate of \$720 or more, but less than \$840 per annum.

*Class D.*—All persons receiving an annual salary of \$600 or more, or a compensation at the rate of \$600 or more, but less than \$720 per annum.

*Class E.*—All persons receiving an annual salary of \$540 or more, or a compensation at the rate of \$540 or more, but less than \$600 per annum.

*Class F.*—All persons receiving an annual salary of \$480 or more, or a compensation at the rate of \$480 or more, but less than \$540 per annum.

*Class G.*—All persons receiving an annual salary of \$420 or more, or a compensation at the rate of \$420 or more, but less than \$480 per annum.

*Class H.*—All persons receiving an annual salary of \$360 or more, or a compensation at the rate of \$360 or more, but less than \$420 per annum.

*Class I.*—All persons receiving an annual salary of \$300 or more, or a compensation at the rate of \$300 or more, but less than \$360 per annum.

*Class J.*—All person receiving an annual salary of \$240 or more, or a compensation at the rate of \$240 or more, but less than \$300 per annum.

*Class K.*—All persons receiving an annual salary of less than \$240, or a compensation at the rate of less than \$240 per annum.

## SPECIAL RULE GOVERNING EMPLOYMENT OF LABORERS.

The employment of laborers by the heads of bureaus or offices shall be subject to the following conditions:

1. They shall be employed according to priority in the filing of their applications for employment, after proper inquiry as to their capacity to labor, their habits of industry and sobriety, and their honesty.

2. No consideration whatever shall be given to the political or religious opinions or affiliations of applicants for such employment, and selection shall, as far as practicable, be confined to natives of the islands.

3. Every applicant employed shall be required to take the oath of allegiance prescribed in section 16 of the civil-service act, and any laborer who is found to be disloyal to the United States of America as the supreme authority in these islands shall be immediately discharged from the service.

4. Laborers who may hereafter be removed from the service by reason of a reduction in force, or otherwise, and whose work and conduct are satisfactory, shall be furnished discharge cards certifying to such fact, and upon presenting such cards shall be preferred in subsequent employment as vacancies occur.

5. On the first day of each month the head of each bureau or office shall notify the civil service board of the number of laborers employed, giving the rates of compensation.

6. No person appointed or employed as a laborer shall be assigned to or perform the duties of any position in the classified service.

WM. H. TAFT, *Civil Governor*.

MANILA, P. I., *January 13, 1903.*

## GENERAL REGULATIONS GOVERNING PROMOTIONS BY COMPETITIVE EXAMINATIONS.

1. In pursuance of the requirements of section 6 of the civil-service act and in conformity with civil-service Rule IX, approved and promulgated by the civil governor January 13, 1903, the following regulations governing promotions through competitive examination in the Philippine civil service are hereby prescribed by the civil service board:

2. No person shall be promoted as a result of competitive promotion examination until after the expiration of his probational appointment.

3. In examinations for promotions a suitable weight shall be given to a knowledge of both the English and the Spanish languages or to a knowledge of the English language and one or more of the native languages whenever in the opinion of the board a knowledge of such languages is useful in the position to which promotion is sought. The object of this rule is to give preferment in examinations for promotions, other things being equal, to employees who speak the Spanish language or any of the native languages and who have increased their efficiency and usefulness by acquiring a knowledge of the English language; and also to give preferment in examinations for promotion, other things being equal, to employees who speak the English language and who have increased their efficiency and usefulness by acquiring a knowledge of the Spanish language or any of the native languages.

4. Examinations for promotions shall be held at such times as in the opinion of the board the needs of the service shall require. Due notice of such examinations shall be posted in the office of the board and in the bureaus and offices in which promotion examinations are to be held, specifying the date and character of the examinations and stating who are eligible therefor.

5. Each competitor in an examination for promotion shall be rated on a scale of 100, and a competitor who fails to attain an average percentage of 70 in the entire examination or who is rated below 70 in efficiency, shall not be eligible for promotion. A competitor who makes less than an average percentage of 60 on the subjects of the examination other than efficiency shall not be given the benefit of his efficiency rating in determining his average percentage in the whole examination.

6. There shall be kept in the office of the civil service board registers of persons eligible for promotion in each bureau, office, or branch of the service for which examinations are held, showing the rating or standing of each person examined.

7. All vacancies above those in the lowest class of any grade, if not filled by reinstatement, transfer, or reduction, shall be filled by promotion from the next lower class, subject to the provisions of Rules II, IX, and X of the civil-service rules. When a vacancy occurs in any class in a bureau, office, or branch of the service, the board shall certify for promotion the highest three eligibles, or two if there be not so many as three eligibles, in the next lower class in said bureau, office, or branch of the

service, and from this certification selection shall be made by the appointing or nominating officer: *Provided*, That if it be found that there are not two persons eligible for promotion in the class next below that in which the vacancy exists, or if a vacancy occurs in a position requiring exceptional or technical qualifications not possessed by any eligible in the next lower class, then the board, after such tests of fitness as it may prescribe, shall certify to the appointing officer, from the highest class or classes in which such persons are serving, the names of three persons, if there are so many, having the required qualifications who are rated highest, or but one person if there are no more in the bureau, office, or branch of the service.

8. In certifying for promotion, when two or more eligibles have the same percentage precedence in certification shall be determined by length of service.

W. S. WASHBURN, *Chairman*.

JANUARY 14. 1903.

REGULATIONS GOVERNING PROMOTIONS IN THE UNIFORMED POLICE FORCE OF THE CITY OF MANILA.

- I. All promotions in the uniformed police force of the city of Manila shall be made in accordance with the provisions of Rule IX of the civil-service rules, the general regulations covering promotions adopted by the civil service board, and these regulations.
- II. 1. Eligibility for promotion shall be determined by promotion examinations, which shall consist of the following subjects and weights:

	<i>Subjects.</i>	<i>Weights.</i>
1.	Practical questions.....	40
2.	Efficiency or ascertained merit .....	40
3.	Length of service .....	20
Total .....		100

2. In determining the rating of efficiency or ascertained merit, the following elements shall be taken into consideration, namely: Sobriety, deportment, conduct, fidelity, bravery, general character, punctuality, absences with sick leave or without leave and causes thereof, physical condition—including energy, activity, and endurance—judgment, ability, fitness and adaptability, fines and penalties, neatness of appearance, knowledge of English, Spanish, and Tagalog languages; executive and administrative ability to be considered in promotion to the higher grades only.
3. Practical questions will cover peace officers' duties, knowledge of duties of grade occupied and to which promotion is sought, city ordinances, police regulations, general knowledge of circulars and general orders, location of streets and buildings, etc.
- III. The board of promotion, hereinafter provided for, shall keep a record of the efficiency of all members of the uniformed police force, below the grade of captain, on a form agreed upon by the civil service board in consultation with the chief of police. The civil service board, after consultation with the chief of police, shall designate three members of the police force, consisting of three officers above the grade of lieutenant, who shall constitute a board of promotion for the purpose of carrying out the promotion regulations: *Provided*, That the civil service board shall constitute the board of promotion for promotions above the grade of captain. If an employee questions his efficiency rating, he may appeal in writing to the board of promotion. Such appeal, together with a full report and recommendation in the case, shall be forwarded to the civil service board for final decision.

W. S. WASHBURN, *Chairman*.

JANUARY 14, 1903.

EXECUTIVE ORDERS.

EXECUTIVE ORDER }  
No. 84. }

OFFICE OF THE CIVIL GOVERNOR OF THE  
PHILIPPINE ISLANDS,  
Manila, P. I., May 9, 1902.

- I. In order to prevent confusion and establish uniformity of action upon the part of the heads of the various bureaus and offices of the civil government in the matter of reducing or discharging subordinate officials or employees, it is deemed advisable

to call attention to the fact that under act numbered twenty-five of the Commission the approval of the civil governor [or secretary of department] is a prerequisite to the discharge of any person in the classified service, and to prescribe the following regulations, which shall govern cases of this character:

(1) When the head of a bureau or office deems it necessary to recommend a subordinate official or employee for reduction in class or grade, he will in writing notify the person affected of the proposed action and the grounds upon which such action is premised, and will prescribe a reasonable period, which shall not be less than twenty-four hours, within which a written reply may be submitted if desired. Upon receipt of the reply of the person recommended for reduction, or the expiration of the period within which such reply should have been submitted, the head of the bureau or office will forward to the civil service board a certified copy of the letter of notification and the reply, if any shall have been received, together with an appointment in accordance with the reduction recommended. These papers will be promptly forwarded to the governor [or secretary of department] by the board together with its recommendation in the case for final action.

(2) In case of proceedings to remove an official or employee for cause, the head of the office may suspend such person at once, if he deem that course necessary, and, in any event, shall in writing notify the person in interest that he is to be recommended for removal for cause, and the ground upon which such recommendation is based, at the same time prescribing a reasonable period within which a written answer and any desired evidence shall be submitted, such period to be not less than twenty-four hours after the actual receipt of the notification by the person recommended for removal. In the event of no response being received within the period prescribed, evidence of the receipt of the written notification, together with a certified copy of same, will be forwarded to the civil service board. If reply has been received, it will be similarly forwarded, with a certified copy of the notification mentioned, together with any other papers in the case. The board will promptly forward, with comment and recommendation, all the papers in the case for final action. If such action be approval of the recommendation to remove for cause, the person affected will be dropped from the rolls of his office as discharged on the day he was suspended, if such action shall have been taken by the head of the office to which he pertains; otherwise his discharge will be on the date of receipt by the head of the office in interest of the notification of approval by the civil governor [or secretary of department].

(3) Under no circumstances shall a civil government official or employee so construe the provisions of any law now in force as to authorize or require the official publication of the cause of removal of any person from the Philippine civil service in more specific terms than, "For the good of the service."

II. In every instance of a tender of resignation by an official or employee occupying a position in the classified Philippine civil service, it shall be the duty of the officer authorized to act thereon to accept or decline to accept the same in writing, and, if resignation be accepted, to clearly state the character of the services rendered by the person resigning and whether or not, in the light of present information, a possible future application for reinstatement would be favorably considered. In the event of a statement to the effect that such application would not be favorably considered, reasons therefore shall be stated and the person in interest informed that he may, should he so desire, submit a reply and such other evidence as he may elect in writing. When completed all the papers in the case will be forwarded to the Philippine civil-service board for file, except in case of objections to reinstatement, in which event the papers will be forwarded by the board with its recommendation for review and final action. For obvious reasons no official or employee should be continued in service who can not be recommended for reinstatement were he to resign.

III. Discourtesy to the public, to private individuals, or to government officials or employees, drunkenness, dishonesty, chronic or flagrant neglect of duty, notoriously disgraceful or immoral conduct, pursuit of private business enterprise to the detriment of official duties, or incompetency, shall be considered reasons demanding proceedings to remove for cause. Any official who knowingly continues in the public service a person guilty of any of the above-named derelictions shall thereby render himself liable to removal from office for cause.

LUKE E. WRIGHT,  
*Acting Civil Governor.*

EXECUTIVE ORDER }

No. 4.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,

EXECUTIVE BUREAU,

Manila, March 1, 1903.

Executive Order Numbered One hundred and twelve, dated December first, nineteen hundred and two, is amended to read as follows:

The following regulations shall govern the matter of leaves of absence granted under the provisions of Act Numbered Eighty to all officials, including heads of offices or bureaus, and to all employees, filling appointive offices and positions of trust and employment under the government of the Philippine Islands, and are hereby published for the information and guidance of all concerned in order that a uniform practice may obtain throughout the service. All orders heretofore issued from the office of the military governor and from this office relating thereto are hereby revoked.

I. Heads of offices or bureaus are directed to keep a systematic record, on a form provided for that purpose, of leaves of absence of all officers and employees connected with their offices or bureaus respectively, and to enter daily upon this record all absences from duty, showing whether with leave, without leave, or on sick leave, and to forward to the civil-service board at the beginning of each month, on Form Three furnished by said board, a statement of the absences of all officers and employees from any cause whatever during the preceding month.

II. In submitting statements of leaves of absence, preliminary to granting leave to officers and employees under the provisions of sections two and three of Act Numbered Eighty, all heads of offices or bureaus will forward a prompt and clear report through the civil service board, on a form prescribed by said board, showing all absences from duty, including therein the period or periods of leave, if any, previously enjoyed, and whether with leave, without leave, or on sick leave.

III. (a) Applications for accrued leave for a period of more than two days must be made in writing one week in advance, wherever possible, of the date on which the leave is desired to become effective, upon Form Numbered Thirty-nine, Philippine civil-service board, to the head of the office or bureau for recommendation and transmission through said board to the proper executive officer authorized to exercise executive control as contemplated in Act Numbered Two hundred and twenty-two.

(b) Accrued leave of absence of an employee in the insular civil service shall be computed pro rata in accordance with the schedule contained in section two of Act Numbered Eighty. The leave of an employee accruing while he was connected with the Army or Navy shall be computed from the date of detail to civil duty; in the case of an officer, on the basis of the pay and allowance received by him during his detail; and in the case of an enlisted man, on the basis of the annual salary first received by him after discharge from the Army or Navy: *Provided*, That no time intervened between the time of such discharge and his appointment in the civil service, in which event no leave will be allowed during the period of his detail while connected with the Army or Navy.

(c) An employee who is separated from the civil service without prejudice (namely, without cause) may be given leave with pay, and his name shall remain on the pay roll at the rate he is then receiving for a period equaling in money value the period of accrued leave, estimated in accordance with the schedule provided in section two of Act Numbered Eighty.

(d) An employee who is granted leave for vacation purposes shall be given leave with pay at the rate he is then receiving for a period equaling in money value the period of accrued leave, estimated in accordance with the schedule provided in section two of Act Numbered Eighty; and he may be granted, if he so desires, such additional leave, without pay, as will give him the aggregate length of time on leave, with and without pay, as provided in the aforesaid schedule.

IV. (a) All applications for leave of absence on account of illness for a period of more than two days must be made on Form Numbered Forty, Philippine civil-service board, and transmitted as in the case of applications for accrued leave: *Provided*, That sick leave shall not be granted in advance.

(b) When it becomes necessary for an officer or an employee to avail himself of the provisions of section three of Act Numbered Eighty, notice must be sent immediately to the head of the office or bureau in which he is employed. Where an officer or an employee contemplates leaving the islands on account of illness he must submit an application on Form Numbered Forty and a medical certificate on Form Numbered Forty-one described in paragraph (c) of this section. Permission to be absent may thus be obtained and the office record will show "absent with leave" each day until return to duty, which shall not be construed as sick leave unless satisfactory evidence of illness is furnished as required in paragraph (c) of this section.

(c) Within five days after return to duty from said leave of absence, the officer or employee shall file with the head of the office or bureau a statement in regard to his absence on account of illness (on Form Numbered Forty, if not previously filed), which must be made under oath before an officer in the Philippine Islands duly authorized to administer oaths, accompanied by a certificate made on Form Numbered Forty-one by the attending physician or physicians during the period of his illness. Said certificate or certificates shall give fully and specifically the name, nature, etiology, history, and description of each disease or disability from which the employee was suffering, the exact period or periods, giving dates, during which the physician writing the certificate treated him, the period or periods, if any, during which he was a patient in a hospital, and if not in a hospital the exact length of time the employee was actually confined to his house, and the length of time such disease wholly incapacitated him from performing the duties of his position. A duplicate copy of report of laboratory test or examination made in each case must accompany the medical certificate. In all cases the certificate of illness must be made by a reputable practicing physician or surgeon. A medical reexamination may be made and a report rendered thereon by a duly authorized medical examiner when so directed by the civil governor or by a secretary of one of the departments. If it shall be shown that the disease named was due to immoral or vicious habits, no allowance for leave on account of illness shall be made, but such leave shall be chargeable against unused accrued leave, and if in excess of accrued leave it shall be without pay, as no such cases will be regarded as meritorious. The physician must state whether or not there are any indications whatever that the disease named was due to immoral or vicious habits: *Provided*, That the physician before making a report or expressing an opinion, as required herein, shall state to the applicant that he will not make any report whatever or submit a medical certificate if he formally withdraws his application for sick leave for the period of such illness, and substitutes therefor an application for accrued leave. If the evidence of illness submitted is satisfactory, sick leave will be granted with pay for the time during which such employee was incapacitated on account of such illness, provided that such period shall not exceed sixty days in any one calendar year.

V. Leaves of absence not exceeding two days may be granted in the discretion of the head of an office or bureau, and in case of illness without the certificate of an attending physician, but the applicant must certify that he was ill and unable to perform his official duties.

VI. Temporary and emergency employees are not entitled to the benefits of leaves of absence provided by any existing law or order.

VII. Leave of absence for any reason other than serious illness must be contingent upon the necessities of the service, and although definitely provided by law it is not an inherent right which may be recognized without due regard for the interests of the public service.

VIII. In computing periods of absence from duty, there is no authority of law for considering such absence on Saturday as less than one entire day, Saturday being a short day and not a half holiday.

IX. Officials and employees on leave of absence are required to report to the heads of their respective offices or bureaus at the end of each month by registered mail their post-office addresses for the ensuing month and shall promptly report in a similar manner and in sufficient detail every unexpected and unavoidable delay which may have occurred during the period contemplated by their leaves of absence.

X. No official or employee holding a classified position in the Philippine civil service shall be dropped from the rolls of his office for unexplained absence in the United States until at least forty days after the expiration of the period of absence contemplated by the leave granted.

XI. All officers and employees who are granted leave of absence for the purpose of visiting the United States and who contemplate returning to duty upon the expiration of such leave of absence shall, before leaving the archipelago, make application to this office for transportation from San Francisco returning to Manila. In each such application the date of the expiration of leave of absence and the post-office address of the applicant while in the United States will be stated. Subsequent communication regarding return transportation and prompt report of any change occurring in the applicant's post-office address will be directed by him to the Chief of the Bureau of Insular Affairs, War Department, Washington, District of Columbia, and a duplicate copy of each such communication mailed at the same time to the executive secretary, Manila.

WM. H. TAFT,  
Civil Governor.

EXECUTIVE ORDER }  
No. 50.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
EXECUTIVE BUREAU,  
Manila, July 7, 1903.

No chief of bureau or office shall, directly or indirectly, invite, solicit, or even discuss with an employee, subordinate, or officer of another bureau or office his transfer to the bureau or office of such chief until the consent in writing of the head of the bureau or office in which the desired employee or officer is a subordinate, or of the civil governor, is first had.

WM. H. TAFT, *Civil Governor.*

EXECUTIVE ORDER }  
No. 67.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
EXECUTIVE BUREAU,  
Manila, August 5, 1903.

Disbursing officers are hereby expressly prohibited from paying any salary to, or upon the order of, any employee appointed in the United States to a position in the Philippine civil service under the provisions of act numbered two hundred and twenty-four or act numbered six hundred and forty-three while such employee is enjoying accrued leave of absence which may have been granted him prior to his having completed two years of service under the insular government, until five days after the return to duty of such employee, and during which five days he shall have demonstrated his good faith and shown to the satisfaction of the head of the bureau or office in which he is employed that it is his intention to continue in the performance of his duties. In the event that it shall appear during such five days of employment that it is not the intention of the employee to continue in the performance of his duties any longer than to enable him to withdraw all back salary which may at that time be due him, such payment shall be withheld, and full report thereof forwarded for proper action by the head of the bureau or office, through the Philippine civil-service board, to the civil governor or head of the executive department, respectively, to which such bureau or office may pertain.

WM. H. TAFT, *Civil Governor.*

EXECUTIVE ORDER }  
No. 75.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,  
EXECUTIVE BUREAU,  
Manila, September 2, 1903.

In order that there may be uniformity of action by heads of departments in the matter of the return to the service of persons separated therefrom before having served the full period prescribed by law or the contracts under which they were appointed, it shall be the rule that no person separated from the public service of the Philippine government before having served the full period prescribed by law or contract shall again be allowed to enter the same in any of its branches until he shall have made good all loss caused by such separation and shall have refunded to the government that proportion of the total expense incurred by it by reason of his appointment, including salary and traveling expenses prior to the date he actually took up the duties of his position, as the time he failed to serve is to the time required by said law or contract, and then only on the recommendation of the head of the department from which he was separated.

All amounts so refunded to the insular government shall be paid to the disbursing officer of the executive bureau, and by him deposited in the insular treasury to the credit of the insular salary and expense fund, and proper accounting therefor shall be rendered to the insular auditor.

Any person desiring to qualify for reentrance to the service under the provisions of this executive order shall first take the matter up with the civil-service board.

WM. H. TAFT, *Civil Governor.*

FORMS PRESCRIBED BY THE PHILIPPINE CIVIL-SERVICE BOARD FOR THE USE OF  
HEADS OF BUREAUS AND OFFICES, OFFICERS AND EMPLOYEES, AND APPLICANTS  
FOR EXAMINATION.

*Form No. 2. Application for examination (English and Spanish).—To be filed by applicants for examination with a view to appointment to clerical, professional, or technical positions.*

*Form No. 3. Monthly report of changes and absences of officers and employees* (English only).—To be forwarded to the civil-service board on the first of every month by the head of each bureau or office, giving all changes and absences for the preceding month. The provincial board will render this report for the province, the officers and employees under all the provincial officers (governor, treasurer, etc.) being included in one report.

*Form No. 7. Request for transfer* (English only).—To be used by heads of bureaus and offices in requesting the transfer of an employee from one classified position to another.

*Form No. 8. Request for certification for reinstatement* (English only).—To be used by heads of bureaus and offices in requesting the reinstatement of a person who has served more than six months in a position classified under the civil-service act and rules.

*Form No. 9. Request for certification for original appointment* (English only).—To be used by the heads of bureaus and offices in requesting a certification from the board's registers of names of persons eligible to appointment to a classified position.

*Form No. 18. Report of selection for appointment* (English only).—To be used by heads of bureaus and offices in reporting the selection or selections for appointment made from certification of names furnished by the board in response to request on Form No. 9.

*Form No. 32. Oath of office* (English only).—To be executed by the appointee on the date of entry into the position to which promoted, reduced, transferred, reinstated, or originally appointed.

*Form No. 33. Appointment* (English only).—To be forwarded to the board by the heads of bureaus and offices for every appointment in the classified service, whether by promotion, reduction, transfer, reinstatement, or original appointment. This form is not to be forwarded until the appointee has entered upon the performance of his duties; the date of such entry will be the date the appointment is to take effect. The character of the appointment is to be stated in the last blank line, e. g., "Transfer from the ——— bureau at \$900;" "Reinstatement;" "Probational appointment;" "Promotion from \$720." Form No. 33 is not to be used in appointing a person to any unclassified position or in cases of temporary or emergency employment. (See Civil Service Rule X.)

*Form No. 35. Application for the trades and skilled occupations* (English and Spanish).—To be used by applicants for the trades and skilled occupations. In most cases the examination consists wholly of the evidence of experience, training, character as workman, age, and physical condition contained in this form. In other cases, additional elements, consisting of practical questions, or the second or third grade examination, are added to the above.

*Form No. 39. Application for accrued leave of absence* (English only).—To be filed by the officer or employee one week in advance, wherever possible, of the date on which the accrued leave requested is desired to become effective. The first indorsement on this form, containing the service record and report of previous absences on accrued and sick leave, should be completely filled by the head of the bureau or office, and the application promptly forwarded to the board. This form is not to be used where the accrued leave requested is for two days or less.

*Form No. 40. Application for leave of absence on account of illness* (English only).—To be filed by the officer or employee one week in advance, wherever possible, of the date on which he intends to leave the islands, and within five days after return to duty from absence on account of illness in every case, whether or not the applicant has been absent from the islands and has previously filed Forms Nos. 40 and 41. The first indorsement on Form No. 40 should be completely filled by the head of the office or bureau, and the application promptly forwarded to the board. This form is not to be used where the sick leave requested is for two days or less.

*Form No. 41. Medical certificate* (English only).—Form No. 40 filed within five days after return to duty from absence on account of illness must always be accompanied by Form No. 41, completely executed by the physician or physicians who were in actual attendance upon the applicant for the whole of the period or periods for which sick leave is requested. Form No. 41 must also accompany every application on Form No. 40 for permission to leave the islands on account of illness.

*Form No. 47. Application for examination—supplementary certificate for professional, scientific, or technical positions* (English only).—To be filed by all applicants for examination with a view to appointment to professional, scientific, or technical positions, as a supplement to Form No. 2, which must also be filed by them.

*Form No. 48. Daily time record*.—For employees in the classified and unclassified civil services entitled to leaves of absence. The employee in charge will verify the correctness of these records, and forward them to the chief of the bureau, who will

use them as a basis for rating punctuality and attendance in the quarterly efficiency report on Form No. 54 to the civil-service board. The daily time record on Form No. 48 will be retained in the bureau or office.

**Form No. 52. Efficiency record of employees.**—To be compiled by the chief of bureau, chief of division, or other designated employee, in accordance with the provisions of section 4, Civil Service Rule IX. This form will be retained in the bureau or office as a permanent office record.

**Form No. 53. Service record of employee.**—To be retained in the bureau or office, in book form.

**Form No. 54. Quarterly efficiency report.**—To be compiled from data obtained from Forms 48 and 52, and forwarded to the civil-service board promptly at the end of each quarter, in accordance with the provisions of section 4 of Civil Service Rule IX. The provincial board will render this report for the province, employees in all provincial offices being included in one report. The judge of each judicial district outside of Manila will render this report for each court of first instance in his district, one report being rendered for the entire district.

**NOTE.**—The above forms are furnished by the civil-service board on request, and should always be ordered by form number. Provincial officers should telegraph their orders when necessary.

The following table shows the results of all examinations (noneducational excepted) held by the Philippine civil service board from October 1, 1902, to September 30, 1903:

## EXHIBIT S.

---

### ACTS PASSED BY THE LEGISLATIVE COUNCIL OF THE MORO PROVINCE, PHILIPPINE ISLANDS.

#### Act No. 1.

AN ACT to provide for the employment of certain subordinate employees in the office of the treasurer of the Moro Province.

*By authority of the Philippine Commission, be it enacted by the legislative council for the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the treasurer of the Moro Province the following subordinate employees:

(a) One examiner at an annual salary of fifteen hundred dollars (\$1,500.00), currency of the United States, or its equivalent in Philippine currency.

(b) One clerk at an annual salary of one hundred and eighty dollars (\$180.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 2. The examiner shall give to the treasurer of the Moro Province a sufficient bond, to be approved by him, in the amount of five thousand dollars (\$5,000.00), currency of the United States, conditioned to secure the faithful performance of his duties and the accounting for all public funds coming into his hands as such employee.

SEC. 3. Subject to amendment or annulment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 4, 1903.

---

#### Act No. 2.

AN ACT authorizing the treasurer of the Moro Province to make requisition upon certain officials of the insular government for moneys of which he is the lawful custodian.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. The treasurer of the Moro Province is authorized and directed to make requisition upon the insular treasurer, collectors of customs, and collectors of internal revenue or other employees of the insular government within the territorial limits of the Moro Province, for all moneys properly belonging to the Moro Province or of which he is the lawful custodian, in accordance with the provisions of Act No. 787 of the Philippine Commission, which may have come into the possession of such officials from and including the 15th day of July, 1903, or which may come into their possession at any future time.

SEC. 2. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 4, 1903.

---

#### Act No. 3.

AN ACT to provide for the organization of the office of district treasurer of the district of Zamboanga, and fixing the salaries of the employees thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission, and its subsequent amendments, there shall be employed in the office of the district treasurer of the district of Zamboanga the following employees:

(a) A treasurer of the district at an annual salary of nineteen hundred dollars (\$1,900.00), currency of the United States, or its equivalent in Philippine currency.

(b) One clerk at an annual salary of three hundred and sixty dollars (\$360.00), currency of the United States, or its equivalent in Philippine currency.

(c) One clerk at an annual salary of one hundred and fifty dollars (\$150.00), currency of the United States, or its equivalent in Philippine currency.

(d) One clerk at an annual salary of one hundred and twenty dollars (\$120.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 2. The district treasurer and clerks as above provided for, in addition to their duties as such employees, shall perform such additional services as deputies or clerks in the office of the treasurer of the Moro Province as the insular treasurer or the treasurer of the Moro Province may from time to time direct, without thereby being entitled to receive other compensation than as provided in section 1 of this act.

SEC. 3. The district treasurer shall give a sufficient bond to the treasurer of the Moro Province, to be approved by him, in the amount of ten thousand dollars (\$10,000.00), currency of the United States, conditioned to secure the faithful performance of his duties, and the accounting for all public funds coming into his hands as such district treasurer and as a deputy in the office of the treasurer of the Moro Province, as provided in section 2 of this act.

SEC. 4. The clerks provided for in section 1 of this act may, in the discretion of the treasurer of the Moro Province, be required to give such bond to the treasurer of the Moro Province as he may direct, conditioned to secure the faithful performance of their duties and the accounting for all public funds coming into their hands as clerks or deputies in the office of the district treasurer or as clerks or deputies in the office of the treasurer of the Moro Province, as provided in section 2 of this act.

SEC. 5. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 4, 1903.

#### ACT No. 4.

AN ACT to provide a seal for the Moro Province and to provide a seal for temporary use.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province that:*

SECTION 1. The provincial engineer of the Moro Province is authorized and directed to provide for the use of the Moro Province an official seal. The official seal shall have a diameter of two and one-fourth inches, and shall bear, running from left to right, on the upper outside edge, the words, "U. S. Moro Province. P. I.," and on the lower outside edge the words, "Official Seal." There shall be in the center of the seal a design showing a Moro vinta in a foreground of sea, a crescent in a background of sky, laid over this a map of the Moro Province, and over the whole a kris and a barong crossed.

SEC. 2. Until such time as the official seal of the Moro Province shall have been provided, the official seal shall consist of a scroll with the word "Seal" and the initials of the secretary of the Moro Province inscribed therein.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 7, 1903.

#### ACT No. 5.

AN ACT to provide for the imposition and collection of a cedula tax.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. There shall be collected in each district of the Moro Province by the district treasurer, and in the subdistrict of Dapitan by the official who shall be designated to perform the duties of subdistrict treasurer, an annual tax of one peso, Philippine currency, to be called the cedula or registration tax, from every male person of eighteen years and not more than fifty-five years of age residing in such district or subdistrict, whether a native of the Philippine Islands, a citizen of the United States, or a foreigner, except a soldier, sailor, or officer of the United States Army or Navy, a member of a non-Christian tribe other than a member of Moro tribe, or a foreign consular officer exempted by treaty or international law. The gross amount of the receipts from the collection of the cedula tax shall constitute a part of the gen-

eral funds of the Moro Province, to be expended in the discretion of the legislative council for provincial, district, or municipal purposes.

SEC. 2. A cedula or certificate shall be issued to each person paying the tax, which shall contain an acknowledgment by the district or subdistrict treasurer of the receipt of the peso, the name of the person paying, his age, residence, place of nativity, his status, whether married or single, and his business or occupation. Upon the delivery to him of his cedula or certificate he shall sign the same with his usual signature in the presence of the collecting officer, who shall witness the signature. In case the taxpayer is unable to sign his name, he shall identify himself by his usual mark similarly witnessed.

SEC. 3. The cedula or certificate of registration herein provided for may be used for the purposes of identification, admitted in evidence, and must be presented by anyone liable to pay such tax whenever (1) he appears in any court of the Moro Province, either as a suitor or as a witness in his own behalf in any civil proceeding; (2) he transacts any business with any public office or officer; (3) he pays any taxes or receives money from any public funds; (4) he acknowledges any document before a notary public; (5) he assumes any public office, whether by appointment or by election, and (6) he receives any license, certificate, or permit from any public authority. Any person violating the provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction shall be fined not to exceed ten pesos, Philippine currency.

SEC. 4. A person liable to pay the cedula tax who has not paid it shall not be allowed to register as an elector or voter. A registration official who permits a person to register as an elector in violation of this section, or a person who so registers, shall be deemed guilty of a misdemeanor, and upon conviction shall be fined not to exceed ten pesos, Philippine currency.

SEC. 5. The district treasurer shall keep in his office, open to the inspection of any person, a register of all certificates of registration issued in his district. The municipal secretary of each organized municipality shall cause to be prepared in duplicate an alphabetical list of all persons liable to the payment of the cedula tax. He shall retain one list in his office, and forward the other duly certified to the district treasurer, who shall keep the same in his office open to the inspection of the public.

SEC. 6. Any person failing to pay the cedula tax at the time fixed in accordance with law, shall be liable to the payment of a penalty of one hundred per cent in addition thereto. The district treasurer or subdistrict treasurer may, in his discretion, enforce the payment of the cedula tax and penalty, after the same shall remain delinquent for fifteen days, by causing the delinquent to be prosecuted before the district governor, or such municipal presidente as the district governor may designate for that purpose, for such delinquency; and upon conviction the person so delinquent shall be sentenced to imprisonment for five days, or to pay a fine of fifteen pesos Philippine currency, and such imprisonment, or the payment of such fine, shall be deemed a satisfaction of the tax and penalty and entitle the person so convicted, at the expiration of his imprisonment, or upon the payment of the fine, to the cedula or certificate as though the tax and penalty had been paid in money.

SEC. 7. By consent of a district treasurer of a district where a person is resident, approved by the treasurer of the Moro Province, a person otherwise liable to the payment of the cedula tax may be exempted on a proper showing that through infirmity or otherwise he is unable to earn a living and is a pauper.

SEC. 8. The cedula tax for the year 1903 shall be due and payable in each district on or before a date fixed by the treasurer of the Moro Province within three months prior to December 31, 1903, by notices posted in conspicuous places in each municipality of the province and at the door of all municipal, district, and provincial buildings. In succeeding years the cedula tax shall be due and payable within three months prior to May 31: *Provided*, That Moros residing in the districts of Cottabato and Zamboanga shall not be liable to the payment of the cedula tax for the year 1903, and other Moros shall not be liable to the payment of the tax for the years 1903 and 1904. By the word Moro is understood natives of the Mohammedan faith.

SEC. 9. The form of the cedula certificate shall be prescribed by the insular treasurer, and blank books containing the same, with proper stubs or duplicate receipts, shall be purchased by the treasurer of the Moro Province from the insular treasurer at cost, and furnished by him to the district and subdistrict treasurers.

SEC. 10. All laws or parts of laws providing for the imposition and collection of cedula or registration taxes, and all provisions of law inconsistent with the provisions of this act, in so far as they may have been heretofore in force in the Moro Province, are hereby repealed.

SEC. 11. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 10, 1903.

## Act No. 6.

AN ACT to provide that the Moro Province shall be the beneficiary of the internal-revenue taxes.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. The gross amount of receipts from the collection of the industrial and stamp taxes, or internal-revenue taxes, shall constitute a part of the general funds of the Moro Province, to be expended in the discretion of the legislative council for provincial, district, or municipal purposes.

SEC. 2. All provisions of law inconsistent with the provisions of this act, in so far as they may have been in force heretofore in the Moro Province, are hereby repealed.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 12, 1903.

## Act No. 7.

AN ACT to provide for the organization of the offices of the district treasurers of the districts of Cottabato, Sulu, Davao, and Lanao, and fixing the salaries of the employees thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. There shall be employed in the office of the district treasurer of the district of Cottabato the following employees:

(a) A treasurer of the district, at an annual salary of eighteen hundred dollars (\$1,800.00).

(b) One deputy, at an annual salary of two hundred and forty dollars (\$240.00).

(c) One janitor, at an annual salary of one hundred dollars (\$100.00).

SEC. 2. There shall be employed in the office of the district treasurer of the district of Sulu the following employees:

(a) A treasurer of the district, at an annual salary of sixteen hundred dollars (\$1,600.00).

(b) One deputy, at an annual salary of two hundred and forty dollars (\$240.00).

(c) One janitor, at an annual salary of one hundred dollars (\$100.00).

SEC. 3. There shall be employed in the office of the district treasurer of the district of Davao the following employees:

(a) A treasurer of the district, at an annual salary of sixteen hundred dollars (\$1,600.00).

(b) One deputy, at an annual salary of two hundred and forty dollars (\$240.00).

(c) One janitor, at an annual salary of one hundred dollars (\$100.00).

SEC. 4. There shall be employed in the office of the district treasurer of the district of Lanao the following employees:

(a) A treasurer of the district, at an annual salary of fifteen hundred dollars (\$1,500.00).

(b) One deputy, at an annual salary of two hundred and forty dollars (\$240.00).

(c) One janitor, at an annual salary of one hundred dollars (\$100.00).

SEC. 5. The employees provided for in this act shall be appointed subject to the provisions of act No. 5 of the Philippine Commission, and its subsequent amendments. The salaries herein provided for are stated in currency of the United States, and shall be payable in such currency or in its equivalent in Philippine currency at the option of the treasurer of the Moro Province.

SEC. 6. Each of the district treasurers of the districts of Cottabato, Sulu, Davao, and Lanao shall give a sufficient bond to the treasurer of the Moro Province, to be approved by him, in the amount of seven thousand five hundred dollars (\$7,500.00), seven thousand dollars (\$7,000.00), seven thousand dollars (\$7,000.00), and six thousand dollars (\$6,000.00), currency of the United States, respectively, which bond shall be conditioned to secure the faithful performance of his duties, and the accounting for all public funds coming into his hands as such district treasurer: *Provided*, That the treasurer of the Moro Province may in his discretion at any time require any district treasurer in the Moro Province to furnish bond in a greater amount than provided by law.

SEC. 7. The deputies employed in the offices of the district treasurers in accordance with the provisions of this act may, in the discretion of the treasurer of the Moro Province, be required to furnish such bond as he may direct, to be approved by him, and conditioned to secure the faithful performance of their duties, and the accounting for all public funds coming into their hands as such employees.

SEC. 8. None of the employees provided for in this act, other than the district treasurers, shall be appointed until such time as the treasurer of the Moro province shall recommend their appointment to the respective district governors.

SEC. 9. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 13, 1903.

---

Act No. 8.

AN ACT defining the crimes of slaveholding and slave hunting, and prescribing the punishment therefor.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Every person who buys, holds, sells, or otherwise disposes of any person as a slave, or who, directly or indirectly, causes any person to be held in involuntary servitude, except as provided by law, is guilty of slaveholding, and upon conviction shall be imprisoned not more than twenty years and be fined not more than ten thousand pesos Philippine currency.

SEC. 2. Every person who buys, captures, abducts, or receives any person with intent to sell or otherwise dispose of such person as a slave, or to cause such person to enter into involuntary servitude, or who knowingly aids or abets the recapture or detention of any person escaped from slavery for the purpose of returning such person to a condition of slavery or involuntary servitude, or who knowingly owns or is employed upon or has any interest in any vessel used or employed in the transportation of any person for the purpose of causing such person to enter into slavery or involuntary servitude in the Moro Province or elsewhere, is guilty of slavehunting, and upon conviction shall be imprisoned for not more than twenty years and be fined not more than ten thousand pesos Philippine currency.

SEC. 3. Any vessel employed with the knowledge and consent of the owner in the transportation of any person from or into the Moro Province, or within the limits of the same, for the purpose of disposing of such person as a slave or of causing such person to enter into involuntary servitude in the Moro Province or elsewhere, and any property, shelter, subsistence, arms, animals, or equipments employed, with the knowledge and consent of the owner, in the trafficking in, hunting, capturing, or recapturing of slaves, shall be subject to confiscation, and upon due proof and after due sentence before the proper court shall be sold at public auction. The proceeds of such sale shall constitute a part of the funds of the Moro Province.

SEC. 4. Nothing in this act shall be construed as countenancing or recognizing the legality of slavery or involuntary servitude as heretofore existing in the Moro Province, or as exempting or excusing any person who may have heretofore committed any of the acts defined and punished in this act as slaveholding or slave hunting from prosecution and punishment under the laws of the Philippine Islands.

SEC. 5. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted September 24, 1903.

---

Act No. 9.

AN ACT to provide for the employment of certain subordinate employees in the office of the governor of the Moro Province, and fixing the salaries thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the governor of the Moro Province the following subordinate employees:

- (a) One stenographer, class 7.
- (b) One clerk, class H.

SEC. 2. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 28, 1903.

## Act No. 10.

AN ACT to provide for the employment of certain subordinate employees in the office of the secretary of the Moro Province, and fixing the salaries thereof:

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the secretary of the Moro Province the following subordinate employees:

- (a) One chief clerk, class 7.
- (b) Two stenographers, class 8.
- (c) One clerk, class 10.
- (d) One clerk, class H.
- (e) One messenger, at an annual salary of one hundred and twenty dollars (\$120.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 2. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 28, 1903.

## Act No. 11.

AN ACT to provide for the employment of an assistant attorney for the Moro Province and other subordinate employees in the office of the attorney for the Moro Province, and fixing the salaries thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. There shall be employed in the office of the attorney for the Moro province an assistant attorney for the Moro Province, who shall be a lawyer admitted to practice in the supreme court of the Philippine Islands, or in the supreme court of a State or Territory of the United States. He shall receive an annual salary of not more than twenty-five hundred dollars (\$2,500.00), currency of the United States, or its equivalent in Philippine currency, to be fixed by the governor of the Moro Province in the appointment. He shall, under the supervision of the provincial attorney, represent the public in the prosecution of crimes and misdemeanors in any of the courts within the Moro Province, when the public interest requires it, and shall render such other services in the performance of the duties of the provincial attorney as may be assigned to him. Before assuming office he shall take the oath prescribed for provincial officers by Act No. 83 of the Philippine Commission.

SEC. 2. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the attorney for the Moro Province the following subordinate employees:

- (a) One clerk, class D.
- (b) One clerk, class K.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 28, 1903.

## Act No. 12.

AN ACT to provide for the employment of certain subordinate employees in the office of the engineer of the Moro Province, and fixing the salaries thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the engineer of the Moro Province the following subordinate employees:

- (a) One chief clerk, class 8.
- (b) Two clerks, class J.

SEC. 2. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 28, 1903.

## Act No. 13.

AN ACT to provide for the employment of certain subordinate employees in the office of the superintendent of schools of the Moro Province, and fixing the salaries thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the superintendent of schools of the Moro Province the following subordinate employees:

- (a) One clerk, class 9.
- (b) Two translators, class A.
- (c) One messenger, at an annual salary of ninety dollars (\$90.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 2. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 28, 1903.

## Act No. 14.

AN ACT appropriating the sum of ten thousand five hundred and fifty-seven pesos and seventy-five centavos, in Philippine currency, or so much thereof as may be necessary, in part compensation for the fiscal year nineteen hundred and four, and for other purposes.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. The following sums, in Philippine currency, or so much thereof as may be respectively necessary, are hereby appropriated, out of any funds in the treasury of the Moro Province not otherwise appropriated, in part compensation for the service of the Moro Province, for the first quarter of the fiscal year nineteen hundred and four unless otherwise stated:

## PERSONNEL OF THE MORO PROVINCE.

Salaries and wages, nineteen hundred and four: Provincial treasurer, at eight thousand pesos per annum; provincial attorney, at eight thousand pesos per annum; superintendent of schools, at eight thousand pesos per annum; two thousand two hundred and twenty-two pesos and sixteen centavos.

Regular supplies, nineteen hundred and four: Office furniture and fixtures, stationery, blank forms, record books, etc., eight thousand pesos.

Rents, nineteen hundred and four: For provincial offices, courts of first instance, jail houses, etc., thirty-three pesos and thirty-three centavos.

## DISTRICT OF ZAMBOANGA.

Salaries and wages, nineteen hundred and four: District treasurer (class 6), at three thousand eight hundred pesos per annum; one clerk, class H, at seven hundred and twenty pesos per annum; one clerk, class K, at three hundred pesos per annum; three hundred and two pesos and twenty-six centavos.

Total appropriations for all purposes ten thousand five hundred and fifty-seven pesos and seventy-five centavos in Philippine currency or so much thereof as may be necessary.

SEC. 2. The appropriations herein made shall be withdrawn from the provincial treasury in Philippine currency or United States currency at the option of the provincial treasurer.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 29, 1903.

## Act No. 15.

AN ACT to provide for feeding and clothing civil prisoners confined in military guardhouses.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Whenever in accordance with the provisions of Circular No. 12, issued November 20, 1902, from headquarters department of Mindanao, the commanding

officer of any post or station within the Moro Province shall, upon the written request of a judge of a court of first instance, a justice of the peace, or the presiding officer of a district court, confine any civil prisoner in a military guardhouse or prison, pending trial, or for the execution of sentence, or pending transfer to the proper prison after conviction, he shall be paid from provincial funds for supplying necessary food the amount of twenty centavos, Philippine currency, per day for each prisoner so confined. If, however, any prisoner so confined shall be furnished a military ration, either a regular ration or a scout ration, the United States shall be reimbursed the cost of such ration. The necessary clothing for such prisoners shall be purchased by the provincial engineer and forwarded by him to the proper commanding officers for distribution.

SEC. 2. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 29, 1903.

---

ACT No. 16.

AN ACT to provide for the employment of certain subordinate employees in the office of the district governor and the district secretary of the district of Sulu, and fixing the salaries thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the district governor of the district of Sulu, the following subordinate employees:

- (a) One stenographer, class 8.
- (b) One interpreter, class A.
- (c) One messenger at an annual salary of one hundred and twenty dollars (\$120.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 2. Subject to the provisions of Act No. 5 of the Philippine Commission and its subsequent amendments, there shall be employed in the office of the district secretary of the district of Sulu, the following subordinate employees:

- (a) One clerk, class 10.
- (b) One janitor at an annual salary of ninety-six dollars (\$96.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 29, 1903.

---

ACT No. 17.

AN ACT temporarily to provide for the establishment and maintenance of a public school system in the Moro Province.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Until such time as the legislative council shall enact a general school law for the organization and support of a public school system for the Moro Province, all public schools hereafter established in the province, and from and including the first day of October, 1903, all schools heretofore established or maintained within the present limits of the province by an organized municipality, or by the bureau of education of the Philippine Islands, shall be included in and contained under the public school system of the Moro Province under the direct control and supervision of the provincial superintendent of schools, and shall be supported and maintained by appropriation from provincial funds. Until the appointment and qualification of their successors under this section, native teachers at present employed in the schools of such organized municipalities shall continue to be paid from municipal funds. The provincial treasurer shall reimburse the insular treasurer for the salaries of all American teachers in the employ of the bureau of education of the Philippine Islands who may after said date be retained or employed in any of the schools of the Moro Province: *Provided, however,* That the provincial superintendent of schools may, at any time, in his discretion, and subject to the provisions of law, establish additional schools, or discontinue any of the schools heretofore established.

SEC. 2. The provincial superintendent of schools shall have authority to establish night schools, but no night school class shall be maintained at the expense of the prov-

ince in which the average nightly attendance in each school month under each teacher is not at least ten pupils over the age of fourteen years. If it is found at the end of any month that the average attendance of any class has been less than ten, such class shall be discontinued. The teacher of such class shall, however, be entitled to pay for each night actual teaching during the month even if the average attendance has been less than ten. Teachers of night school classes shall be paid for nights of actual teaching at the rate not to exceed three pesos, Philippine currency, per night, for each American teacher, or one peso, Philippine currency, per night, for each native teacher.

SEC. 3. The actual expenses of teachers or employees of the provincial superintendent of schools while traveling or absent from their usual places of residence on official business authorized by the provincial superintendent of schools, shall be paid by appropriation from provincial funds.

SEC. 4. Subject to the provisions of Act No. 5 of the Philippine Commission, and its subsequent amendments, there may be employed in the public school system of the Moro Province the following teachers:

- (a) Thirteen teachers of English, class 9.
- (b) Seven teachers of English, class 10.

SEC. 5. There may also be employed, under such regulations and restrictions as to qualification as the provincial superintendent of schools shall prescribe, the following native teachers:

- (a) Two teachers at annual salaries not to exceed nine hundred dollars (\$900.00), currency of the United States, or its equivalent in Philippine currency.
- (b) One teacher at an annual salary not to exceed six hundred dollars (\$600.00), currency of the United States, or its equivalent in Philippine currency.
- (c) Two teachers at annual salaries not to exceed four hundred and twenty dollars (\$420.00), currency of the United States, or its equivalent in Philippine currency.
- (d) Six teachers at annual salaries not to exceed three hundred dollars (\$300.00), currency of the United States, or its equivalent in Philippine currency.
- (e) Fifteen teachers at annual salaries not to exceed two hundred and forty dollars (\$240.00), currency of the United States, or its equivalent in Philippine currency.
- (f) Thirty teachers at annual salaries not to exceed one hundred and eighty dollars (\$180.00), currency of the United States, or its equivalent in Philippine currency.
- (g) Twelve teachers at annual salaries not to exceed one hundred and fifty dollars (\$150.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 6. All laws or parts of laws inconsistent with the provisions of this act, in so far as they may have been heretofore in force in the Moro Province, are hereby repealed.

SEC. 7. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 30, 1903.

#### ACT No. 18.

AN ACT to provide for the employment of certain subordinate employees in the offices of the governor and secretary of the district of Zamboanga, and fixing the salaries thereof.

*By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, that:*

SECTION 1. Subject to the provisions of Act No. 5 of the Philippine Commission, and its subsequent amendments, there shall be employed in the office of the governor of the district of Zamboanga, the following subordinate employees:

- (a) One interpreter, class C.
- (b) One interpreter, class D.
- (c) One messenger at an annual salary of one hundred and twenty dollars (\$120.00), currency of the United States, or its equivalent in Philippine currency.

SEC. 2. Subject to the provisions of Act No. 5 of the Philippine Commission, and its subsequent amendments, there shall be employed in the office of the secretary of the district of Zamboanga, the following subordinate employees:

- (a) One chief clerk, class 9.
- (b) One typewriter, class C.
- (c) One interpreter, class D.
- (d) One clerk, class K.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, September 30, 1903.

## EXHIBIT T.

### REPORT OF GENERAL WOOD AS TO ABROGATION BATES TREATY.

ZAMBOANGA, MINDANAO, P. I., December 16, 1903.

His Excellency WILLIAM H. TAFT,  
*Governor of the Philippines, Manila, P. I.*

SIR: I have the honor to recommend that the so-called Bates agreement be abrogated to date from October 30, 1903, and that all payments made to Moros under it be stopped. The reasons for recommending the abrogation of this agreement are as follows:

First. The Moro signers of the agreement have neither the power nor the ability to make their part of it good, nor did they have such power at the time of signing, nor have they had it since.

Second. The agreement stands in the way of the establishment of a good government, inasmuch as it recognizes the authority of a class of men whom we have found to be corrupt, licentious, and cruel; men whose authority, as a matter of fact, is exercised, not through just laws, but through the power of slavery and peonage; through the power of execution without trial, and through the exercise of arbitrary power resulting in the indulgence of unbridled lusts, robbery, forcible seizure of property, etc. In brief, a condition has existed, and will exist, under this agreement, which at times amounts to anarchy, and is always one of serious disorder.

Third. Because of the oft-repeated offense of sending juramentados into Jolo. A juramentado is a man who has gone through a form of religious preparation and taken an oath to die killing Christians. He must necessarily have the consent of his dato, and his preparation is made under the direction of the priest, who practically preaches a holy war, so far as he is concerned, and encourages him with hope of future reward and happiness to commit murder and self-sacrifice. It is safe to say that every juramentado who has come into Jolo in recent years has come with the knowledge of the majority of the people of the section in which he lived, and the dato and principal priests of his district, all of whom have directly or indirectly taken part in preparing him for his mission. Without the approval of the chiefs and hadjis, it is doubtful if there could have been a single instance of juramentado in these islands.

Fourth. The persistent refusal of the Moros to observe the general instructions given them concerning slavery at the time of signing of the Bates agreement and often afterwards; instructions which prohibited the further seizure and enslaving of people. Notwithstanding this, they have continued raiding among the savage tribes, capturing and enslaving whenever opportunity afforded.

Fifth. They have frequently stolen property belonging to the United States and failed to give it up when it was demanded, the datos professing ignorance of its whereabouts, and even when told where it was said they could not recover and return it.

Sixth. Failure to administer justly and equitably such laws as they have; seizure of property of defenseless people, rape, murder—in fact, an entire failure to give their people reasonable security of life, person, and property. The constant existence of petty wars, raiding, and slavery, running off of stock, all combine to render life and property in the Sulu Archipelago insecure and to prevent the development of the country.

Seventh. The character of the Sulu laws alone considered is sufficient reason why we should have no agreement with them. Murder of a freeman, for instance, being punishable by the imposition of a fine of 105 pesos, or \$52.50 gold, while the maximum penalty for the murder of a slave is but half that amount. This is an illustration of the laws which have been in force during the agreement. Any man has been at liberty to murder his enemies and pay for them, in case he should happen to be tried, at the rate of \$52.50 apiece.

Eighth. The formation of a plot to surprise Jolo during the recent visit of Panglima Hassan with 1,000 armed Moros to that town, and to massacre the garrison and inhabitants, followed by the unprovoked attack upon United States troops on October 30 last while they were engaged in making a topographical map of the central portion of the island, and the further attack on November 12 of between 2,000 and 3,000 armed Moros upon United States troops at Siet Lake. These acts of treachery and rebellion were accompanied by the erection of forts and the construction of trenches and other works, indicating full preparation for a determined resistance against the authority of the United States.

A condition of well-organized rebellion existed involving the principal datos of the island. Panglima Hassan was at the head of it. Hassan is and has been a prominent Sultan's man, as distinguished from Datos Joakanain and Kalbi, who have been opposed to the Sultan.

Maharajah Indanan and other prominent representatives of the Sultan had contingents in this fight. Both Indanan and the Sultan claimed that they were unable to control their people; that they went against their will. Datos Joakanain and Kalbi confessed that a number of their followers took part in both attacks, but also claimed that they could not prevent it.

All these things are simply illustrations of the fact that this so-called Sultan and his datos have not sufficient authority to carry out the agreement. It can also be charged without doing them any injustice, that they have not tried to carry it out. There is little doubt that if the Sultan and the principal datos who signed the agreement had combined to prevent hostilities and acts of bad faith toward the United States, that they could have done it, and if unable they could at least have given warning and asked our assistance in controlling the unruly element.

The people of these islands are Mohammedans. Their faith teaches them that it is no sin to kill Christians, and they are taught by the priests to believe it is commendable. They are nothing more or less than an unimportant collection of pirates and highwaymen, living under laws which are intolerable, and there is no reason, in view of the numerous acts of bad faith on their part, why the so-called Bates agreement should be longer continued, involving as it does the payment of salaries to a number of people who have never been loyal to the United States, and who in their ignorance and conceit interpret this agreement as indicating that they are a people of great importance, and that we are willing to pay them to be good.

I inclose an extract from the report of Gen. George W. Davis for the year 1903; a report by Maj. H. L. Scott, governor of Sulu; also extracts from the minutes of various interviews between commanding officers of Jolo, the Sultan of various datos, together with extracts from various letters and reports on Moro matters. Nearly all of these show that a condition of serious disorder, often amounting to anarchy, has existed and that there has been neither law, order, or safety to life or property. They show also that the representatives of the United States have exercised the greatest patience and tolerance. The entire correspondence indicates plainly the undesirability of longer continuing the so-called Bates agreement.

Very respectfully,

LEONARD WOOD,  
Major General, U. S. Army,  
Commanding Department Mindanao, Governor Moro Province.

GOVERNMENT OF THE SULU DISTRICT OF THE MORO PROVINCE,  
OFFICE OF THE GOVERNOR,  
Jolo, Jolo Island, October 12, 1903.

The SECRETARY OF THE MORO PROVINCE,  
Zamboanga, P. I.

SIR: I have the honor to report that after an observation of the conditions existing in the Sulu Archipelago extending over a period of a month, and an examination of the records of Jolo, it is found that there is and has been no government of the Moros by the Sultan worthy of the name or such as is contemplated by the agreement made by Gen. J. C. Bates with the Sultan of Sulu August 20, 1899.

The Sultan depends for the little power he possesses upon the fact that he is the head of the Mohammedan religion in this Archipelago and upon the wishes of the more powerful chiefs, who are sometimes with him, at other times against him, and never, even when friendly, comply with his directions unless they feel it will be to their interest to do so. He has no power of his own to enforce his mandates, and must rely solely upon persuasion (see copy of his remarks herewith, marked 68, 87, 88, 90, 91, 96). The result of this is a state of anarchy throughout the Archipelago,

a condition set forth in the reports of the various commanding officers for some years past (extract copies of which are submitted herewith), also extract copies of the letters of the Sultan and the military governor of Jolo, and reports of conferences taken from the records of Jolo.

The Sultan, whatever may have been his attitude in the past, would now gladly inaugurate and maintain a stable government if he could, but he is entirely unable to accomplish this on account of a total inaptness, ignorance, and want of power.

The island of Sulu is divided up into various districts, such as those of Look, Lati, Tando, Parang, etc.; each district is occupied by a powerful chief, who is usually at enmity with all his neighbors. This results in a state of turmoil and insecurity of life and property which is appalling, and which is increased by the custom of punishing both parties in a controversy, usually by fines and the confiscation of the property at issue and of all bail, for the benefit of the Sultan and the chiefs; the amount seldom has reference to the gravity of the offense but only to the ability of the victim to pay, and runs as high as 2,000 pesos for very trivial offenses, but the Moro code calls only for a fine of 105 pesos for murder, one of the lightest offenses in the code. In case of failure or inability to pay, the man and his family are enslaved.

Peace has heretofore been kept with these arrogant chiefs (No. 63 and No. 64, letters herewith) by letting them alone under the Bates agreement, a policy of noninterference and of moral suasion. The result after four years of occupation is that Americans can not be permitted to go out of the gate of the walled city of Jolo without arms, or beyond the outposts without an armed escort, and within ten days past a Moro was permitted, probably encouraged by other Moros, to come in where he broke through the gate of the walled city, ran through the barracks yard, cutting a soldier across the back with his barong, and was killed on the main plaza of Jolo, where the ladies and children of the garrison usually congregate to listen to the music at guard mount, at the time the band had already formed for this purpose. Similar affairs have occurred many times in the past and are liable to occur again at any moment. A Moro has stated within ten days, in this office, that his carabao is his worst enemy, for as long as he has him he is liable to be killed by thieves in the endeavor to steal him, but he must keep him to make his crops.

This state of affairs has existed since the occupation by Americans, as well as long before under the Spaniards, with no prospect of amelioration under the Bates agreement or until the more powerful chiefs are regulated by a strong hand. The accompanying papers, as well as an immense number of complaints that come in daily and never recorded, plainly show that the Moro people are not getting any protection from the Sultan and but little from the United States; that the Bates agreement is a one-sided affair, lived up to only by the United States and violated daily by the Sultan through his inability to do otherwise; and it is my firm conviction that so long as this agreement is considered binding by the United States there is no possibility for the establishment of schools away from Jolo or the maintenance of peace, law and order, or progress in civilization in the Sulu Archipelago.

Very respectfully,

A true copy.

H. L. SCOTT,  
*Major, Fourteenth Cavalry, Governor.*

FRANK R. MCCOY,  
*Captain, Third Cavalry, Aid-de-Camp.*

---

*Extract from report of Major-General Davis for year of 1903.*

The Bates agreement with the Sultan of Sulu, which it appears was advised by the Schurman Commission, is an obstacle to the establishment of good government; but there have been many instances of failure on the Sultan's part to observe the requirements of the compact, and the bargain is voidable on the part of the United States, in its discretion. The Filipino legislation by Congress of March 2, 1902, makes no mention of this agreement, although it is expressly provided in the conditional approval of it by the President, notice of which was communicated to General Otis by the Secretary of War on October 27, 1899, that the agreement was made subject to the action of Congress under the Paris treaty; also that the Sultan and his datus be made to distinctly understand that this agreement was not to be understood as in any way to authorize or give the consent of the United States to the existence of slavery in the Sulu Archipelago. As slavery has been continually practiced there, and is now common, and as the Sulu Moros are known to have continued to purchase slaves from outside the Sulu group, and themselves to have engaged in

the slave trade continuously and persistently, the United States has further justification for declaring the agreement as null and void.

It was apparently the understanding of those who favored the negotiation of this instrument that its making would probably prevent an uprising of the Moros, and so spare the United States from another war with a fanatical and savage people. The fact is that there never has been a time for three years when a force of 500 soldiers in Jolo and two or three small gunboats could not preserve the peace or suppress any uprisings; but this was not known or not fully understood when this agreement was entered into.

A true copy.

FRANK R. MCCOY,  
*Captain, Third Cavalry, U. S. Army, Aid-de-Camp.*

ZAMBOANGA, MINDANAO, April 8, 1903.

*His Excellency the Sultan of Jolo, and the Dato Raja Muda, the Dato Attick, the Dato Kalbi, and the Dato Joakanain, Island of Jolo:*

I have the honor to state that I have been directed by the military governor of the Philippines to inform you that the President of the United States has confirmed and approved the agreement of August 20 last between the Sultan of Jolo and the Raja Muda, the Dato Attick, the Dato Kalbi, and the Dato Joakanain on the one part, and myself, as representing the United States, on the other, except as to the tenth article, which reads as follows: "Every slave in the archipelago of Jolo shall have the right to purchase freedom by paying to the master the usual market value." The subject of slavery or peonage will be reserved as a matter for future conference, determination, and agreement.

The Constitution of the United States forbids slavery in any part of the United States, and it remains to find an equitable mode of abolishing the institution. All other articles of the agreement are in force.

Very respectfully,

J. C. BATES,  
*Major-General, U. S. Vols.*

A copy of this letter has been sent to (1) His Excellency the Sultan of Jolo; (2) to the Dato Calbi and the Dato Joakanian, (3) to the commanding general, district of Mindanao and Jolo Archipelago; and (4) to commanding officer, Jolo, P. I.

Official:

S. E. SMILEY,  
*Captain, Fifteenth U. S. Infantry, Aide-de-Camp.*

A true copy.

H. L. SCOTT,  
*Major, Fourteenth Cavalry, Governor.*

HEADQUARTERS TWENTY-THIRD INFANTRY,  
*Jolo, Jolo Island, April 13, 1900.*

*To His Highness the Sultan of Jolo, from his brother, the governor of Tiange, greetings:*

I send you a letter and translation received from General Bates. Do not let it worry you. The people of the United States are just, but are opposed to slavery, which at one time existed in America. The question will probably be considered in a conference between the Moros and some authorized American representative, in which your pecuniary interests in your slaves will be recognized and some method will be agreed on so that slavery shall cease without pecuniary loss to yourselves. This method has been adopted by England in her dealings with some of her slave-holding colonies with satisfaction to all parties.

Very respectfully,

O. J. SWEET,  
*Major, Twenty-third Infantry, Military Governor.*

H. L. SCOTT,  
*Major, Fourteenth Cavalry, Governor.*

[Copy.]

JOLO, JOLO, P. I., July 3, 1902.

The COMMANDING OFFICER, Siassi, P. I.

SIR: I am directed by the post commander to communicate to you the following copies of records on file at these headquarters relative to the subject of slavery in the Jolo Archipelago for your information and guidance in dealing with this question.

Article 10 of the Bates agreement reads: "Any slave in the archipelago of Jolo shall have the right to purchase freedom by paying to the master the usual market value."

April 4, 1900, General Bates notified the Sultan and Datos Calbi and Joakanian that he had been directed by the military governor of the Philippine Islands to advise them that the President of the United States had approved and confirmed the agreement of August 20, 1899, except as to the tenth article, and "The subject of slavery or peonage will be reserved as a matter for future conference, determination, and agreement. The Constitution of the United States forbids slavery in any part of the United States, and it remains to find an equitable way of abolishing the institution. All other articles of the agreement are in force."

General Orders, No. 12, paragraph 3, current series, Headquarters Seventh Separate Brigade, as far as referring to slavery, was modified by cablegrams received from same source, as follows:

March 20. " \* \* \* the last two lines of paragraph 3, General Orders, No. 12, are not to be interpreted in a manner that would be a violation of any provisions of the articles of the agreement, but if any slave escapes from any Moro in Jolo or elsewhere and appeals to you for protection against recapture, you must not fail to give him that protection. So far as application to the Jolo Archipelago, the last phrase in paragraph 3 should be read as follows: 'And that those who leave their masters will be protected against recapture and forcible bondage.' It is not intended to disturb the relations existing between Moros and their slaves who wish to remain so, nor is it intended to invite persons held as slaves to flee."

May 29. \* \* \* "General Orders, No. 12, Seventh Separate Brigade, as modified by telegram of March 20, required that commanding officers should not return slaves to further bondage if they asked protection from recapture. This is not ordering an emancipation. If the Sultan or any Moro considers that this is in contravention of the Bates agreement with him and other datos, invite him to state the grounds of his objection and forward same. The order in question was approved by the division commander." \* \* \*

Complaint referred to in last cablegram has been made by the Sultan direct to the division commander, June 13.

Inclosed copy of a "letter of protection" may serve as a model in similar cases.

Very respectfully,

F. C. MARSHALL,  
*Captain and Adjutant, Fifteenth Cavalry, Adjutant.*

A true copy.

H. L. SCOTT,  
*Major, Fourteenth Cavalry, Governor.*

JOLO, P. I., May 12, 1902.

*To my son, his highness the Sultan of Jolo, from his father, the governor of Jolo, Colonel Wallace, greetings:*

With reference to your request to compel Datos Calbi and Joakanain to return to the Sultan certain runaway slaves, I hereby inform you that slavery is not recognized by the United States and I can not entertain any such proposition.

April 4, 1900, Gen. J. C. Bates directed the commanding officer at Jolo to advise the Sultan and Datos Calbi and Joakanain that the military governor of the Philippines had directed him to inform them that the President of the United States had approved and affirmed the agreement, except as to the tenth article, and that the subject of slavery will be reserved as a matter for future conference, determination, and agreement.

The military governor at Jolo conveyed this information to the Sultan and datos April 13, 1900.

The above notice is to be construed as requiring slavery to rest and remain in its status as it existed April 13, 1900; any person newly made a slave since that date is held not subject for redemption, if redemption should be determined upon by the United States Government.

Slaves coming to me for protection will be declared free. I will, however, in case the respective owner can prove that persons so liberated were slaves prior to April 13, 1900, and have been such since, give the owner a letter stating this fact. If redemption should take place, this letter will then enable him to receive compensation for the thus liberated person.

The foregoing does not apply to people who have agreed to work for a certain per-

son for a certain length of time to cancel a debt. They are not slaves. Such people, if they run away, might be compelled to return and complete their contract.

Very respectfully,

W. M. WALLACE,  
Colonel Fifteenth U. S. Cavalry, Military Governor.

*Conference between Brig. Gen. J. C. Bates and the heir apparent, secretary, chief advisor, and other chiefs, held at Jolo, P. I., July 24, 1899.*

[Extract.]

General BATES. We hope that it is going to be so free that people can go about as they want to and be good friends.

SECRETARY OF THE SULTAN. We understand that and hope things will assume that shape so that everybody can go where they want to.

General BATES. Where crimes and offenses are committed by Moros against Moros the government of the latter bring to trial and punish the criminals and offenders, which will be delivered to the government of the Sultan by the United States if in their possession. All other persons charged with crime will be delivered to the United States authorities for trial and punishment.

SECRETARY OF THE SULTAN. We understand that.

*Conference between Brig. Gen. John C. Bates and Datto Kalbi, held at Jolo, P. I., July 30, 1899.*

[Extract.]

Dato KALBI. He says he is put in a very unpleasant position. It may be known to you that he and his brother were not very good friends with the Sultan, but that they tried their best to be very good friends with him, and he hoped very much you would come to very good terms with the Sultan.

A true copy.

H. L. SCOTT,  
Major, Fourteenth Cavalry, Governor.

*Report No. 7: Jolo, September 14, 1899, Maj. S. A. Goodale, Twenty-third Infantry.*

[Extract.]

The relation between the Sultan and his various datos seems somewhat strained. Recent reports have been received here to the effect that the Sultan is going to punish Dato Puyo, of Siassi, Dato Amir Hussin, of Lugas, and Dato Tantong, of Bongao. Reason not known.

*Report No. 9: Jolo, P. I., October 31, 1899, Maj. C. J. Sweet, Twenty-third Infantry.*

[Extract.]

*Political situation.*—As stated in the last report, his highness the Sultan of Jolo was a bit disgruntled when we visited him, claiming \$500 per month in payment of his loss of Siassi.

He now retaliates by placing an embargo on all trade with the Americans. He has issued an order to all his people prohibiting trade with Siassi and Jolo and ordering all products to be delivered at Maibun. His object in doing this is to divert trade to his village, in order that he may collect revenues from exports and imports. His taste of revenues while in charge of Siassi has opened his eyes to the possibilities in this direction, and he will probably make every effort, unless interrupted, to divert trade from American ports. That he has been successful in his efforts has been manifested by complaints from Siassi, and an examination of the exports from this port for last month will show a decided decrease from the preceding month.

Three chiefs or datos have reported that the Sultan has fined several of their followers \$105 each for disobeying his order, and some not being able to pay this large fine have been placed in slavery. [There was no clause in the agreement that prevents the increase of slavery.]

*A new fort.*—The Sultan has issued an order to all his people to come to Maibun to build a new fort and trench. The fort was seen by us during our last visit to Maibun.

*Letter from Capt. Samuel Seay, Twenty-third Infantry, to the adjutant-general, Department of Mindanao and Jolo, dated Camp Gregg, Siassi, P. I., December 22, 1899.*

[Extract.]

I have the honor to inclose a letter received to-day from Dato Amilhussin, of Lugas. Its purport is to the effect that the Sultan of Jolo has imposed a fine of \$2,000 on one Salapudin, of Lugas, for bringing copra to Siassi to sell in violation of an order from the Sultan forbidding his subjects to trade with Siassi. He has sent one Hadji Tahib Sudgar to Lugas to collect said fine or, in default, kill said Sarapudin. This act of the Sultan being in direct violation of Article V of the treaty, I have notified Dato Amilhussin that pending instructions from you I will support him in case he resists the collection of this fine, and that I would advise him to send the man Sarapudin to this place, where protection can be given him.

*Letter from the Sultan to Amilhussin and to Panglima Sasapan, dated October 1, 1899.*

I beg to inform my grandfather that I desire him to seriously take the case of the following people in hand and fine them each two pieces of cloth (value per cloth, \$1.50) for acting contrary to the treaty or order of Panglima [name rubbed out], that trade with Tiange "Jolo" was prohibited. Before this decree was proclaimed

they did not care to trade with Tiange, and only did it out of spite, just as if they would find fault with an act agreed upon by everybody, especially by Maharaja Tain and Panglima [name rubbed out], therefore without fail fine them.

*Report No. 12: Jolo, P. I., July 19, 1900. Maj. O. J. Sweet, Twenty-third Infantry.*

[Extract.]

*Political situation.*—Since last February 24, 1900, the situation has remained practically unchanged; everything smooth and complaisant on the surface, but no desire or intention on the part of the authorities of working in harmony with the United States in improving the condition of the people, or of stopping robberies or piracies, unless there is some pecuniary benefit to be derived. The Sultan will put 200 or 300 armed men in the field to collect a fine as at Lugus, but he will not bother himself, or plead inability when asked to arrest pirates or thieves wanted by the United States authorities, and who are in his territory.

\* \* \* \* \*

*Piracy.*—The natives of the islands are natural pirates, the multitude of small reefs and islands favoring them. These piracies are committed against each other or against Chinamen. When boats and their crews disappear, the natives take it as a matter of course; it is only another case of piracy. No reports of piracy against whites have been received, but from evidence found by Captain Cloman in the Selungan affair, it would appear that piracies against Sandakan traders have been committed recently.

\* \* \* \* \*

I believe that the pirates left Parang the evening of the day of our arrival. That they were not captured by the Sultan's party was through collusion on the part of Rajah Muda; they had men enough to do it. No advance was made on the fort until they were vacated by the piratical supporter of Puding, the pirate chief.

Complaints are being received from Moros as to unjust treatment from the Sultan, datos, and others in authority, and when they complain to the Sultan, they are fined or can get no redress. I have investigated some of these complaints for my own information and find that justice, as we understand it, is unknown. The desire to get money overrides all other considerations. As an example of justice, a Moro lost a carabao by theft; he located the thief and complained to the Sultan, who fined the thief and confiscated the carabao.

H. L. SCOTT,  
Major, Fourteenth Cavalry, Governor.

*Report No. 13: Jolo, P. I., October 24, 1900. Maj. O. J. Sweet, Twenty-third Infantry.*

[Extract.]

*Political situation.*—The political situation remains the same as at last report. The lower classes have more confidence in us, but the Sultan and chiefs are obstructive factors in all our efforts for the betterment of the condition of the Moro people. They have no honest desire for American methods of honest administration, when the people will be benefited, unless there is some consideration in it for them. They are as overbearing toward their people as ever, and do not seem inclined to change their arbitrary methods or aid the people to better themselves. They act as if they thought the people were created to be their slaves or for their own aggrandizement. The lower class seem to be peaceable and as law abiding as they can be under the circumstances. Stealing is very prevalent, and will continue so until the chiefs resort to different methods of punishment. Fining and selling into slavery are practically the only punishment awarded for any offense, and as the fines are divided between the Sultan and datos and the judge, they are naturally large for small offenses and comparatively small for the worst offenders. The result is a person has to steal in order to pay his fine, or he will be sold as a slave.

*Piracy.*—The pirate Puding and his followers have not been delivered as yet. Reports of his whereabouts are so conflicting that it is impossible to say where they are.

(These pirates were never delivered.)

A true copy.

H. L. SCOTT,  
Major, Fourteenth Cavalry, Governor.

*Report No. 14: Jolo, P. I., February 1, 1901. Maj. O. J. Sweet, Twenty-third Infantry.*

[Extract.]

*Political situation.*—The political situation remains practically unchanged and will remain so until the government assumes control of affairs between Moro and Moro. The agreement simply perpetuates a condition of affairs which it is impossible to change under the agreement, and which does not admit progress either in civilization or the welfare of the mass of the people. This condition is good for the chiefs, as it gives them supreme and arbitrary powers, from which there is no appeal, and allows them to do what they like with the people.

The relations between the United States authorities and the natives are excellent and continue to improve daily. The intercourse between the Sultan and different chiefs is strained and borders so nearly on war that it is justifiable under their laws and customs to steal horses, cattle, and people from each other. Considerable correspondence has passed on account of thefts committed in the vicinity of Jolo, the property being taken into the interior.

The iron gates from the cemetery were stolen. \* \* \* All chiefs were notified to be on the lookout, but with no result.

A true copy.

H. L. SCOTT,  
Major Fourteenth Cavalry, Governor.

*Report No. 15: Jolo, P. I., May 1, 1901. Maj. O. J. Sweet, Twenty-third Infantry.*

[Extract.]

*Political situation.*—The political situation since last report remains the same; our relations with the Sultan and the chiefs are friendly. They will promise anything in the shape of reforms, but these are never carried out. The best way to look out for No. 1 is their only object in life, and every other interest is secondary to it. Our relations with the poor, who are the great mass of the people, are cordial. Nine out of ten of the population of the islands would gladly renounce all allegiance to the Sultan and datos and swear allegiance to the United States. There can be no progress until the United States takes complete control of the islands. Neither the Sultan nor any dato who is in the line of succession to the sultanate can make anything out of the country; they are bound up in traditions and ancestor worship, and to do anything their grandfathers did not do, would be wrong. In many things they are inferior to the American Indians, and I know of no trait in which they are superior. I have tried to bring the Sultan and datos together, but so far without success. The Sultan stands on his dignity and quotes erroneously from the Koran as to the duties of a Sultan toward his people; so far I can find no case in which he lives up to his model.

The poor people are very anxious that the rival powers should come together, as in case of war they are the ones to suffer.

\* \* \* \* \*

Difficulties exist between Indanan and nearly every one on the island, except the Sultan; they will continue until Indanan is killed. He has had a prominent part in my reports, is a noted thief and a Sultan man, so the Sultan pays no attention to any charges against him. The complaints of the Sultan against Tahir are not well founded.

*Major, Fourteenth Cavalry, Governor.*

JOLO, P. I., June 24, 1902.

THE ADJUTANT-GENERAL, SEVENTH SEPARATE BRIGADE,  
*Zamboanga, P. I.*

SIR: I have the honor to inform you that while the Sultan was staying at Tullei, on the 12th inst., a family of 7 persons appeared at these headquarters and asked for protection, as the Sultan was claiming them as his slaves. Conformably to orders received from the brigade commander, they were given a letter of protection, translated copy of which was furnished the Sultan.

The latter considered this action unjustified in view of the Bates' agreement and General Bates' letter of April 4, 1900, to the Sultan and datos regarding the subject of slavery; he wished to know by what authority I acted thus. I furnished the Sultan translated extract copy of General Orders No. 12, current series, headquarters Seventh Separate Brigade, and telegrams of March 20 and May 29 from the same source, as far as referring to the subject. The Sultan then informed me that he was going to complain direct to the division commander, and requested me to permit the official interpreter, Mr. Schuck, to translate his letter, to which I consented. I herewith inclose a copy of the Sultan's letter of complaint, for the information of the brigade commander.

Very respectfully,

W. M. WALLACE,  
*Colonel Fifteenth Cavalry, commanding.*

A true copy.

H. L. SCOTT,  
*Major, Fourteenth Cavalry, Governor.*

*Report No. 21. Jolo, P. I., July 2, 1902. Col. W. M. Wallace, Fifteenth Cavalry.*

[Extract.]

But true to Moro custom the hostile factions continue to manifest their ill feeling toward each other by mutual stealing of horses and cattle, thus keeping the fire of strife smoldering. To remove this constant menace to peaceable development and secure the punishment of thieves and evil doers, I have made every effort to bring

about a reconciliation between the Sultan, his principal opponents and Dato Kalbi and Joakanain.

\* \* \* \* \*

A family of 7 persons, living in Buz Buz, having been sent for by the Sultan, who claims all of them as his slaves, appealed to me for protection, which was accorded them conformably to general orders and instructions received.

\* \* \* \* \*

June 1 I received a letter from the Sultan's brother, the Dato Rajah Muda, informing me that he was going to Tapul Island, to settle cases, and that if evil reports should reach me concerning his doing there, not to believe them. Soon after I heard that the Rajah Muda was busy fining Tapul people under one pretence or another, but no official complaint was made to me. However, I had a hint conveyed to the Rajah Muda that his actions had come to my knowledge and an investigation was intended. He immediately decamped for Maibun, much to the relief of the Tapul people.

H. L. Scott,  
Major, Fourteenth Cavalry, Governor.

Report No. 23. Jolo, P. I., January 18, 1903. Col. W. M. Wallace, Fifteenth Cavalry.

[Extract.]

Thefts are increasing on the island of Jolo. Among others, numerous complaints came to me from the Sultan and Maharajah Indanan, who accuse Dato Kalbi and Joakanain's people of stealing horses and cattle, and from Dato Kalbi, who makes similar charges against the followers of the former. It is the old story of retaliative thefts, though Indanan's people seem most to blame and enjoy an all-around bad reputation.

\* \* \* \* \*

The Sultan arrived at Siassi October 26, remaining until November 6, when he left for Lugus; gambling seemed the sole object of his visit to Siassi. Just before his departure, a Moro and his wife came to the commanding officer to ask protection against being taken as slaves by the Sultan, and a Moro woman requested protection for herself and her child from being taken into slavery by the Rajah Muda. Both parties were given protection.

JOLO, P. I., March 17, 1903.

Brig. Gen. S. S. SUMNER,  
Commanding Department of Mindanao,  
Zamboanga, P. I.

SIR: When the Sultan learned from me this a. m. that the 7 sentenced Moro prisoners were to go to Manila on the *Liscum* this afternoon, both he and his officers became very much excited. The Sultan declared that he could not be responsible for what might occur, and finally after a three hours talk he went away declaring that he could not answer for the acts of the Parang people.

Very respectfully,

A true copy.

W. M. WALLACE,  
Colonel Fifteenth Cavalry, Commanding.

H. L. Scott,  
Major, Fourteenth Cavalry, Governor.

[Copy.]

JOLO, P. I., March 17, 1903.

Brig. Gen. S. S. SUMNER, U. S. Army,  
Commanding Department of Mindanao,  
Zamboanga, P. I.

SIR: The Moros are very restless throughout the island. The Look chiefs are unfriendly, not to say hostile.

The last three juramentados came from Look. A Moro from here, while back in the country buying chickens, was asked if they had been to Jolo. Panglima Hassan is reported to have threatened to attack Jolo.

The Look chiefs work together; they muster about 10,000 men, women, and children. The Sultan informs me that Panglima Hassan will not obey his orders; that he has sent for him, but the Panglima refuses to visit Maibun, because the navy were allowed to put their flags on the land. The Sultan begs me to stop the naval survey, if only for some time.

Many of the Parang people are angry because of the trial and sentence of seven of their men for burning and looting of the Chinese quarter.

Many people believe that juramentadoing is countenanced by all of the chiefs. The immediate cause of discontent is the survey and the census; the Moros associate both together. They will not believe that we are not going to tax the people and take their land. The customs officials have continued to nag them from the beginning. Only yesterday the Sultan complained that the officer at Siassi was charging a license on boats over a certain tonnage. It was found to be so, but Mr. Corwine said that it was a mistake by the local officer.

The cholera is still bad in the interior and the Moros say that they had better die fighting than of cholera. They talk a great deal about Genenal Bates's promise that the Americans would treat them better than the Spaniards did, but say that they enjoyed free trade under the Spaniards while the Americans make them pay heavy duty even on the thread that their women use in weaving. They also find the duty on Chinese tobacco, which is a favorite, prohibitive, as it is ten times as much as it cost; so they claim that matters and things are going from bad to worse until they are utterly demoralized.

Dato Kalbi asks permission to move to Mindanao. He wishes to take some of his people. He gives as a reason that there is no law in the country, that the Sultan is against the datos, and that he has set up one chief and another until they have grown powerful and are now beyond his control. Kalbi says also that a considerable number of his following has deserted and gone to join the Look people.

The Sultan and his prime minister, Hadji Butu, are to go to Singapore by next boat. It looks as if both the Sultan and Kalbi anticipate trouble and wished to stand from under. I shall advise the Sultan to remain here, as he will be held responsible even though he be absent.

Taking all these things into consideration, I believe that not less than three troops should be sent out together. The Moros should not be allowed to think for a moment that they could attack the troops successfully; consequently the column in the field should be strong. Four troops or companies would not be too strong a garrison for this place should it be attacked. This is not probable, but it is a fact that all of the chiefs in the Look district are united, and others, like Maharajah Indanan, would perhaps join them.

When I say that not less than three troops go out together, I consider the fact that when B Troop scouted alone its complement was more than 100 men, whereas our troops now would not get out more than 45 men, and the Moros are decidedly threatening in their attitude. In my opinion the presence of a regiment on the island, with its 50,000 Moros close at hand, would act as an excellent preventive.

Under the present condition of affairs on the island, this garrison should consist of not less than eight troops, three of them mounted. I know that I make this statement at the risk of appearing too cautious, but on the principle that an ounce of prevention is worth several pounds of cure, and that it is my duty to state a candid opinion.

Very respectfully, your obedient servant,

W. M. WALLACE,  
*Colonel, Fifteenth Cavalry, Commanding.*

*Major, Fourteenth Cavalry, Governor.*

---

*Report No. 26.—Jolo, P. I., June, 30, 1903.—Col. W. M. Wallace, Fifteenth Cavalry.*

[Extract.]

Residents of Jolo town and Tulei complained to me that a number of branded cattle and horses had lately been stolen from them, presumably by followers of Maharajah Indanan of Parang. I therefore sent, April 2, Capt. Le Roy Eltinge with Troops H, I, and M, Fifteenth Cavalry, to the Maharajah's territory to look about

for the stolen property. The troops proceeded along the Maibun road and then followed a trail leading to Indanan's cotta. Bodies of troops have at different times visited and camped in Parang; their appearance should therefore create neither surprise or apprehension among the natives, yet the reception of the cavalry was extremely hostile. When Captain Eltinge arrived near Indanan's place, the troops halted and dismounted for a short rest, the captain intending to visit Indanan. Immediately gongs were heard sounding, summoning his people to arms, and in an incredibly short time about 500 armed Moros gathered at the place. All carried rifles or spears and barongs; even women and boys armed with barong or spear hurried to the scene. The men crowded around the soldiers in the most threatening manner. The maharajah appeared, surrounded by a number of his men, to meet Captain Eltinge. A short conversation took place, in the course of which Indanan professed total ignorance regarding the stolen cattle. His whole behavior was most insolent. When Captain Eltinge inquired why he had called his people together at the approach of the troops, and requested him to at least stop his men from provoking the soldiers, as this might lead to trouble, Indanan replied that if any one of his men was hurt there would be a fight, and if the troops remained at his place until afternoon some 1,500 of his (Indanan's) followers would gather there. When the troops resumed the march, after a stay of two hours and a half, they were followed part of the way by the yelling mob. It was reported to me that Indanan expected to return next day, and made preparations for a fight. Some armed bands even advanced that day along the Maibun road, and late in the evening firing was heard at the Asturias blockhouse.

I informed the Sultan of this occurrence, and enjoined him to take Indanan severely to task, as a repetition of such demonstration would not be tolerated. A few days later Indanan came to me with profound apologies. However, no faith can be placed in his sincerity. He is an ignorant but cunning, unprincipled savage, and his henchmen are composed of the worst element. Though the cavalry did not see any of the stolen cattle in his territory, yet there exists but little doubt that the thieves are among his people, and that he is perfectly cognizant of the fact.

[Copy.]

Post of JOLO,  
*Jolo Jolo, P. I., August 17, 1903.*

Maj. Gen. LEONARD WOOD, U. S. Army,  
*Civil Governor, Moro Province.*

SIR: Allow me to state a few facts concerning Jolo and the Moros: To give a general idea of what you may expect to find, 50,000 people before the cholera, now about 45,000; many chiefs of various rank and following. The strongest men are the few who command the greatest number of followers.

The Sultan is a power, but has nothing like the influence he might and should possess.

The Datos Joakanain and Kalbi (brothers) rank next to the Sultan. They are strong, but have not the following they had a year and a half ago. They are not loyal to the Sultan.

Panglima Hassan is probably the strongest chief on the island. His cotta is about 4 miles south from Seit Lake. He can call 500 well-armed men in an hour, and many more hundreds in a day. Hassan claims to be friendly; if he were Sultan he would rule.

Barulla is also a strong chief. He lives southwest from Hassan. He is friendly, and considered by all officers who have seen him to be a very good man.

Maharajah Indanan is as strong as any chief on the island.

His cotta is 6 miles south of Jolo. Indanan is a bad character. His people steal cattle, horses, and slaves. He will have to be disciplined. Indanan's people swarmed around three troops of cavalry, dismounted, under Captain Eltinge. Fortunately not a shot was fired.

There are probably 100 other chiefs who command strong followings, but none have been so much in evidence as those mentioned.

The Taglibi chiefs have been surly, they refused to come to see General Davis.

The Parang chiefs have been guardedly friendly. It was at Parang where the Chinese quarter was burned and looted by the Moros. The leaders of that outrage are now in Bilibid prison.

A man may ride anywhere on the island unarmed, but if alone and armed he might be killed for his gun and pistol.

It is usual for the Moros to meet the troops with armed force. They assemble quickly at the beating of gongs. I have prohibited such assembling since Captain Elting's experience. The chiefs have always been notified that the troops were to visit them; it was General Davis's orders to so notify them. This was upon the special request of the Sultan and all the chiefs.

When Captain Eltinge went to Indanan's cotta it was a surprise, because stolen stock was looked for.

There is no immediate occasion to punish any chief except Indanan.

Very respectfully,

W. M. WALLACE,  
*Colonel Fifteenth Cavalry, Commanding.*

A true copy.

H. L. SCOTT,  
*Major, Fourteenth Cavalry, Commanding.*

*Letter from Capt. S. Seay, jr., Twenty-third Infantry, dated Siassi, Siassi, P. I., November 20, 1900, to the acting assistant adjutant-general, third district of Mindanao and Jolo.*

[Extract.]

I have the honor to report that the bearer of this, Lustriano Panozo, a Filipino, has complained to this office that his adopted son, Hoan, a Filipino-Moro, was murdered at Balimbing about a week ago by the Dato Pangiran, of Lamenua, who was one of the retinue of the Rajah Muda, and who invited Hoan into his boat under pretense of friendship and then shot him. Hoan had previously killed one Amil, a slave of the dato, for assaulting Hoan's wife's sister.

This seems to be the outcome of the abduction, sometime ago, of Hoan's wife and her sister, which occurred at Laparan Island.

As this affair is one between Moros, I do not see my way clear to act, although the Dato Pangiran lives in my jurisdiction; but it would be advisable to cause some action to be taken by the Sultan, if possible, as it will maintain our influence with the natives if they know that this action is taken at our instance.

A true copy.

H. L. SCOTT,  
*Major, Fourteenth Cavalry, Governor.*

*Report of Moro affairs for the month of March, 1902, dated Siassi, Siassi, P. I., March 31, 1902.—Capt. L. B. Simonds, Twenty-seventh Infantry.*

[Extract.]

A messenger arrived from Dato Amilhussin, stating that he, the dato, had received word from the Sultan to send 400 of his men, fully armed, to report to the Sultan, and asking for instructions. This in view of the agreement made in July, 1901, between the dato and the district commander at Jolo, in which American protection was promised the dato if he would refuse to fight for or against the Sultan. Report was immediately made by wire to the commanding officer, Jolo, and under his instruction the dato was instructed not to obey the order of the Sultan and he would be protected.

\* \* \* \* \*

The Sultan's representative on the island of Lugas, Salapudin, is very unfriendly to the dato, and would undoubtedly, as he has before, relish an opportunity to make war on the dato. In October last a similar order was issued by the Sultan, and the dato not obeying was fined and Sarapudin ordered to collect it. A fight occurred, and part of the command at this station was sent to Lugas and stopped the fighting. A repetition of this affair is more than probable, unless the Sultan be warned to not attempt to collect the fine. Prompt action should be taken when it becomes necessary to protect Amilhussin, as he has faithfully kept his promises to the military government and is believed to be very friendly to American interests. He controls nearly all of the islands of Lugas, Lepac, and Siassi, and will prove an important factor in all native affairs. Dato Puyo is at present the only dato resident in Siassi.

He controls portions of Siassi and Lapac, and has some following. He is an old man, and his son is the real head of affairs. These two datos are the only ones in this jurisdiction who are receiving subsidies.

[Cablegram.]

SIASSI, P. I., March 27, 1902.

ADJUTANT, Jolo:

Messenger left Sultan Saturday, reached dato Monday morning, here to-night, will return messenger to dato instructing him to not send men to Sultan and he will be protected. Please keep me advised about Sultan's orders, as the people here are constantly stirred up by him, and many men from Lugas and Tapul have landed here to-day and there is more or less excitement. Have you any further instructions for to-night?

H. L. SCOTT,  
Major, Fourteenth Cavalry, Governor.

*Letter from the commanding officer (Capt. Le Roy Eltinge, Fifteenth Cavalry), Siassi, Siassi, P. I., to the adjutant, Jolo, P. I., dated October 31, 1902.*

[Extract.]

Dato Yacob, of Seyunds, caused considerable trouble during the latter part of September and beginning of October by protecting and hiding a horse thief and refusing to give up either the horse or the thief. This resulted in making a peremptory demand that he deliver the man and horse and come himself to Siassi and report to me. He sent the man and horse, but refused to come himself. I then sent an officer and 20 men to bring him, but he fled to his grandfather, Dato Emil Hussan. Dato Emil Hussan, however, told him that he was a young fool and was too presumptuous, and ordered him to come in here and report to me, which he did.

I have seen him several times since then and he is very friendly, while up to that time he had been troublesome and never voluntarily came in sight of an American.

With these exceptions there has been an unusually quiet and prosperous month among the people.

The Sultan of Sulu arrived here in the middle of the night of the 26th instant. He is gambling and losing heavily.

\* \* \* \* \*

H. L. SCOTT,  
Major, Fourteenth Cavalry, Governor.

*Letter from Capt. Howard R. Hickok, Fifteenth Cavalry, commanding Siassi, Siassi, P. I., to the adjutant, Jolo, P. I., dated February 25, 1903.*

[Extract.]

I have the honor to make the following report:

On or about December 26, 1902, there occurred a triple murder of 3 Moros and a robbery by 1 Moro named Guguyu. The facts as at first reported appeared to constitute a case of piracy. The guilty man was arrested by his dato. I could not have

him brought in at the time due to the prevalence of cholera in that district. He was brought in on the 13th instant, and is now in confinement here. When I requested the arrest and transfer of this man to military jurisdiction there was no objection made by the Moros, who seem to think it perfectly proper that the United States should dispose of the case. After consulting with Judge Powell, of the court of first instance for the jurisdiction, it is not clear that a *prima facie* case of piracy exists, but only one of murder and robbery.

Under the Moro schedule the punishment adjudged on this man by the Sultan's representative will be: Three people killed, at \$210, \$630; 1 robbery, at \$105; total fine, \$735.

He is poor (so are his relatives), and the fine will probably not be paid; in default of which slavery is the punishment.

If he appeal for protection against slavery (and there is a growing feeling for such protection), the practice observed is to grant the protection and give a "safe conduct" in writing. Thus the man escapes free of punishment.

*Report of Capt. S. A. Cloman, Twenty-third Infantry, dated Bongao, P. I., February 2, 1900.*

[Extract.]

I have the honor to report the following as having taken place in the Tawi-Tawi group of islands, within my jurisdiction:

On January 26, 1900, a party of soldiers, consisting of Sergt. Egbert V. De Wolfe, Corpl. Leonard T. Mygatt, Privates Webster F. Gibbons, William T. Carter, and John A. Greathouse, all of Company H, Twenty-third Infantry, left the post in a small sailboat on a seven day's pass, for the purpose of visiting the lake on the island of Tawi-Tawi and hunting.

The aforesaid party left the post about 8 a. m. Friday, January 26, 1900, and proceeded up the coast of Tawi-Tawi about 12 miles, where they camped on the beach for the night.

\* \* \* \* \*

The party next went into camp on a small uninhabited island about 8 miles from Balimbing, and about 6 o'clock that evening saw two large praos (native boats) about a mile offshore, where they remained all night. This caused no particular remark, as praos are continually coming and going in those waters, many people living entirely in their boats. Early the next morning these praos landed and the natives, 10 in number, came to camp. Several of them were recognized as being of the inhabitants of Balimbing, who had treated them so nicely, so every effort was made to return the hospitality. They were given breakfast and a deck of cards that they seemed to greatly fancy. About 7 a. m. the party broke camp and proceeded over the main island of Tawi-Tawi, although the natives seemed to insist on their staying where they were until high tide in the afternoon.

\* \* \* \* \*

At this time Corporal Mygatt was taking off his clothes in a corner of the tent, while the other four men were playing whist on a blanket in the center, being surrounded by the natives, who seemed greatly intent on grasping the methods of the game. They had no weapons with them except their woodcutter's tools, consisting of native hatchet and parangs (a sort of bolo used for cutting small timber), but none of these were visible at the time. The corporal left the tent and went to the beach and soon afterward heard some screams and two shots. In the tent the game had continued for about five minutes after the corporal's departure, when the native standing behind Sergeant De Wolfe suddenly pulled a parang from behind him and struck the sergeant on the neck, nearly severing the head from the body and killing him at once. At almost the same time Private Gibbons was struck on the side of the neck and head, making a hole through the skull 5 inches long, through which the brain oozed, and Private Greathouse was struck on the neck, the parang severing the external carotid artery and exposing the internal artery and spine. The parang (barong), which I now have, is badly nicked and dulled, or the head would have been completely severed. The edge of the parang meant for Private Carter's neck was turned by the tent canvas and only staggered him, but at almost the same

time another Moro struck him a terrible blow on the head with an oar he had made. He staggered toward his gun but another native sunk a hatchet deep in his back, injuring his spine. He then ran to the cook fire about 20 yards distant for the axe, but by the time he had reached it and turned, the Moros had all disappeared but the three who were chopping Private Gibbons, and these ran before he could reach them. In the meantime Private Gibbons had reached his gun and fired a shot, but being virtually blind and staggering, it was without effect, and then began a terrible struggle for the gun. Private Gibbons could do little more than struggle bare-handed for its possession while the 3 natives literally chopped him until he was helpless, when one of them got possession of the gun and shot him below the heart. The natives then ran for their boats and pushed off, taking with them 3 rifles, 1 revolver, and 4 belts, with the cartridges. This whole melee lasted only about a minute, being simply a wild chopping and scramble for the guns. When the corporal returned from the beach he met Private Greathouse in the woods, carrying a gun with one hand and holding his head on straight with the other. \* \* \* The dead sergeant and Private Gibbons had to be carried through the woods to the boat, and they were over 30 miles from friends or help, with one man to sail the boat and take care of the three wounded. \* \* \* The two dead men were buried that afternoon, and during the day I collected what native boats I could preparatory to an expedition in search of the murderers. There is only one prao in the vicinity and it is a poor affair, that was dangerously overloaded with 10 soldiers, while the others are mere native skiffs carrying from 1 to 5 soldiers each. Enough were collected to carry 45 soldiers and the Moro boatmen, and the expedition left the next morning (Wednesday, January 31, 1900) at 8 a. m., accompanied by Dato Tantong and Dato Sakilan of this place, with 11 followers. \* \* \* Immediately upon landing the town was surrounded, and upon the appearance of the chiefs they were told to order all the inhabitants ashore unarmed and assemble them below the fort. \* \* \* I passed the rest of the afternoon in trying to get information from the chiefs and men assembled, but they all expressed absolute ignorance of the murder, the men who committed it, and all the side details which I asked. The corporal was not very sure of the appearance of the murderers, and the conference finally ended by my sending them back to town with the information that it would be surrounded all night by guards who would shoot anyone leaving it by boat or land, and that they must do their own investigating during the night, and that if in the morning at 8 o'clock they could give no information the town would be burned. During the afternoon I had arrested 11 men on suspicion, and they were confined in the fort, where we passed the night, with proper guards over the boats and over the town. During the night I examined the prisoners in the most searching way, and finally two of them confessed knowledge of the matter, saying the murderers had come to their houses secretly on the night of the murder for food and told them about it, after which they left for the island of Latuaus. They gave me a list of the 8 men, and of course I knew that the traitors were the other two. I verified many of the subsidiary details from the other prisoners. In the town there was a big talk all night, with many of the friendly Moros to help matters along, so I was not at all surprised when early next morning word was sent that they had 3 of the murderers to turn over. This was done, and the talking was fast and furious. All the accused told about each other, told where the other 5 men were working, and told where the guns were buried in almost inaccessible caves in the mountains about 5 miles away. They all told the same story of the murder and the share each man took in it to the minutest detail, their reasons for it, etc. One of the murderers was then sent with a party to get some weapons and the other 9 were sent with a guard to get wood and water for cooking purposes. In a short time I heard some firing. I sent a detail to investigate this and they returned with the news that soon after leaving the fort they had made an ill-advised attempt to escape, but fortunately all had been killed. Soon afterward the other party of soldiers and Moros returned with the news that the murderer in their charge had been killed while attempting to escape. \* \* \* The inhabitants furnished me with 3 large praos to bring back some of the soldiers from our overloaded boats. Ten men were sent to the old camp for the tent fly and the remainder returned to Bongao, arriving about 3 p. m., having been gone about thirty-one hours. \* \* \* I was not able to find one inhabitant of Balimbirg besides the murderers who knew of it. The murderers had kept their secret well, and the chiefs obtained confessions from the men during the night by means that I know nothing about. It was my ultimatum to them to produce the murderers.

*Report of Moro affairs, dated Bongao, Sulu Islands, P. I., April 23, 1900.—Capt. S. A. Cloman, Twenty-third Infantry.*

[Extract.]

*Inhabitants.*—The inhabitants of this group are the bayan (or fishermen) Moros. They are all either pirates, ex-pirates, or descendants of pirates, but now rarely exercise their craft, and then only on each other. About every two months a boat load of Moros disappears never to be heard of again, and the natives only wonder who did it. All boats go armed, and in fact the carrying of weapons at all times is universal. This, of course, leads to many cutting affairs, but these are being discouraged by harsh and summary punishment.

*Copy of letter from Capt. R. C. Croxton, Twenty-third Infantry, commanding Bongao, P. I., to the adjutant-general third district of Mindanao and Jolo, dated Bongao, P. I., October 23, 1900.*

Referring to the visit of Dato Tantong to the Sultan of Jolo, I have the honor to request information as to the following matter : Dato Tantong informed me that he was given a letter to the Sultan from the military governor of Jolo, to the effect that he and his people must be protected and not interfered with. The dato himself was not fined, but Hadji Halimow, who was with him, was fined \$105 Mexican, and Immum Sulimum, the brother of Tumas (who was killed in Sibutu), was also fined the same amount. The reason appears to be that Sulimum performed the marriage ceremony for Alibassa and wife and Hadji Halimow allowed it. Alibassa's wife was a daughter of Panglima Pandow, who opposed the marriage, but the woman was willing, and they were married. The Moro custom seems to be to fine the man who marries the woman, and the fines imposed upon Hadji Halimow and Sulimum appear to be unjust, and I have therefore directed them not to pay them until the matter is laid before the governor of Jolo. Panglima Pandow is also trying to fine Alibassa 12 slaves for taking the daughter. I have directed him not to pay until I have investigated further. All these fines have been imposed since the killing of Alibassa's wife, and I believe all of them have been imposed on account of her accidental death. This matter is laid before the governor of Jolo for the reason that Alibassa was found innocent, and the governor has directed that he be not interfered with.

*Copy of letter from Capt. B. F. Hardaway, Seventeenth Infantry, to adjutant Seventeenth Infantry, Zamboanga, P. I., dated Bongao, P. I., November 14, 1901.*

I have the honor to report that His Highness the Sultan of Jolo visited this station to-day, flying four Moro flags from the boats of the fleet.

On the 12th instant a messenger came to the post bearing the news that His Highness would visit us within a few days with a fleet which is making a tour of the archipelago.

The messenger was flying a Moro flag when he landed at the pier. I caused him to lower the flag upon his departure and cautioned him against the further use of any but the American (United States) flag.

The messenger reported my action to His Highness upon returning to Balimbing, but the latter nevertheless entered the harbor here two days afterwards flying the flag mentioned at the place of honor on the boats, they being the only flags displayed from the boats bearing them. There were several United States flags in the fleet, but upon other boats.

This action of His Highness the Sultan of Jolo was regarded by me not only as a direct violation of the treaty with the United States but as open defiance of my authority as acting military governor of the Tawi Tawi group.

Upon the departure of the fleet I caused His Highness to lower all the Moro flags

except upon His Highness's own boat, and cautioned His Highness that even there it must always be displayed in company with the United States flag, which must always occupy the most exalted position.

*Letter from First Lieut. Warren Dean, Fifteenth Cavalry, commanding Bongao, P. I., to the adjutant, Jolo, Jolo, P. I., dated August 31, 1902.*

[Extract.]

From observations during this trip and my dealings with the natives the last three months, I would summarize the conditions in the Tawi Tawi group as follows:

The people of the group are on the whole friendly to the Government of the United States. They are ignorant, slow to reason, and fear the Americans. There is no industry except fishing and rice planting except at Balimbing and a few boats made at Banaran. In general the people recognize no native authority outside of their own immediate chiefs. Dato Tantong has little or no authority even in his own town of Seminol. Many times since I have been here the Panglimas of Seminol have refused to obey him. Dato Sakilan, a brother-in-law of Tantong's, rules Bongao and Sanga Sanga. Dato Ta Ta rules Bilitan and Panglima Rajalum is the chief at Secubun. The people follow their own pursuits and seem to care little what goes on outside of their own immediate neighborhood.
